**Tåning, Vedel Å.** - Report from Denmark. – Rapp. & Pr.-Verb., Cons. Expl. Mer., XCIII, Rapp. Atlantique, 1933, 36. Copenhague (1935). **b - 1904**

Brief summary of racial investigations on the haddock, *Gadus aeglefinus*, sent by Dr. Thompson, New Foundland.

**Thompson H.** - Haddock Investigations. – 3 tabl., Rep. Newfoundl. Fish. Research Labor., II, 3, 42-45. Newfoundland (1935). **b - 1905**

After some considerations concerning the abundance of haddock in the southern portion of the Grand Banks and the fluctuations of the stock of this fish in Newfoundland waters, author communicates the results of research on the amount of haddock in the surveyed areas during the years 1931–1934. The relationship of catch of haddock and water temperature is also discussed.

**An.** - Untersuchungen über den Kabeljau an der russischen Murmanküste. – 3 Tab., Fischmarkt, III, 6, 160-161. Cuxhaven (1935). **b - 1906**

Zusammenfassende Wiedergabe von den Ergebnissen der von russischer Seite angestellten Untersuchungen über Kabeljaufänge an der Murmanküste, die, obgleich sie sich ausschliesslich auf Küstengewässer und Langleinenfischerei beziehen, doch auch ein allgemeines Interesse haben. (S.: V. K. Essipov: « Contribution aux caractéristiques techniques et biologiques de la pêche à la morue et à l'aiglefin sur la côte Mourman orientale », Rev. Trav., VII, 3,1934).

**An.** - Distribution of the Age-Classes of Cod in 1934. –8 maps, 1 table. Rep. Newfoundl. Fish. Research Labor., II, 3, 31-35. Newfoundland (1935). **b - 1907**

Account of the results of investigations on hand of scale samples made on 2.609 cod from Bay Bulls, 2.160 cod from southern Grand Bank, 878 cod from Fortun, and on lesser numbers in various other regions, on the distribution of the age-classes of cod in Newfoundland waters during 1934. The outlook for 1935.

**An.** - The Distribution of Cod Fry. 1931-1934. – Rep. Newfoundl. Fish. Research Labor., II, 3, 36. Newfoundland (1935). **b - 1908**

Deductions drawn from the results of the hauls taken during both spring and fall cruises (with the exception of 1931, where there was no spring cruise), half an hour in duration in the northern area and the Grand Banks region of Newfoundland.

**Kaganovskaja S. M.** - La pêche de l'« ivasj » (*Sardinella melanosticta*) dans la région de l'Ile Poutjatine en 1933. (En russe). – 4 graph., 7 tab., Rybn. Choz. Daljn. Vost. (Econ. Pêche Extr.-Orient), 1/2, 34-44. Moskva-Khabarovsk (1934). **b - 1930**

Données statistiques sur le montant des captures, sur le rapport entre le rendement effectif et le rendement prévu de la pêche en 1933, sur l'influence de la température de l'eau sur la pêche de *S. melanosticta*, sur la composition des captures (pourcentage des groupes d'âge déterminés, longueur et poids des poissons, leur sexe). Difficultés qui s'opposent à l'étude du rendement de la pêche de *S. melanosticta* dans les eaux de l'Extrême-Orient.

**Kaganovskij A. G.** - Reconnaissances pour la pêche du poisson « ivasj » (*Sardinella melanosticta*) et prévisions pour sa pêche. (En russe). – 2 graph., 3 tabl., Rybn. Choz. Daljn. Vost. (Econ. Pêche Extr.-Orient), 1/2, 11-20. Moskva-Khabarovsk (1934). **b - 1931**

Après des considérations générales sur les migrations de *S. melanosticta* dans les mers de l'Extrême-Orient, l'A. donne un aperçu historique du développement de la pêche de ce poisson dans la région considérée avec référence spéciale à la nécessité d'une bonne organisation d'un service de recherches permettant de déterminer la position des bancs de *S. melanosticta*. Pour conclure il communique certains données déduites des observations des années précédentes concernant les prévisions du rendement de la pêche de *S. melanosticta* pendant l'année courante.

**Kournajev E. F.** - Efficacité de l'utilisation de l'« ivasj » (*Sardinella melanosticta*), selon les différentes formes de traitement de ce poisson. (En russe). – 2 tabl., Rybn. Choz. Daljn. Vost. (Econ. Pêche Extr.-Orient), 1/2, 44-52. Moskva-Khabarovsk (1934). **b - 1932**

Différents modes d'utilisation de *S. melanosticta* dont la pêche est très développée dans l'Extrême-Orient russe; comparaison entre les différents modes de traitement auxquels on soumet le poisson, au point de vue de l'utilisation de toutes les substances alimentaires contenues dans sa chair.

**Laurinat K.** - Erfahrungen mit der Stempelung der deutschen Salzheringe. – Dtsch. Fischwirt., II, 17, 378. Berlin (1935). **b - 1933**

Einige Ausführungen über die Stempelung der deutschen Salzheringe, die auf Grund der Vorschriften der Wirtschaftlichen Vereinigung der Fischindustrie Deutschlands vom 4. Oktober 1934 eingeführt worden ist.

**Le Gall J.** - La pêche du hareng deviendrait-elle scientifique ? – Pêche Marit., Pêche Fluviale et Piscicult., XVII, 388-390, 445-446, 485-486. Paris (1934). **b - 1934**

**Le Gall J.** - Statistiques biologiques et considérations sur la population harenguière de la Manche Orientale et du Sud de la Mer du Nord. – 5 fig., 16 tabl., Rev. Trav. Off., Pêches Marit., VII, 3, 335-353. Paris (1934). **b - 1935**

Ces « Statistiques Biologiques » continuent la série des « Statistiques et Considérations » qui ont été régulièrement publiées par l'A. depuis 1926. Elles résument les observations faites pendant l'année 1933 sur les pêcheries de harengs de la Manche Orientale et du Sud de la Mer du Nord, avec référence spéciale aux déplacements de la pêcherie harenguière pendant la saison d'hiver 1933–1934. L'A. formule aussi quelques considérations sur la population harenguière en Manche Orientale et à l'entrée sud de la Mer du Nord pendant la saison de pêche 1933–1934, dont le fait dominant a été l'abondance extrême de harengs de 4 ans dans les concentrations, abondance qui a été prévue et signalée dès 1933.

**Le Gall J.** - La pêche de la sardine. – 23 fig., 1 graph. Mém. Off. Pêches Marit., Man Pêches Marit. Franç., Sér. Spéc., 10, 2, 94-117. Paris (1935). **b - 1936**

Chapitre de la II-ème partie du « Manuel des Pêches Maritimes Françaises » traitant de la pêche de la sardine avec référence spéciale à la sardine européenne, à la pêche de la sardine sur les côtes de France, aux lieux et époques de pêche, à l'historique de la pêche de la sardine en France, aux centres d'armement, aux bateaux et leur équipage et annexes, aux appâts, aux engins et à la technique de pêche, aux différents modèles de seines, à l'écoulement des produits de la pêche et à l'utilisation des sous-produits.

Vf., Heizer auf dem Fischdampfer « Borkum-Riff », schildert die Hochseefischerei aus einer sozusagen „ Arbeitsperspektive ", mit besonderer Berücksichtigung des harten Berufes der auf dem Fischdampfer beschäftigten Seeleute.

**Peace H. L.** - New Menhaden Plant and Trawler Under Construction at Fernandina. – Fish & Oyst. Rep., XVI, 4, 6, Tampa, Fla. (1935). **b - 1940**

Brief account of the last development of Ferdinandina's menhaden trawler industry.

**Phillips J. B.** - The Sizes of Sardines Caught by different Fishing Gear and in different Localities of the Monterey Region. – 16 figs., 6 tabl. Calif. State Fish. Labor., Contr. 113-114; Div. Fish & Game, Fish Bull. 43, 7-30. Sacramento, Calif. (1935). **b - 1941**

Results of an investigation made to determine whether or not the system of sardine sampling as carried on in the past is still adequate since changes have occurred in the fishery. The results are of value to the sardine investigation because of the demonstration of the continual reliability of the sardine sampling in use in California and the furnishing of additional evidence indicating a southward movement of sardines along the California coast during the winter months.

**Roubine S. I.** - Montant des captures de l'« ivasj » (*Sardinella melanosticta*), dans les lieux de pêche du Trust du Poisson de l'Extrême Orient en 1933 (En russe). – 13 tabl., Rybn. Choz. Daljn. Vost. (Econ. Pêche Extr.–Orient), 1/2, 20-33. Moskva–Khabarovsk (1934). **b - 1942**

Données statistiques sur le produit de pêche de *S. melanosticta* en 1933 avec les filets traînants, les filets fixes et avec les seines. Quelques conclusions concernant la répartition de la région de pêche en plusieurs zones et la nécessité de l'emploi de différents types de filets de pêche dont les qualités et les défauts peuvent ainsi se compenser.

Int. Aquicult. & Pêche Paris (1931), Communications, III, 311-328. Impr. du Loiret. Orléans (1935). **b - 1967**

Notes historiques sur la pêche depuis 1815. Le nom Tassergal et la classification. Morphologie, distribution; pêche: époques et valeur en comparaison avec celle des Sardines, préparation.

**Arcidiacono F.** - Contributo alla conoscenza della pesca dell'Alalonga nel basso Tirreno e nell'Ionio. – Boll. Pesca, Piscicolt. e Idrobiol., XI, 2, 323-337. Roma (1935). **b - 1968**

Biologia dell'alalonga (*Thynnus alalonga*) e sua comparsa nei nostri mari. Periodi adatti per la sua cattura; pesca con le reti e alla traina e perfezionamenti apportati a questo sistema. Piano di studi sulla pesca dell'alalonga.

**Belloc G.** - La pêche du thon blanc ou germon. – 8 fig., 2 tabl., 1 pl., Mém. Off. Pêches Marit., Sér. Spéc., 10, 2, Man. Pêches Marit. Franç., 118-126. Paris (1935). **b - 1969**

Chapitre de la III-ème Partie du « Manuel des Pêches Maritimes de France », dans lequel l'A. traite des différentes espèces de thon, des bateaux et des centres de pêche du thon, des engins et de la technique de la pêche, du traitement du thon à bord et de la motorisation des bateaux thonniers.

**Godsil H. C.** - Locality Records and the Tuna Fishery. – 2 charts., Div. Fish & Game, Bur. Comm. Fish., Fish Bull. 44, 41-43. Sacramento, Calif. (1935). **b - 1970**

Brief information on the organization of the statistics of tuna fishing localities, as adopted by the Bureau of Commercial Fisheries of California. A reproduction of the charts is given.

**Kyte F. L.** - Sworder, Ahoy! – 3 phot., Canad. Fisherm., XXII, 8, 11-13. Gardenvale, Que. (1935). **b - 1971**

An account of the Cape Breton swordfishery, its birth, development and progress, illustrated by a description of a swordship–campaign of the little vessel « Stranger ».

**Miyamoto H.** - The Form of Amberfish Keddle Net on the Basis of Model Experiments. (In Jap., Engl. Rés.). – 1 pl. with figs., 4 tabl., 3 fig., Bull. Jap. Soc. Scient. Fish., IV, 3, 153-157. Tokyo (1935). **b - 1972**

The form of model net constructed according to Tauti's principle was sketched both from above and lateral sides under the current in the prevailing directions in Iwae fishing ground. The sketches are reproduced here.

**Uda Mititaka & Tukusi Ziro** - Local Variations in the Composition of Various Shoals of « Katuwo » *Euthynnus vagans* (Lesson), in several Sea-districts of Japan. (In Jap., Engl. Rés.).– 6 tabl., Bull. Jap. Soc. Scient. Fish., III, 4, 196-202. Tokyo (1934). **b - 1973**

The composition of various shoals of "Katuwo" in each sea–district offers a certain peculiarity. In the northern sea–district the shoals are mainly associated with sharks and crowded densely in number, while in the southern they are mainly associated with birds or attached to banks and crowded thinly. The leading shoals vary from northern to southern sea–districts in succession from those associated with sharks, whales, birds or drifting timbers and to those attached to banks. (From A:s rés.).

**An.** - Mackerel Season Open. – 1 phot., Fish. Gaz., LII, 5, 9. New York (1935). **b - 1974**

Statistical statements concerned with the beginning of the mackerel season in the United States.

**An.** - Swordfishing ! – 2 phot., Fish. Gaz., LII, 7, 7. New York (1935). **b - 1975**

Actual conditions of the swordfishing as related by Capt. Manuel Avilla, a New Bedford skipper and owner of the "Bethlehem", a typical craft of the swordfishing fleet.

## *Salmonidae.*

**Alexander G. J.** - A Brief Statistical Review of the Sockeye Fishing and Canning Industry in Rivers Inlet. – 4 graphs, 2 tabl., Rep. Comm. Fish. Brit. Columb., 1934, 68-75. Victoria, B. C. (1935). **b - 1976**

The report shows the increase of the numbers of boats fishing for sockeye salmon in Rivers Inlet during the past twelve years, and a decrease in the average salmon–packs and individual earnings of the fishermen and their effect on the salmon–canning industry. Causes of the drop of efficiency of gill–nets in Rivers Inlet.

**Allotte M.** - Le saumon et les rivières ou il ne peut plus gagner ses frayères. – VII Congr. Int. Aquicult. & Pêche Paris (1931), Communications, III, 233-237. Impr. du Loiret. Orléans (1935). **b - 1977**

Sur les obstacles constitués par différentes constructions hydrauliques et remèdes.

**Decantelle A. P.** - La position des échelles à saumon. – VII Congr. Int. Aquicult. & Pêche Paris (1931), Communications, III, 244-245. Impr. du Loiret. Orléans (1935). **b - 1978**

En se basant sur ses nombreuses observations faites en qualité d'amateur de pêche au saumon, l'A. conclut qu'il faudrait faire coïncider l'entrée de l'échelle avec le point d'attirance du saumon, c'est–à–dire placer l'échelle au pied même du barrage et dans le chenal.

**Dolghikh B.** - Sur l'*Oncorhynchus keta.* (En russe). – Fig., tab., 135 pp., Oghiz. Irkoutsk-Moskva (1934). **b - 1979**

L'A. considère les saumons *O. keta* comme un groupe ethnographique particulier de la région soviétique du Nord et en décrit les différentes formes y compris la plus septentrionale, qui se rencontre dans la rivière Kourejka.

**Doubrovskaja N. V.** - Sur la question du cycle évolutif de l'*Oncorhynchus gorbuscha* Wal. des provinces maritimes de l'Extrême-Orient russe (Primorje). (En russe). – 1 fig., 4 tab., Rybn. Choz. Daljn. Vost. (Econ. Pêche Extr.-Orient) 1/2, 65-68. Moskva-Khabarovsk (1934). **b - 1980**

Résultats de la lecture des écailles, de la détermination de l'âge, du poids, et des dimensions des jeunes *O. gorbuscha* Walb. capturés non loin des côtes méridionales du Primorje qui permettent de jeter une certaine lumière sur les migrations de ce poisson des endroits du frai aux endroits où ils trouvent la meilleure nourriture.

**Foerster R. E. & Pritchard A. L.** - The Identification of the Young of the Five Species of Pacific Salmon, with Notes on the Fresh-Water Phase of their Life-History. – 1 fig., 6 tabl., 1 pl. o. t. Rep. Comm. Fish. Brit. Columb., 1934, Append., 106-116. Victoria, B. C. (1935). **b - 1981**

1. Discussion of variable characters, records, mainly for the fisheries scientist, certain detailed observations which are now at hand concerning various body characters. 2. A general description of species, general information concerning habits and appearance of each species. 3. Key for separating the various species and a plate illustrating the typical markings characteristic of each species.

**Lachadenède (de)** - Le saumon dans les Gaves et les échelles à Poissons. – VII Congr. Int. Aquicult. & Pêche Paris (1931), Communications, III, 238-243. Impr. du Loiret. Orléans (1935). **b - 1982**

Après quelques observations générales sur les obstacles formés par les constructions hydrauliques pour les poissons migrateurs l'A. décrit une échelle construite et soumise à l'expérience au laboratoire hydraulique de Banlève.

**Marquard O.** - Beitrag zur Lachsfrage im Ostseegebiet. – 1 Karte, 1 Tab., Dtsch. Fischwirt., II, 22, 466-468. Berlin (1935). **b - 1983**

An Hand der Erforschung der Lachs–und Forellenbiologie im Ostseegebiet von Prof. Dr. Willer, berichtet Vf. über den heutigen Zustand, die Art der Fischereiausübung, die Ergebnisse der Lachsfischerei hinsichtlich ihrer Grösse und Gewichte, die Anlandungen von Lachsen, die Schwankungen der Lachsfangzahlen, die Ergebnisse der Lachsmarkierung, die Wanderungen des Lachses, den Zusammenhang zwischen dem Anwesen von Sprotten, Tobiasaal und anderen Fischen und der Lachsfischerei in Ostpommern.

Table giving the annual catches during the past five years.

**An.** - Ueber die nordische Tiefseegarnele. – Fischmarkt, III, 10, 265–267. Cuxhaven (1935). **b - 2030**

Kurzer Bericht über das Vorkommen in den norwegischen Fjorden, namentlich an der Skagerrakküste, von einer Garnelenart, welche von den Norwegern als Tiefseegarnele, (*Pandalus borealis*) bezeichnet wird, und über die Entwicklung und die grosse Bedeutung der Fischerei dieser Garnele in dem betreffenden Gebiete. Ausserdem sind, an Hand neuerer norwegischer Veröffentlichungen, die Möglichkeiten einer Verbesserung des Absatzes der Garnelen durch eine bessere der Behandlung der Ware, erörtert.

**An.** - Shrimp from San Francisco. – 3 phot., Fish. Gaz., LII, 4, 14–15. New York (1935) **b - 2031**

Some information concerning the shore operations of the shrimp industry in San Francisco Bay, California, which is controlled exclusively by and for Chinese.

**An.** - New Lobster Season Finds Modernized Conditions. – 2 phot., Fish. Gaz., LII, 9, 7. New York (1935). **b - 2032**

Brief description of the new modernized methods of handling lobsters, which has been introduced recently in the storage and shipment of living lobsters in the United States.

**An.** - Le transport des Homards vivants. – Pêche Marit., Pêche Fluviale et Piscicult., XVII, 341–343, 392–393. Paris (1934). **b - 2033**

**An.** - Prehistoric «Crab Culture» in Puerto Rico. – Science, Suppl., 2100, 9. New York (1935). **b - 2034**

Short remark on the great importance of the crab for the prehistoric Indians as is seen from a report of F. G. Rainey to the National Academy of Sciences concerning excavations undertaken on the S. coast of Puerto Rico.

## *Ostreae et alia Mollusca – Molluschicultura.*

**Bachrach E.** - Le bleuissement des Diatomées et le verdissement des Huîtres. Revue critique. – Rev. Trav. Off. Pêches Marit., VIII, 1, 112–123 (Stat. Marit. Biol. Tamaris 1934–35). Paris (1935). **b - 2035**

L'A. passe rapidement en revue les principaux faits connus sur le verdissement des Huîtres et ses rapports avec les Diatomées : Morphologie et biologie de la Diatomée bleue : *Navicula ostrearia*. Origine et nature de la marennine. Signification du processus de bleuissement. Absorption du pigment par l'huître. Investigations complémentaires qui s'imposent.

**Bonnot P.** - The California Oyster Industry. – Calif. Fish & Game, XXI, 65–80. Sacramento (1935). **b - 2036**

**Borde F.** - Observations sur la production du naissain dans le Bassin d'Arcachon en 1932, 1933 et 1934. – 1 fig., 6 graph., Rev. Trav. Off. Pêches Marit., VIII, 1, 102–111. Paris (1935). **b - 2037**

Pour chaque année l'A. a étudié : la pluviosité et la densité du Bassin d'Arcachon, la croissance, la fixation des larves et le rendement de la récolte en faisant la numération des larves.

**Chaux-Thévenin H.** - Notes sur la production du naissain d'Huîtres portugaises dans la Région de Marennes de 1932 à 1934. – 3 fig., 4 tabl., 27 graph., Rev. Trav. Off. Pêches Marit., VIII, 1, 79–101. Paris (1935). **b - 2038**

D'une façon générale, le résultat de la campagne 1932 a été moins satisfaisant que celui des années précédentes. Le naissain obtenu a été cependant en quantité suffisante pour que les ostréiculteurs ne se plaignent pas. Le même résultat a été obtenu pour la campagne 1933. Comme résultat de la campagne 1934 il semble que le naissain recueilli ait été abondant sur les rives de la Seudre, moins nombreux à Ronce et très rare sur les parcs d'Oléron.

**Fischer-Piette E.** - Histoire d'une moulière. Observations sur une phase de déséquilibre faunique. – Bull. Biol. France et Belg., LXIX, 2. Paris (1935). **b - 2039**

**Herman A.** - Rapport sur la reproduction des Huîtres indigènes dans le Morbihan et le Finistère en 1934. – 5 fig., Rev. Trav. Off. Pêches Marit., VIII, 1, 70–78. Paris (1935). **b - 2040**

La récolte sera pour l'ensemble du secteur breton, bien supérieure à l'année dernière. Les nombreuses Huîtres adultes présentes sur les parcs ont compensé la déficience des gisements naturels. Les deux centres producteurs de naissain, la rivière d'Auray et la rivière de la Trinité, se détachent nettement des autres rivières où les essais de reproduction ne sont encore qu'à la période expérimentale.

An Hand eines längeren Vortrages von Regierungsrat Finzel im " Jahresbericht über die deutsche Fischerei 1934 ", wird ein Ueberblick über die Hauptvereinigung der Deutschen Fischwirtschaft, ihren Sinn und ihre Zwecke gegeben, mit besonderer Berücksichtigung der tatsächlichen Eingliederung aller Zweige der Fischwirtschaft im Reichsnährstande.

## *Italia Coloniaeque.*

**Brunelli G.** - La Pesca. – 1 tav., f. t., Progr. dell'Agric. Ital. in Reg. Fasc., 327–333, Roma (1935). **b - 2181**

Si rileva l'attività svolta dal Governo dopo l'avvento del Fascismo, in materia di disciplinamento e organizzazione della pesca. Riferiti alcuni dati tecnici sulla produttività del mare si allega l'elenco dei provvedimenti legislativi e ministeriali che testimoniano la complessità delle provvidenze riguardanti i più svariati campi della produzione e del commercio dei prodotti pescherecci.

**Brunelli G. & Bini G.** - Ricerche comparative sulle pesche profonde di diversi mari italiani. – 4 fig., 1. tav. Boll. Pesca, Piscicolt., e Idrobiol., X, 6, 733–744. Roma (1934). **b - 2182**

Vengono illustrate comparativamente le pesche profonde (al di là della isobata di m. 200) eseguite nel Tirreno (nella zona prospiciente il golfo della Spezia e intorno all'isola di Montecristo), nello Jonio (al largo di Gallipoli) e nell'Adriatico (tra Pelagosa e Lagosta), nella zona dove vivono comuni lo scampo (*Nephrops norvegicus*) ed il melù (*Gadus poutassou*).

**Conte F.** - Le tonnare di Favignana. – Ann. Merceol. Sicil., IX, 2, 199–207. Messina (1933). **b - 2183**

Dopo un breve cenno illustrativo sulla pesca del tonno nelle tonnare di Favignana, il cui sistema è comune a tutte le altre tonnare, sono riportati i dati statistici della pesca del tonno in tonnara, per ciascuna campagna dal 1925 al 1929.

**Giacchetti A.** - Il problema della pesca verso la pratica risoluzione. – 112 pp. Tip. S. I. T. A., Ancona (1934). **b - 2184**

Programma da svolgersi per un miglioramento dell'industria peschereccia: organizzare la vendita, disciplinarla, migliorare l'industria della pesca, diffondere il credito peschereccio, con lo scopo di rendere possibile un maggior consumo nel popolo italiano.

**Lo Presti S.** - La pesca e i pescatori nel Golfo di Catania (continua) - 3 tav., Folklore Ital., IX, 1/4, 81–112. Catania (1934). **b - 2185**

L'A. ha raccolto le tradizioni dei pescatori del Golfo di Catania. In questa prima parte si occupa dei diversi tipi di barche, degli ordegni da pesca, dei nomi dialettali e volgari dei pesci e della loro abbondanza nei diversi mesi nel Golfo di Catania.

**Mancini L.** - Elementi di un portolano di pesca della costa ligure. – 4 tav. f. t., Boll. Pesca, Piscicolt. e Idrobiol., Suppl. Mem. Scient., IX, serie B, 5–327. Roma (1934). **b - 2186**

Caratteri di pescosità della costa del Golfo Ligure, dal confine francese fino a Viareggio. Il litorale costiero è stato così suddiviso in nove zone in cui si tien conto: *a*) della configurazione della costa in confronto dello sviluppo della platea continentale prospiciente; *b*) della frequenza dei porti o degli approdi favorevoli alla permanenza dei pescherecci ed alla spedizione del prodotto: *c*) della circoscrizione marittima.

**Mengoni A.** - La pesca nella Laguna di Orbetello. – 9 Fig., Vie d'Italia, 1, 27–32. Milano (1935). **b - 2187**

Alcuni aspetti dell'industria peschereccia di Orbetello. Vari sistemi di pesca.

**Morandini G.** - Cenni di geografia generale dei mari con particolare riguardo al Mediterraneo. – 4 Fig., Boll. Pesca, Piscicolt. e Idrobiol., X, 4, 432–461. Roma (1934). **b - 2188**

Sono esaminate le condizioni grafiche del Mediterraneo Romano, per illustrare alcuni dei principali problemi geografici che possono interessare dal punto di vista della pesca italiana e del suo rapido progresso nel dopo guerra, dovuto sopratutto all'introduzione di una tecnica nuova di pesca, la pesca meccanica e la lampara.

**Petrillo P.** - La pesca nel Golfo del Carnaro. - 248 pp. La Vedetta d'Italia. Fiume (1934). **b - 2189**

**An.** - L'industria peschereccia nella provincia di Venezia. - Le Tre Venezie, XI, 158. Venezia (1935). **b - 2190**

La pesca del mare è fatta quasi esclusivamente con naviglio chioggiotto. Dati statistici su di esso. Principali qualità di pesce che affluiscono al mercato di Venezia.

## *Japonia.*

**Elie M.** - L'industrie de la pêche au Japon. – Géogr., Terre-Air-Mer, LXIV, 6, 414–419. Paris (1935). **b - 2191**

Importance toujours grandissante de la question de la pêche dans le développement du Japon moderne. La surabondance du poisson et les principales variétés de poissons et d'algues comestibles. La compensation par les produits de pêche de l'insuffisance des produits agricoles du sol nippon. Convention conclue avec la Russie pour la concession de droits de pêche dans les eaux sibériennes. Divers tableaux font ressortir l'importance des moyens employés et des résultats obtenus par les Japonais dans l'industrie de la pêche.

**Schepers H.** - Japans Seefischerei. Eine wirtschaftsgeographische Zusammenfassung. – Abb., Taf. u. Kart., 228 S., Hrsg. Japan-Inst. in Berlin. F. Hirt, Breslau (1935). **b - 2192**

Der grosse Aufschwung der japanischen Seefischerei während der letzten Jahre als wichtiger Bestandteil der japanischen Volksnahrung. Der Fischreichtum im japanischen Teile des pazifischen Ozeans.

Die Bedeutung des Fischereirechtes an der russischen Küste des japanischen Meeres für Japan.

**Schnakenbeck W.** - Die Seefischerei Japans. – 2 Tab., Fischmarkt, III, 9, 232–237. Cuxhaven (1935). **b - 2193**

Statistische Angaben an Hand eines fischwirtschaftlichen Sonderheftes von " The Japan Times & Mail " vom Februar, 1935 und eines vom Japan-Institut in Berlin ausgegebenen Buches von H. Scheppers, " Japans Seefischerei " (Verl. F. Hirto, Berlin). Es wird ein vielseitiger Einblick in die Verhältnisse der Seefischerei Japans gegeben mit besonderer Berücksichtigung seiner wichtigsten Nutzfische, des Einflusses der Fischerei auf Religion, Kunst und Geistleben des japanischen Volkes, der gesetzlichen Regelung der japanischen Fischerei, der Fangzeuge und -geräte und der volkswirtschaftlichen Bedeutung der Seefischerei Japans.

## *Norvegia.*

**Fiskeridirektøren** - Beretninger om torskefisket (utenom Lofoten) og silde-, makrell-, bank- og kveitefisket samt selfangsten i 1934. – Tav., Årsber.v. Norg. Fisk. 1934, IV, 1–147. Bergen (1935). **b - 2194**

Rapporti e tavole statistiche sulla pesca delle diverse regioni della Norvegia, riguardanti battelli ed equipaggio, rendimento della pesca in kg., preparazione dei prodotti e valore delle vendite. Rapporto sulla pesca di *Hippoglossus* e *Gadus* nell'Isola degli Orsi, nella Groenlandia occidentale e nell'Islanda; la pesca di *Clupea* nell'Islanda e quella della *Balaena*.

**Fiskeridirektøren** - Lofotfisket 1935. – Tav. fig., Årsber. v. Norg. Fisk. 1935, 2, 1–103 Bergen (1935). **b - 2195**

Amministrazione e personale. Pescatori, navi ed utensili. Disposizioni sanitarie. Commercio dei pesci. Condizioni meteorologiche e pesca. La pesca e il suo rendimento. Ricerche biologiche ed oceanografiche.

**Fiskeridirektøren** - Norges Fiskerier 1933. – Tabl., Norg. Off. Statistikk, IX, 68, 1–18. Oslo (1935). **b - 2196**

Tableaux contenant une revue statistique pour périodes étendues des pêches, personnel et matériel, produits de pêches, données plus détaillées sur les pêches principales (morue, hareng, esprot, maquereau) consommation domestique de poisson par les pêcheurs.

**S.-e.** - Zur Lage der Seefischerei in Norwegen. – Dtsch. Fischwirt., II, 8, 138–139. Berlin (1935). **b - 2197**

Beitrag zu den norwegisch-deutschen Fischhandelsbeziehungen an Hand des norwegischen Berichtes über die Fischerei im Jahre 1934.

**An.** - Schwere Beeinträchtigung der deutschen Fischerei durch neue norwegische Fischereigrenze. – 2 Kart., Dtsch. Fisch.-Rundschau, 19, 431–435. Bremerhaven (1935). **b - 2198**

Kommentar des von dem Storthing gemachten Beschlusses vom 24. 6. 1935 und der königlichen Resolution vom 12. 7. 1935, welche eine neue norwegische Fischereigrenze einführen und den jahrelangen Meinungsverschiedenheiten Norwegens und den vor der norwegischen Küste Fischerei treibenden Ländern eine entscheidende Wendung geben. Die Feststellung einer neuen Fischereigrenze bedeutet eine weitere Beeinträchtigung dieser Fischerei.

**An.** - Norwegen sucht seine neuen Fischereigrenzen zu rechtfertigen. – 2 Kart., Dtsch. Fischwirt., II, 39, 739–742. Berlin (1935). **b - 2199**

Zusammenfassende Wiedergabe der Stellungsnahme der norwegischen Fischereipresse zu der neuen Regelung der norwegischen Fischereigrenzen, welche das schwerste Bedenken von britischer und deutscher Seite hervorgerufen hat.

## *Palestina.*

**Bahous E. & Massad H. M.** - Fisheries of Palestine. – Tabl., Ann. Rep. Dpt. Agric. & Forests for the Year ending March 1934, 151–165. Jerusalem (1935). **b - 2200**

I. Northern District: Importation of Fish. Gear (tackle), dynamites. Turtle. Immature Fish. Sardines. Lake Fisheries. Appendices: Total landing of sea fish. Details of Fish caught and first selling price at different places, boats and men engaged in fishing during 1933. II. Southern District: Estimate of production during 1933. *Sardina* sp. Fishing grounds. *Scomber* spp. Trawl Fishery. Dynamiting. Appendices: Details of fish caught at Jaffa and other places, total landing of sea fish. Period during which different kinds of fish visited the Southern coastal waters. Number of boats and Fishermen employed during 1933.

**Hornell J.** - Report on the Fisheries of Palestine. – Num. tabl., 14 figs., viii + 106 pp. Crown Agents for the Colonies. London (1935). **b - 2201**

This work may in certain respects be considered to complete another work on the fishery and aquatic fauna of Syria (A. Gruvel: Les Etats de Syrie, Paris, 1931). Results of researches as to the sea fishery, lake fishery and fishing industry. Projects of modernization of fishing methods and construction of ports. In an appendix are given a list of fish names in Latin, English and Arabic as well as a great many statistic tables.

## SUBPRODUCTI FRUCTUUM PISCATIONIS

### *Residua et reiectanea – Collae – Farina ichthyca.*

**Anderson A. W., Harrison R. W. & Pottinger S. R.** - Studies on Drying Cod and Haddock Waste. – 7 figs., 9 tabl., U. S. Dpt. Comm., Bur. Fish., Invest. Rep. 32, II, 1–41. Washington D. C. (1935). **b - 2220**

During a series of investigations on the effect of manufacture on the nutritive value of ground-fish meals, carried on by the U. S. Bureau of Fisheries, data were obtained which demonstrated that the wet process of manufacture caused a material decrease in the utility of these meals for feeding purposes. The present report contains a study of methods of overcoming the difficulty of drying this type of waste without the removal of the glue–forming proteins and an investigation of the relative efficiencies of wet and dry process of fish–meal manufacture.

**Croker R. S.** - Increased Utilization of Fish Livers. – Calif. Fish & Game, XXI, 3, 263. Sacramento (1935). **b - 2221**

Attention is drawn to the relatively high value of A and D vitamins in the livers of the white sea–bass, barracauda, swordfish, totuava, mackerel, bonito and tuna.

**Grimaud M.** - Quelques remarques au sujet de la réglementation concernant le commerce des farines de poissons. – VII Congr. Int. Aquicult. & Pêche Paris (1931), Communications. III, 157–159. Impr. du Loiret. Orléans (1935). **b - 2222**

Nécessité d'une dénomination précise des faunes de poissons. Teneurs maxima en matières grasses et en sel marin. Pourcentage de sable.

**Harrison R. W.** - Some Developments in Markets for By–Products during the past Year. – 5 figs., 7 tabl., Fish. Gaz., Ann. Rev. Numb., 92–96. New York (1935). **b - 2223**

Account of some particularly interesting developments with respect to the by–products of the United States commercial fisheries; statistical statements concerning the values of by–products by States, the products of menhaden industry, the fresh–water mussel shell products, the miscellaneous by–products, the marine pearl–shell products, the oyster–shell products, in 1934.

**Harrison R. W., Pottinger S. R., Lee C. F. & Anderson A. W.** - Studies on the Utilization of Swordfish Livers. – 3 figs., 4 tabl., U. S. Dpt. Comm., Bur. Fish., I, 28, Invest. Rep. 1–10. Washington D. C. (1935). **b - 2224**

The swordfish industry. Composition of swordfish livers. Extraction of oil from swordfish livers. Some physical and chemical properties of swordfish–liver–oil. Vitamin potency of sword–fish liver oil. Importance of swordfish as a source of vitamins A and D.

**Harrison R. W., Pottinger S. R. & Anderson A. W.** - Effect of Manufacture on the Quality of Nonoily Fish Meals. – U. S. Dpt. Comm., Bur. Fish., Invest. Rep., II, 30, 1–30. Washington D. C. (1935). **b - 2225**

Trend and problems of fish–meal research. Factors involved in the manufacture of nonoily fish meals: proteins and vitamins. Relation of method of manufacture to quality of fish–meal protein and vitamin value: effect on vitamin G. Manufacture of nonoily fish meal by the dry process.

**Johnston W. W.** - How to Manufacture Fish Glue from Skins and Heads. – 1 table. Canad. Fisherm., XXII, 12, 29–32. (Atlant. Fish. Exp. Stat. Note n. 45). Gardenvale, Que. (1935). **b - 2226**

**Jouvalov P. E.** - Sur la qualité de la farine de poisson de l'Extrême–Orient. (En russe). – 2 tabl., Rybn. Choz. Daljn. Vostoka (Econ. Pêche Extr.–Orient), 1/2, 150–161. Moskva–Khabarovsk (1934). **b - 2227**

Résultats des analyses de la farine de poisson de différente origine fabriquée dans l'Extrême–Orient, avec référence spéciale aux matières étrangères que contient souvent ce produit.

**Kharjkov I. I.** - Approvisionnement automatique en matières premières des fabriques pour l'utilisation des déchets de poisson. (En russe). – 2 fig., 2 tabl., Rybn. Choz. Daljn. Vost. (Econ.

Pêche Extr.–Orient), 1/2, 161–165. Moskva–Khabarovsk (1934). **b - 2228**

1. Rationalisation des travaux de chargement des différentes parties de l'installation pour le traitement des déchets de *Sardinella melanosticta*. 2. Rationalisation des usines pour la fabrication d'engrais avec les produits de la chasse aux animaux marins de l'Extrême–Orient russe.

**Oya Takeo & Kimura Minoru** - Effects of Degree and Duration of Heating on the Digestibility of Powdered Fish Meal. (In Jap., Engl. Rés.). – 2 fig., 3 tabl., Bull. Jap. Soc. Scient. Fish., IV, 2, 95–97. Tokyo (1935). **b - 2229**

On the basis of the experiments described here and expressed graphically it is shown that the digestibility of the powdered fish muscles diminishes with increasing degree and duration of heating. The difference of digestibility of various fish meals appears to be due to degree and duration of heating in the manufacturing procedures.

**An.** - Smoked Herring Marketing. – Canad. Fisherm., XXII, 3, 17. Gardenvale, Que. (1935). **b - 2273**

Measures taken by the Grand Manan dealers in order to organize and to stabilize the smoked herring industry, all of which is practically located at Grand Manan, Charlotte County, N. B.

**An.** - Eine lehrreiche Statistik der deutschen Salzheringswirtschaft. – Dtsch. Fischwirt., II, 9, 153–154. Berlin (1935). **b - 2274**

Statistische Angaben, welche der für das Jahr 1934 von der Deutschen Heringshandel-Gesellschaft m. b. H., Bremen, herausgegebenen Statistik, entnommen sind, und die auch einen interessanten Einblick in die geschichtliche Entwicklung der grossen Heringsfischerei seit dem Jahre 1906 gestatten.

## *Refrigeratio fructuum piscatus eiusque technica.*

**Amasaki Tamotu & Hasebe Akasi.** - Heat Admitted into a Cold Storage Room by its Door-opening. (In Jap. Engl. Rés.). – 4 tabl., 5 fig., Bull. Jap. Soc. Scient. Fish., IV, 3, 198–202. Tokyo (1935). **b - 2275**

On an empirical formula by H. S. Whitesel (Refrig. Eng., XXVII, 5, 240–247, 1934) to estimate the heat load of the door–opening for a household refrigerator cabinet. Different cases of application and modifications.

**Bähr O.** - Das Solegefrieren von Heringen. – Dtsch. Fisch.-Rundschau, 3, 58-59. Bremerhaven (1935). **b - 2276**

An Hand von zwei der englischen Zeitschrift « Fishing News », n. 1129 und 1133 entnommenen Artikeln, bespricht Vf. die Versuche mit der Solegefrierung von Heringen, welche an Bord der englischen Dampfer unternommen worden sind.

**Beard H. R.** - Value of Scientific Research to the Fisheries. – 3 phot., Fish. Gaz., LII, 12, 6–7. New York (1935). **b - 2277**

New quick–freeze system developed. Combination of scientific and practical knowledge. Greatest problem: the improvement of fresh, frozen and smoked fish.

**Birdseye C.** - Quick-Freezing Fillets. – 1 phot., Fish. Gaz., LII, 11, 7. New York (1935). **b - 2278**

Account of the introduction, development and progress of quick–freezing of fish fillets from 1924 to nowadays.

**Cannicci G.** - Refrigerazione e congelazione del pesce. – Num. fig., 130 pp. Manuali Diana. Ed. Vallecchi, Firenze (1935). **b - 2279**

L'A. descrive la particolare applicazione per la conservazione del pesce, dei comuni metodi di refrigerazione, di congelazione rapida ed in atmosfera raffreddata. La diffusione del pesce congelato sui mercati italiani. Magazzini, trasporti e banchi di vendita. Il ghiaccio secco e la sua applicazione nell'industria ittica.

**Gardner Poole** - Quick Freezing. – 3 fig., 2 tabl., Fish. Gaz., Ann. R. Numb., 84–85, 87 & 105. New York (1935). **b - 2280**

Review of recent progress in the quick industrial refrigeration applied to the fisheries, with special reference to early studies in « Quick–Freezing », the commercial applications realized, the various methods of quick freezing, the new chemical findings, the packaging and transportation problems; the article is completed by two statistical tables, containing data on cold storage holdings of cured fish in the United States, by species and months, and by geographical sections and month, during 1934.

**Heiss R.** - Einrichtungen und Aufgaben der Aussenstelle des Kältetechnischen Instituts in Wesermünde. – 1 Fig., Dtsch. Fisch. Rundschau, 24, 554–557. Bremerhaven (1933). **b - 2281**

Disposition und Beschaffenheit der Kühlanlagen im Institut zu Wesermünde, welche es gestatten, alle Untersuchungen unter möglichst eindeutigen und planmässig variierbaren Bedingungen zu veranstalten um alle Phasen des Gefrierverfahrens und der Veränderungen der beim Lagern gefrorenen Fische zu studieren.

**Hjorth-Hansen S.** - Opbevaring av håbrand på kjølelager. – 8 Tab., 2 fig., Årsber. v. Norg. Fisk. 1933 (Stat. Fiskeriførsøksstasjons virks. 1933). 3, 27–35. Bergen (1935). **b - 2282**

Lagerung bei + 1° C bis + 2° C und bei 0° C. Einfluss der Luft. Analyse eines gefrorenen Fisches.

**Mc Kerlie J.** - Refrigeration in the Store. – 4 figs., Canad. Fish. Manual, 1935, 56–58. Gardenvale, Que. (1935). **b - 2283**

Method of preservation of fish in the stores with special reference to the use of ice, the mechanical refrigeration, the humidity and the costs of preservation.

**Okada Mituyo** - Circulation of Air in a Cold–Storage Warehouse. II. Reproduction in Models of the Observed Original Circulations. – 9 figs., 5 tabl., 2 pls., Journ. Imp. Fish. Inst., XXX, 4, 227–251. Tôkyô (1935). **b - 2284**

Distribution of temperature and the velocity of steady circulations of air produced by natural convection in several parts of a cold–storage warehouse were observed and reproduced in a reduced scale in models. It has been shown that the laws of natural convections in the steady state are utilizable in the comparison between the original and the modelled circulations, and that the circulation in the chamber, where the air freezing of fishes is going on, can also bee treated as in quasi–stationary state.

**Okuno Hirosi** - On the Ice Crystal Formed in the Tissues of Frozen Fish. (In Jap., Engl. Rés.). – 1 graph, 2 tabl., Bull. Jap. Soc. Scient. Fish., IV, 4, 259–260. Tokyo (1935). **b - 2285**

The results reported here were obtained by the A. when observing the size distributions of ice crystals and the process of their growth during cold storage by the microphotography in preparation for further experiments.

**Ono Toyoki** - Chemical Changes of Fish Body-fats in Cold Storage. (In Jap., Engl. Rés.). - 2 figs., 8 tabl., Bull. Jap. Soc. Scient. Fish., III, 5, 255–262. Tokyo (1935). b - 2286

The A. has examined whether the chemical changes of fish fat in cold storage is caused by oxidation or by lipase, and at the same time he has made observations on the lipase action at lower temperature.

**Petit G.** - Sur la congélation du poisson à bord. - VII Congr. Int. Aquicult. & Pêche, Paris 1931, Communications, III, 151–156. Impr. du Loiret. Orléans (1935). b - 2287

Aperçu général de la question. Première application, avantages de la congélation en général, congélation à terre, congélation à bord, possibilité d'adapter aux chalutiers les méthodes industrielles de congélation telles qu'elles sont réalisées à terre, en dotant les chalutiers d'installations frigorifiques.

**An.** - Glänzendes Urteil über neue Kühlmethode. - 1 Fig., Dtsch. Fisch.-Rundschau, 4, 73–75, Bremerhaven (1935). b - 2294

In vorliegender Notiz wird der im Heft 1, 1935 von derselben Zeitschrift veröffentlichte Bericht über eine neue Kühlmethode für Fische, das Verfahren B. F., ergänzt.

**An.** - Versuche mit Trockeneiskühlung auf deutschen Fischdampfern. - Dtsch. Fisch.-Rundschau, 23, 528. Bremerhaven (1935). b - 2295

Auf Grund dieser und anderer Ergebnisse ist man zu der Ansicht gekommen, dass, nach einigen Verbesserungen der technischen Kühleinrichtungen, die Trockeneiskühlung auf Fischdampfern anderen Methoden überlegen ist.

**An.** - Einsetzung eines technischen Beirates aus Fischwirtschaftlern für die Kühlforschung. - Dtsch. Fisch.-Rundschau, 24, 557–558. Bremerhaven (1935). b - 2296

Bericht über die Einsetzung eines kleinen technischen Beirats aus dem Fischgewerbe in seinen drei Zweigen, Reederei, Handel und Industrie zur Zusammenarbeit mit dem Institut für Seefischerei in Wesermünde auf dem Gebiete der Frischhaltung der Fische.

## *De fructibus piscatus vario modo confectis.*

**Beatty S. A.** - The Handling of Shucked Scallops. - Canad. Fisherm., XXII, 10, 31–32. Gardenvale, Que. (1935). b - 2297

Before discussing the possible faults in handling of shucked scallops author calls the attention to some of their characteristics, whose value may be overlooked, and which are very important on account of fresh scallops' preservation and storage.

**Bonde (von) C. & Marchand J. M.** - Studies in the Canning of Cape Crawfish, Kreef or Spiny Lobster, *Jasus lalandii* (Milne Edwards) Ortmann. - Figs., 14 tabl., Dpt. Comm. & Ind., Fish. & Mar. Biol. Surv. Div., Invest. Report 5, 5–43. Pretoria (1935). b - 2298

Résumé of the canning process. Explanation of hydrogen ion concentration of pH. Technical discussion. Chemical analysis of crawfish meat. Blue meat. Canning of leg meat. Suggestions and recommendations. Appendices: Gauge pressure and temperature; Analysis of samples of Japanese crab, Canadian lobster and Cape crawfish. Bibl.

**Cooper D. LeB.** - Devising Canning Methods for Fisheries Products. - Canad. Fisherm., XXII, 5, 22 & 31. Gardenvale, Que. (1935). b - 2299

The elaboration of the method is the consequence of a research concerned with sterilization technique at the Fisheries Experimental Station in Halifax. The present article contains a description of an apparatus not hitherto published and which allows to sterilize the canned product without spoiling its appearance and taste.

**Gericke G.** - Erfahrungen über neue Wege im Dorschabsatz. - Dtsch. Fischwirt., II, 40, 760–761. Berlin (1935). b - 2300

Technische und statistische Ausführungen über die Entwicklung und Organisation der Ostdorschfilets-Herstellung ; Nachweis der guten Möglichkeiten dieser Industrie an Hand eines Auszuges aus einem Bericht über die Lage der Dorschfilets-Industrie in Dänemark, welcher auch den Wortlaut der am 1. Oktober 1935 in Kraft getretenen Verordnung der dänischen Regierung über die Ausfuhr von Fischfilet enthält.

**Hess E.** - Canning Scallops. – Canad. Fisherm., XXII, 3, 9. Gardenvale, Que. (1935). **b - 2301**

Fisheries Experimental Station (Atlantic), Note n. 31. Some additional information to a previous report (Progress Report nº 1, Fisheries Experimental Station, Note nº 1, January 1931) on preliminary experiments on canning of scallop muscles.

**Hess E.** - Canning Mackerel Fillets. Products Offer Worthwhile Industry. - 8 figs. Canad. Fisherm., XXII, 5, 13–15. Gardenvale, Que. (1935). **b - 2302**

Illustration of methods of filleting, cutting and packing mackerel in the can, with special reference to cannery equipment, raw material, and labour.

**Hjorth-Hansen S.** - Undersøkelser angående kokning och behandling av ferske reker. – 18 tab., Årsber. v. Norg. Fisk. 1933. (Stat. Fiskeriforsøksstasjons virks. 1933), 3, 5–23. Bergen (1935). **b - 2303**

Allgemeine Untersuchungen. Salzgehalt. Lagerungsversuche. Andere Faktoren, welche auf die Haltbarkeit und die Qualität während der Lagerung Einfluss haben.

**Hurequin L.** - Les conserves des Crabes japonais. – Pêche Marit., Pêche Fluviale et Piscicult., XVII, 448–450. Paris (1934). **b - 2304**

**Jarvis N. D. & Griffiths F. P.** - Home Canning of Fish. – Fish & Oyst. Rep., XVI, 5, 6–7 & 11. Tampa, Fla. (1935). **b - 2305**

General directions for home canning of fish. Recommended procedures for canning different fishes.

**Saito Kazuo** - The Content of S $H_2$ of the Exportable and Non–Exportable Canned Crabs. – 1 table. Bull. Jap. Soc. Scient. Fish., II, 6, 285–286. Tokyo (1934). **b - 2306**

Report on expert's classifications, exportable or non-exportable, according to Almy's method of determination of $SH_2$ in the juice from canned crabs.

**Struve K.** - Ueber die Verwendung von Wasserstoffsuperoxyd bei Kochmarinaden. – Dtsch. Fisch.-Rundschau, 2, 33 ; 5, 100–101. Bremerhaven (1935). **b - 2307**

Kritische Betrachtungen über die im Jahre 1934 im Fachblatt "Die Fischwaren- und Feinkost-Industrie" erschienenen Abhandlungen und Sprechsaalantworten in Bezug auf die Notwendigkeit des Wasserstoffsuperoxyds bei Kochmarinaden.

**Struve K.** - Sardinen-Konservierung in Kalifornien. Wertvolle Anregungen für unsere Fischindustrie. – Dtsch. Fisch.-Rundschau, 5, 102–104; 6, 126–129. Bremerhaven (1935). **b - 2308**

Ungekürzte Wiedergabe eines längeren Artikels von R. S. Croker (California State Fisheries Laboratory), der sich eingehend mit der in Kalifornia üblichen Sardinen-Konservierung befasst. Es werden Einzelheiten und Abweichungen des Arbeitsvorganges geschildert.

**An.** - Verdünnte Essigsäure - Essig. Das Ende eines jahrelangen Streites. – Dtsch. Fisch.-Rundschau, 13, 285–288. Bremerhaven (1935). **b - 2309**

Einige Gesichtspunkte aus den Entscheidungsgründen des Reichsgerichtes in Bezug auf die Bezeichnung der verdünnten Essigsäure als Essig und ihre Verwendung in der Fischindustrie.

**An.** - Oysters-Fillets. – 3 phot., Fish. Gaz., LII, 10, 5. New York (1935). **b - 2310**

The two factors contributing to the better development of the fishing industry : the rapid growth of fillet business and the oyster industry ; their influence upon the fishing industry as a whole.

**An.** - Pollock Fillets Now a Real Source of Income. – 1 photo. Fish. Gaz., LII, 13, 9. New York (1935). **b - 2311**

Note showing that fresh pollock fillets found very good marketing condition in the winter 1934–35.

## *Officinae fructibus piscatoriis conficiendis et conservandis – Thecae – Industria.*

**Deed W. J.** - The Technical Section (of the Fishing Gazette). – Fish. Gaz. LII, 5, 25–30; 6, 13–18; 7, 13–16; 9, 13–16; 11, 13–16; 12, 11–14; 13, 11–17. New York (1935). **b - 2312**

In these sections A. gives some practical hints as to the maintenance of fishing boats and their installations : standardized types of boats, new engines, lubrification paints and coatings, fuel oils, fire prevention on board, electrical equipments, ropes etc.

**Hinard G.** - Considerazioni sulle conserve di pesce. Basi tecniche di un controllo sulla loro fabbricazione. – Ind. It. Cons. Alim., 12, 301–311. Parma (1935). **b - 2313**

Ricordate le cause che determinano decomposizioni nelle conserve di pesce mal preparate, l'A. riferisce sulle condizioni igieniche dei prodotti. Condizioni del pesce in scatola (conserva) : procedimenti coi quali viene trattato il pesce nelle fabbriche ; sterilizzazione ; esame del prodotto pronto per la vendita.

**Lang O. W.** - Thermal Processes for Canned Marine Products. – Index, 52 tabls., 14 charts. Univ. Calif. Publ. in publ. Health, II, 1 ; vii + 174 pp. Berkeley, Calif. (1935). **b - 2314**

**Lasausse E.** - Les conserves en boites hermétiques. – VII Congr. Int. Aquicult. & Pêche, Paris, 1931, Communications, III, 137–143. Impr. du Loiret. Orléans (1935). **b - 2315**

Origine et développement des méthodes de conservation du poisson, avantages, contenu en vitamines, hygiène.

**Laurinat K.** - Die deutsche Fisch-Vollkonserven-Industrie. – Dtsch. Fischwirt., 23, 481–484. Berlin (1935). **b - 2316**

Zusammenfassendes Bild der heutigen Lage und Zukunftaussichten der deutschen Fisch-Vollkonserven-Industrie ; ihre wichtigsten Probleme ; wissenschaftliche Erfahrung, welche zu ihrer Lösung verhelfen könnte.

**Lehr** - Die äussere Kennzeichnung der in Packungen oder Behältnissen in den Verkehr gebrachten Lebensmittel. – Dtsch. Fisch.-Rundschau, 3, 54–57. Bremerhaven (1935). **b - 2317**

Ausführungen und Empfehlungen von sachverständiger Seite veröffentlicht im "Reichsanzeiger" Nr. 229 vom 30. September 1927.

**Metzner H.** - Zur Dosennormierung und Kennzeichnung. – Dtsch. Fischwirt., II, 34, 659–660. Berlin (1935). **b - 2318**

Aufstellung genauer Normen für Fischdosen, für Glaspackungen und Packungen aus Pappe und ähnlichem Material ; Problem der Normalisierung.

**Miyakosi Sôdi & Terase Tuneo** - Vibration Figures on the Upper End of Cans beaten repeatedly. I. The Rate of Appearance of the Figure in Relation to the Weight and Vacuity of Salmon Cans. (In Jap., Engl. Rés.). – 4 fig., 1 tabl., Bull. Jap. Soc. Scient. Fish., IV, 2, 82–84. Tokyo (1935). **b - 2319**

**Tjötta L. L.** - Leichter oder schwerer Arbeitsgang in der Vollkonservenindustrie. – Dtsch. Fisch.-Rundschau, 6, 125–126. Bremerhaven (1935). **b - 2320**

Mitteilungen aus dem Institut für Seefischerei Wesermünde. Vf. beschreibt die verschiedenen praktischen Arbeitsgänge in der Sprottenherstellung und bespricht die möglichen Massnahmen, welche die Anstrengung der Arbeiter mildern könnten.

**Tjötta L. L.** - Versuche mit einem neuen Reinigungsmittel für Konservendosen. - Dtsch. Fisch.-Rundschau, 18, 414. Bremerhaven (1935). **b - 2321**

Bericht über das Ergebnis der am Institut für Seefischerei Wesermünde durchgeführten Versuche mit dem Reinigungsmittel „Minlosit-Standard-F“ um festzustellen, ob sich damit eine schnelle, vollständige Reinigung der sterilisierten Konservendosen ermöglichen lässt.

**Tomimasu Kenzô** - Measuring of the Vacuity of full Cans by the Elastic Deflexion of their Upper and Lower End Plates. I. (In Jap., Engl. Rés.). – 9 figs., 5 tabl., Bull. Jap. Soc. Scient. Fish., IV, 4, 261–273. Tokyo (1935). **b - 2322**

Report on the tests undertaken which prove that the changes of the upper end plate vary with atmospheric pressure and temperature, and accordingly that there is no creep in any one of the test cans examined hitherto.

**Normenausschuss.** - Endgültige Festlegung der Dosennormen. – 7 Tab., Dtsch. Fisch.-Rundschau, 16, 362–364. Bremerhaven (1935). **b - 2323**

Tabellen über die Masse, die für die Dosen der Fischindustrie-Erzeugnisse vom Normenausschuss endgültig festgelegt worden sind.

# ABBREVIATIONES

**a.** - annus, anno, année, an, año
**Aardr.** - Aardrijkskundig
**Abb.** - Abbildungen
**Abh.** - Abhandlung(en)
**Abt.** - Abteilung
**Acad.** - Academia, Académie, Academy
**Accad.** - Accademia
**Akad.** - Akademia, Akademie, Akademi, Akademiia; Akademische
**Algol.** - Algologique
**Amer.** - America; American
**Anat.** - Anatomia, Anatomie, Anatomy; Anatomico(a), Anatomique, Anatomical, Anatomisch
**Ann.** - Annales, Annali, Annals, Annaler, Annalen, Anais, Analele; Annuel, Annual
**Annot.** - Annotationes, Annotations
**Annu.** - Annuario, Annuaire
**Anu.** - Anuario
**Anz.** - Anzeiger
**App.** - Appendix, Appendice
**Aquic.** - Aquiculture
**Aarb.** - Aarbok
**Arbeit.** - Arbeit(en)
**Arch.** - Archivium, Archivio, Archive(s), Archiv, Archivo
**Arct.** - Arctic
**Ark.** - Arkiv(et)
**Årsb.** - Årsbok
**Årsber.** - Årsberetning
**Ass.** - Associazione, Association
**Assem.** - Assemblea, Assemblée, Assembly
**Astron.** - Astronomia, Astronomie, Astronomy; Astronomico(a), Astronomique, Astronomical, Astronomisch
**Austr.** - Australian
**Avd.** - Avdelning

**Bacteriol.** - Bacteriology, Bacteriologie; Bacteriological, Bacteriologisch
**Bactériol.** - Bactériologie; Bactériologique
**Batteriol.** - Batteriologia; Batteriologico(a)
**Bd.** - Board
**Begr.** - Begründet
**Beitr.** - Beitrag, Beiträge
**Ber.** - Bericht(e)
**Biol.** - Biologia, Biologie, Biology; Biologico(a), Biologique, Biological, Biologisch, Biologisk
**Bl.** - Blatt, Blätter
**Bol.** - Boletim, Boletin
**Boll.** - Bollettino
**Bot.** - Botanica, Botanique, Botany, Botanik; Botanical, Botanisch, Botanisk
**Brit.** - Britain; British
**Bul.** - Buletin, Buletinul
**Bull.** - Bulletin, Bulletijn, Bulletino
**Bur.** - Bureau

**Calif.** - California
**Camp.** - Campagnes
**Canad.** - Canadian
**Cat.** - Catalana
**Centr.** - Centrale, Central(e)
**Chem.** - Chemistry; Chemical
**Choz.** - Chozjajstvo
**Cienc.** - Ciencias
**Circ.** - Circulaire, Circular
**Cl.** - Classe
**Col.** - Colonie, Colony; Colonial(e)
**Coll.** - Collegio, Collège, College
**Collect.** - Collection
**Com.** - Commerce, Comercio; Commerciale, Commercial, Comercial
**Comit.** - Comitato
**Comm.** - Committee, Commission
**Commiss.** - Commissioner
**Comp.** - Comparata, Comparée, Comparative
**Conf.** - Conferentia, Conferenza, Conférence, Conference
**Congr.** - Congresso, Congrès, Congress, Congreso
**Cons.** - Consiglio, Conseil

# TABULA

**Abbreviationes** . . . Pag. III

## I. Generalia

### Navigatio

*Navigationis Historia – Itinera* . . . » 1
*Navigatio plana et litorea – Navigatio astronomica – Instrumenta – Tabulae – Ephemerides – Navigatio radiogoniometrica – Studia pro navigatione* . . . » 10
*Securitas maritima – Operae pro vitae rerumque conservatione – Adsistentia – Destructio et recuperatio navium* . . . » 18
*Signalationes maritimae (fixae, fluctuantes, luminosae et per radio, sonorae et ultrasonorae) – Libri pharorum, lanternarum, signalationum – Communicationes* . . . » 19

### Operae Maritimae

*Operae portuales – Tunnels – Canales maritimi – Effossiones fundi marini* . . . » 22
*Operae submarinae – Mersiones – Scaphandrarii – Cava* . . . » 24

### Varia

*Res nauticae – Folklore – Historia politica, militaris et mercatoria marium – Vocabularia nautica – Legislatio nautica* . . . » 25
*Biographiae et necrologiae* . . . » 28

## II. Oceanographia Physica

### Generalia

*Instituta oceanographica – Relationes publicae – Conventus et conferentiae – Oceanographiae historia – Ars docendi – Bibliographiae* . . . » 31
*Expeditiones oceanographiae et scientiae causa susceptae – Studia et quaesita oceanographica* . . . » 37

### Geologia Maris

*Geologia generalis bacini oceanici – Marium origo – Vestigia veterum marium* . . . » 44
*Litora et orae maritimae – Erosiones* . . . » 50
*Sedimenta* . . . » 53
*Topographia submarina – Marini fundi configuratio* . . . » 55

### Geographia Maris

*Geographia descriptiva et oeconomica* . . . » 57
*Geographia Polaris* . . . » 60
*Relevationes hydrographicae (geodeticae, topographicae, bathymetricae) – Instrumenta hydrographica et bathymetrica – Naves hydrographicae* . . . » 67
*Chartographia – Atlantes – Portulani* . . . » 77
*Maritimi Portus – Canales – Aestuaria* . . . » 82

### Chemia et Physica Maris

*Chemia et Physica – Salsedo et temperatura – Transparentia – Densitas – Evaporatio – Aquae chemici componentes* . . . » 85
*Energia marium – Penetratio energiae solis radiantis* . . . » 93

Maris Dynamica

*Circulatio oceanica – Currentiae* . . . . . Pag. 94
*Aestus et apparatus mareographici – Maris livellus* . . . . . » 98
*Undarum motus* . . . . . » 102
*Hydrodynamica theorica* . . . . . » 103

Geophysica

*Meteorologia* . . . . . » 105
*Glacies marina* . . . . . » 121
*Vis magnetica* . . . . . » 125
*Gravitas* . . . . . » 130
*Sysmologia et vulcanismum bacini oceanici* . . . . . » 132

**II. Oceanographia Biologica**

Generalia

*Instituta – Musea – Aquaria – Relationes annuae – Congressus et conferentiae – Expeditiones oceanographicae – Biographiae* . . . . . » 135

Methodice

*Apparatus oceanographici et scientifici – Subsidia technica – Microscopia – Microphotographia* . . . . . » 139

Anatomia et Physiologia

*Cytologia et histologia* . . . . . » 140
*Apparatus musculorum atque apparatus scheletricus – Quaestio de motu – Vesica natatoria* . . . . . » 141
*Apparatus nervorum. – Organa sensuum* . . . . . » 145
*Apparatus circulationis atque sanguis* . . . . . » 148
*Apparatus respirationis* . . . . . » 149
*Apparatus digestionis atque alimentatio* . . . . . » 149
*Apparatus uro-genitalis* . . . . . » 152
*Glandulae et Hormones* . . . . . » 153
*Color et influentia pigmentorum* . . . . . » 153
*Regeneratio, autotomia et muta* . . . . . » 155
*Squamae piscium – Determinatio aetatis animalium marinorum* . . . . . » 156
*Varia* . . . . . » 157

Procreatio

*Maturitas sexualis – Cellulae sexuales – Physiologia fecundationis – Characteres sexuales secundarii – Genetica* . . . . . » 158

Progressus embryonalis et Accretio corporis

*Embryologia – Accretio larvalis – Metamorphosis* . . . . . » 163

Biochemia

*Chemia biologica et metabolismum vitale – Actio substantiarum chemicarum in organismis* . . . . . » 167
*Compositio chemica organismorum marinorum* . . . . . » 170

Oecologia

*Hydrobiologia – Adaptatio loco ambienti – Effectus lucis, temperaturae, salinitatis et pressionis in organisma marina* . . . . . » 172
*Geographica distributio animalium* . . . . . » 177
*Migrationes et marchatura – Scalae ascensionales* . . . . . » 183
*Animalium societas – Biocoenosis – Symbiosis* . . . . . » 185
*Parasiti – Pathologia et Teratologia* . . . . . » 187

Plancton et Benthos

*Zooplancton et Phytoplancton – Distributio et valor* . . . . . » 191

Zoologia Systematica et Descriptiva

*Bacteria* . . . . . . . . . . . . . . . . . . . . . . . . . . . . Pag. 194
*Protozoa* . . . . . . . . . . . . . . . . . . . . . . . . . . . . » 195
*Porifera* . . . . . . . . . . . . . . . . . . . . . . . . . . . . » 197
*Coelenterata – Insulae et scopuli coralliferi* . . . . . . . . . . . . . . . . . . » 197
*Vermes* . . . . . . . . . . . . . . . . . . . . . . . . . . . . » 201
*Echinodermata* . . . . . . . . . . . . . . . . . . . . . . . . . . » 204
*Mollusca* . . . . . . . . . . . . . . . . . . . . . . . . . . . . » 206
*Arthropoda varia – Crustacea* . . . . . . . . . . . . . . . . . . . . » 210
*Tunicata* . . . . . . . . . . . . . . . . . . . . . . . . . . . . » 217
*Pisces et Cyclostomata* . . . . . . . . . . . . . . . . . . . . . . » 218
*Mammalia* . . . . . . . . . . . . . . . . . . . . . . . . . . . . » 231
*Animalia incertae sedis* . . . . . . . . . . . . . . . . . . . . . . » 233
*Varia* . . . . . . . . . . . . . . . . . . . . . . . . . . . . » 234

Botanica

*Plantae marinae – Algologia* . . . . . . . . . . . . . . . . . . . . » 236
Palaeobiologia . . . . . . . . . . . . . . . . . . . . . . . . . . . . » 240
Phylogenia . . . . . . . . . . . . . . . . . . . . . . . . . . . . » 250

**IV. Piscatus**

Generalia – Institutiones, Laboratoria, Congressus, Expeditiones oceanographicae . . » 252
Piscatus oeconomia – Legislatio – Piscatorum activitas . . . . . . . . . . . . . » 256
Biologia piscatui applicata – Hydrographia et Hydrologia piscatui applicatae – Piscicultura . . . . . . . . . . . . . . . . . . . . . . . . . . . . » 260
Portus ad piscandum . . . . . . . . . . . . . . . . . . . . . . . . . » 264
Methodus et Instrumenta piscationis – Retia – Classiculae piscatoriae . . . . . . » 265
Loca ad piscandum – Tabulae et statisticae piscatoriae . . . . . . . . . . . . » 269
Fructus piscationis – Species edules et commerciales – Aestimatio alimentaris . . . » 272
Mercatus – Provisiones – Pretia et taxationes – Vectura . . . . . . . . . . . . » 281
Industria et commercium fructuum piscatus in diversis regionibus . . . . . . . . » 286
Subproducti fructuum piscationis – Farina ichthyca – Olea . . . . . . . . . . . » 291
Conservatio – Bacteriologia – Hygiene – Pisces infumati, salati et exsiccati – Refrigeratio – Officinae fructibus piscatoriis conficiendis et conservandis . . . . . . » 294
Index Auctorum . . . . . . . . . . . . . . . . . . . . . . . . . . » 301

Index materiarum:

*Oceanographia Physica et Navigatio* . . . . . . . . . . . . . . . . . . » 313
*Oceanographia Biològica et Piscatus* . . . . . . . . . . . . . . . . . . » 321

# I.

# GENERALIA - NAVIGATIO

## Navigationis historia - Itinera.

**Acworth B.** - The Restoration of England's Sea Power [*De renovata dominatione anglica marium*]. Eyre & Spottiswood. London (1935). **a - 1**

It is a new edition of the Author's book: The Navy and the Next War.

**Alaux J. P.** - Ulysse aux Antilles [*De navigatione ad insulas Antillas*]. Nombr. fig., 324 pp., Galion d'or. Paris (1935). **a - 2**

Episodes de l'histoire coloniale française. Récit généralement humoristique, parfois tragique.

**Anderson R. C.** (Supervisor). Lists of Men-of-War, 1650-1700. Parts I & II [*Indices longarum navium, 1650-1700*]. Num. tables. Cambridge University Press. London (1935).

( — ) See brief introductory notes in: Mar. Mirr., XXI, 2, 140-144. London (1935). **a - 3**

Series of Lists published in self-contained parts of about 50-60 pages. Part I contains the English lists, Part II the French ones. They indicate the names of the ships, the number of guns, the place of construction, its date, the length, the beam and the tons.

**Anderson R. C.** - The Als Boat [*Navicula ad* Als *pertinens*]. 2 figs., Mar. Mirr., XXII, 1, 105-106. London (1936). **a - 4**

Some criticism on the article dealing with the resemblances between Scandinavian and Indonesian boat-building (S.: « Mar. Mirr. », Oct., 1935) by Mr. Hornell, followed by an answer of the latter, illustrated by two diagrams.

**Anderson R. C.** - Rye Barges [*De scaphis ad* Rye *pertinentibus*]. Mar. Mirr., XXII, 1, 106 & 108. London (1936). **a - 5**

On hand of an article by Mr. Rice in « Archaeologia » of 1824 (vol. XX) Author gives some supplementary information which permits to form a more definite opinion on the last survivors of the Rye barges, described by Mr. Vidler in a previous issue of « Mar. Mirr. ».

**Anisimov S.** - Possibilités non réalisées [*De possibilitatibus quae effici non potuerunt*]. (En russe). Zvezda Severa, 5, 121-123. Arkhangheljsk (1935). **a - 6**

Analyse critique du livre de A. Mironov sur la « Campagne de l'équipage du " Tchéljouskine " ».

**Arruda M. M. V.** preced. de um ensaio critico, por... - Colleçao de documentos relativos ao descobrimento e pouvamento dos Açôres [*Collectio documentorum quae pertinent ad inventionem insularum* Açôres *atque etiam ad advectionem colonorum*]. 11 pl., clxxxiii + 255 pp., Off. Artes Gràf., Ponta Delgada (1932). **a - 7**

Volume publié à l'occasion du cinquième centenaire de la découverte des Iles Açores célébré à Ponta Delgada, contenant, en dehors d'un essai critique de M. M. V. Arruda, la plupart des documents relatifs à la découverte de ces îles et à leur colonisation. L'œuvre est complétée par la publication des documents officiels de 1439 à 1449, par la description primitive des Iles Açores et enfin par des extraits de chroniques et des lettres se référant aux donations et aux attributions faites par les souverains portugais.

**Azurara (de) G. E.** - Chroniques: La conquête de Ceuta; La découverte de la Guinée [*Chronica. De* Ceuta *subacta deque inventa Guinea*]. Cartes, ill., xiv – 200 pp. (Les grands navigateurs et colons portugais du XV^e^ et du XVI^e^ siècles), Ed. Duchartre. Paris (1934). **a - 8**

La présente édition poursuit un but de popularisation des « Chroniques » d'Azurara qui continuent à représenter le seul témoignage d'un contemporain des premières trente années de l'expansion portugaise d'outre-mer. Elle contient une traduction abrégée du texte original des « Chroniques » qui rend leur lecture plus aisée au public français.

**Baevskij I. L.** - Anniversaire de l'épopée héroïque [*Epos navis* « Tcheljouskine », *die anniversario*]. (En russe). 4 fig., Sov. Arkt., 1, 39-42. Leningrad (1935). **a - 9**

A l'occasion de l'anniversaire du voyage et du renflouement du « Tchéljouskine ».

**Bainbridge Hoff A.** - Preble and the « Philadelphia » [*De domino* Preble *deque navi nomine* « Philadelphia »]. 8 pls., U. S. Nav. Inst. Proc., LXI, 6 (388), 818-830. Annapolis, Md. (1930). **a -10**

On hand of original sources author gives an account of the Tripoli Campaign of Edward Preble, and especially how it was affected by the loss of the « Philadelphia », in order to add something to the account of Preble's career given by Mr. Flatcher Pratt.

**Balen (van) W. J.** - Wat dreef de Portugeezen naar Indië? [*Quae res Lusitanos in Indias adduxerunt?*]. Tijdschr. Kon. Ned. Aardr. Gen. Amsterdam LIII, 1, 46-53. Leiden (1936). **a - 11**

Riferendosi al lavoro dello scrittore storico portoghese J. Bensaude (O Plano da India) ed a un proprio lavoro precedente l'A, sostiene l'idea che sia stato principalmente un fanatismo religioso che abbia spinto i Portoghesi verso l'India. Progetti del Principe Enrico il Navigatore. Spedizioni lungo le coste d'Africa.

**Ballard G. A.** - The Unarmoured Branches of the British Navy of 1875 [*De navibus non aeratis ad classem britannicam pertinentibus, A. 1875*]. 5 figs., 2 pls., Mar. Mirr., XXI, 3, 245-274. London (1935). **a - 12**

Description of the varying designs of new unarmoured tonnage built in 1875, concerned especially with (I) Frigates, (II) Corvettes, (III) Sloops and (IV) Gunvessels; author deals with the size and power, the profile and ordnance forming the armaments of the unarmoured classes, the positions of the gun-ports, etc.

**Ballard G. A.** - British Frigates of 1875. The « Inconstant » and « Raleigh » [*De majoribus navibus anglicis, A. 7185, « Inconstant » et « Raleigh »*]. 4 pls., Mar. Mirr., XXII, 1, 42-53. London (1936). **a - 13**

Author describes the vessels built with the new idea of a complete iron hull encased in timber planking from keel to bulwarks throughout its length adopted by the British Admiralty.

**Barbagelata H. D.** - Histoire de l'Amérique espagnole [*De historia Americae hispanicae*]. 2 cart., 323 pp. Armand Colin. Paris (1936). **a - 14**

**Barrows E. M.** - The Great Commodore [*Res gestae a* Matthew Calbraith Perry]. Bobbs Merril Company. New York (1935). **a - 15**

The exploits of Matthew Calbraith Perry.

**Barthel S.** - Loggbok. Förd ombord i s/s « Albania » på resa från Gävle till Palermo [*Diarium nauticum redactum perdurante navigatione navis* « Albania » *a* Gävle *ad Panormum*]. Ills., 209 pp., Ed. Bonnier. Stockholm (1934). **a - 16**

**Benoist M.** - La Marine Française [*Classis Gallica*]. De Gigord. Paris (1935). **a - 17**

**Berezkine V. & Zhoukov S.** - Le voyage du « Lénine » à Kolyma. Sur l'Océan Glacial avec un vapeur fluvial [*De navigatione navis* « Lenin » *ad* Kolyma. *Navigatio per oceanum glacialem in navi fluviatili vapore eunte*]. (En russe). 15 fig., 62 pp., Ed. Osvod., U. R. S. S. Moskva-Leningrad (1933). **a - 18**

**Bigelow J.** - The So-Called Bartholomew Columbus Map of 15 06 [*De tabula ad Bartholomeum* Colombo *pertinente*]. Geogr. Rev., XXV, 4, 643-656. New York (1935). **a - 19**

On the ideas of Freiherr R. von Wieser about this map. In this discussion evidence is presented to show that the sketch maps of a medieval codex in the Biblioteca Nazionale of Florence do not represent Columbian ideas exclusively and probably date from as late as 1522-1525. Some other criticism on the pamphlet of von Wieser.

**Bolton Ch. K.** - Terra Nova. The Northeast Coast of America before 1602: Annals of Vinland, Markland, Estotilands, Drogeo, Baccalaos, and Normbega [*De Terra Nova. Litus nordorientale Americae ante 1602. Annales*]. Maps, ills., xiii + + 194 pp., Usef. Ref. Ser., no. 56, F. W. Faxon. Boston (1935). **a - 20**

A brief account of the discoverers and the discoveries made in the northeastern part of the western hemisphere from the earliest times to the year 1602. The book is completed by an alphabetical list of « Several Persons Reputed to Have Been on the North East Coast before 1602 ».

**Bona E.** - Alessandro Malaspina. Sue navigazioni ed esplorazioni. [*De Alexandro* Malaspina *eiusque navigationibus atque explorationibus*]. Ill., carte, 33 tav., 13 portol. originali. Ist. Graf. Tiberino. Roma (1935). **a - 21**

Prima pubblicazione italiana del suo diario di bordo.

**Bonner Smith D.** - The Case of the « Sartine » [*De fortuna navis* « Sartine »]. Mar. Mirr., XXI, 3, 305-322. London (1935). **a - 22**

On the hand of the minutes of the proceedings of the court martial on Captain Roddan Home, who fired on the cartel ship « Sartine » on May 1st, 1780, author retells at some length the story revealed by the « court enquiry » and tries to clear up the enquiry about what constituted « a cartel flag » which, as it has been told, has been hoisted by the « Sartine ».

**Castex** - Théories stratégiques. Tome V [*De strategia*]. 730 pp., Soc. Edit. Géogr. Marit. & Colon. Paris (1935). **a - 28**

Dans ce V-ème volume de sa grande oeuvre doctrinale l'A. étudie l'antagonisme séculaire entre les hégémonies marines et les puissances continentales, en analysant tour à tour les guerres napoléoniennes, la grande guerre et le problème russo-asiatique.

**Chabanier E.** - Connaissance de la Mer Rouge [*De Mari Rubro eiusque notione*]. 3 tables, 4 croquis de cartes. Géogr., Terre-Air-Mer, LXV, 2, 85-124. Paris (1936). **a - 29**

L'A. examine avec attention le problème de la Mer Rouge dans son développement au cours des siècles et dans son importance comme route de voyage. Dans le premier chapitre il étudie l'expédition de Renaud de Chatillon en 1182 qui a réalisé, d'une manière pratique, la

navigation sur la Mer Rouge, à travers un canal construit entre cette dernière et la Méditerranée. Dans les autres chapitres il précise l'histoire de la route maritime d'Asie à la lumière des témoignages de l'Histoire des Francs en Asie et des observations des rédacteurs des plus anciens, Red Sea Pilots; la première raison de navigation de la Mer Rouge fut la recherche des marchés de l'encens nécessaire au culte. Il illustre ensuite les difficultés de retour révélées par le voyage de Joham de Castro et dans ses conclusions il affirme que la route de l'Inde par la mer Rouge a été établie d'une façon artificielle pour concurrencer la route des Hauts Plateaux de la Côte Arabique.

**Chabanier E.** - Astronomie méditerranéenne et marine grecque [*De astronomia mediterranea deque marina graeca*]. 7 fig., 2 tabl., Rev. Scient., LXXIII, 4 & 5, 112-122, 153-159. Paris (1935). **a - 30**

L'A. essaie de déterminer l'ensemble des connaissances qui forment le fond de l'astronomie nautique du monde antique, avec référence spéciale au gnomon–héliotropion qui a contribué à la fondation de l'astronomie publique. Il décrit les applications maritimes des données de cette science sur l'exemple des voyages odysséens, des voyages ioniens et aux premières expéditions dirigées à l'étude des vents par les géographes grecs, à l'interprétation astronomique du méridien expérimental, au premier parallèle et s'arrête de nouveau sur les gnomons dont il décrit plusieurs formes.

Account of the arctic navigation during the year 1935, which has been essentially different, by its volume and importance, from those of the preceding years; it represents the first attempt to pass from the field of scientific investigations to a regular traffic from east to west and vice versa along the Great Northern Maritime Route.

**Duff G.** - The Trafalgar General Order Book of H. M. S. « Mars » [*Liber de praeceptis generalibus pro pugna navali* Trafalgar *in navi regia* « Mars »]. 2 tables. Mar. Mirr., XXII, 1, 87-104. London (1936). **a - 41**

Publication of Captain Duff's General Order Book, issued by him when he assumed the command of H. M. S. « Mars » on June 6th, 1804, together with that of Captain (afterwards Admiral) Robert Dudley Oliver, concerning respectively: General Orders relative to the International Regulations of H. M. S. « Mars ». Orders at sea. Orders respecting accidents by fire. Orders to be observed on Board H. M. S. « Mars » preparative to and in action.

**Dyer F. E.** - Reprisals in the Sixteenth Century [*De ultionibus navalibus sec. XVI*]. Mar. Mirr., XXI, 2, 187-197. London (1935). **a - 42**

Some information on the reprisals in the sixteenth century, which were regarded by every government as a legitimate means of obtaining redress for wrongs committed by the subjects of neighbouring states, with whom there was otherwise complete peace. Author gives a more or less typical example of one case of such reprisals, which has drawn the English and French governments into quarrel in the year of 1576.

**Dzhemali A.** - La lutte pour la Voie du Nord [*De cursu maritimo Nordico*]. (En russe). Fig., ill., 103 pp., Tekhn. da Schrama. Tiflis (1935). **a - 43**

**Foulkes C.** - Wreck of « Mary Rose » [*De naufragio navis* « Mary Rose »]. Mar. Mirr., XXI, 2, 205-206. London (1935). **a - 46**

Description of some remains of the ship « Mary Rose » which sank in an engagement with the French fleet in July 1545 behind the sandbanks of Portsmouth.

**Gakkelj J. J.** - The Voyage of the « Vanzetti » and « Iskra » [*De navigatione a navibus* « Vanzetti » *et* « Iskra » *peracta*]. (In Russ. Engl. Summ.) Bull. Arct. Inst., VI, 1, 14-16, 45-46. Leningrad (1936). **a - 47**

Brief account of the voyage of two cargo-steamers « Vanzetti » and « Iskra » from Murmansk on July 25th, 1935 to Vladivostok. They reached this last port in splendid condition, and the complete security of the cargo delivered constituted the best proof of the success of this first trip of cargoes along the Northern Sea Route. During the voyage meteorological observations and hydrological and oceanographic work were performed by two scientists appointed by the Arctic Institute.

**Gavaldà J.** - Consideraciones acerca de la hegemonia y decadencia de los veleros y sobre sus glorias y su utilidád [*De navigatione velica. Notae historicae*]. 8 fig., Iberica, a. XXIII, V. XLV, 1111, 161 y 170-174. Madrid (1906). **a - 48**

Recuerdos de los dias de la vela. Continuación del art. publicado en el vol. XLIII, 1043, 221 y 1070 p. 280. Continuarà.

**Gilfillan S. C.** - Inventing the Ship [*De historia navis inventionis et constructionis*]. 80 figs., 294 pp., Follett Publ. Co. Chicago (1935). **a - 49**

History of shipbuilding from its very origin until today, with special reference to its development during the last 150 years, containing most precise and complete information about the progress of the modern Navy.

**Gillespie R. St. J.** - Sir Nathaniel Dance's Battle off Pulo Auro [*De pugna navali Domini* Nathaniel Dance *longe a litoribus* Pulo Auro]. 4 pls., Mar. Mirr., XXI, 2, 162-186. London (1935).

( — ) Commodor Dance's Action off Pulo Auro. – Mar. Mirr., XXI, 4, 457-458. London (1935). **a - 50**

On hand of manuscript memoirs, written in 1825, of John Cunningham, Surgeon in the Royal Navy, and of a number of authentic facts and figures regarding Nathaniel Dance's battle with the French Admiral Linois off Pulo Auro, in the China Seas, the author gives a description of the battle drawing some conclusions which do not altogether agree with the commonly accepted accounts.

**Giorgi De Pons R.** - L'epoca dei clippers [*De navibus nomine* clippers]. Riv. Maritt., LXVIII, 11, 113-131. Roma (1935). **a - 51**

Volo d'uccello sul periodo velico della seconda metà del secolo passato. Caratteristiche dei clippers e loro principali imprese specialmente nei mari d'Australia.

**Goeje (de) C. H.** - Op den oceaan voor en na Columbus (met een oplossing van het raadsel van Antilia). [*De navigatione per Oceanum ante et post aetatem Columbianam. Solutio adiicitur aenygmatis ad insulas Antillas pertinentis*]. West-Ind. Gids 18, 65-81. ? (1936-37). **a - 52**

**Gorett J. M. L.** - The Mariner's Compass [*De buxida nautica*]. 3 fig. o. t., Journ. Amer. Soc. Nav. Engrs., XLVII, 2, 220-228. Washington (1935). **a - 53**

On the ancient history of the compass. The A. demonstrates the falsity of many ideas believed all over the world about this history, as, for instance, the fact that the compass was known in China still earlier than in Europa.

**Gould R. T.** - John Harrison and His Timekeepers [*Johannis* Harrison *eiusque chronometra*]. 1 frontisp., 6 pls., Mar. Mirr., XXI, 2, 115-139. London (1935). **a - 54**

Annual lecture for 1935 delivered at the Society for Nautical Research dealing with the man who first solved definitively the famous problem of finding longitude at sea and tracing the first development of the marine timekeeper. The later development of the construction of marine timekeepers under the stimulus of Harrison's example and success in other countries than Great Britain is also dealt with.

**Guillén J. F.** - Suggested Remains of a Carthaginian Boat [*De praesumptis relictis navis cuiusdam Carthaginiensis*]. 3 figs., Mar. Mirr., XXI, 2, 206-207. London (1935). **a - 55**

Description of some wooden remains appeared during the excavations now in progress in Albufereta, three kilometers north of Alicante, (Spain), ancient Roman port of Lucentum, which can be easily identified as a piece of washboard, falca, of a boat's beam.

**Hamilton R. C. & Ballard G. A.** - Commodore Dance's Action off Pulo Auro [*De pugna navali a Commodoro* Dance *peracta longe a* Pulo Auro]. Mar. Mirr., XXI, 3, 323-324. London (1935). **a - 56**

Two comments on Colonel Gillespie's article on « Commodore Dance's Action off Pulo Auro » published in « Mar. Mirr »., XXI, 2, pp. 163–186, 1935.

**Hammarsten H.** - Med « Thalatta » till Nordkap [*De navigatione, navi* « Thalatta » *peracta, ad* Nordkap]. Jorden runt 305-321. Stockholm (1934). **a - 57**

**Hennig R.** - Terrae incognitae. Eine Zusammenstellung und kritische Bewertung der wichtigsten vorkolumbischen Entdeckungsreisen an Hand der darüber vorliegenden Originalberichte. I. Altertum bis Ptolemäus [*Terrae incognitae. Relatio et investigatio critica explorationum majoris momenti quae temporibus prae-columbianis peractae fuerunt. I. Ab antiquis temporibus usque ad aetatem ptolemaicam*]. 384 pp., E. J. Brill. Leiden (1936). **a - 58**

**Hoel A.** - The Discovery of King Karl Land, Spitsbergen [*De inventa Terra Regis Caroli* (Spitsbergen)]. 1 map., Geogr. Rev., XXV, 3, 476-478. New York (1935). **a - 59**

Description of the probable early discovery of the King Karl Land by an English whaler in 1617 and its rediscovery by Elling Carlsen of Tromsö in 1859. Author shows that this Land has been discovered by E. Eriksen six years before Carlsen.

**Högbom I.** - Världssjöfarten [*De navigatione omnium gentium*]. 309 pp., maps, 6 tabl. Göteborg (1935). **a - 60**

An attempt to analyse the economical and geographical possibilities underlying the world's navigation. Trade and its relation to navigation. Important ports and their regions for sale. Different trade and passenger lines all over the world with a special regard to those of Northwestern Europe and their competition.

**Hornell J.** - Constructional Parallels in Scandinavian and Oceanic Boat Construction [*Comparatio inter Scandias constructiones scapharum et constructiones australienses*]. 6 figs., 6 pls. o. t., Mar. Mirr., XXI, 4, 411-427. London (1935). **a - 61**

The present note is mainly interrogative, for while it describes certain strangely close resemblances in the highly specialised technique of boat construction of two widely separated regions - Scandinavia and Western Oceania - author is unable to furnish conclusive evidence in favour of either of the hypotheses suggested to account for a common origin of these remarkable similarities.

**Hovdenak G.** - Roald Amundsens siste ferd. Med et tillegg om Krassin-Ferden av Adolf Hoel [*De ultima navigatione a* Roald Amundsen *suscepta. Supplementum adicitur de expeditione navis* « Krassin »]. Ills. & maps, 303 pp. Oslo (1934). **a - 62**

Geschichtlicher Ueberblick der Segelschiffe während 1780-1930. Vf. erörtert die verschiedenen Typen und die gradweisen Veränderungen, welche während der oben genannten Periode stattgefunden haben.

**Ioffe S. S.** - Le premier voyage soviétique du « Sadko » [*De prima navigatione navis sovieticae* « Sadko »]. (En russe). « Sadko » pod Sov. Flag. (« Sadko » sous Band. Sov.), 5-17. Ed. Glavsevmorputj, Leningrad (1935). **a - 64**

**Jourjev S.** - Sur une barque au-delà du cercle polaire [*De navigatione in scapha trans circulum polarem*]. (En russe). 4 ill., 1 carte. Morsk. Sborn., 10, 49-55. Leningrad (1935). **a - 65**

Expédition des élèves de l'Institut « Dzerzhinskij ».

**Jouzhine D.** - Les Colomb russes [*De navigatoribus russicis qui cum* Colombo *comparari possunt*]. (En russe). 1 fig., Karelo-Mourm. Kraj, 7, 24-26. Leningrad (1935). **a - 66**

A propos du bicentenaire de la Grande Expédition Polaire.

**Kammerer A.** - La Mer Rouge l'Abyssinie et l'Arabie depuis l'antiquité. Tome II. Les guerres du Poivre. Les Portugais dans la Mer Rouge et en Abyssinie [*De mari Rubro, Abyssinia et Arabia ab antiquis temporibus. Tomus II. De Lusitanis eorumque navigationibus in mare Rubrum et Abyssiniam*]. 7 tabl. synopt., 169 pl., 95 fig., 570 pp., I & II, Soc. R. Géogr. d'Egypte. Le Caire (1935). **a - 67**

Ces deux volumes ne sont pas uniquement la suite du tome 1er et peuvent être lus sans que soit nécessaire la connaissance du précédent. Le premier volume traite des guerres maritimes des Portugais dans la Mer Rouge dans le but de s'emparer du commerce des épices, et d'autres campagnes jusque dans l'Océan Indien. Le second volume est consacré à l'Histoire de la Géographie à la base des découvertes portugaises et surtout au développement de la cartographie scientifique, dans lequel les Portugais ont joué le premier rôle.

**Keigwin R. P.** - Admiral Nelson's Journey Trough Germany [*De itinere Almiragii* Nelson *per Germaniam*]. Mar. Mirr., XXI, 2, 153-157, London (1935). **a - 68**

A brief account with some quotations of a long article, published in a German naval officers' Journal M. O. V. June 15th and July 1st, 1934 by Christian Voigt on a Voyage of the Admiral Nelson in Germany in 1800.

**Koulyghine P.** - Le récit des héros [*Epos navigatorum navis* « Tcheljouskine »]. (En russe). 20 ill., 272 pp. « Daljghiz ». Moskva-Khabarovsk (1934). **a - 69**

L'épopée de l'équipage du brise-glace « Tchéljouskine ».

**Köster A.** - Studien zur Geschichte des antiken Seewesens [*De historia veteris artis navigandi*]. 1 Taf., 16 Abb., 155 S., Klio, Beiheft 32 (N. F. 19). Verl. Dieterich. Leipzig (1934). **a - 70**

Die hier vorliegenden Studien bilden eine wertvolle Ergänzung zu dem früher erschienenen Werke über das Antike Seewesen. Altägyptische Schiffe: Transportschiff für Obelisken, die Schiffahrt auf dem Nil (nach Herodot), die schwimmende Villa des Ptolemaios; persische und griechische Schiffe (Xerxes) und altnordische Schiffe.

**Krastine E. F.** - Activité de la flotte maritime dans l'Extrême Nord [*Res gestae a classe maritima in extremis septentrionalibus regionibus*]. (En russe). Za Osvojenije Arkt., 73-88. Leningrad (1935). **a - 71**

**Litke N.** - Traces de l'expédition Roussanov sur l'« Hercule », disparue sans nouvelles depuis 1913 [*De vestigiis expeditionis* Russanov *no-*

*mine, in navi* « Hercule » *quae dilapsa est sine ulla notitia*]. (En russe). 2 fig. Izv. Gos. Gheogr. Obstsch. (Bull. Soc. Géogr.) LXVII, 2, 255–257. Moskva–Leningrad (1935). **a - 76**

Bref compte-rendu de la trouvaille des traces de l'expédition Roussanov disparue depuis 1913, sur une île inconnue que l'on suppose être l'Ile de Vejsel et à laquelle on a attribué ce nom.

**Mac Millan Ch.** - Les Français et la découverte de l'Australie [*De Gallis deque inventa Australia*]. 1 carte, 3 grav. Géogr., Terre–Air–Mer. LXIV, 1, 10-19. Paris (1935). **a - 77**

Historique de la découverte de l'Australie et du rôle des Français dont il résulte le fait vraiment paradoxal, que le continent australien ait été annexé par les Anglais du fait des Français eux-mêmes. Compte rendu de l'expédition du Comte de la Perouse, basé en partie sur un extrait de son journal.

**Magnaghi A.** - Precursori di Colombo ? Il tentativo di viaggio transoceanico dei genovesi fratelli Vivaldi nel 1291 [*De* Vivaldi *fratribus eorumque navigatione transoceanica A. 1291*]. 6 carte, 155 pp. Mem. R. Soc. Geogr. Ital. XVII, 14. Roma (1935). **a - 78**

L'A. fa una compilazione dei manoscritti, delle carte e dei portolani antichi e dei libri, in cui sono segnalati i viaggi compiuti dai fratelli Ugolino e Guido Vivaldi, commercianti e navigatori genovesi del secolo XIII, che sarebbero partiti da Genova nel maggio 1291 avendo per iscopo di raggiungere le Indie passando per l'Atlantico. Si sa che dopo aver attraversato Gibilterra, navigato lungo il littorale africano occidentale raggiunsero una località detta « Gozora », sita probabilmente sulla costa marocchina vicino al Capo Jubyn laddove le loro tracce furono perdute. Sembra che volessero, facendo il periplo dell'Africa, raggiungere l'Etiopia.

**Manwaring C. E. & Dobrée** - The Floating Republic. An Account of the Naval Mutinies at Spithead and the Nore in 1797 [*De seditione navali in* Spithead *et* Nore *A. 1797*]. Geoffrey Bles Ltd. London (?). **a - 79**

Thanks to the patient and exhaustive research among temporary records undertaken by the A. A. this work is able to throw new light on the causes of this extraordinary revolutionary movement and their leader.

Le voyage du brise-glace « Ghéorghij Sjedov » vers la Terre de François-Joseph et la Severnaja Zemlia en 1930 [*De navigatione navis glaciei-ruptricis* « Gheorghij Siedow » *ad Terram Francisci Josephi et* Severnaja Zemlja *A. 1930*]. (En russe). 1 carte, 180 pp., Severn. Izd. Leningrad (1932). **a - 86**

**Murray K. M. E.** - The Constitutional History of the Cinque Ports [*De historia constitutionali quinque Portuum*]. Univ. Press. Manchester (1936). **a - 87**

**Nani Mocenico M.** - Storia della Marina Veneziana da Lepanto alla caduta della Repubblica [*De historia Classis Venetae a proelio Naupacto ad exitum Rei Publicae*]. 73 tav., f. t. iii + 384-xxxix pp. Litografia dell'Ufficio di Gabinetto, Ufficio Storico della R. Marina, Edit., Roma (1935). **a - 88**

L'organizzazione navale veneziana da Lepanto alla caduta della Repubblica. La Marina veneziana dopo Lepanto. Gli Uscocchi. La guerra Ispano-Veneta. Altri avvenimenti navali fino al 1644. La guerra di Candia (1644-1669). La Marina veneziana dopo la perdita di Candia. La guerra di Morea (1684-1699). La Marina veneziana al principio del secolo VIII. La guerra di Corfù (1714-1718). La Marina veneziana dopo il trattato di Passarowitz. Le spedizioni contro gli Stati Barbareschi. Fine della Marina veneziana.

**Nielsen A. K.** - Marco Polos Rejser [*De navigationibus a Marco Polo peractis*]. 303 S., Gyldendal, København (1935). **a - 89**

**Nishimura S.** - The Karriwa-Buné or Birch-Bark Canoe [*De scapha* K-B *seu canoa ex typo* B-B]. Figs., pls., fold. map. Soc. Nav. Architects. Tokyo (1931). **a - 90**

This work is vol. VIII of a Study of Ancient Japanese Ships and concludes the survey of skin-boats.

**Nordhoff Ch. & Hall H. J.** - Les mutins de la « Bounty » [*De seditiosis navis* « Bounty »]. (Trad. de l'Angl.). 316 pp., Ed. Nouv. Rev. Critique, coll. « Tours d'Horizon », Paris (1935). **a - 91**

Récit traduit de l'anglais, des tragiques évènements qui se déroulèrent à la fin du XVII-ème siècle sur le vaisseau armé de Sa Majesté britannique et qui constitue un roman d'aventures le plus surprenant dans les annales de la Marine anglaise; la relation officielle de Sir John Barron a fourni les données pour l'évocation magnifique de cette incroyable aventure de mer.

**Nouhuys (van) J. W.** - Crooked-Stern Craft [*De navibus, puppis praeditis asymmetricis*]. Mar. Mirr., XXII, 1, 109-110. London (1936). **a - 92**

Some observations on a peculiarity in the construction of Venitian gondolas, which all have an obvious list to starboard. Author claims that very little attention has been paid to this famous type of boat.

**Nunn G. E.** - The Columbus and Magellan Concepts of South American Geography [*Conceptiones Columbianae et Magellanicae pro geographia Americae meridionalis*]. 7 charts, 2 maps o. t., 58 pp., Priv. print. Glenside (1932). **a - 93**

By means of a comparison between the opposite opinions of these cosmographs of the XVIth century, the existence of two theories concerning the identity of Asia and America in those remote times is pointed out.

**Nunn G. E.** - The Mappemonde of Juan de la Cosa. A Critical Investigation of its Date [*De mappamundi ad Johannem* de la Cosa *pertinente. Investigatio critica circa tempus eius delineationis*]. 2 maps. o. t., 52 pp., G. H. Beans. Libr., Jenkintown (1934). **a - 94**

The mappemonde of Juan de la Cosa seems to be issued in 1500; its author took part in the first two voyages of Columbus. Claiming however that Juan de la Cosa has known other charts of the same region the A. of the note places the data of the issue of the Mappemonde in the years 1507-1508 instead of the year 1500.

**Orlovskij P. V.** - Traces de l'expédition de V. A. Rousanov [*De vestigiis expeditionis* V. A. Rusanov]. (En russe). Sev. Morsk. Putj, II, 39-44. Leningrad (1935). **a - 95**

**Ouchakov, Zoubov, Nikolaev, & Volodarskij.** - Vers les hautes latitudes [*De navigationibus ad altas latitudines*]. (En russe). Sovj. Arkt., 2, 87. Leningrad (1935). **a - 96**

Le premier radiogramme du «Sadko» de Barentsbourg.

**Oulie M.** - La vie maritime aux Antilles [*Vita maritima in insulis Antillis*]. 10 fig. Mer & Outre-Mer, n.° avr., 1-6. Paris (1936). **a - 97**

Histoire de la découverte des Antilles par les espagnols; les embarcations des indigènes; histoire de la conquête des Antilles par les français; la lutte avec les anglais; les Antilles pendant la Révolution; description des côtes des Antilles et de la pêche autour et au large de ces îles.

**Ostrovskij B. G.** - La Grande Expédition Polaire, 1733-1743 [*De navigatione ad Polum. 1763/1773*]. (En russe). Ill., 137 pp., Sevkrajghiz., Arkhangheljsk (1935). **a - 98**

**Outhwaite L.** - Unrolling the Map. The Story of Exploration, with Drawings of Ships by Gordon Grant [*Historia explorationum maritimarum cum adumbrationibus quae naves repraesentant, per* G. Grant]. Figs., 56 maps, xiv + 351 pp. Constable, London (1935). **a - 99**

Being a seaman and a scholar in anthropology A. gives a methodic account of the exploration of the world. He does not only give a simple list of conquered countries and of crossed seas, but tries also to penetrate the intentions and the aims of the travellers, as well as the secret reasons which obliged them to act in the way they did.

**Paier J.**, trad. & rev. **Retovskij I. & L.** - 725 jours dans les glaces de l'Arctique [*De navigationibus per glacies arcticas 725 dies*]. (En russe). Ill., 3 cartes h. t., 301 pp., Ed. Glavsevmorputj, Leningrad (1935). **a - 100**

Traduction de l'ouvrage fondamental sur l'expédition polaire austro-hongroise, 1871-1874.

**Pitcairn J. Ch. G.** - Pakenham on Masting [*De domino* Pakenham *eiusque scriptis quoad navium malos*]. 3 figs., Mar. Mirr. XXI, 4, 454-455. London (1935). **a - 101**

Translation of a letter found in a volume of papers on Naval Architecture published by the proprietors of the «European Magazine»(1793) and containing Captain Pakenham's remarks about the difficulty and expense of remasting ships on foreign stations.

**Prestace E.** - The Portuguese Pioneers [*Primi exploratores Lusitani*]. Maps, xiv + 352 pp. (The Pioneer Histories), A & C. Black Ltd., The Macmillan Co., London & New York (1933). **a - 102**

History of Portuguese over-sea expansion; an up-to-date account of the origins and development of the nautical science in the Iberian Peninsula; author provides «a broad survey of a great migration» and its course from the expedition to Ceuta in 1415 down to the settlement in Macao in 1557.

**Prianichnikov D.** - L'histoire de la conquête de l'Arctique [*Historia explorationum per Arctidem*]. (En russe). 1 carte, 12 fig., Nauka i Jiznj, 4, 9-20. Moskva (1935). **a - 103**

**Quinn D. B.** - Edward IV and Exploration [*De Eduardo IV deque explorationibus maritimis*]. Mar. Mirr., XXI, 3, 275-284. London (1935). **a - 104**

An account of the few scraps of information pieced together by the Author containing evidence of the precise nature and extent of English expansion under the reign of Edward IV, which is peculiarly important in the development of English overseas commerce. The article is completed by the full text of the various documents which are commented by the Author.

**Ramusio G. B.** (trad. par **Langlois & Simon J.**) - A la découverte de l'Amérique du Nord. Navigation et voyages [*De navigationibus ad inveniendam Americam Septentrionalem*]. 1 Carte h. t., 120 pp., André Hevet. Paris (1933). **a - 105**

Traduction d'une partie du troisième volume de l'ouvrage de Ramusio, écrit en italien vers 1553; elle contient une série de lettres, de discours et de rapports écrits ou prononcés par des personnages en vue de cette époque et se référant à la découverte de l'Amérique. Entre autre, on y trouve deux pièces illustrant les voyages de découverte de Verazzano et ses successeurs sur la côte orientale de l'Amérique, depuis Terre-Neuve jusqu'à la Floride et au Brésil.

**Richter B.** - Amundsen sur les côtes russes [*De exploratore* Amundsen *in litoribus russicis*]. (En russe). Photos. Sovj. Arkt. 2, 66-70. Leningrad (1935). **a - 106**

**Rose J. H.** - The Royal Navy and the Suppression of the West African Slave Trade (1815-1865). [*De regia classe Britannica deque suppressa servitute in regionibus Africae meridionalis (1815-*

*1865) Pars 1ª*]. 2 tables. Mar. Mirr. XXII, 1, 54-64. London (1936). **a - 107**

The first of two articles, in which author describes the work of British Preventive Squadrons off West Africa, the Cape, Brazil and the Caribbean Sea in their effort to suppress slave trade, on hand of data contained in some of the 1529 volumes, including the dispatches on this subject from 1815 to 1878 and relegated to the Archives of the British Foreign Office.

**Rothschild (de) H.** - Tour du Monde [*De navigatione per orbem*]. 284 pp., Hachette. Paris (1936). **a - 108**

**Roussier P.** - L'établissement d'Issiny, 1687-1702 [*De condita colonia Gallica, nomine* Issiny. *1687/1702*]. 12 pl., 1 carte h. t. 241 pp. Publ. Com. Hist. Scient. Afrique Occid. Franç., Sér. A, n. 3. Larose. Paris (1935). **a - 109**

Voyages de Ducasse, Tibierge et d'Amon à la Côte de Guinée publiés pour la première fois et suivis de la Relation du Voyage du Royaume d'Issiny du P. Godefroy Loyer. Relations des voyages des précurseurs de la création de la colonie française de la Côte d'Ivoire, complétées d'un historique très complet des évènements qui sont survenus dans ces parages à la fin du xvii-ème siècle.

**Rouzov L. V.** - Un des hivernages (sur le Cap Tchéljouskine) [*De hiematione in promunturio* Tscheljuskin]. 3 fig. Sovj. Arkt. 1, 57-62. Leningrad (1935). **a - 110**

**Ruthven J. F.** - Good Keeping of the Seas. A New History of « Elizabethan England », Afloat and Ashore [*De optima marium dominatione. Historia recens Angliae, temporibus reginae Elisabethae*]. Mar. Mirr. XXI, 2, 158-162. London (1935). **a - 111**

Review on some of the outstanding essentials of the co-ordinated History of the Elizabethan era in relation to Foreign Powers, four volumes of which, ranging from 1553 to 1583 are now in hands of the subscribers. The work has been undertaken by E. M. Tenison, Member of the Society of Nautical Research.

**Rutter Owen** (Ed.) - Mr Glasspoole and the Chinese Pirates [*De domino* Glasspoole *deque piratis Sinensibus*]. Engravings, 64 pp. The Golden Cockerel Press. London (1935). **a - 112**

Account of the history of piracy in the China seas since antiquity until nowadays.

**Samoilovitch R. L.** - La lutte pour l'Arctique [*De navigationibus in regiones Arcticas*]. (En russe). Nov. Mir III, 213-231. Moskva (1935). **a - 113**

**Samojlovitch R. L.** - De l'histoire des explorations arctiques [*De historia explorationum per Arctidem peractarum*]. (En russe). Za Osvoj. Arkt., 49-62. Leningrad (1935). **a - 114**

**Sempolowska S.** - Na Ratunek [*Auxilia quae lata sunt aëronavi* « Italia »]. 316 pp., Towarz. wydawn. « Roj ». Warszawa (1934). **a - 115**

Sur l'expédition du dirigeable « Italia » et les expéditions de sauvetage du « Krassine » et du « Malyghine ».

**Sherwood M.** - The Voyage of the « Tai-Mo-Shan » [*De navigatione navis* « Tai-Mo-Shan »]. Ill. photos. Geoffrey Bles Ltd. London (1935). **a - 116**

Description of a voyage undertaken by five young English naval officers in the spring of 1932 from the China station to Japan, Alaska, down the coast of America to Panama and through the canal into Atlantic.

**Smith D. B.** - The Naval Mutinies of 1797 [*De seditionibus navalibus A. 1797*]. Mar. Mirr., XXI, 4, 428-449; XXII, 1, 65-86. London (1935). **a - 117**

After a quotation of some previous works issued on the naval mutinies of 1797, A. communicates the results of his study of the records about the mutiny and draws some conclusions that are entirely different from those arrived at by other historians of the mutiny. In the XXII vol. are recorded the events at Spithead on Easter Sunday 1797 with special regard to the Fleet Petition and the proceedings on board the « Queen Charlotte ».

**Sottas J.**, transl. from the French by **Milne-Thomson L. M.** - A model of the Portus Ship [*Exemplar navis in portu Ostiensi*]. 3 pls. Mar. Mirr., XXI, 2, 144-152. London (1935). **a - 118**

This article concerns a ship that forms a part of a marble basrelief (Emperor Claudius) discovered in the ruins of a portico surrounding the ancient harbour of Ostia.

**Szymanski H.** - Deutsche Segelschiffe [*Naves germanicae velis euntes*]. 93 Abb., 158 Phot., 92 Taf., E. S. Mittler & Sohn. Berlin (1935). **a - 119**

Geschichte der hölzernen Frachtsegler vom Ende des 18. Jahrhunderts bis zur Gegenwart. Beschreibung verschiedener Typen, ihre Bau- u. Verwendungsart.

**Thomas M. S.** - Onze Ijslandvaarders in de 17 de en 18 de eeuw. Bijdrage tot de geschiedenes van de Nederlandsche handel en visscherij. [*Navigatores qui Islandiam exploraverunt sec. xvii et xviii*]. 17 Kart., Abb., 284 S. Mij. Enum. Amsterdam (1935). **a - 120**

Akademische Abhandlung. Das Werk ist auf gründliche Quellstudien in holländischen, dänischen und schwedischen Archiven aufgebaut und behandelt hauptsächlich Handel und Fischerei. Eine Anzahl Reproduktionen von Karten und verschiedenen Schiffstypen vom 17. und 18. Jahrhundert sind auch enthalten.

**Tornoe J. H.** - Hvitserk og Blåserk [« *Tunica alba* » *et* « *Caerulea tunica* » *nomina haec sunt duobus montibus quorum alter in Islandia, alter in Groenlandia*]. (In Norw., Engl., Rés.). 1 map. Norsk Geogr. Tidsskr., V, h. 7, 3, 429-443. Oslo (1935). **a - 121**

Old tales on the first discovery of Greenland. Identification of the two mountains called « Hvitserk » and « Blåserk » situated respectively in Iceland and Greenland which are said to have been sighted both at the same time from the sea by the first discoverer.

**Trolle A.** - Beretning om M/S « Thor's » Havundersøgelsetogt 1934 [*Relatio circa explorationem motonavis* « Thor »]. Publ. Østgrønland, 3. København (1935). **a - 122**

**Wafer L.** - A New Voyage and Description of the Isthmus of America [*De nova quadam navigatione et descriptione isthmi Americani*]. Ser. 2, LXXIII. Hakluyt Soc. Edw. Quaritch, Ltd. London (1934). **a - 123**

Edited by L. E. Elliot Joyce. Wafer was surgeon on the Buccaneering Expeditions in Darien, the West Indies and the Pacific from 1680 to 1688. Report on Wafer's secret (1698) and Davis's Expedition to the Gold Mines (1704).

**Clissold & Tweddell** - Brown's Nautical Star Chart. [*Tabula stellarum*]. Brown, Son & Ferguson Ltd. Glasgow (1935). **a - 152**

Diagram of the position of the principal navigational stars on a Mercator projection of the celestial sphere.

**Cluett Sandford L.** - Offshore Position by Sextant Altitude of Mountain Peak [*Positio navis ex mensura altitudinis montis cuiusdam*]. 4 figs., & 1 diagr. U.S. Nav. Inst. Proc., LXI, 393, 1665-1669. Annapolis, Md. (1935). **a - 153**

On a simple formula and a diagram useful for determining the distance of a mountain peak that lies beyond the horizon.

**Cornisch V.** - Scenery and the Sense of Sight [*Quaestio de visione*]. 9 pls., 111 pp. Univ. Press, Cambridge (1935). **a - 154**

Author tries to establish the relationship existing between the visual impressions and the real dimensions of the view embraced by our eyes. The results of observations are summarized in 9 comprehensive plates; they have been obtained both in high mountains and on the sea shore.

**Crockett G. R.** - A Position Indicator Machine [*Apparatus qui punctum indicat*]. Naut. Mag. Aug. 123-127. Glasgow (1935). **a - 155**

**D'Ambrosio R.** - Il « Fusorario D'Ambrosio » come orologio universale specialmente adatto per la Marina e per l'Aviazione [*Agitur de apparatu cui nomen est « Fusorario d'Ambrosio ». De hoc agitur idem ac de horologio universo pro navigatione maritima et aeria*]. Atti Soc. It. Progr. delle Scienze - XXIII Riunione, II 259-262. Roma (1935). **a - 156**

L'autore descrive il suo *Orologio Universale Fusorario D'Ambrosio* che indica l'ora legale, quella media locale e la data per un luogo qualsiasi della Terra.

**Del Pino** - Navigazione costiera: discussione sul metodo da adottarsi a bordo per determinare il punto nave allorchè si hanno a disposizione soltanto due punti noti della costa [*Navigatio litorea: Discussio de rationibus adhibendis ad navis positionem determinandam quandoque duobus punctis tantum in litoribus constitutis uti fas est*]. 3 fig., Marina It., 19, 303-304. Genova (1934). **a - 157**

È indicato un metodo col quale il punto nave può essere determinato sempre con sufficiente approssimazione qualunque sia l'angolo di intersezione fra le visuali ai due punti. Dimostrata poi la convenienza di sostituire nella pratica di bordo questo metodo a quello consueto dei due rilevamenti si indicano i casi nei quali il metodo stesso è particolarmente raccomandabile.

**Dijèvre** - Point autour de Midi [*De altitudinibus circummeridianis*]. Rev. Marit., Juillet. Paris (1935). **a - 158**

Utilisation des hauteurs circumméridiennes pour la navigation moderne des navires rapides. Tableaux qui précisent la différence entre le passage au méridien et la culmination observée d'un navire en marche. Tables permettant un calcul rapide de la droite circumméridienne. Limites des circumméridiennes.

**Dzerdzeevskij V. L.** - Service du Temps et son travail dans l'Arctique [*De officio condicionibus atmosphaericis providendis in regione Arctica eiusque muneribus*]. (En russe). Sov. Arkt. 1, 31-34. Leningrad (1935). **a - 159**

**Ehlerding C. W.** - Das Beidrehen mit Dampfern in schwerem Wetter [*De decursu navium tempestatibus perdurantibus*]. Seewart, IV, 3, 121-123. Hamburg (1935). **a - 160**

Nach einigen allgemeinen Betrachtungen über die Wichtigkeit eines richtigen Manövers für die Sicherheit von Schiff und Menschenleben beim Beidrehen mit Dampfern in schwerem Wetter, illustriert Vf. seine Ausführungen mit der Beschreibung eines der Praxis entnommenen Falles eines Schiffes auf der Reise nach Ostasien in der Biskaya.

**Ehlerding C. W.** - Nächtliche Gestirnsbeobachtungen zur Bestimmung des Schiffsorts [*De nocturnis observationibus astronomicis ad navis positionem determinandam*]. 3 Taf. Seewart, IV, 6, 250-256. Hamburg (1935). **a - 161**

Beschreibung der vom Vf. seit 1930 unternommenen Beobachtungen, welche 132 verschiedene Reihen mit rund 1000 Einzelbeobachtungen umfassen, Anweisungen für den Aufbau und die Anwendung des Versetzungsdiagramms; Ungenauigkeiten bei Versetzungskurven; die Bedeutung der Kimm. Musterbeispiel dieser Nachtbeobachtungen.

**Ehlerding C. W.** - Die Verwendung des Funkpeilers in der Navigation [*De utendo radiogoniometro in navigando*]. 1 Taf. a. T. Seewart, V, 3/4, 101-104. Hamburg (1936). **a - 162**

Gewöhnliche Fehler bei sowohl optischen als Funkstrahlpeilungen bei wachsender Entfernung vom Peilobjekt. Anwendungsmöglichkeiten des Funkpeilers erläutert durch Beispiele, die den Vorteil des Funkpeilers hervorheben.

**Ehlerding C. W.** - Sternbeobachtungen zur Bestimmung des Schiffsortes bei Tageslicht [*De diurnis observationibus stellarum ad navis positionem determinandam*]. I Taf. Seewart V, 8/9, 261-264. Hamburg (1936). **a - 163**

Vorteile dieser Beobachtungen, Anweisungen. Kritische Bemerkungen zu der Arbeit von R. E. Thomas « Stowage ».

**Farvell R. F.** - Special Circumstances [*De locutione « special circumstances » idest « Condiciones abnormes »*]. U. S. Nav. Inst. Proc., LXI, 393, 1597-1608. Annapolis, Md. (1935). **a - 164**

On the danger of the phrase special circumstances included in the International Rules to avoid collisions. Examples.

**Grambow J. B.** - Der Unterschied zwischen loxodromischer und orthodromischer Distanz [*De differentia inter distantiam loxodromicam distantiamque orthodromicam*]. 3 Tab., Seewart, V, 5, 145-152. Hamburg (1936). **a - 176**

Die Arbeit beschäftigt sich mit der Feststellung der maximalen Wegersparnis, welche sich durch Vergleich des loxodromischen mit dem orthodromischen Wege ergibt. Ein absolutes Maximum wurde für einen Ost-West-Kurs auf Breite - 39°32' bei einem Längenunterschied von 180° gefunden. Die loxodromische Distanz beträgt hier 8329 Sm, die orthodromische 6056 Sm und somit die Wegersparnis 2273 Sm. (Vf.).

Leningrad (1935). **a - 191**

**Matussevic N.** - On Fixing the Position of a Ship by means of two Angles [*De navis positione per duos angulos tantum calculata*]. (En russe). Zapiski po Hidrogr., 1, 40-56. Leningrad (1934). **a - 192**

**Meldau-Steppes** - Lehrbuch der Navigation. 2. Aufl. [*Liber de arte navigandi. Editio II°*]. Bremen (1935). **a - 193**

Diese neue Auflage ist besonders in Bezug auf den II. Teil (den Magnetkompass, die neuzeitlichen Instrumente und das Funkpeilwesen) erweitert worden. Der I. Teil behandelt, wie früher, ohne grössere Veränderungen oder Erweiterungen, die Grundlagen der Kartenprojektion und die Entwicklung der Karten, die astronomische Navigation und Gezeitenerscheinungen.

**Naccari G.** - Atlante astronomico. [Atlas astronomicus]. (Terza edizione rinnovata ed ampliata dal dott. Attilio Colacevich, con prefazione del prof. Giorgio Abetti). xvi-136 pp., 71 tav. f. t. Tip. Stabil. della Casa Editrice dott. Francesco Vallardi, Milano (1935). **a - 194**

È opera di divulgazione. Pur conservando le caratteristiche e l'ordinamento datovi dal prof. Naccari, è stato possibile al dott. Colacevich di rinnovare in gran parte le Tavole, aggiornando anche la parte descrittiva la quale, ad illustrazione e maggior intendimento delle Tavole stesse, costituisce un breve trattato di Astronomia elementare.

**Neuberg H.** - Bemerkungen zu G. Boljahn « Sichtmessungen auf See an der Kimm » [*De observationibus a* G. Boljahn *peractis*]. 1 tab., Ann. d. Hydrogr., LXIII, 4, 176-177. Berlin (1935). **a - 195**

Einige Bemerkungen, in welchen uns Vf. darauf aufmerksam macht, dass die in der Boljahnschen Abhandlung entwickelte Kimmethode der Sichtmessung nur einen beschränkten Anwendungsbereich hat.

**Nobile V.** - Sulla possibilità di nuovi indirizzi della teoria della refrazione astronomica e di occasionali contributi alla fisica dell'atmosfera. [*Ratio refractionis astronomicae. Contributiones ferendae in Physicam atmosphaericam.*]. Nota I e II. Atti R. Acc. Naz. Lincei – Rend. Cl. Sc. fis., mat. e nat., serie VI, v. XXI, fasc. 9-10, 615-620, 675-678. Roma (1935). **a - 196**

Premesso come la costruzione di una teoria rigorosa della refrazione astronomica si trovi presto arrestata nel suo sviluppo a causa della insufficienza dei dati sulla costituzione fisica dell'atmosfera e notato come le ipotesi avanzate per rimediare a quella insufficienza abbiano carattere di arbitrarietà e di incertezza, si dimostra qui come da una inversione del processo tradizionale siano da attendersi decisivi progressi sia nel problema geofisico (costituzione dell'atmosfera) che in quello che interessa l'astronomia.

L'A. décrit une méthode de construction de la droite d'azimut sur une projection de Mercator, en appliquant laquelle, au lieu de calculer, comme on le fait généralement la différence entre les azimuts loxodromiques et orthodromiques du radiophare ou du navire, on calcule la distance $\delta$ entre le radiophare (ou le poste radiogoniométrique) et le point de rencontre du méridien de ce point avec la tangente à l'orthodromie au navire dans le cas d'un radiophare ou avec une parallèle menée du navire à la tangente à l'orthodromie au poste dans le cas d'un poste radiogoniométrique. Avec cette méthode on obtient des résultats particulièrement simples pour les deux premiers termes du développement.

Il volume consta di due parti: nella prima si trovano riuniti gli elementi relativi al Sole, alla Luna ed ai grandi pianeti, poi quelli relativi alle stelle fisse, ed un breve accenno agli eclissi di Sole e di Luna. La seconda parte contiene diverse tavole di uso corrente nei calcoli della navigazione astronomica.

**Marine Superintendent** - The Marine Observer, 1936 [*Periodicus* The Marine Observer *1936*]. Mar. Obs., XIII, 121. 3. H. M. Stat. Off. London (1936). **a - 239**

Account of the programme and the articles to be published in « The Marine Observer », 1936.

**Société Anonyme des Instruments de Géodésie H. Wild** - Nouveau Sextant H. Wild [*De novo quodam sextante* H. Wild]. 1 table, Rev. Hydrogr., XII, 2,121-122. Monaco (1935). **a - 240**

Description de l'instrument.

**Société Française Radio-Electrique** - Détecteur d'obstacles type S. F. R. – D. 16 [*Apparatus qui obstacula detegit, typus S. F. R. – D. 16*]. 8 fig. dont 3 h. t. Rev. Hydrogr. XIII, 1, 116-121. Monaco (1936). **a - 241**

L'inventeur est M. Ponté. L'instrument permet de détecter un obstacle à 7 km. On peut encore déceler un bateau de pêche à 3 km. et une bouée à 1 km. 500.

**U. S. Bureau of Standards** - Directional Radio as an Aid to Marine Navigation [*Radiodirectio ac auxilium navigationi ferendum*]. Journ. Franklin Instut. March. 365. Philadelphia, Pa. (1935). **a - 342**

On U. S. radiolights and radiogoniometers. Results of experiences. The present situation.

**An.** - Rostschutz für Messgeräte und Instrumente [*Protectio apparatuum pro mensurationibus*]. Allg. Vermess.-Nachr. 11. Okt. 524. Liebenwerda (1935). **a - 243**

**An.** - Nautical Ephemerides – Ephémérides nautiques [*Ephemerides nauticae*]. (In Engl. & French). Int. Hydrogr. Bull. – Bull. Hydrogr., Int., III, 64. Monaco (1935). **a - 244**

Provisional list of countries which publish nautical ephemerides with the date of the inauguration of the publication.

**An.** - Centralisation of Notices to Mariners in the Principal Ports of the World – Centralisation des Avis aux Navigateurs dans les ports principaux [*Agitur de monitionibus ad usum navigatorum in praecipuis orbis portibus colligendis*]. (In Engl. & French). Int. Hydrogr. Bull. – Bull. Hydrogr. Int., IV, 79-87. Monaco (1935). **a - 245**

Resolution 36 and 36a of the 1929 Internationa- Hydrographic Conference (Repertory of Technical Resolutions, 1930, p. 40, nº 21, paragraphs 1 to 5). The present is a provisional list of the Ports where the centralisation Service is operating with the addresses of the centralizing Offices and lists of the Notices to Mariners, which cancels the lists published previously in « International Hydrographic Bulletin, XI, 1930, p. 246; Circular Letter nº 9H, 18. XII, 1933 and Supplements A, B, C & D; Circ. Lett. nº 2-H, 12, III, 1934; and « Int. Hydrogr. Bull. », nº 1, 1935, p. 3).

**An.** - E. D., P. D., P. A. Dangers – Dangers E. D., P. D., P. A. [*Pericula E. D., P. D. et P. A.*]. (In Engl. & French). Int. Hydrogr. Bull. – Bull. Hydrogr. Int., IV, 91. Monaco (1935). **a - 246**

(See also: « Petermanns Mitteilungen, Juni, 1935, S. 139). Dangers of doubtful existence with reference to the Podesta Island (32° 14' S. 89° 09' W.) and to the Nimrod Islands group. (nº 249 of the General List published by the I. N. B.).

**An.** - Units of Length – Nautical Mile – Unités de longueur – Mille marin [*Longitudinis unitates. Miliarium marinum*]. (In Engl. & French). Int. Hydrogr. Bull. – Bull. Int. Hydrograph., V, 104. Monaco (1935). **a - 247**

Account of the official information received by the International Hydrographic Bureau from the U. S. Hydrographic Office and the U. S. Coast and Geodetic Survey, in order to inform that a nautical mile equal to 1852.248 meters used for years, is still in use in the U. S. A. Navy.

**An.** - Centralisation of Notices to Mariners in the Principal Ports of the World-Centralisation des Avis aux Navigateurs dans les ports principaux [*Agitur de monitionibus ad usum navigatorum in praecipuis orbis portibus colligendis*]. (In Engl. & French). 1 table, Int. Hydrogr. Bull. – Bull. Hydrogr. Int. VI, 111-119. Monaco (1935). **a - 248**

Resolutions 36 and 36a of the 1929 International Hydrographic Conference (Repertory of Technical Resolution, 1930, p. 40, nº 21, paragraphs 1 to 5). Revised list of the Ports where the Centralisation Service will be operating in 1936 with the addresses of the centralizing offices and lists of the countries which send their notices to each. The list contains all information received at the International Hydrographic Bureau up till last December 1935.

**An.** - Exhibition of Instruments – Exposition d'Instruments [*De instrumentis. Expositio*]. (In Engl. & French). Int. Hydrogr. Bull. – Bull. Hydrogr. Int., VI, 119-120. Monaco (1935). **a - 249**

List of additional instruments received by the International Hydrographic Bureau for its permanent exhibition.

**An.** - Notice to Mariners – Avis aux Navigateurs [*Notitia ad usum navigatorum*]. (In Engl. & French). Int. Hydrogr. Bull. – Bull Hydrogr. Int., VI, 124. Monaco (1935). **a - 250**

Information on the establishment of a fog signal of the TYPHON system in the Sea of Marmara at Marmara Islands - Hairsiz-Ada Islet.

**An.** - Notices to Mariners – Avis aux Navigateurs [*Monitiones ad usum navigatorum*]. (In Engl. & French). Int. Hydrogr. Bull. – Bull. Hydrogr. Int., 1, 5. Monaco (1936). **a - 251**

Information on the reorganization of the publication of the Notices to Mariners issued in the Commonwealth of Australia and in the Territories under its control.

**An.** - Centralisation of Notices to Mariners in the Principal Ports of the World – Centralisation des Avis aux Navigateurs dans les ports principaux [*Agitur de monitionibus ad usum navigatorum in praecipuis orbis portibus colligendis*]. (In Engl. & French). Int. Hydrogr. Bull. – Bull. Hydrogr. Int., I, 6-7. Monaco (1936). **a- 252**

(See « Int. Hydrogr. Bull. », VI, p. 111, 1935). List concerning the centralisation of Notices to Mariners, received during the month of January 1936 by the International Hydrographic Bureau. Corrections to be inserted in the list of ports in which the Centralisation Service operates.

**An.** - Notices to Mariners by W/T – Avis aux Navigateurs télégraphiques [*Monitiones ad usum navigatorum per telegraphum*]. (In Engl. & French). Int. Hydrogr. Bull. – Bull. Hydrogr. Int., II, 23. Monaco (1936). **a - 253**

Information on a letter of the Hydrographer of Equador containing the notices that the Naval W/T stations HGG will give Notices to Mariners as soon as NAA (Washington, Arlington) has given the meteorological report.

**An.** - Centralisation of Notices to Mariners in the Principal Ports of the World – Centralisation des Avis aux Navigateurs dans les ports principaux [*Agitur de monitionibus ad usum navigatorum in praecipuis orbis portibus colligendis*]. (In Engl., & French). Int. Hydrogr. Bull. – Bull. Hydrogr. Int., II, 23-24. Monaco (1936). **a - 254**

(See « Int. Hydrogr. Bull. », I, p. 6, 1936). Further information concerning the centralisation of Notices to Mariners in ports of the Commonwealth of Australia, in the Oriental Republic of Uruguay, Italy, and Great Britain.

**An.** - Fog Dissipation [*Caliginis dissipatio*]. Journ. Franklin Instit. March 262. Philadelphia, Pa (1935). **a - 255**

**Pierrottet E.** - Verso la risoluzione del problema generale di stabilità delle navi [*De solvendo problemate quoad navium stabilitatem*]. Ann. Vasca Naz. Esper. Arch. Nav., III, 94-99. Roma (1933). **a - 273**

La soluzione consiste nel valutare in modo semplice la entità massima delle azioni esterne capaci di operare su un bastimento, nel supporle tutte contemporaneamente agenti e nello stabilire che sotto questa contemporaneità il bastimento non superi una determinata inclinazione massima. A conclusione e come preludio alla risoluzione pratica del problema di stabilità delle navi, l'A. presenta al Congresso uno: « Schema di regolamento per la verifica della stabilità dei galleggianti ».

**Putnam G. R.** - New Safeguards for Ships in Fog and Storm [*Auxilia nova pro navigatione per caliginem atque tempestates*]. 30 figs., Nat. Geogr. Mag., LXX, 2. Washington (1936). **a - 274**

Algunas cifras correspondientes al tonelaje de conjunto que ha sido desguazado durante los cinco ultimos años, en las flotas mercantes de las principales naciones.

**An.** - Pollution of the Sea by Oil [*Aquae marinae ab oleo pollutio*]. 32 pp., Edition of the League of Nations. For sale by Carl Heymanns Verl. Berlin (1935). **a - 280**

The first part describes the ever growing serious pollution of the sea by oil, which has necessitated measures of protection to be taken. The second part deals with the international co-operation which has resulted in the publication of a Memorandum of the damages caused, and a resolution on the construction of special apparatuses to clean the water from oil. These apparatuses are dealt with in the Supplements I and II of the work where the points of view of the different countries on the problem also are included.

**An.** - Advocates Abnormal Intensifier for Fog-Piercing Lights [*De peculiaribus reflectoribus in pharis contra caliginem*]. Fish & Oyst. Rep., XVI, 4, 8. Tampa, Fla. (1935). **a - 281**

Summary of a technical paper by Mr. Gjon Mili presented before a joint meeting of the American Physical and Optical Society, in which he shows that burning incandescent lamps over-voltage in special reflectors or lenses would increase the candlepower of fixed marine signal lamps a thousand-fold and increase visibility in a given direction in fogs by as much as three times.

Art. 35: Meteorological Services. Art. 36: Ice Patrol. Derelicts. Art. 37: Ice Patrol. Management and Coast. Art. 38: Speed near ice. Art. 39: North Atlantic Routes. Art. 40: Transmission of information. Information required.

**An.** - Safety of Life at Sea [*De securitate in navigando*]. Mar. Obs., XIII, 122, 44-45. London (1936). **a - 284**

Some considerations concerning the organisation of the information of marine disasters to be given by « The Marine Observer » and the importance of routine observations, as well as of « additional remarks » to provide valuable information on hazard which could be avoided.

**An.** - La campagne héroïque. La « Pravda » sur l'expédition polaire du « Tchéljouskine » [*Expeditio egregia. Ephemeris* Pravda *refert de navigatione ad polum navis* « Tscheljouskin »]. (En russe). Ill., 46 pp., « Pravda » & IZOGHIZ. Moskva (1934). **a - 285**

Album dans lequel on a recueilli sur 46 pages du format journal tout le matériel publié par la presse centrale (le journal « Pravda ») depuis le 25 Juin 1933 au 18 Juin 1934 sur la campagne du brise-glace « Tschéljouskine » dans les mers polaires, son naufrage et les expéditions de sauvetage organisées par sa suite.

**An.** - L'exploit dans l'Arctique [*De expeditione egregia navis* « Tcheljouskine » *in regionem arcticam*]. (En russe). 1 fig., Vestn. Vozd. Flota, 5, 4-7. Moskva (1934). **a - 286**

L'article est dédié à la description des exploits des aviateurs au cours du sauvetage du « Tchéljouskine ».

## Signalationes maritimae (fixae, fluctuantes, luminosae et per radio, sonorae et ultrasonorae) - Libri pharorum, lanternarum, signalationum - Communicationes.

**Fevrot C.** - Phares et projecteurs [*De pharis et proiectoribus*]. Rev. Scient., LXXIII, 4, 124. Paris (1935). **a - 287**

Comparaison entre la lentille de Fresnel qui a équippé la plupart des phares pendant la seconde moitié du XIXème siècle et le début du XXème, le miroir Mangin et le miroir parabolique que l'on préfère à l'heure actuelle.

**Gilberti D.** - Proposta di norme per il collaudo dei radioricevitori e dei radiogoniometri. (Continua). [*Praecepta ad apparatus radioreceptores et radiogoniometricos comprobandos*]. Boll. Radiotel. R. E. 1/2, 52-60. Roma (1935). **a - 288**

Le norme proposte dall'A. e dal 1° cap. ing. F. Galetti nel Bollettino r. t., nn. 1 e 2, vol. II del gennaio e marzo 1932, vengono ripubblicate con le modifiche richieste dagli organi competenti, in armonia con le pubblicazioni più recenti sull'argomento. Il lavoro è diviso in due parti: una concernente i radioricevitori e l'altra i radiogoniometri; ciascuna parte consta di un gruppo di articoli dedicati alle definizioni e convenzioni e di un gruppo riguardante le norme vere e proprie. Anche in questa seconda edizione, le norme sono presentate sotto forma di proposta da studiare ulteriormente, per il fatto che molti particolari non possono ancora essere normalizzati.

**Hilker Chr.** - Ein Leuchtturm feiert Jubiläum. - Fünfzig Jahre « Rote Sand » [*De pharo* Rote Sand *quinquagesimo recurrente anno*]. Dtsch. Fisch.-Rundschau, 21, 477-479. Bremerhaven (1935). **a - 289**

Kurze Geschichte des am 23. Oktober 1885 fertiggebauten Leuchtturmes, der als Wahrzeichen der Deutschen Bucht dient.

**Manisco G.** - I radiofari nella navigazione marittima ed aerea [*De radiopharis pro navigatione maritima et aëria*]. 8 fig., Naz. Mil., 9, 632-634. Roma (1935). **a - 290**

Notizie sul servizio dei radiofari nella navigazione marittima ed aerea ed importanza che tale servizio potrà assumere in guerra.

**Mead H. P.** - The British Merchant Jack [*Vexillum mercatorium anglicum*]. 5 figs., Mar. Mirr., XXI, 4, 395, 410. London (1935). **a - 291**

Origins and customs connected with the use of the British pilot jack, generally recognised as the Union flag with white border.

**Montefinale G.** - Radiofari per navigazione marittima ed aerea [*Radiophari pro navigatione maritima et aëria*]. 33 fig., Alta Fr., 6, 673-704. Milano (1934). **a - 292**

Si descrivono i principali tipi di radiofari attualmente in uso per la navigazione marittima e per quella aerea. Si mette in evidenza come le diverse esigenze dei due servizi impongano caratteristiche differenti ai relativi impianti. Si forniscono notizie circa installazioni recenti di radiofari per la guida lungo le rotte aeree e negli atterraggi alla cieca.

**Renaud L. M.** - Pavillons de France [*Vexilla Gallica*]. 34 fig., Mer et Outre-mer, juillet, 17-24. Paris (1935). **a - 293**

Pavillons de guerre et de commerce. Pavillons personnels. « Marques » de Chefs d'État.

**Repsold A.** - Versuchsweise Aussendung über den Deutschlandsender auf Welle 1571 m. [*De transmissione instrumento germanico per undam 1571 m. longam*]. Seewart, IV, 6, 267. Hamburg (1935). **a - 294**

Seit dem 1. Juli 1932 sendet die Deutsche Seewarte über den Reichssender Hamburg und die angeschlossenen Sender ein nur aus 6 Punkten bestehendes Kurzzeitzeichen aus. Eine versuchsweise Aussendung, wie oben erwähnt, ist vom 1. Januar bis Februar ermöglicht worden.

**Rosani S.** - Piano di organizzazione dei radiofari marittimi in Italia [*Ratio radiopharos maritimos in Italia constituendi causa*]. 10 fig., Alta Fr., 2, 138-153. Milano (1935). **a - 295**

Una commissione internazionale, riunitasi a Bordeaux nell'aprile dello scorso anno, ha concretato un piano di accordo per l'organizzazione dei servizi di segnalazione delle coste con radiofari, nelle zone del Mediterraneo occidentale e dell'Atlantico centro-orientale. Resi noti i principii di massima che sono stati seguiti nel progettare la nuova rete di stazioni, si descrive quella parte del lavoro che riguarda le coste italiane. Si forniscono inoltre alcuni dati sui primi impianti che sono attualmente in corso di esecuzione e che fra breve entreranno in servizio in località dell'alto medio Adriatico.

**Sterling R. B.** - Lighthouses of the Maine Coast and Men Who Keep Them [*De pharis in litoribus regionis* Maine *eorumque ministris*]. 100 figs., 352 pp. Brattleboro (1935). **a - 296**

**Tzvetkov M. K.** - On the Method of Automatic Recording of Radio-Sound Signals [*De prescriptione automatica signalationum radioscandalio*]. (In Russ., Engl. Summ.). 4 figs., Bull. Arct. Inst., 10, 314-315, 353. Leningrad (1935). **a - 297**

The reception of signals from radio-sounds of Prof. P. A. Moltschanov's device being effectuated during its first year of working by ear, Author has elaborated a method of automatic recording of these signals which has given wholly satisfactory results. Methods, records obtained.

**Vicedomini F.** - I recenti progressi della radiotelegrafia nelle applicazioni navali [*De progressibus scientiae radiotelegraphicae pro navalibus applicationibus*]. Atti Soc. It. Progr. Scienze - XXIII Riunione, II, 73-88. Roma (1935). **a - 298**

Dopo aver brevemente accennato allo sviluppo recentemente assunto dalle applicazioni radiotecniche in generale, si esaminano particolarmente i recenti progressi compiuti dalla radiotelegrafia nelle installazioni di bordo sia della Marina Militare che Mercantile.

**Vorobjov A. V.** - Le service radiographique dans l'Arctique [*De servitio marconigraphico in regionibus arcticis*]. (En russe). Za Osvojenije Arkt., 165-175. Leningrad (1935). **a - 299**

**Comitato Nazionale per l'Ingegneria. Rep. per le Costr. Elett.** - Le microonde nella R. Marina [*De microundis et Regia Classe Italica*]. 11 fig. & 8 fig., Ric. Scient., a. VI, v. I, 7/8 e a. VI, v. II, 7/8, 247-250, 405-413. Roma (1935). **a - 300**

Vengono passati in succinta rassegna gli studi e le ricerche svolti presso il R. I. E. C. della Marina nel campo delle microonde. Si dà cenno di recenti esperienze e di un servizio continuativo di radiotrasmissione svolto per mezzo di esse con risultati soddisfacenti.

**Deutsche Seewarte** - Die Bedeutung von Sturmwarnungen durch Schiffe [*De providendis tempestatibus pro navigatione*]. Seewart, IV, 6, 263-264. Hamburg (1935). **a - 301**

Im Anschluss an den im Seew. 4 (1935) erschienenen Artikel über den Meteorologischen Warndienst und Schiffssicherheitsvertrag wird hier ein neues Beispiel für den Nutzen solcher Warnungen mitgeteilt. Ergänzende Anmerkung der Schriftleitung.

**Istituto Idrografico della R. Marina** - Supplemento n. 1 al vol. I dei « Radioservizi per la Navigazione » (Ed. 1934), ricapitolativo dei fogli n. 1-11. Aggiornato al 7 dicembre 1934-XIII [*De radioservitiis pro navigatione*]. 16. pp., Tip. Ist. Idrogr. R. Marina. Roma (1934). **a - 302**

**Istituto Idrografico della R. Marina** - Radioservizi per la navigazione. Volume II: Radioservizi meteorol., sanitari, ecc. Appendice: Norme e codici per la decifrazione dei bollettini meteorici [*De radioservitiis pro navigatione*]. 37 fig., viii + + 272 pp., Tip. Ist. Idrogr. R. Marina. Genova (1934). **a - 303**

Il volume è aggiornato al 20 settembre 1934-XII.

**Istituto Idrografico della R. Marina** - Supplemento all'elenco dei Fari, Fanali e segnali da nebbia (Mediterraneo, Mar Nero, Mar d'Azof, Mar Rosso, Golfo d'Aden e Costa orientale d'Africa fino a Zanzibar) [*Index pharorum, lanternarum et signalationum per caliginem. Supplementum*]. 80 pp., Tip. Ist. Idrogr. R. Marina. Genova (1935). **a - 304**

**Organisation Météorologique Internationale** - Notice sur le plan international des transmissions en mer [*Nota de ratione internationali pro transmissionibus maritimis*]. 126 pp., Secr. Organ. Météorol. Int., 18. Utrecht (1934). **a - 305**

**Salvage Service of Turkey** (Tahlisiye Umum Müdürlügu) - Notices to Mariners - Avis aux Navigateurs [*Monitiones ad usum navigatorum*]. (In Engl. & French). 5 figs., Int. Hydrogr. Bull. - Bull. Hydrogr. Int., IV, 87-89. Monaco (1935). **a - 306**

Information sent to the International Hydrographic Office by the Salvage Service of Turkey relating to a radiobeacon recently installed at the entrance to the Bosphorus, at Rumeli-Fener.

**Tzoueghems** (Bureau Météorologique Central). - Manuel pour la rédaction des télégrammes météorologiques du bord des navires et des stations côtières [*De redigendis telegrammatis meteorologicis a navibus stationibusque litoreis*]. (En russe). 28 pp., Ed. Bur. Centr. Météorol. Moscou (1933). **a - 307**

**G. M. F.** - Il servizio radiotelefonico marittimo in Germania [*Servitium radiotelephonicum maritimum in Germania*]. 3 fig., Rass. Poste, Telegr. e Telef., 1, 20-25. Roma (1935). **a - 308**

L'importanza del servizio radiomarittimo, anche agli effetti della salvaguardia umana in mare, richiama l'attenzione di tutti gli Stati. Dopo lo sviluppo del servizio radiotelegrafico marittimo abbiamo ora il progressivo affermarsi del servizio radiotelefonico marittimo a grande distanza, che in Italia è stato affidato al Centro multiplo di Coltano, mentre stazioni costiere minori a Genova e Napoli provvedono al servizio entro brevi distanze. Identicamente è stato organizzato il servizio radiotelefonico marittimo in Germania e di esso l'A. dà esaurienti notizie.

**H. B.** - Perfectionnements dans la technique de la signalisation maritime [*De signalationibus maritimis. Perfectiones quae in earum technica adductae sunt*]. Rev. Hydrogr., XII, 2, 116-117. Monaco (1935). **a - 309**

Complément au Compte rendu des Travaux de la Conférence Technique Internationale de Signalisation Maritime de Paris 1933, dont cette Revue a donné un aperçu dans le vol. XI, 2, 1934, page 129. Communication au Bureau par M. de Rouville, Directeur des Phares et Balises de France.

**An.** - Les phares le long de la Route Maritime du Nord [*De pharis per cursum maritimum ad regiones nordicas*]. (En russe). Bull. Arct. Inst., 1, 33. Leningrad (1936). **a - 310**

Information sur l'établissement sur le trajet Karskija Vorota - embouchure du fleuve Lena – de 110 phares automatiques à gaz de 1 million de bougies et de 5 phares électriques de 2-2,5 millions de bougies, et sur la construction projetée d'autres phares électriques pour la navigation maritime et aérienne.

**An.** - New Incandescent Lamp for Marine Signal Lights [*Lampas incandescens pro signalationibus maritimis*]. Fish & Oyst. Rep., XVI, 4, 5. Tampa, Fla. (1935). **a - 311**

Improvements embodied in the design of this new lamp: light center fixed by prefocused base, new filament eliminating lens shadow, million of flashes secured by each lamp.

**An.** - Approvazione dell'accordo regionale concernente i radiofari marittimi, stipulato fra l'Italia e gli altri Stati in Bordeaux il 28 aprile 1934–XII. (Regio decreto 1º aprile 1935–XIII, n. 988) [*Comprobatio pactionis regionalis de radiopharis maritimis ab Italia subscriptae ceterisque nationibus, Burdigalae die XXVIII mensis Aprilis 1934-XII*]. Gazz. Uff. Regno d'It., 147, 3145-3152. Roma (1935). **a - 312**

**An.** - Faros con luz blanca y con luz de color para la niebla [*De pharis qui lucem albam mittunt lucemque variis coloribus contra caliginem*]. Ibérica, XLIII, 1070, 279. Barcelona (1933). **a - 313**

Descripción de unos experimentos llevados al cabo en el Laboratorio Nacional de Fisica, de Londres, para comparar la diferente potencia de penetración, en la niebla, de los faros blancos y de color, desde el punto de vista de la visibilidad de los objetos. (v.: W. S. Stiles en el « Illuminating Engineer » de octubre 1934).

**An.** - New Nautical Documents. Ouvrages nautiques nouveaux [*De novis operibus nauticis*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., I, 9-10. Monaco (1936). **a - 314**

Information on the publication by the Lisbon Lighthouse Service of a new edition of the « Lista de Faróis », corrected to 1935, of a new List of Lights (Tôyô Tôdaihyô) published by the Japanese Hydrographic Office, of two Nautical Almanacs, issued respectively in Italy and in Japan, and of Tide Tables, published by the Royal Magnetic and Meteorological Observatory of Batavia (Netherlands East Indies).

**An.** - List of W/T Signal Stations. Liste des stations de radiosignaux [*Index stationum pro radiosignalationibus*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., IV, 95. Monaco (1935). **a - 315**

Information au sujet de la publication par le Service Hydrographique de la Marine Française de l'édition de 1935 du 2ème volume des « Radiosignaux » (à l'usage des Navigateurs) qui concerne la météorologie et les Avis aux Navigateurs.

**An.** - Distinctive Signal for Surveying Vessels - Signal distinctif pour navires hydrographiques [*De signis pro naviculis hydrographicis*]. (In Engl. & French). 1 fig., Int. Hydrogr. Bull. - Bull. Hydrogr. Int., V, 104. Monaco (1935). **a - 316**

Description of the distinctive flag adopted by Russian vessels engaged in hydrographic work in accordance to information given in « Izvestija Moreplavateljam » (Notices to Mariners).

**An.** - Wireless Weather Signals [*De radiosignalationibus meteorologicis*]. 4 tabl., 20 code tabl., 1 chart. Mar. Obs., XIII, 121, 28-39. London (1936). **a - 317**

I. Ships' wireless weather signals: World-wide system of voluntary selected ships routine wireless weather telegraphy (Instructions). - Wireless stations detailed to receive routine coded weather reports from « A selected ships » and to intercept routine coded weather reports from « B selected ships ». - International ships' Wireless Weather Telegraphy Code. - Code Tables (XX tables).

**An.** - New Radiobeacon Schedule Provides Added Safety [*Ratio novi cuiusdam radiophari construendi ad augendam securitatem*]. Naut. Gaz., CXXV, 23, 9 & 32. New York (1935). **a - 318**

United States and Canadian Lighthouse Services have reached decision to adopt new methods of operating navigational radio signals.

**An.** - Zusammenarbeit zwischen Luftschiff und Seeschiff [*De operibus consociatis inter aeroplana et naves*]. Seewart, V, 2, 68-69. Hamburg (1935). **a - 319**

Berichte der Luftschiffsleitung des Graf Zeppelin und der Schiffsleitung des D. España. über eine durch optischen Signalverkehr zustandegekommene Proviantabgabe des Luftschiffes.

# OPERAE MARITIMAE

## Operae portuales – Tunnels – Canales maritimi – Effossiones fundi marini.

**Azzini A.** - Banchina nel Porto di Messina [*De contignatione portuali Messanae*]. 8 fig., Cem. Arm. - Le Ind. del Cem., 2, 13-18. Milano (1935). **a - 320**

Caratteristiche del tipo adottato. Calcoli statici delle parti principali. Tiranti verticali. Disposizioni di cantiere.

**Krall G.** - Problemi inerenti alla costruzione del nuovo bacino di carenaggio a Genova [*De navalibus Genuae construendis problematisque quae ad ea pertinent*]. 11 fig. n. t. & 1 tav. f. t. Ann. Lav. Pubbl., 11, 1016-1040. Roma (1935). **a - 321**

La nota espone gli originali metodi seguiti per il calcolo del nuovo bacino di carenaggio a Genova nonchè gli speciali accorgimenti costruttivi adottati nell'esecuzione della grandiosa opera.

**Baumeister** - Ufereinfassungen in Seehäfen [*Praecepta ad lineam litoream in portibus maritimis servandam*]. Werft, Reed., Hafen. Berlin (1935). **a - 322**

**Bruns R.** - Der Ausbau des Danziger Hafens in den Jahren 1920-1935 [*De amplificatione portus Dantisci A. 1920/1935*]. Jahrb. d. Hafenbautechn. Ges., XIV. Hamburg (1934 & 35). **a - 323**

**Coen Cagli E.** - Sulle condizioni di stabilità dei moli a parete verticale [*De stabilitate quoad moles foraneas parietibus verticalibus*]. 6 fig., Ann. Lav. Pubbl., 6, 495-518. Roma (1934). **a - 324**

Dopo aver richiamato le fondamentali condizioni che nell'applicazione del tipo verticale o misto debbono essere soddisfatte, l'A. analizza i disastri recentemente avvenuti nelle opere di difesa dei porti di Catania e di Algeri (opere del tipo misto, con infrastruttura di massi ciclopici) per arrivare alla identificazione delle cause cui i disastri stessi debbono essere imputati.

**Coen Cagli E.** - Italian Breakwater Construction [*De molibus maritimis italicis aedificandis*]. Nature, CXXXVI, 3429, 99. London (1935). **a - 325**

Short note on a conference held by prof. Coen Cagli at the Institution of Civil Engineers London on July 9, on the progress made during recent years at Italian harbours and the present accomodation and equipment at the leading ports.

**Coen Cagli E.** - Le opere di difesa dei porti [*De operibus tutelaribus in portibus*]. Realtà, 12, 603-609. Milano (1934). **a - 326**

Secondo la diversa loro struttura queste opere di difesa possono dividersi in due grandi categorie: opere costituite a guisa di vere dighe, da una grande gettata di materiali lapidei, e opere costituite da una vera e propria muraglia a pareti verticali o quasi. Accennato al diverso comportamento di queste opere sotto l'azione esercitata dalle onde, l'A. tratta più particolarmente di quelle del tipo a muraglia, eretta in grandi profondità e dà conto delle varie applicazioni che se ne sono fatte in Italia ed all'estero. In fine dà conto delle cause essenziali dei disastri avvenuti recentemente in opere di questo tipo, uno a Catania, l'altro ad Algeri.

**Croce L.** - I gargami nei bacini di carenaggio in conglomerato cementizio armato [*De operibus in navalibus construendis cemento armato*]. 2 fig., Cem. Arm. - Le Ind. del Cem., 3, 25-26. Milano (1934). **a - 327**

Indicate le disposizioni costruttive che, con l'introduzione del cemento armato nella costruzione dei gargami nei bacini di carenaggio, permettono di assegnare ai conci di granito l'ufficio di materiali di rivestimento e di riportare per contro tutte le sollecitazioni trasmesse dal battello-porta esclusivamente sul conglomerato, si dà conto del procedimento seguito nei calcoli statici dei gargami.

**Cunningham B.** - Wave Action on Vertical Wall Breakwaters [*Undarum actio in moles maritimas parietibus verticalibus*]. 8 figs., Nature, CXXXVI, 3434, 283-286. London (1935). **a - 328**

Some consideration on the incidents occurred to the breakwaters at Catania in Sicily in March 1933 and at Algiers in North Africa in February 1934. Results from experiments undertaken by prof. Coen Cagli and prof. Stucky at the Hydrobiological Laboratory of the University of Lausanne. Conclusional remarks on the structure of the walls.

**Davis F. S.** - The Port of Boston [*Portus* Boston]. 2 figs., Naut. Gaz., CXXV, 16, 5-8. New York (193 ). **a - 329**

Brief description of the port; facilities and improvements.

**Despujols M.** - L'état actuel des travaux d'aménagement du Port du Havre. La gare maritime transatlantique [*De operibus in portu* Le Havre (*Gratiae*). *Statio maritima transatlantica*]. 18 fig., Génie Civ., CVI, 22, 525-532. Paris (1935). **a - 330**

**Despujols M.** - The Port of Le Havre [*Gratiae Portus*]. 8 figs., Naut. Gaz., CXXV, 15, 3-7. New York (1935). **a - 331**

Description and short history of the works and facilities done in this harbour.

**Goossens Ph. & Verschoore E.** - Le nouveau port de pêche d'Ostende [*Portus piscatorius novus Ostendae*]. 4 fig., 3 phot., 1 pl. h. t., Ann. Trav. Publ. Belgique, XXXVI, 4, 507-534. Bruxelles (1935). **a - 332**

Après une brève description de l'état et des conditions du port de pêche d'Ostende avant le 1 Mars 1922, les. A. A. illustrent les travaux exécutés en vue de la construction d'un nouveau port de pêche en cette ville et décrivent les nouvelles installations dans les suivants chapitres: I. Bassin à flot. - II. Ecluse. – III. Installations pour la réparation des bateaux de pêche: cales de halage ou slipway; chantiers de petite construction navale et agrandissement éventuel du bassin à flot. - IV. Bassin à marée, banc de carénage et chenal d'accès. – V. Minque. - VI. Quartier industriel et Cité des pêcheurs.

**Greenwood T.** - Le tunnel sous-marin de la Mersey [*Porticus submarina in regione* Mersey]. Rev. Scient., LXXIII, 1, 24. Paris (1935). **a - 333**

Quelques chiffres et un commentaire concernant la construction du tunnel sous-marin qui relie la ville de Liverpool à celle de Birkenhead, de l'autre côté de la Mersey, en traversant 3 km. 300 au dessous du large estuaire de cette rivière. C'est certainement un des travaux les plus remarquables accomplis par le génie civil anglais.

**Legowski St.** - Der Hafen von Gdynia (Gdingen) [*Gdyniae portus*]. Jahrb. d. Hafenbautechn. Ges., XIV. Hamburg (1934 & 35). **a - 334**

**McLellan H. J.** - Greater Saint John [*Portus amplificatior* Saint John]. 4 figs., Naut. Gaz., CXXV, 18, 4-6. New York (1935). **a - 335**

On the improvements of this harbour, the industrial heart of the Maritime Provinces of Canada.

**O' Brien M. P.** - Models of Estuaries [*De exemplaribus faucium fluminum*]. 1 fig., 1 table, Nat. Res. Counc., Amer. Geoph. Un., Trans. 16th Ann. Meet., Apr. 25-26, 1935, II, 485-492. Washington D. C. (1935). **a - 336**

Pointing out that small-scale hydraulic models are admirably suited to the solution of estuary-problems A. in a table reports the dimensions and other characteristics of the more important estuary-models built to date in USA. Model laws and program of experiments on hand of the model of the Columbia River estuary, built by the U. S. Tidal Model Laboratory.

**Pagan L.** - Porto Marghera e la sua funzione economica [*Portus* Marghera *eiusque functio oeconomica*]. 27 fig., 33 pp., Officine grafiche Carlo Ferrari. Venezia (1935). **a - 337**

Con la creazione di Porto Marghera, triplice era il problema che si mirava a risolvere e che investiva tutta la vita economica e l'avvenire stesso della città di Venezia. L'A. illustra questi aspetti e cioè: Provvedere alle indispensabili estensioni degli approdi commerciali; creare, in prossimità dei nuovi centri di produzione e di lavoro, nuove zone di espansione edilizia e demografica. L'A. dà notizie di quella parte del programma già realizzata, mettendo infine in rilievo l'importanza della funzione di Porto Marghera in rapporto a tutto il complesso della produzione e dell'economia nazionale.

**Pagliaro F.** - La diga di Chambon [*De mole foranea ad* Chambon *pertinente*]. 6 fig., Ann. Lav. Pubbl., 7, 542-552. Roma (1935). **a - 338**

L'A. riferisce i principali dati di costruzione facendo seguire qualche osservazione circa la diga di Chambon, sulla Romanche (Francia).

**Periani P.** - Progettazione ed esecuzione delle opere marittime. III. L'arredamento portuale nei riguardi del traffico [*Ratio et aedificatio operum maritimorum. III. De muneribus in portibus constituendis pro mercium frequentia*]. 152 fig., 3 tav., 244 pp., U. Hoepli. Milano (1935). **a - 339**

È il XX vol. edito dalla Scuola speciale del cemento armato annessa alla Scuola Politecnica di Milano.

**Plate M.** - Les installations du port de Bremerhafen [*De muneribus in portu* Bremerhafen]. 3 fig., Bull. Assoc. Int. Perm. Congrès Navig., X, 19, 30-41. Bruxelles (1935). **a - 340**

Conférence à la Faculté des Lettres de l'Université de Bordeaux.

**Poujade J.** - Fresque marine [*De navibus ab antiquis temporibus in hodiernum*]. 10 fig., Mer et Outre–Mer. Juin, 49-53. Paris (1935). **a - 394**

L'évolution du navire de la Méditerranée des galères égyptiennes jusqu'aux cuirassés decrite aussi par illustrations avec texte explicatif.

**Prak W.** - Problems of the Pacific. Causes for War [*Quaestiones ad oceanum Pacificum pertinentes*]. Tables & sketches U. S. Nav. Inst. Proc., LXI, 389. 917-927. Annapolis, Md. (193). **a - 395**

Situation in the Pacific examined from economic, military-technical, and political standpoints. The danger of the Japanese empire and its increase of vitality. The Author advises to prepare arms as the best guarantee of peace.

**Rickover H. G.** - International Law and the Submarine [*Lex internationalis et navis submarina*]. U. S. Nav. Inst. Proc., LXI, 391, 1213-1227. Annapolis, Md (1935). **a - 396**

The object of this paper is to examine the rules of naval war which govern the use of the submarine, with a view to ascertain whether, under the changed conditions of modern war, the rules generally accepted prior to 1914 still reflect underlying principles of international law.

**Rocco F.** - L'assicurazione marittima ed aeronautica [*Cautio maritima et aëria*]. Ed. Jovene. Napoli (1935). **a - 397**

**Rudershausen J.** - Die polnische Seehandelspolitik [*De politica commercii poloni maritimi*]. Osteurop. Forsch. N. F. XXI, Königsberg/Berlin (1936). **a - 398**

**Sanders H.** - The Destruction of Prizes at Sea [*Destructio navium mercatoriarum bello perdurante*]. U. S. Nav. Inst. Proc., LXI, 391, 1233-1237. Annapolis, Md. (1935). **a - 399**

Sinking merchant vessels at sea is a measure resorted to by the weaker belligerent. History records but three wars in which enemy prizes were regularly destroyed at sea. The use of submarines. The effect of a strong Navy of U. S. to guarantee the rights of their nationals at sea.

**Sandiford R.** - Diritto marittimo di guerra [*Ius maritimum bellicum*]. Arti grafiche Sansovini. Roma (1935). **a - 400**

**Schäfer O.** - Die geopolitischen Grundlagen der englischen Mittelmeerherrschaft. [*Fundamenta politica imperii mediterranei Anglici*]. Geogr. Anz. XXXVII, 4, 73–78. Gotha (1936). **a - 401**

**Scheibe A.** (Hrsg.). - Nautikus, Handbuch der Seemacht und Seegeltung [Nautikus. *Liber de potentia maritima et maris dominatione*]. 280 S., 16 Jaf. Mittler u. Sohn. Berlin (1936). **a - 402**

Dies Werk ist aus Interesse für sowohl Kriegs- als Handelsmarine, Luftfahrt, Schiffbau und Reedereien. Geleitwort von Admiral von Trotha; 12 Mitarbeiter, Fachmänner der alten Marine.

**Scheltema de Heere R. F.** - Mathematics and Research. [*De mathematica ac investigationibus*]. Mar. Mirr. XXI, 4, 450–452. London (1935). **a - 403**

Author claims that we ought to devote more attention to the physical and theoretical side of shipbuilding than has been done before and emphasizes the help which could be given by model builders to the study of the exact proportions and dimensions of ancient ships. Such a study can prevent the repetition of errors already committed in shipbuilding.

**Sheridan T. W.** - Save Stems for Ships [*Prorae securae pro navibus*]. U. S. Nav. Inst. Proc., LXI, 6 (388), 812-813. Annapolis, Md. (1935). **a - 404**

Author points out the necessity of changing the dangerous shape of merchant ships' stems, as it is appreciated that the sharp, straight knife-edge of the modern merchant craft has tremendous penetrating powers, and emphasizes the urgency of an international implementing agreement by which the port charges of ships constructed with safety stems would be reduced to encourage the construction of this type of crafts.

**Sillani T.** - Scritti di Manfredi Gravina [*Operae*. Manfredi Gravina *auctore*]. Ed. La Rassegna Italiana. Roma (1935). **a - 405**

Prefazione di S. E. Federzoni sull'ultimo suo incontro con Gravina. Raccolta degli scritti fatta da Maria Sofia Gravina e ordinata dall'A. Vi si mette in evidenza la dottrina storica e politica dell'Alto Commissario della Società delle Nazioni per Danzica.

Author deals with the subject of the equality of security whose aim is to establish a formula upon which to base comparative warship needs in order to eliminate unrestrained construction competition between the different countries, and passes then to the history of the development of the United States' foreign trade, with special regard to those of their Merchant Fleet. He discusses then the foundation of sea power and illustrates the main elements of it in the various states under the headings: (1) Naval ships, (2) Naval bases, and (3) The Merchant Marine. At the end he deals with the naval problems in the Pacific.

**W. S. R.** - The «Nonsuch» and the «Belle Poule» [*De navibus* «Nonsuch» *et* «Belle Poule»]. Mar. Mirr., XXI, 4, 456-457. London (1935). **a - 422**

On hand of the example of the encounter between the «Nonsuch» and the «Belle Poule» on July 16th, 1780, author quotes the habit in the eighteenth century of spelling of place names by Masters of H. M. Ships, which was often of the phonetic order. The example illustrated refers to the name of the Yeu Island, which was not unknown also as Ile d'Yeu and Ile Dieu, and which in English logs is referred to as Isle God.

**An.** - Annali della Vasca Nazionale per le esperienze di Architettura Navale in Roma [*Alveus ad experientias ducendas pro navali architectura. Annales*]. V. III, viii + 139 pp. ill. e 33 f. t. Ist. Poligr. dello Stato, Roma (1933). **a - 423**

Il volume contiene: informazioni sull'esercizio della vasca Nazionale di Roma sino a tutto il 1933.

**An.** - Le rapport du Comité central des armateurs de France pour l'année 1934 [*Agitur de Gallicis navium constructoribus eorumque relatione pro A. 1934*]. Rev. Scient., LXIII, 8, 287-288. Paris (1935). **a - 424**

Résumé du Rapport contenant un aperçu sur la situation maritime du double point de vue national et international, avec référence spéciale à l'amélioration de la situation maritime mondiale et à la crise de l'armement français.

## Biographiae et necrologiae.

**Ångström A.** - Axel Wallén. – 1 photo. Un. Géod & Géoph. Int., Assoc. Météorol., Pr. – V. V–e Ass. Gén. Lisbonne, Sept. 1933, II Mém. & Disc., 3-5. Paris (1935). **a - 425**

Notice biographique et nécrologique consacrée au Directeur Général et Chef de l'Institut National Suédois de Météorologie et d'Hydrographie, Président de la Commission de Radiation Solaire de l'Union Géodésique et Géophysique Internationale, mort le 23 février 1935 à Stockholm.

Librarian of the University of Amsterdam, author of several works on navigation and geography.

**Wiese W.** - C. Borchgrevink. (En russe). 1 photo, Bull. Arct. Inst., 3/4, 85-86. Leningrad (1935). **a - 459**

Nécrologie du célèbre explorateur de l'Antarctique.

**Bureau Hydrographique International** - Le Contre-Amiral Luigi Tonta [*Contralmiragius Aloysius* Tonta]. 1 phot., Rev. Hydrogr., XII, 2, 7-8. Monaco (1935). **a - 460**

Biographie nécrologique.

**Bureau Hydrographique International** - Le Professeur Louis Joubin. - Rev. Hydrogr., XII, 2, 9. Monaco (1935). **a - 461**

Biographie nécrologique.

**Deutsche Seewarte** - Kapitän Otto Reichbächer. - 1 Phot., Seewart, IV, 3, 105-106. Hamburg (1935). **a - 462**

Kurze Biographie mit Schilderung der Verdienste des in den Ruhestand getretenen Abteilungdirektors der Hamburg-Amerika Linie.

**U. S. Coast & Geod. Survey** - Edwin J. Brown. 1899-1935. - Bull. Géod., 47, 372-373. Toulouse-Paris (1935). **a - 463**

**A. L.** - Jubilé du Prof. N. M. Knipovitch [*De jubilatione professoris* N. M. Knipovitsch]. (En russe). 1 photo, Bull. Arct. Inst., 3/4, 82-83. Leningrad (1935). **a - 464**

Biographie et résumé des principaux travaux du prof. Knipovitch dont l'activité a eu surtout pour but l'exploration et l'étude de l'Arctique, publiés à l'occasion du 50ème anniversaire de sa carrière scientifique, pédagogique et politique.

**A. R. & E. B.** - Boris Lavrentjevitch Isatchenko. (En russe). 1 photo, Bull. Arct. Inst., VI, 1, 28-29. Leningrad (1936). **a - 465**

Bref compte-rendu des travaux du savant qui a fêté le quarantenaire de son activité pédagogique et scientifique en Octobre 1935; le prof. Isatchenko en dehors des travaux sur les semences et la microbiologie, a exécuté des recherches sur les mers polaires de l'URSS, sur la microfaune de ces mers, ainsi que celle des mers méridionales.

**E. P.** - Le Professeur Charles-Robert Richet. Nécrologie [*Prof. Carolus Robertus* Richet. *Necrologium*]. Bull. Soc. Amis Inst. Océanogr., XVII, 51, 2. Le Havre (1935). **a - 466**

Souvenirs émus d'un ami.

**V. A.** - A. W. Greely. - 1 photo, Bull. Arct. Inst., VI, 1, 30-31. Leningrad (1936). **a - 467**

Nécrologue du savant décédé à l'âge de 91 ans à Georgestown (États Unis) avec référence spéciale à l'organisation de la participation à la 1ère Année Polaire Internationale des États Unis et complété par une liste de travaux de Greely.

**W. W.** - A. de Gerlache. (En russe). Bull. Arct. Inst., 3/4, 87. Leningrad (1935). **a - 468**

Nécrologie du célèbre explorateur belge de l'Antarctique avec un rapide résumé de ses principaux travaux.

**An.** - A. Greely. - Bull. Arct. Inst., V, 12, 450. Leningrad (1935). **a - 469**

Short biography of the explorer of the Polar regions dead in autumn 1935 at Georgetown (U. S. A.).

**An.** - Déces du Professeur Giovanni Magrini [*Obitus professoris Johannis* Magrini]. Bull. Gèod., 47, 421. Toulouse-Paris (1935). **a - 470**

**An.** - Professeur Axel Wallen († 1935). - Bull. Géod., 48, 457. Toulouse-Paris (1935). **a - 471**

**An.** - Sur le cinquantenaire de l'activité au sein de la Société Géographique de l'Etat de son Président Honoraire, homme de science émérite, le Professeur Jules Mikhajlovitch Shokaljskij [*De prof.* J. M. Sokhaljskij, *50° recurrente anno ab initio eius activitatis pro Societate Geographica Nationali*]. (En russe). 1 photo, Izv. Gos. Ghéogr. Obstsch. (Bull. Soc. Géogr. Etat), LXVIII, 1, 3-4. Leningrad-Moskva (1936). **a - 472**

Brève biographie du Président Honoraire de la Société Géographique Russe et de son activité au sein de la Société avant et après la révolution d'Octobre.

**An.** - Captain James Cook. - 1 phot., Mar. Obs., XIII, 122, 51-53. London (1936). **a - 473**

Continuation of Cook's biography (See: « Mar. Obs. », XIII, 119, p. 14, 1936) containing an account of Cook's expedition on board the « Resolution » sent out to settle the controversy arisen around the discovery of Australia and New Zealand in 1772-1775, and another expedition for the discovery of a North-west Passage of 1777-1779, during which Cook was killed in a battle with the natives of one of the islands of the Sandwich group (Hawaii).

**An.** - Homenajes al Profesor Odon de Buen. - Rev. Cons. Oceanogr. Ibero-Amer., V, 1/4, 15-33. Madrid (1935). **a - 474**

Omaggi resi al prof. de Buen in occasione del suo abbandono della cattedra di Biologia presso l'Università Centrale di Barcellona, per limite di età.

**An.** - Giovanni Piero Magrini [*Iohannes Petrus* Magrini]. Rev. Hydrogr., XIII, 1, 7. Monaco (1936). **a - 475**

Nécrologie.

**An.** - Le Major Général A. W. Greely, U. S. A. - Rev. Hydrogr. XIII, 1, 8. Monaco (1936). **a - 476**

Nécrologie.

**An.** - Giovanni Piero Magrini [*Iohannes Petrus* Magrini]. Ricerca Scient., 15-31 maggio, 459-460. Roma (1935). **a - 477**

Necrologia.

# II.

# OCEANOGRAPHIA PHYSICA

## GENERALIA

### Instituta oceanographica – Relationes publicae – Conventus et conferentiae - Oceanographiae historia – Ars docendi – Bibliographiae.

**Annenkova K. A. & Zhukov D. A.** - Manuel bibliographique [*Liber bibliographicus*]. (En russe). 98 pp., Append. Man. Résources d'eau URSS, Severn. Kraj, II. Leningrad (1934). **a - 479**

Liste des ouvrages sur l'hydrologie de la région du Nord de l'URSS.

**Berezkine V.** - Travaux scientifiques à bord du « Lütke » [*De operibus scientificis in navi* « Lütke »]. (En russe). Naouk. i Tekhn., 22, 1-2. Moskva (1934). **a - 480**

**Bigelow H. B.** - Fifth Annual Report of the Director for the Year 1934 [*Relatio* $V^a$ *annua a Directore redacta pro A. 1934*]. Woods Hole Oceanogr. Instit., Rep. 1934, 8-17. Woods Hole, Mass. (1935). **a - 481**

Report of the Director of the Woods Hole Oceanographic Institution concerned with the equipment and the new scientific equipment of the Institution, the library, the personnel, the foreign staff and assistants, the publications, the cooperation with other scientific institutions, the field work, the staff meetings, the general financial condition of the Institution, and its scientific program.

**Bonsdorff I.** - Comptes rendus de la huitième session de la Commission Géodésique Baltique réunie à Tallin et Tartu du 20 au 23 août 1935 [*Relationes de* $VIII^a$ *sessione Commissionis Geodeticae Balticae,* Tallin *et* Tartu *a die 20 ad 23 mensis Augusti 1935*]. (En allem.). Nombr., fig., 298 pp., Osakeyht. Weilin & Goos. Helsinki, Finlande (1936). **a - 482**

**Bossolasco M.** - Résumé des travaux exécutés à la Station Géophysique temporaire de Mogadiscio entre le 1 août 1932 et le 31 juillet 1933 [*Compendium operum peractorum a Statione Geophysica Temporaria* Mogadiscio *a die 1 mensis Augusti 1932 ad diem 31 mensis Julii 1933*]. Un. Géod. & Géoph. Int., Assoc. Météorol., Pr.-V. V-e Ass. Gén., sept. 1933, Lisbonne, II Mém. & Disc., 301-304. Paris (1935). **a - 483**

Bref résumé des travaux de météorologie et climatologie, d'aérologie, d'océanographie, de magnétisme terrestre et d'électricité tellurique, exécutés à l'occasion de la 2ème Année Polaire Internationale à la Station géophysique de Mogadiscio (2°02' N., 45°21' E.).

**Britton C. E.** - Forgotten English Meteorological Societies [*Societates meteorologicae Anglicae oblitae*]. Quart. Journ. R. Meteorol. Soc., LXI, 261, 343-346. London (1935). **a - 484**

Historical account of the activity of the R. Meteorological Society; the foundation of the Astro-meteorological Society and the Copernican Meteorological Society, which both have been entirely forgotten.

**Brunelli G.** - I pionieri della oceanografia [*Praecones scientiae oceanographicae*]. Boll. Pesca Piscic. e Idrobiol., XI, 5, 697-705. Roma (1935) **a - 485**

Sviluppo della scienza del mare attraverso la storia e nomi legati alle scoperte, imprese, iniziative e al suo progresso, sia in Italia che tra gli stranieri.

**Chevey P.** - Rapport sur le fonctionnement de l'Institut Océanographique de l'Indochine pendant l'année 1934-1935 [*Relatio de activitate Instituti Oceanographici Indosinensis*]. 19 pl., h. t., Inst. Océanogr. Indochine, Stat. Marit. Cauda, Note 27, 3-26. Saïgon (1935). **a - 486**

Personnel. Matériel. Navigation. Recherches scientifiques et techniques: Océanographie physique: A. Travaux de synthèse, B. Travaux en mer: 1° Étude des isothermes en plan, 2° Étude des isohalines en plan, 3° Étude des isothermes et des isohalines en coupes, 4° Conclusion, 5° Étude spéciale du Golfe de Tonkin, 6° Étude spéciale du Golfe du Siam, 7° Étude spéciale de la baie de Nhatrang. Oceanographie biologique.

**De Buen R.** - Reunión del Comité Ejecutivo de la Comisión Internacional para la Exploración cientifica del Mediterràneo [*Consessus Comitatus secutorii e Commissione internationali Mari Mediterraneo scientiae causa explorando*]. Rev. Cons. Oceanogr. Ibero-Amer., V, ¼, 35-40. Madrid (1935). **a - 487**

Acta de la reunión del Comité en el mes de noviembre 1934 en Paris con asistencia de representantes de Egipto, España, Francia, Italia, Marruecos español, Mónaco y Rumania.

**De Buen R.** - Reunión en Copenhague (junio 1934) del Consejo Internacional para la Exploración del Mar [*Consilium internationale mari explorando. Consessus Hauniae habitus (mense Junio 1934)*]. Rev. Cons. Oceanogr. Ibero-Amer., V, 1/4, 41-51. Madrid (1935). **a - 488**

Acta de la reunión del Consejo. Entre los acuerdos tomados en las sesiones plenarias, se destaca, por su importancia, uno referente a la protección de ciertas especies, incluso fuera de aguas jurisdiccionales. Copia integral de la propuesta adoptada. Labor realizada en la Asemblea del Consejo del Comité de la Planicie Continental Atlántica y del Comité de Ballenas.

**Ermolaev M.** - 15 années de l'Institut Arctique [*De Instituto Arctico, XV° recurrente anno ab eius fundatione*]. (En russe). 8 fig., 2 tabl., Vestn. Znan., 6, 410-417. Leningrad (1935). **a - 489**

**Field R. M.** - Report of Special Committee of Geophysical and Geological Study of Oceanic Basins [*Relatio a Comitatu, sinibus oceanicis e geophysica et geologia studendis, redacta*]. Nat. Res. Counc., Trans. Amer. Geoph. Un., 16th Ann. Meet., App. 25-26, 1935, I, 6-9. Washington D. C. (1935). **a - 490**

Program of work and scope of the Committee; the hope in a complete collaboration of the Committee with the recently organized Committee on Geophysical and Geological Study of the Continents, and the reasons why the development of such a cooperation might be assured; projects of the expeditions to be organized by the Committee. Opinions and suggestions of the Committee on (1) sounding and submarine physiography, (2) gravity, (3) seismic, and (4) marine sedimentation.

**Fleming J. A.** - Introduction (to the « Transactions of the American Geophysical Union Sixteenth Annual Meeting, April 25 and 26, 1935, Washington, D. C. Part I). [*Introductio in Acta scripta de XVI° Consessu annuo ab* American Geophysical Union *habito a die 25 ad diem 26 mensis Aprilis 1935,* Washington]. Nat. Res. Counc., Trans. Amer. Geoph. Un. 16th Ann. Meet., Apr. 25-26, 1935, I, 3-4. Washington, D. C. (1935). **a - 491**

Brief introductory account on the foundation and activity of the American Geophysical Union, followed by a short summary of the work of the different Sections of the Union during the 16th Annual Meeting, April 25 and 26, 1935, at Washington.

**Helland-Hansen B.** - Det geofysiske institutt [*Institutum geophysicum*]. 2 cartes, Bergens Mus. Årsber. 1934-1935, 64-73. Bergen (1935). **a - 492**

Enseignement et cours. A. Section Hydrographie: Nouvels appareils, recherches entreprises dans plusieurs fiords, expédition d'« Armauer Hansen », 30 Mai-22 Juillet, recherches sur température, teneur en sel, oxygène, concentration des ions, teneur en phosphates et observations météorologiques; autres recherches, publications, B. Section de météorologie théorique: ballons sonde, publications. Section C. Magnétisme terrestre et physique cosmique: Personnel, recherches sur radiation cosmique, effet Raman, publications. La commission géophysique: Membres. La société geophysique norvégienne: réunion annuelle.

**Holmes M. C. B.** - An Introduction to the Bibliography of Captain James Cook, R. N. [*Introductio in bibliographiam ad Cap.* James Cook *pertinentem*]. 64 pp., Francis Edward L . London (1936). **a - 493**

**Jarring A.** - Polarsovjet [*Regio polorum ad U. R. R. S. pertinens*]. Sv. Geogr. Arsb., II, 248-253. Lund (1935). **a - 494**

Review of a book written by members of the Arctic Institute and edited by Prof. Samoilovitch concerning the work accomplished by the Arctic Institute from its foundation in 1919 to 1934.

**Kähler K.** - Tagung der Deutschen Meteorologischen Gesellschaft in Danzig vom 25. bis 27. August 1935 [*Consessus Societatis Germanicae pro re meteorologica Dantisci habitus, mense Augusto a die 25 ad diem 27, 1935*]. Naturwiss., XXIII, 46, 783-785. Berlin (1935). **a - 495**

Kurze Besprechung der Vorträge. Der Festvortrag wurde der Sprache der Meteorologie, d. h. den internationalen Einheitsbezeichnungen gewidmet.

**Khanaitschenko N. K.** - Travaux de la Station Météorologique de Volotchanka sur la péninsule de Tajmyr en 1932-34 [*De operibus peractis a Statione Meteorologica in* Volotschanka *in paeninsula* Tajmyr *A. 1932-35*]. (En russe). Bull. Arct. Inst., 8, 243-244. Leningrad (1935). **a - 496**

Courte description de la construction de la station et de la première période de son fonctionnement.

**Knudsen M.** - Hydrographical Committee 1934 [*Comitatus hydrographicus, A. 1934*]. 1 fig., Rapp. Pr.-Verb. Cons. Expl. Mer, XCIV, 2^me^ partie, Rapp. administr. (1934-1935), 62-70. Copenhague (1935). **a - 497**

Summary of cruises in 1934. Reports from Belgium, Denmark, England, Finland, France, Germany, Holland. Irish Free State, Latvia, Norway, Poland, Portugal, Scotland, Sweden.

**Lavrov B.** - Campagne et hivernage de la première expédition de Léna [*De explorationibus et hiemationibus, prima perdurante expeditione ad flumen* Lena]. (En russe). 8 fig., Sov. Sever, 1, 74-88. Moskva (1935). **a - 498**

**Levi G.** - Il Registro Italiano Navale ed Aeronautico [*Registrum Italicum navale et aeronauticum*]. Boll. Sind. Fasc. Ingg. ed Arch. Tre Venezie, 3, 65-69. Venezia (1935). **a - 499**

Si illustra l'attività di questo istituto che ha quale scopo principale quello della sorveglianza e classificazione delle navi mercantili e delle aeromobili per servizio civile, e mansioni accessorie relative a questioni attinenti alle attività marittime ed aeree.

**Marsili L. F.** - Osservazioni intorno al Bosforo Tracio o vero Canale di Costantinopoli rappresentate in lettera alla Sacra Real Maestà di Cristina, Regina di Svezia da Luigi Ferdinando Marsili [*Observationes circa Bosphorum Tracium seu Canalem Constantinopolitanum ex epistulis ad Sacram Regiam Majestatem Christinae Suetiorum Reginae ab Aloysio Ferdinando* Marsili *missis*]. 5 fig., Boll. Pesca, Piscic. e Idrobiol., XI, 5, 734-758. Roma (1935). **a - 500**

**Murray J.** - The American Association for the Advancement of Science. The Los Angeles Meeting of the Pacific Division. Sessions of the Affiliated Societies: Oceanographic Society of the Pacific [*Societas Americana rebus scientificis progredientibus. Consessus habitus in* Los Angeles

*a Divisione pro Oceano Pacifico. Agitur de sessionibus habitis a Societate pro Re oceanographica Oceani Pacifici*]. Science, LXXXII, 2125, 267-268. New York (1935). **a - 501**

The meeting was held on June 28 under the joint auspices of the Committees on the Oceanography of the Pacific for the United States and for Canada. Elections and papers presented.

**Navarrete J.** - Historia del Observatorio del Salto [*Observatorii* del Salto *historia*]. Ill., 16 pp., Santiago de Chile (1934). **a - 502**

Memoria presentada a la Societad cientifica de Chile.

Ordre du jour de la réunion de l'Association internationale de Météorologie convoquée en Septembre 1933 à Lisbonne. Liste des sujets de discussion accompagnée d'un exposé des motifs et d'un bref commentaire explicatif.

**Wenner F.** - Report of Special Committee on Journal of Geophysics [*Relatio a speciali Comitatu redacta de ephemeride geophysica instituenda*]. Nat. Res. Counc., Amer., Geoph. Un., Trans. 16th. Ann. Meet., Apr. 25-26, 1935, I, 18-19. Washington, D. C. (1935). **a - 514**

Brief account of the work of the Committee consisting of the chairmen of the seven sections of the American Geophysical Union considering the possibilities of establishing a Journal of Geophysics.

**Administration centrale de la voie maritime du nord (Glavsevmorputj)** - Novaja Zemlja. Index Bibliographique [*Index bibliographicus circa* Novaja Zemlja]. (En russe). 240 pp., Ed. Glavsevmorputj, Leningrad (1935). **a - 515**

**American Geophysical Union** - Resolutions Adopted by the 16th Annual Meeting, April 25-26, 1935) [*Consilia sumpta a XVI Consessu annuo a die 25 ad diem 26 mensis Aprilis 1935*].

Nat. Res. Counc., Amer. Geoph. Un., Trans. 16th Ann. Meet., Apr. 25-26, 1935, I, 50-53. Washington D. C. (1935). **a - 516**

Text of 18 resolutions adopted, of which the following ones relate to oceanography: (I) Resolution of the proposed construction by Great Britain of a magnetic-survey vessel, (II) Resolution on suitable vessel in United States Navy for oceanic surveys, (III) Resolution on bathymetric charts off west coast of the United States, (IV) Resolution of making available for scientific use accumulated geological and geophysical data obtained by U. S. Coast and Geodetic Survey and Navy Department.

**Arctic Institute of USSR.** - Travaux scientifiques de la Station dans la Baie Tikhaya sur la Terre de François-Joseph. - Observations météorologiques en 1929-1930 [*De operibus scientificis peractis a Statione in baja* Tikhaja *circa Terram Francisci Josephi. Observationes meteorologicae A. 1929-1930*]. (En russe, préf., titres et ind. en franç.). 16 fig. et cartes, 7 tables. Trans. Arct. Inst., V, 3-70. Leningrad (1934). **a - 517**

Après une préface concernant la fondation en 1929 d'une station pour les explorations scientifiques dans la Baie Calme (Tikhaja), Terre de François-Joseph, l'A. donne dans un compte rendu des observations effectuées pendant la première année de l'existence de la Station. Description de la Station Météorologique de la Baie Tikhaja. Remarques concernant les observations météorologiques et leur utilisation. Tables: Observations météorologiques routinières.

**Bureau Hydrographique International** - Première Conférence Océanographique Ibéro-Américaine. Madrid-Malaga 1935 [*Prima Conferentia Oceanographica Hispano-Americana. Matriti et Malacae, A. 1935*]. Rev. Hydrogr. XII, 2, 12-16. Monaco (1935). **a - 518**

Pays représentés. Sujéts étudiés. Documents exposés par le Bureau Hydrogaphique International.

**Commissione (R.) Geodetica Italiana** - Verbale delle sedute della R. Commissione Geodetica Italiana tenute a Milano il 10-11 aprile 1934-XII [*Acta scripta Regiae Commissionis Italicae pro re geodetica. Mediolani a die 10 ad diem 11 mensis Aprilis 1934–XII*]. 2 ill., Nuova serie, n. 10, 44. Padova (1935). **a - 519**

**Consejo Oceanografico Ibero-Americano** - Primera Conferencia Oceanográfica Ibero-Americana (Madrid-Malaga, abril 1935) [*Prima Conferentia Oceanographica Hispano–Americana* (*Matriti et Malacae, mense Aprili, 1935*)]. 4 tav., Rev. Cons. Oceanogr. Ibero-Amer., VI, 1, 3-76. Madrid (1935). **a - 520**

Exposición de la labor realizada por la Primera Conferencia Oceanográfica Ibero-Americana celebrada en los dias 23 al 28 de abril 1935 e de los resultados de sus reuniones. Figuran en este trabajo todos los datos referentes a la composición del Comité Ejecutivo del Consejo Oceanográfico Ibero-Americano; del Comité Nacional español y de las nutridas e importantes Delegaciones que han concurrido a la Conferencia, asi como un resumen de los trabajos presentados. Sección de Oceanografía e Hidrologia – Sección de Hidrología Continental – Sección de Problemas generales – Sección de Biología y Pesca.

**Consiglio Oceanografico Ibero-Americano** - Secciòn oficial [*Sessio publica*]. Rev. Cons. Oceanogr. Ibero-Amer., V, 1/4, 53-71. Madrid (1935). **a - 521**

Primera Conferencia Oceanográfica Ibero-Americana. Reunión privada de Delegados y Representantes diplomáticos. Los puntos más interesantes de la nueva circular, con el numero 3, de la primera Conferencia Oceanográfica Ibero-Americana. Estado de la Biblioteca del Consejo.

**Fifth Pacific Science Congress** - Resolutions of.... [*Proposita sumpta, V° perdurante congressu pro re scientifica Oceani Pacifici*]. (In Russ.). Bull. Pacif. Comm. Acad. Sc., USSR, 3, 71-78. Leningrad (1934). **a - 522**

Russian translation of the text of 26 resolutions adopted by the Fifth Pacific Science Congress on its conclusive meeting on June 14th, 1933, at Vancouver.

**Filiale de L'Extrème Orient de l'Académie des Sciences de l'URRS.** - Rapport sur le travail de la...en 1934 [*Relatio de operibus, A. 1934*]. (En russe). 37 pp., Ed. Fil. Extr. Orient Acad. Sc. URSS. Vladivostok (1935). **a - 523**

**Hydrographic Offices - Services Hydrographiques** - Work Carried Out - Travaux exécutés [*De operibus peractis*]. (In Engl. & French). Int. Hydrogr. Bull. – Bull. Hydrogr. Int., III, 55-56. Monaco (1935). **a - 524**

French hydrographic survey in Indochina; information taken from the «Annales Hydrographiques», Paris 1934, numbered 14-1317 and 14-1318 of the series.

**Hydrographic Offices - Services Hydrographiques** - Reports on the Work Carried Out and Projected by the Hydrographic Offices- Rapport sur les travaux exécutés et projetés par les Services Hydrographiques. - Siam, 1934-35 & 1935-1936 [*Relatio de operibus peractis et peragendis a Servitiis Hydrographicis. Siamensis Regio. A. 1934/35 et 1935/36*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., V, 100-102. Monaco (1935). **a - 525**

A) Surveys made during the period: June 1934 to April 1935: (1) Coastal surveys; (2) Ocean surveys; (3) Magnetic surveys; (5) Tides, tidal stream and current observations; (5) Miscellaneous. B) Charts published in 1934–35: (1) New charts; (2) New editions of existing charts C) Books or Publications issued in 1934–35. Work projected: (a) Surveys projected during period: July 1935-March 1936; (b) Charts in hand; (c) Books or publications in hand.

**Institut Arctique URSS.** - Thèses des rapports de la Session du Conseil Scientifique de l'Institut [*Theses quae continentur in relationibus redactis a Consilio Scientifico ad Institutum Arcitcum Sovieticum pertinente*]. (En russe). 110 pp. Ed. Glavsevmorputj. Leningrad (1935). **a - 526**

**International Commission for Synoptic Weather information** - Report of the Ninth Meeting, De Bilt, May 12th-18th, 1934 [*Relatio de IX consessu habito in* De Bilt *a die 12 ad diem 18 mensis Maji, 1934*]. Pls., tables, 212 pp., Secr. Organ. Météorol. Int., 21. Utrecht (1935). **a - 527**

**International Hydrographic Bureau - Bureau Hydrographique International** - Yar-Book of the... - Annuaire du... [*Annuarium*]. (In Engl. & French). Tables, 85 pp. Monaco (1936). **a - 528**

Après une liste des États membres du Bureau Hydrographique International, de son Comité de Direction, et de son Personnel, suivent les monographies des Services et les biographies des Directeurs des Services Hydrographiques des États membres du Bureau International.

**National Research Council of Japan** - Report April 1933 - March 1934 [*Relatio a mense Aprili 1933 ad mensem Martium* II, 3. *1934*]. 244 pp. Tokyo (1935). **a - 529**

Meetings, works and publications.

**Norsk Polarklubb** - Årbok [*Liber de polo septentrionali*]. Norsk Polarklubb. Oslo (1935). **a - 530**

Contains 17 articles among which may be noticed those concerning the international ice survey in the Atlantic by Olav Mosby, fishing possibilities at the western Greenland by Oscar Sund, the ice-breaker of the Svalbard, the whaling and fishery of *Hippoglossus* in the Arctic waters by Hans Bogen.

**Pacific Committee of the Academy of Sciences of the USSR.** - Bulletin N. 3 [*Bulletinus N. 3*]. (In Russ.). 7–78. Leningrad (1934). **a - 531**

This Bulletin contains a series of papers prepared for the Fifth Pacific Science Congress which have been also published in English in the « Reports » of the Congress. Being also of interest to Russian scientists they are published in the present volume in Russian. The papers by N. V. Kondyrev « Chemical analysis of Water of the Japan Sea » and P. J. Schmidt « List of Marine Biological Stations on the Pacific » have not been included in this series of communications to the Congress and are therefore followed by an English Abstract.

**Première Conférence Géographique Soviétique** - Travaux de la . . . . . . . . (11-18 avril 1933), vol. IV. Séances des Sections [*De operibus peractis prima perdurante Conferentia geographica Sovietica (a die 11 ad diem 18 mensis Aprilis 1933). Vol. IVum*]. (En russe). Tabl., 2 cartes h. t., 221 pp., Edit. Soc. Géogr. Etat. Leningrad (1934). **a - 532**

Thèses et résumés des rapports présentés dans les différentes sections et, entre autre, compte-rendu des travaux de la Section Arctique (pp. 166-180).

**Royal Indian Marine** - Work Carried Out-Marine Survey of India: 1933-1934. Travaux exécutés [*De operibus peractis a* Marine Survey of India, *A. 1933/34*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., V, 99-100. Monaco (1935). **a - 533**

Brief extract from the Administration Report of the Royal Indian Marine, Dehli, 1935.

**Royal Meteorological Society** - Bibliography of Meteorological Literature [*Rerum meteorologicarum bibliographia*]. III, 7 (January-June), 245-291. London (1935). **a - 534**

**Société Météorologique de France** - Bibliographie météorologique. Tomes I à IV. Années 1921-1924 [*Bibliographia meteorologica. Volumina I-IV. A. 1921-1924*]. Off. Nat. Météorol. & Soc. Météorol. de France. Paris (1935). **a - 535**

**Union Géodésique & Géophysique Internationale.** - Actes de la Commission pour l'Etude des Raz de Marée [*Acta scripta Commissionis maris motibus studendis*]. 1 tabl., Ann. Comm. Etude Raz de Marée, 4, 1-19. Paris (1934). **a - 536**

Liste, par États et par ordre alphabétique des membres de la Commission. Extrait de la comptabilité de la Commission pour la période comprise entre le 31 décembre 1932 et le 31 décembre 1933. Activité de la Commission de septembre 1933 à septembre 1934: Représentation des États à la Commission - Recherches - Enquête destinée à permettre à la Commission d'aborder l'étude des raz de marée sur un plan plus général. Résumé des réponses des différents pays au questionnaire qui leur a été envoyé.

**United States Naval Institute Proceedings.** - Various authors [*De operibus a variis auctoribus peractis*]. U. S. Nav. Inst. Proc., LXI, 10 (392), 1357-1588. Annapolis, Md. (1935). **a - 537**

Foreword. Sellers. - The founding of the Naval Academy by Bancroft and Buchanan. Sturdy. - The First Academy Staff. The Colonial Government House of Maryland. Magruder. - The Departments. Description of the United States Naval Academy. Lewis. - Entrance Requirements of U. S. Naval Academy. Rooks. - Naval Academy cheers and songs. Drum and Bugle Corps. Grantham. Officers and gentlemen in the making. Alden. - Annapolis, mother of Navy Men. Ageton. - Navy life begins. Eller. - Plebe summer infantry. A midshipman's day. Kenn. - Extra-curricular activities. Grantham. - Midshipman cruises. Patrick. - Healty minds in healthy bodies. Ageton. Athletic training at the Naval Academy. Aamold.

**Woods Hole Oceanographic Institution** - Report for the Year 1934 [*Relatio pro A. 1934*]. 38 pp., Woods Hole, Mass. (1935). **a - 538**

I. Trustees, as of December 31, 1934. - II. Members of the Corporation, as of December 31, 1934. - III. Report of the Treasurer. - IV. Report of the Director. - V. Staff as of December 31, 1934. - Appendix: Reports of progress by investigators working at the Institution during 1934.

**Woods Hole Oceanographic Institution** - Annual Announcement. Sixth Year 1936-1937 [*Nuncius annuus. A. VI. 1936-1937*]. 12 pp. Woods Hole, Mass. (1936). **a - 539**

Trustees. Officers. General information. Buildings. Salt water supply. Library. Equipment. Staff. Fellowships. Provision for visiting investigators. Instruction. Facilities for publication. Program.

**A. S.** - Commission Polaire de l'Académie des Sciences [*Commissio Polorum ex Academia Scientiarum*]. (En russe). Bull. Arct. Inst., 3/4, 87-88. Leningrad (1935). **a - 540**

Historique de la foundation et de l'organisation de la Commission Polaire de l'Académie des Sciences Russe en 1914; son développement; les principaux travaux exécutés et les recherches accomplies.

**An.** - XVIme Congrès International de Navigation, Bruxelles, 1935 [*De XVI° Congressu Internationali pro Navigatione. Bruxellis, 1935*]. Ann. Trav. Publ. Belgique, XXVI, 6, 964-976. Bruxelles (1935). **a - 541**

Conclusions et vœux élaborés respectivement par la 1ère Section, Navigation Intérieure, et par la 2me Section, Navigation Maritime, au cours de leurs séances lors du XVIème Congrès International de Navigation, réuni à Bruxelles dans la première quinzaine de Septembre 1935.

**An.** - Jubilee Section of the Arctic Institute [*Sessio jubilaris Instituti Arctici*]. (In Russ. Engl. Summ.). 1 photo, Bull. Arct. Inst., 3/4, 53-55, 112. Leningrad (1935). **a - 542**

Brief account of the meeting held in order to celebrate the 15th anniversary of the Arctic Institute of the USSR; list of 62 papers read during the meetings of the Congress from April 14th to April 18th, 1935.

**An.** - Compte-rendu des Sections de l'Institut Arctique de l'URSS sur les travaux exécutés au cours des 15 années de l'existence de l'Institut [*Relatio a Sectionibus quae ad Insti-*

*tutum Arcticum Sovieticum pertinent de operibus peractis per XV annos*]. (En russe). 2 tabl., Bull. Arct. Inst., 3/4, 61-75. Leningrad (1935). **a - 543**

Compte rendu des travaux de la Section Géologique, de la Section Hydrologique, de la Section Cartographique et Géodésique, de la Section Géophysique, de la Section Biologique et Industrielle de l'Institut Arctique de l'URSS.

**An.** - L'Exposition de la Session Jubilaire de l'Institut Arctique) [*De expositione perdurante Sessione jubilari Instituti Arctici*]. (En russe). 3 photos, Bull. Arct. Inst., 3/4, 75-77. Leningrad (1935). **a - 544**

Courte description de l'exposition ouverte en occasion du 15$^{me}$ anniversaire de la fondation de l'Institut Arctique de l'URSS.

**An.** - Works in the Arctic Regions in 1936 [*De operibus peractis in regionibus arcticis, A. 1936*]. (In Russ., Engl. Summ.). Bull. Arct. Inst., VI, 1, 3, 43-45. Leningrad (1936). **a - 545**

Brief account of the discussions which have taken place during a Conference held at Moscow on January 15th, 1936, by the personnel of the Chief Administration of the North Sea Route together with the Heads of various central and local administrations and other people interested in the problem of Soviet Arctic. O. J. Schmidt presented a report on the Program of Work for 1936 and on a number of problems to be taken in consideration on account of the economic development of Soviet Arctic.

**An.** - Sur les problèmes actuels [*Quaestiones hodiernae*]. (En russe). Bull. Arct. Inst., VI, 1, 3-7. Leningrad (1936). **a - 546**

Bref compte rendu du rapport du Directeur de l'Institut Arctique de l'URSS, le Prof. R. L. Samoilovitch, présenté à la réunion des collaborateurs économiques et politiques de l'Administration Centrale de la Voie Maritime du Nord. Le rapport contient le résumé de l'activité déployée en 1935 par les différentes Sections de l'Institut, à voire: les sections géologique, géodésique, hydrologique, biologo-industrielle et géophysique.

**An.** - Quatrième Congrès international de Photogrammétrie. Vœux et résolutions des Commissions [*Proposita et consilia sumpta a variis Commissionibus*]. Bull. Photogramm., 2, 52-62. S-té Franç. Photogr. & Cinématogr. Paris (1935). **a - 547**

Vœux et résolutions du Congrès réuni à Paris du 30 novembre au 1 décembre 1934.

**An.** - La Academia Sinica [*Academia Sinensis*]. 2 fot., Iberica, XXII, 1089, 195-196. Barcelona (1935). **a - 548**

Información sobre la fundación de la Organización Central de Investigación establecida por el Gobierno nacional de Nankin en 1928. La idea de sus fundadores fué fundar una especie de Academia de Ciencias (en su sección de Investigación científica e industrial) combinada con una especie de « Kaiser-Wilhelm-Gesellschaft ». Descripción de los institutos de la Academia Sínica.

**An.** - Annual Report of the Director of the U. S. Coast and Geodetic Survey, 1934. Rapport annuel du Directeur du Coast and Geodetic Survey des E. U. A., 1934 [*Relatio annua a Directore redacta*]. (In Engl. & French). 1 table, Int. Hydrogr. Bull. - Bull. Hydrogr. Int., III, 51-55. Monaco (1935). **a - 549**

Brief summary of the more important items of the Annual Report of the Director of the U. S. Coast and Geodetic Survey for the financial year ended 30th June 1934, containing some interesting information concerning the activities of that Service.

**An.** - Despatch Lists of Publications Issued by Hydrographic Services. Liste d'envoi des publications éditées par les Services Hydrographiques [*Index publicationum editarum a Servitiis hydrographicis*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., III, 57-58. Monaco (1935). **a - 550**

Information concerned with the addresses of the various Hydrographic Offices of the U. S. of America, of which a complete list is reproduced, in order to avoid delays and losses of various foreign publications on account of their being often incorrectly addressed.

**An.** - Report of Proceedings of the Seventh Meeting of the Baltic Geodetic Commission at Leningrad and Moscow, September 1934. Comptes-rendus de la Septième Séance de la Commission Géodésique Baltique, à Léningrad, Septembre 1934 [*Relationes quae pertinent ad VII$^{am}$ Sessionem habitam a Commissione Geodetica Baltica Leningradi et Mosquae. Mense Septembri 1934*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., III, 59-60. Monaco (1935). **a - 551**

Brief account of the report consisting in two volumes, in German, printed at Helsingfors in 1935; vol. I gives the reports of proceedings and the reports of the Commission, and vol. II contains papers read during the course of sessions. Some particularly important papers are recorded in a list.

**An.** - Annual Report of the Director of the Department of Terrestrial Magnetism. Carnegie Institution of Washington, 1933-34 [*Relatio annua redacta a Directore Dipartimenti pro magnetismo Terrestri. A. 1933-34*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., IV, 91-92. Monaco (1935). **a - 552**

Summary of the results obtained and progress made in the various branches of investigation of the Department of Terrestrial Magnetism which are grouped under four divisions; account of the final compilation and preparation for publication of the results in physical and chemical oceanography obtained during the last cruise of the « Carnegie », magnetic equipment and instructions, co-operation with the different International Polar Year Committees.

**An.** - Fifth Annual Report of the Woods Hole Oceanographic Institution, 1934. Cinquième Rapport annuel de l'Institut Océanographique de Woods Hole, année 1934 [*De V$^{a}$ relatione annua ab Instituto Oceanographico in* Woods Hole *redacta. A. 1934*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Int. Hydrogr., V, 107-108. Monaco (1935). **a - 553**

Brief summary of the contents of the Report followed by a list of publications dealing with the biology and the physics of the sea and especially concerned with hydrography.

**An.** - Annual General Meeting of the Society for Nautical Research [*Consessus plenarius annuus Societatis pro inquisitionibus nauticis*]. Mar. Mirr., XXI, 4, 349-377. London (1935). **a - 554**

Account of the Meeting held on July 31st, 1935 in the Theatre of the Royal United Service Institution, Whitehall. List of members and text of the speeches delivered.

**An.** - International Meteorological Conference Warsaw meeting [*Conferentia internationalis pro re meteorologia. Sessio Varsovina*]. Nature, CXXXVI, 3441, 613-614. London (1935). **a - 555**

Report on the conference held on September 6-13, 1935.

**An.** - Classified List of Papers and Reports Bearing on Oceanography Published in Japan during 1932 [*Bibliographia operum oceanographicorum in Japonia editorum, A. 1932*]. Rec. Oceanogr. Works in Japan VI (1934), 73, Tokyo (1936).

(—) Id. Id. Published during 1933, VII (1934). Tokyo (1936). **a - 556**

**An.** - Celebración del XX aniversario de la creación del Instituto Español de Oceanografia y V de la constitución del Consejo Oceanográfico Ibero-Americano [*De Instituto Hispanico pro re oceanographica deque Consilio oceanographico Hispano-Americano. Prioris instituti celebratio, XX° recurrente anno ab eius fundatione, V° autem recurrente a fundatione alterius instituti*]. Rev. Cons. Oceanogr. Ibero-Amer., V, 1/4, 3-14. Madrid (1935). **a - 557**

Discurso del Director del Instituto Español de Oceanografia, Profesor Odón de Buen e copia de un artículo publicado por el Profesor Od. de Buen con el título « El Instituto Español de Oceanografía cumple veinte años di existencia » (« Industria pesqueras», VIII, n° 174 y 175, Vigo, Julio 1934).

Compte rendu du Congrès contenant, entre autre, aussi la résolution votée sur le rapport de R. M. Samojlovitch « Résultats de l'exploration de l'Arctique au cours de 15 ans ».

## Expeditiones oceanographiae et scientiae causa susceptae - Studia et quaesita oceanographica.

**Barnes Cl. A., Thompson Th. G. & Zeusler F. A.** - Summary of the Oceanographical Investigations of Bering Sea and Bering Strait [*De exploratione oceanographica Maris Bering et Strictus. Compendium*]. 1 map, 7 tables. Nat. Res. Counc., Amer. Geoph. Un., Trans. 16th Ann. Meet., Apr. 25-26, 1935, I, 258-264. Washington D. C. (1935). **a - 563**

Summary of the oceanographic investigations conducted in Bering Sea during the summer 1934 in a cooperative program of study between the U. S. Coast Guard and the Oceanographic Laboratories of the University of Washington. It contains the following data: Description of region. Apparatus and methods. Sections and stations, temperature- and chlorinity-values of the waters. Nutrient salts and dissolved oxygen. Currents.

**Berezkine - V.** La campagne du « Lütke » en 1934 [*De navigatione navis* « Lütke ». *A. 1934*]. (En russe). 7 fig. Morsk. Sborn. 12, 58-71. Leningrad (1934). **a - 564**

Conferencia dada en la Sociedad Geográfica el 11 de Marzo de 1935 acompañada de numerosas proyecciones; descripción de la expedición que se realizó en el buque de la Compañía Trasatlántica « Marqués de Comillas » y consistió en seguir el itinerario oficial de vapores correos; los trabajos de crucero consistieron, en primer lugar, en conferencias.

**Derjughin K. M.** - Explorations of the Pacific Scientific Expedition of the State Hydrological Institute in 1932 [*De operibus peractis per Expeditionem scientificam in Oceanum Pacificum ab Instituto Hydrologico Nationali susceptam. A. 1932*]. (In Russ.). Bull. Pacif. Comm. Acad. Sc. USSR, 3, 29-32. Leningrad (1934). **a - 571**

Four cruises have been made in the Japan Sea during which an investigation of the continental shelf has been performed. In the Okhotsk Sea hydrological sections and stations have been made, and in the Bering Sea all the western area lying between the Bering Strait and the Komandorskije Islands has been investigated, with especial reference to the intermixtion of the waters of both the Bering and the Tschukhotsk Seas. (Report to the Fifth Pacific Congress).

**Derjughin K. M.** - Exploration des mers de l'Extrême-Orient [*De exploratis maribus ad ultimas regiones orientales pertinentibus*]. Bull. Soc. Océanogr. France, XV, 85, 1473-1481. Paris (1935). **a - 572**

Sur les cinq croisières du « Rossinante » dont quatre au golfe de Pierre-le-Grand et dans les régions les plus proches de la mer du Japon. Détachement de la mer de Okhotsk sur le chalutier « Gagara ». Détachement de la mer de Bering sur le trawler « Dalnevostočnik ».

**Dudkovskij** - La II$^{ème}$ campagne de Lena de la GUSMP (Administration Centrale de la Voie Maritime du Nord) [*De secunda navigatione per flumen* Lena *ab Instituto* GUSMP *peracta*]. (En russe). Sov. Jakut. 9/10. 65-74. Jakutsk (1934). **a - 573**

**Evghenov N. I.** - High Latitude Expedition on the « Sadko » [*De expeditionibus ad altas latitudines navis* « Sadko »]. (In Russ. & Engl.). Bull. Arct. Inst., V, 10, 322-328, 355-360. Leningrad (1935). **a - 574**

Account of the expedition of the « Sadko », which sailed from Arkhangheljsk on July 6th and returned in the same port on September 28th, 1935. The Expedition organized by the Administration of the Northern Sea Route had two main objects, i. e.: the collection of material for the further development and elaboration of ice prognosis for long periods ahead, and the exploration of unknown or little known regions in the northern high latitudes. The article contains information on the staff of the Expedition, the oceanographic work performed during the voyage, the aerological surveys made, the ice condition encountered by the ice-breaker, the discovery of an Island, named Ushakov in lat. 80°50′ N., long. 79°20′ E., and of an extensive shallow bank in the extreme northern part of the Kara Sea.

**Fedorov E. K.** - Scientific Work at the Polar Station on Cape Tscheljuskin during the Wintering Period 1934-1935 [*De operibus scientificis peractis a Statione polari in promunturio* Tscheljuskin, *hieme 1934/35*]. (In Russ. & Engl.). Bull. Arct. Inst., V, 10, 333-335, 368-365. Leningrad (1935). **a - 575**

Record of the work performed on the Station built in 1932 and considerably enlarged in 1934 for the purpose of scientific investigations. A brief description of the new buildings of the Station is given as well as a short account of the meteorological, aerological observations, the investigation of the atmospheric electricity and the work on terrestrial magnetism carried out during the winter 1934-35.

**Galbis J.** - Contribution à l'étude géophysique de la Méditerranée [*Contributio in studendum Mare Mediterraneum e re geophysica*]. 1 carte h. t. Rapp. Pr.-Verb. Cons. Expl. Scient. Méditerranée (n. sér.), IV, 59-83. Paris (1935). **a - 576**

État actuel des travaux dans la partie occidentale. Bathymétrie. Météorologie. Gravimétrie (liste des stations): Magnétisme terrestre (liste des stations). Sismologie (situation des foyers sismiques de la Méditerranée). Relation de quelques raz de marée dans la Méditerranée. Géodésie et photogrammétrie.

**Gomojounov K. A.** - Sur le travail des expéditions hydrologiques [*De operibus peractis ab expeditionibus hydrologicis*]. (En russe). Bull. Arct. Inst., V, 11, 397-398. Leningrad (1935). **a - 577**

Bref compte rendu des expéditions envoyées sur les fleuves suivants de l'Arctique et leurs embouchures: Pjasina, Taymyr, Khatanga, Anabar, Indighirka et Kolyma.

**Gomojunov K. A.** - Hydrological Expeditions of the Arctic Institute in 1935 [*De expeditionibus hydrologicis ab Instituto Arctico peractis, A. 1935*]. (In Russ. & Engl.). Bull. Arct. Inst., V, 8, 245-249, 265-268. Leningrad (1935). **a - 578**

Account of the following expeditions sent out by the Arctic Institute of the USSR during 1935: I. Marine expeditions: 1. Kara Sea, 2. Vilkitzky Strait and Laptev Sea, 3. Across all the seas of the Northern Sea Route. II. River Expeditions: Basin of the Kara Sea. Basin of East-Siberian Sea.

**Gomojunov K. A.** - The Work of the Hydrological Expeditions of 1935 [*De operibus peractis ab expeditionibus hydrologicis. A. 1935*]. (In Russ. & Engl.). Bull. Arct. Inst., V, 9, 285-286, 308-309. Leningrad (1935). **a - 579**

Results of the work of the hydrological expeditions sent to Taimyr, to Anabara, Khatnaga, Kolyma, Lean, and Indigirka Rivers and during voyages of ships along the Northern Sea Route.

**Granqvist G.** - The Thalassological Summer Cruise in 1935. [*Navigatio thalassologica estate A. 1935*]. Tabl., 1 map., 17 pp. Merentutk. laitoks, Julk. (Havsforskn. inst. skr.), 103. Helsinki (1935). **a - 580**

The results are expressed in tables concerning temperature, salinity, density, hydrogen ion activity, oxygen content, percentage of oxygen saturation and alcalinity for various depths, as well as temperature and salinity of surface waters. Meteorological data and table of the transparence of the water without and with colour filters.

**Hamlet H. G.** - Oceanographic Work Carried on by the United States Coast Guard During 1934 and Plans for 1935 [*De operibus oceanographicis peractis ab* U. S. Coast Guard. *A. 1934. Ratio et proposita pro A. 1935*]. Nat. Res. Counc., Amer. Geoph. Un., Trans. 16th Ann. Meet., Apr. 25-26, 1935, I, 214-215. Washington D. C. (1935). **a - 581**

Brief account of the results of the cruises of the 125-foot patrol boat « General Green », during which hydrodynamic survey, oceanographic stations, soundings and measurements of water-temperature have been made. Some hints as to the program of 1935.

**Hebecker O.** - Belehrungsfahrten als Ergänzung und Erweiterung des Unterrichts an Seefahrtschulen [*De expeditionibus discipulos docendi causa peractis a scholis nauticis*]. Seewart V, 6, 184-189. Hamburg (1936). **a - 582**

Allgemeine Gesichtspunkte. Betrachtung des Arbeitsverfahrens. Die Bedeutung der Belehrungsfahrten für den Lehrer.

**Hernandez-Pacheco E.** - Expediciòn cientifica a Ifni [*De expeditione scientiae causa ad* Ifni]. 14 lam. Bol. Soc. Geogr. Nac., LXXV, 9, 516-541. Madrid (1935). **a - 583**

El presente trabajo es copia casi literal del Informe, que, come jefe de la « Expedición Cientifica a Ifni » el autor expuso a la consideración de la Presidencia del Consejo de Ministros para dar cuenta al regreso de los resultados obtenidos en esta primera exploración del país recientemente incorporado de hecho al conjunto de la República Española. Esta Memoria es el primer relato de carácter científico del territorio de Ifni, país que antes de la expedición estaba hermético a los europeos y totalmente desconocido.

**Isachsen G.** - Norvegia rundt sydpollandet. Norvegia – Ekspedisjonen 1930–1931. [*De navi* « Norvegia » *per Polum meridionalem. Navigatio navis* « Norvegia » *A. 1930/31*]. 100 fig., 1 carte h. t. 252 pp., Gyldendal Norsk Forl., Oslo (1934). **a - 584**

Compte rendu de la quatrième expédition de la « Norvegia » autour du pôle Sud envoyée dans les régions antarctiques dans le but d'exécuter des études océanographiques, météorologiques, biologiques et des recherches de baleines.

**Khlynovskij D.** - Explorations scientifiques de la Mer de Barents [*De Mari* Barents *scientiae causa explorato*]. (En russe). Karelo-Mourm. Kraj, 1/2 , 58. Leningrad (1935). **a - 585**

**Khmyznikova V.** - Expedition on the Ice-Breaker « Malyghin » in 1935 [*De navigatione navis glaciei ruptricis* « Malyghin » *A. 1935*]. (In Russ. Engl. Summ.), 1 map. Bull. Arct. Inst., VI, 1, 16-19, 46-48. Leningrad (1936). **a - 586**

Brief account of the expedition sent out from Arkhangheljsk in order to investigate the navigation-route, along the line: Cape Zhelanije-Vilkitzkij Strait, and Dickson Island-Vilkitzkij Strait. The Expedition left Arkhangheljsk on July 6th and returned there on October 28th, 1935. Hydrological and hydrobiological work performed.

**Knipovitsch N.** - Hydrological Survey of the Barents Sea [*De adumbrationibus hydrologicis Maris* Barents]. (In Russ., Engl. Summ.). 1 map. Bull. Arct. Inst., V, 12, 440-442, 465-466. Leningrad (1935). **a - 587**

Results of hydrological investigations carried out in the Barents Sea by the vessel « Persey » and the small investigation ship « N. Knipovitch », during which 155 stations and 87 stations respectively by both the vessels have been made. At all the stations determinations of temperature, salinity, oxygen-content and hydrogen-ions concentration have been made, and in the great majority of cases, determinations of phosphor, nitrates and nitrites content have also been effectuated.

**Kourbatov L. M.** - The Work of the Radiometric Laboratory of the Geological Section of the Arctic Institute in 1935 [*De operibus peractis a Laboratorio radiometrico ad Sectionem geologicam Instituti Arctici pertinente pro A. 1935*]. (In Russ. Engl. Summ.), Bull. Arct. Inst., VI, 1, 10-12, 44-45. Leningrad (1936). **a - 588**

Brief account of the work of the Laboratory principally concerned with (1) investigating the radioactivity of rocks, bottom sediments, waters and other natural elements of the Arctic regions, and (2) elaborating of radiometric methods suitable under Arctic conditions.

**Kurze F. W.** - Nordmeerfahrten der Reichsmarine [*De navigationibus ad regiones Maris Nordici, Classe Germanica peractis*]. 65 Abb., Dietrich Reimer Verl., Berlin (1935). **a - 589**

Vf. beschreibt die Fahrten des Vermessungs- und Forschungsschiffes « Meteor » nach Island, Grönland und Jan Mayen. Er schildert See, Land und Leute und berichtet ausserdem über die zahlreichen ausgeführten Vermessungsarbeiten und ozeanographischen Beobachtungen (S. « Buchbesprechung » von E. Römer, « Seewart », IV, 3, 126-127).

**Le Danois Ed.** - Premiers résultats des croisières de l'Office de Pêches Maritimes exécutées sur le navire « Président Théodore Tissier » [*De navigationibus inquirendi causa peractis per navem* « Président Théodore Tissier » *ad Officium pro piscatione maritima pertinentem. Resultatus priores*]. Rev. Scient., LXXIII, 5, 145-152. Paris (1935). **a - 590**

Conférence faite à l'Institut Océanographique décrivant le lancement, l'armement et la mise au point de l'outillage scientifique du navire océanographique français. Description de la première croisière du navire, au cours de laquelle l'A. a observé certains hauts-fonds sur la côte nord de l'Espagne, a visité l'archipel des Salvages, a exploré l'île de Lanzarote, la plus orientale des Canaries, a exécuté une prospection méthodique du banc Conception, a exploré les fonds marocains en dehors de la zone corallienne, a exécuté une section hydrologique le long de 10ᵉ méridien pour étudier la température et la salinité de l'eau du large de l'Atlantique. Les études d'ordre pratique et scientifique accomplies au cours de la seconde croisière du « Président Théodore Tissier » et les recherches effectuées lors de la troisième croisière du navire dans les eaux américaines.

**McLean Fraser C.** - Oceanography in British Columbia in 1934 [*De oceanographia in Columbia Britannica, A. 1934*]. Nat. Res. Counc., Amer. Geoph. Un., Trans. 16th Ann. Meet. Apr. 25-26, 1935, I, 256-268. Washington D. C. (1935). **a - 591**

Account of the oceanographical work performed in British Columbia during the year 1934, treated under three heads: (1) chemical and physical oceanography; (2) biology and fisheries; (3) fisheries technology.

**Meleschko V. P.** - Hydrological Work at the Polar Station on Cape Tscheljuskin [*De operibus hydrologicis peractis per stationem polarem in promunturio* Tscheljuskin *constitutam*]. (In Russ. & Engl.), Bull. Arct. Inst., V, 10, 335-337, 365-366. Leningrad (1935). **a - 592**

Brief account of the work performed during 1934-1935 by the hydrologist of the Station, chiefly concerned with the hydrology of the Vilkitskij Strait; depth soundings with simultaneous measurements of the ice and snow cover, as well as some observations of the ice-drift and magnetic investigation.

**Mosby O.** - Forschungsfahrten um Neufundlad unnd Labrador [*De expeditionibus inquirendi causa peractis ad regiones* Neufundland *et* Labrador]. Seewart V, 3/4, 108-111. Hamburg (1936). **a - 593**

Der Vf., Chef-Ozeanograph des International Ice Patrol Service, berichtet über seine in 1931 und 1932 mit dem Kutter der U. S. Coast Guard « General Greene » ausgeführten Stromuntersuchungen und Eisbeobachtungen. (Sonderausdr. aus dem Polar Aarboken 1935, Oslo).

**Orvin A. K.** - Norges Svalnard-og Ishavs-Undersøkelsers ekspedisjoner i årene 1934 og 1935 [*De expeditionibus a Norvegis peractis ad*

Svalbard *et Mare arcticum A. 1934 et 1935*]. 4 figs., 2 maps. Norsk Geogr. Tidsskr. V, h. 8, 4, 467-484. Oslo (1935). **a - 594**

The Expeditions to northeastern and southern Greenland in 1934. Sounding-expedition to Svalbard in 1935. Hydrographical expedition to Davis Strait in 1935. The expeditions of S/S Busko and Veslekari to northeastern Greenland in 1935. The expedition to Southeastern Greenland in 1935.

**Palmén E.** - The Thalassological Summer Cruise in 1934 [*De navigatione thalassologica, aestate 1934*]. 1 map, tabl. Merentutk-laitoks. julk. (Havsforskn. inst. skr.), 98, 1-17. Helsinki (1935). **a - 595**

Results of this exploration of the waters surrounding Finland expressed in tables for depth- and surface sections concerning temperature, salinity, density, Ph, oxygen content, percentage of oxygen saturation and alcalinity for various depths, meteorological data etc.

**Pineghine N.** - Dans le pays des renards blancs [*Expeditio ad regionem quam vulpes albae habitant*]. (En russe). Ill. 246 pp., Ed. Pisatelej (Ed. des Ecrivains). Leningrad (1935). **a - 596**

Compte-rendu de l'expédition de l'Académie des Sciences de l'URSS aux Iles Novosibirskije en 1928.

**Pravoslavlev P.** - Sur les travaux de l'expédition de l'Académie des Sciences pour l'exploration des baies Mertvyi Koultouk et Kajdak de la Mer Caspienne en 1934 [*De operibus quae pertinent ad expeditionem susceptam ab Academia Scientiarum,* Mertvyi, Kultuk *et* Kajdak *in Mari Caspio explorandi causa, A. 1934*]. (En russe). 1 carte, Bull. Acad. Sc., URSS., Cl. Sc., Mathém. & Nat., VII, 3, 335-347. Moscou-Léningrad (1935). **a - 597**

Après un rapide résumé de l'histoire de l'exploration des Baies Mertvyj Koultouk, e Kajdak qui représentent une des zones les moins connues de la Mer Caspienne, étant donné qu'elles se trouvent dans une région désertique et, à cause de leur profondeur réduite, restent en dehors des voies de navigation, l'A. donne un aperçu des résultats d'une expédition envoyée en 1934 par l'Académie des Sciences de l'URSS dans le but d'étudier ces baies et d'établir, dans la mesure du possible, leur rôle dans l'hydrologie et la biologie de la Mer Caspienne. L'exploration de ces baies avait une importance particulière à cause du phénomène bien connu de l'assèchement de la partie nord de la Mer Caspienne, dans laquelle elles sont situées.

**Serdjukov** - Hydrographic Work During the Year 1935 [*Opus hydrographicum peractum A. 1935*]. (In Russ. Engl. Summ.). Bull. Arct. Inst., 7, 199-202, 227-228. Leningrad (1935). **a - 608**

After a brief outline of the program elaborated for the hydrographical work for 1935, author communicates the program of work in the western portion of the Northern Sea Route, those of the West-Siberian Hydrographic Department and of the East-Siberian Hydrographic Department of the Northern Sea Route.

**Spigai V.** - La fonotelemetria e la guerra marittima [*De phonotelemetria et bello maritimo*]. 7 fig. Riv. Maritt. LXIX, 1, 30-46. Roma (1936). **a - 609**

**Sverdrup H. U. (Ed.).** - The scientific Results of the Norwegian North Polar Expedition with the « Maud » 1918-1925 [*De resultatibus scientificis expeditionis Norvegicae ad arcticas regiones ab A. 1918 ad A. 1925 per navem* « Maud »]. I a, 1-8, I b, II, III, IV, 1-4, V, 1-20. Bergen (1928-1933). **a - 610**

The volumes published concern: Special reports; Magnetic, atmospheric-electric and auroral results; Meteorology; discussion and tables; Oceanography; Biology, Mineralogy and Ethnography. (See rev. by A. Defant, Naturwiss. 1, 10-14. Berlin, 1936).

**Svetakov L. V.** - La Baie Tixi [*Baja* Tixi]. (En russe). 2 fig. Sov. Sever. 5, 65-67. Moskva (1934). **a - 611**

Compte rendu des travaux de l'expédition envoyée dans l'embouchure du fleuve Léna et dans la Mer des Frères Laptev par l'Administration Centrale de la Voie Maritime du Nord, en 1933.

**Tåning Å. V.** - Blade af « Dana's » Davbog [*De foliis ad ephemeridem nauticam navis* « Dana » *pertinentibus*]. Nord. Havfisk. Tidsskr. IX, 7, 3-5. København (1935). **a - 612**

**Tikhomirov E.** - Quelques résultats de l'expédition de la « Maud » 1918-1925) [*Nonnulli resultatus deprompti ab expeditione navis* « Maud » (*1918-1925*)]. (En russe), 8 fig. Météorol. Vestn. (Bull. Météorol.), 1/2; 1-17. Leningrad (1935). **a - 613**

**Tschausov A.** - L'océanographie polaire sur une nouvelle étape [*De novis progressibus oceanographiae polaris*]. (En russe). 5 fig., 2 tabl. Vestn. Znan., 6, 418-425. Leningrad (1935). **a - 614**

**Tschernigovskij N.** - First Wintering on Lonely Island (Oujedinenija) [*De priore hiematione in insula cui « Solitudinis » nomen est*]. (In Russ. & Engl.). Bull. Arct. Inst., V, 10, 330-333, 362-363. Leningrad (1935). **a - 615**

Brief account of the work performed at the polar station on Lonely Island (lat. 77′ 30° 24″ N., long. 82° 12′ 12″ E.) specially concerned with the dependence of the water-level and the salinity of the water upon the prevailing winds, the tidal and water-temperature observations and observation of the ice-condition. Some actinometrical and climatological and meteorological work has also been carried out.

**Vaughan Wayland T. W.** - Oceanographic Research at the Scripps Institution During April 1934 to April 1935 [*Investigationes oceanographicae a* Scripps Institution *peractae, a mense Aprili 1934 ad Aprilem 1935*]. 1 table. Nat. Res. Counc., Amer. Geoph. Un., Trans. 16th Ann. Meet., Apr. 25-26, 1935, I, 221-226. Washington D. C. (1935). **a - 616**

Improvements. Expeditions and oceanographic data. Physical oceanography and marine meteorology. Chemical investigations. Biological investigations. Marine bottom-deposits.

**Victor P. E.** - Rapport préliminaire de l'expédition scientifique française sur la côte Est du Groenland (1934-1935) envoyée par le Musée d'Ethnographie du Trocadéro (Muséum National d'histoire naturelle) [*Relatio prior expeditionis scientificae francogallicae ad litora orientalia Groenlandiae* (*1934-35*). *Relatio delata est ad museum Etnographicum* τοῦ Trocadero]. Géogr., Terre-Air-Mer, LXIV, 5, 321-327. Paris (1935). **a - 617**

Résumé des buts et des travaux de l'expédition qui tout en étant essentiellement ethnographique et anthropologique, permettait de poursuivre d'autres travaux d'ordre géographique et géologique. Les détails des travaux sont réportés dans une liste à part (pp. 324-327).

**Zinger M.** - L'Océan reveillé [*Acta scripta ad expeditionem polarem in regionem* Kolyma *pertinentia*]. (En russe). 18 cartes s. pl. h. t., cartes à tabl. 291 pp., Moskovsk. Tov. Pisatel. Moskva (1934). **a - 618**

Compte rendu de la Ie expédition polaire nord-orientale dans la région de Kolyma.

**Glavsevmorputj** (Administration Centrale de la Voie Maritime du Nord) « Sadko » sous la bandière soviétique [« Sadko » *sub vexillo sovietico*]. (En russe). Fig., tabl., 5 cartes à diagr. h. t., 232 pp., Ed. Glavsevmorputj. Leningrad (1935). **a - 619**

Recueil d'articles des membres de la première expédition arctique du « Sadko » sous la bandière soviétique en 1934.

**Navy Department Bureau of Engineering** - American Polar Year Expedition, 1932-1933. Radio Section [*De expeditione americana anno polorum 1932-1933 perdurante. Sectio pro radiotelegraphia*]. 4 tables, 15 pls., 12 pp., Navy Dept. Bur. Eng. Rep. H-1032. Nav. Res. Labor. Bellevue, D. C. (1934). **a - 620**

**Première Conférence Géographique Soviétique** - Travaux de la . . . . . . . . (11-18 avril 1933), vol. 3. Séances des Sections [*De operibus peractis, prima perdurante Conferentia geographica sovietica (11-18 aprilis 1933)*]. (En russe). Fig., 6 cartes h. t., 429 pp., Ed. Soc. Géogr. Etat. Léningrad (1934). **a - 621**

Compte rendu des travaux de la section de Géographie Physique, et des sous-sections: géomorphologique, hydrologique, biogéographique et climatologique, parmi lesquels on peut signaler les rapports de V. P. Kaljanov sur les « Travaux de l'Institut Océanographique de l'Etat dans le domaine de la géomorphologie et de la géologie quaternaire des côtes des mers septentrionales » et sur les « Caractéristiques fondamentales de la géomorphologie de la côte occidentale de la péninsule de Kanine sur la base des matériaux de l'expédition du GOIN en 1930 ».

**R. Società Geografica Italiana** - Risultati preliminari della campagna oceanografica della Spedizione J. Murray nel Mar Rosso [*Resultatus priores deprompti ab expeditione oceanographica* J. Murray *in Mare Rubrum*]. Boll. Soc. Geogr. It., maggio-giugno, 344-397. Roma (1935). **a - 622**

**K. A. G.** - Travaux de l'expédition hydrographique sur le brise-glace « Malyghine » [*De operibus peractis perdurante expeditione hydrographica navis glaciei ruptricis* « Malyghin »]. (En russe). Bull. Arct. Inst., V, 9, 289. Leningrad (1935). **a - 624**

Bref compte rendu des travaux exécutés dans la partie septentrionale de la Mer de Kara et de l'exploration de la « tâche blanche » située au nord-ouest de l'Ile Oujédiénijé dans laquelle on a découvert un entier archipel d'îles et d'îlots.

**K. A. S.** - Winter Work of the Geological Expedition to Chukchee Peninsula in 1934-1935 [*Opus hiemale peractum perdurante expeditione geologica ad paeninsulam* Tschuktschi *A. 1934-35*]. (In Russ. & Engl.). Bull. Arct. Inst., V, 3/4, 80, 121-122. Leningrad (1935). **a - 625**

Brief account of the cartographical surveys made by the wintering party of the expedition under the leadership of S. V. Obrutchev, in Chaun Bay and on the coast of the East-Siberian Sea, as well as on Ayon Island.

**L.** - 923 Meter unter dem Meeresspiegel [*Metra 923 in profundum*]. 6 Abb., Umschau XL, 3, 46-49. Frankfurt a. M. (193 ). **a - 626**

Etwas von Beebe's Fahrten. Beschreibung seiner Tiefseekugel.

**T. K.** - Le rapport de l'Expédition Antarctique Australienne 1915 [*Relatio de expeditione antarctica australiensi, A. 1915*]. (En russe). Klimat i Pogoda, 3, 23. Leningrad (1935). **a - 627**

**An.** - Organizacja Polskiej Wyprawy Polarnej na Spitsbergen [*Ratio et munera ad expeditionem polonam in* Spitsbergen *pertinentia*]. Biul. Towarz. Geofizyk., Zesc. 9/10, 49-50. Warszawa (1934). **a - 628**

**An.** - Expedition to High Arctic Latitudes [*De quadam navigatione ad arcticas peraltas latitudines*]. (In Russ. & Engl.). Bull. Arct. Inst., V, 3/4, 81, 117-118. Leningrad (1935). **a - 629**

Brief account of the program of the expedition of the ice-breaker « Sadko » to the region north of the extreme archipelagos of the Continental Shelf-Spitzbergen, Franz-Joseph Land and Severnaja Zemlja.

**An.** - L'Arctique en 1935 [*De regionibus arcticis, A. 1935*]. (En russe). Bull. Arct. Inst., V, 5/6, 123-125. Leningrad (1935). **a - 630**

Extrait d'une interview avec le Directeur de la Voie Maritime du Nord O. J. Schmidt, concernant les derniers travaux de son Administration et le programme prévu pour 1935. Cette année signera le début de l'exploitation pratique de la Voie Maritime du Nord, étant donné que le Conseil du Travail et de la Défense de l'U. R. S. S. a approuvé un plan de transports qui devront s'effectuer par cette Voie. Parallèlement on continuera l'exploration scientifique de l'Arctique Soviétique qui sera partagée en plusieurs sections, desservies chacune par un des puissant brise-glace russes. Quelques aperçus sur le développement projeté de l'exploitation et de l'utilisation des ressources minérales, végétales et animales de l'Extrême Nord russe.

**An.** - Arctic Stations of the Chief Administration of the Northern Sea Route [*Stationes arcticae quae pertinent ad Centralem Administrationem pro Via maritima Nordica*]. (In Russ. & Engl.). Bull. Arct. Inst., V, 9, 282-283, 305-307. Leningrad (1935). **a - 631**

Brief account of the work carried out on the Polar Stations of Cape Zhelanija, Ozernaja (Sheleznyj Vorota), Matotchkin Shar, Russki Isl., Cape Tcheljuskin, Cape Nordwick, Cape Billings, and Cape Schmidt.

**An.** - La Deuxième Expédition Antarctique de Byrd [*De secunda expeditione ad regiones Antarcticas a* Byrd *peracta*]. (En russe). Bull. Arct. Inst., V, 9, 293. Leningrad (1935). **a - 632**

Bref compte rendu des travaux de l'expédition de Little America en 1934 avec référence spéciale aux explorations conduites par P. Siple, A. Blackburne, à la croisière de « Bear of Oakland » et au retour de l'expédition de Byrd.

**An.** - Deuxième Expédition Antarctique de Ellsworth, 1934-1935 [*De secunda expeditione ad regiones antarcticas ab* Ellsworth *peracta. A. 1934-35*]. (En russe). Bull. Arct. Inst., V, 9, 293-294. Leningrad (1935). **a - 633**

Bref compte-rendu de l'expédition, dont le but principal était de survoler le continent antarctique de la mer de Weddel jusqu'à la Mer de Ross.

**An.** - Expédition Antarctique Britannique sur la Terre de Graham [*De expeditione a Britannis suscepta ad Terram* de Graham]. (En russe). Bull. Arct. Inst., V, 9, 294. Leningrad (1935). **a - 634**

Description de la seconde période de l'expédition, au cours de l'hiver 1935, passé dans les parages des Iles de l'Argentine et consacré, en dehors des explorations des alentours immédiats, à la préparation de l'exploration du littoral entre la Terre de Charcot et la Terre de Luitpold, qui représente une zone complètement inconnue encore.

**An.** - La navigation de la « Discovery II » en 1933-1935 [*De navigatione navis* « Discovery II » *A. 1933-35*]. (En russe). Bull. Arct. Inst., V, 9, 294-295. Leningrad (1935). **a - 635**

Extrait du rapport sur le voyage antarctique, publié dans « Polar Record », n° 10.

**An.** - Observations océanographiques faites de Barry (Angleterre) à l'Archipel de Kerguelen (12 octobre-2 décembre 1923). Le Havre (1935). **a - 636**

**An.** - Second Expedition to the Estuary of the River Lena. Deuxième expédition à l'estuaire de la rivière Lena [*De secunda expeditione ad accessum fluminis* Lena]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., III, 60-61. Monaco (1935). **a - 637**

Extract from the « Bulletin of Arctic Institute », n° 8/9, Leningrad, 1934, dealing with the hydrographic expedition on board the ice-breaker « Yermak ».

**An.** - Arctic Expeditions during 1935. Expéditions arctiques au cours de l'année 1935 [*De expeditionibus ad regiones arcticas, A. 1935*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Int. Hydrogr., V, 108. Monaco (1935). **a - 638**

Brief account of expeditions to the Arctic organized by the U. S. S. R., and by Norway.

**An.** - Antarctic Research 1935. Exploration dans l'Antarctique en 1935 [*De explorationibus ad regiones antarcticas, A. 1935*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Int. Hydrogr., V, 108-109. Monaco (1935). **a - 639**

Brief account of Antarctic research carried out by the tanker « Thorshavn » belonging to the Lars Christensen Whaling Company and information on the completion of the third expedition of the R. R. S. « Discovery II » in Antarctic waters.

**An.** - The John Murray Expedition to the Arabian Sea (Continued) - Expédition John Murray à la Mer d'Arabie (suite) [*De expeditione* « John Murray » *ad Mare Arabicum*]. Int. Hydrogr. Bull. - Bull. Int. Hydrogr., VI, 121-122. Monaco (1935). **a - 640**

(See prev. issues of « Int. Hydrogr. Bull. » since 1933) - Further information, on hand of note published in « The Marine Observer », October, 1935, containing the results of echo-soundings carried out by the John Murray Expedition.

**An.** - Oceanographic Resarch - Recherches océanographiques [*Investigationes oceanographicae*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Int. Hydrogr., VI, 122. Monaco (1935). **a - 641**

Brief account of the oceanographic research work of the German exploring vessel « Meteor » in the area situated between South Greenland and Newfoundland.

**An.** - Expedition to High Arctic Latitudes - Expédition vers la haute Arctique [*De quadam expeditione ad Antarctidem septentrionalem*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Int. Hydrogr., VI, 122-123. Monaco (1935). **a - 642**

Extract from the « Bulletin of the Arctic Institute », n° 3/4, p. 117, 1935, Leningrad: the expedition of the ice-breaking S. S. « Sadko » to the district north the extreme archipelagos of the Continental Shelf. - Some other information on the expedition gathered from « La Géographie », Paris, 1935 and other sources.

**An.** - Voyages of Exploration - Voyages d'exploration [*De navigationibus explorandi causa*]. (In Engl. & French). Int. Hydrogr. Bull., VI, 123-124. Monaco (1935). **a - 643**

Short note on the sending by the Service Hydrographique of the French Navy to the International Hydrographic Bureau of a reproduction of a chart entitled « Les Français au cœur de l'Amérique » (The French in the heart of America), prepared on the occasion of the first voyage of the « Normandie » in 1935.

**An.** - Arctic Expeditions - Expéditions arctiques [*De expeditionibus ad regiones arcticas*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., II, 27-28. Monaco (1936). **a - 644**

Brief account, on hand of information published in « The Polar Record », on arctic exploration carried out during the summer 1935 by expeditions of different countries.

**An.** - Antarctic Expeditions - Expéditions antarctiques [*De expeditionibus ad regiones antarcticas*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., II, 29. Monaco (1936). **a - 645**

Extract from « The Polar Record », Cambridge, January, 1936, dealing with the British Graham Land Expedition and the expedition of « Discovery II ».

**An.** - Communication du brise-glace « Krassine » [*Communicatio navis glaciei ruptricis* « Krassin »]. (En russe). 1 fig., Izv. Gos. Ghidrol. Inst., 67, 16. Leningrad (1934). **a - 646**

Travaux hydrographiques exécutés par l'expédition au cours de son voyage à l'Ile de Vrangel dans la partie nord-occidentale de la Mer de Tchoukhotsk et dans la partie orientale de la Mer Sibérienne Orientale.

**An.** - Travail scientifique à bord du « Lütke » [*Opus scientificum peractum in navi* « Lütke »]. (En russe). Meteorol. Vestn., 10/12, 338-339. Leningrad (1934). **a - 647**

Chronique des travaux exécutés sur le navire au cours de son expédition dans l'Arctique.

# GEOLOGIA MARIS

## Geologia generalis bacini oceanici - Marium origo - Vestigia veterum marium.

**Alcock F. J.** - Geology of Chaleur Bay Region [*De geologia in* Chaleur Bay]. Ills., maps, 146 pp., Geol. Surv. Canada Dpt Mines. Mem. No. 183. Ottawa (1935).

( — ) Version française: J. O. Patenaude. Ottawa (1935). **a - 648**

**Arkell W. J.** - On the Nature, Origin, and Climatic Significance of the Coral Reefs in the Vicinity of Oxford [*De natura, origine et climate rupium corallinacearum apud Oxonium*]. Quart. Journ. Geol. Soc., XLI, 77-110. London (1935). **a - 649**

Author gives a vivid description of the surroundings of Oxford during part of the Jurassic period, which consisted of a clear shallow sea with a complex of true coral reefs intersected by narrow channels. He discusses therefore the climate of the region under consideration during this period and concludes that either the corals have changed their habits since Jurassic times, or the climate was markedly warmer than now. The cause of the extension of a subtropical climate to Britain is not discussed, but the author remarks that « many lines of evidence seem to point to the conclusion that in Mesozoic times there was a more uniform climate over most parts of the globe, and that the regions that are now cold or temperate were considerably warmer ».

**Aschauer H. & Hollister J. S.** - Ostpyrenäen und Balearen; mit einem paläontologischen Beitrage von O. H. Schindewolf und Schlussbetrachtungen von H. Stille [*De montibus Pyrenaeis insulisque Balearibus ex palaeontologia, cum observationibus* H. Stille. O. H. Schindewolf *auctoribus*]. 8 Taf., 44 Abb., 208 S. Beitr. z. Geol. d. westl. Mediterrangebiete hrsg. v. H. Stille Nr. 11, Abh. Ges. Wiss. Göttingen, math.-naturw. Klasse III. Folge, Heft 10. Weidmannsche Buchhandl. Berlin (1934). **a - 650**

Die viel umstrittene Frage der östlichen Fortsetzung der Pyrenäen wird hier endgültig geklärt. Es wird auch beinahe festgelegt, dass die Fortsetzung des Südastes der Pyrenäen in den Balearen zu suchen ist. Von grosser Bedeutung sind die von Hollister im Jungpaläozoikum Menorcas gefundenen, zwei altersverschiedenen Faunen gehörenden, Ammonoideen, von denen eine die ufernahe marine (paralische) Zone umfasst und die andere mediterranen Charakter hat.

**Baak J. A.** - Regional Petrology of the Southern North Sea [*Petrologia in regionibus meridionalibus Maris nordici*]. H. Veenman en Zn. Wageningen (1936). **a - 651**

**Basse E.** - Etude géologique du Sud-Est de Madagascar [*Studium geologicum regionum in* Madagascar *sudorientali*]. 26 fig., 3 pl., 12 cartes, 4 cartes h. t., 159 pp., Mém. Soc. Géol. France. Paris (1934). **a - 652**

Thèse de géologie présentée à la Faculté des Sciences de Paris et qui forme une très importante contribution à l'étude de la formation du sol de Madagascar. La région illustrée comprend tout le territoire Sakalava situé au nord au nord-est et à l'est de Tulear.

**Bessmertny A.** - L'Atlantide (trad. franç. par F. Gidon) [*De Atlantide*]. 23 fig. & cartes, 270 pp., Payot. Paris (1935). **a - 653**

Traduction française de l'ouvrage allemand contenant un exposé des hypothèses relatives à l'énigme de l'Atlantide. Le traducteur, M. Gidon, a ajouté un chapitre très important traitant des submersions irlando-armoricaines de l'âge du bronze et de la tradition atlantidienne.

**Blanc C. A.** - Formazioni pleistoceniche nel sottosuolo della Versilia (Nota preliminare) [*De formationibus pleistocenicis in inferiore solo Versiliae*]. 2 fig., Atti Soc. Toscana Sc. Natur., XLII, 5, 129-143. Pisa (1934). **a - 654**

L'A. segnala nel lago di Massaciuccoli una successione stratigrafica pleistocenica comprendente i relitti di una foresta di Conifere di tipo subartico, una fauna marina fossile di carattere più caldo dell'attuale e un « deserto fossile ».

**Blom J. C. E.** - Geologische Probleme im Malayischen Archipel [*De problematis geologicis archipelagi Malesiae*]. 1 Karte, 72 S. Inaug. Diss. Friedrich Schiller-Universität. Jena (1934). **a - 655**

Allgemeine Lage und geologische Grundlagen des Archipels. Analyse des Archipels.

**Bondon J. & Yovanovitch B.** - Sur les terrains antécarbonifères du Maroc Occidental [*De terrenis antecarboniferis Mauretaniae occidentalis*]. 1 carte, C. R. Acad. Sc., CCII, 16, 1380-1382. Paris (1936). **a - 656**

Brève description des terrains antécarbonifères que l'on rencontre dans la partie du Maroc située à l'Ouest du méridien de Casablanca et dont les facies lithologiques et paléontologiques sont remarquablement constants; ils sont, en outre, affectés par un système de plis, orientés N 10° E que l'on peut suivre à travers les plissements postérieurs et que l'on est tenté de faire continuer sous l'Océan.

**Bordas A. F.** - Las formaciones sedimentarias del terciario inferior de la Patagonia [*De formationibus sedimentariis aetatis tertiariae inferioris Patagoniae*]. 17 fig., Rev. geogr. Amer., IV, 26, 305-316. Buenos Aires (1935). **a - 657**

**Bourcart J.** - Le Quaternaire du littoral de Rabat (Maroc) [*De aetate quaternaria in litoribus mauretanicis regionis* Rabat]. C. R. Acad. Sc., CCI, 19, 839-840. Paris (1935). **a - 658**

Ce quaternaire a enregistré les mouvements qu'a subi le Maroc atlantique; il se trouve plissé en très grands anticlinaux et synclinaux qui suivent l'orographie actuelle du Maroc. Les différentes formations et fossiles marins.

**Bourcart J.** - Le Quaternaire dans la région de Meknès (Maroc) [*De aetate quaternaria in Mauretanica regione* Meknès]. C. R. Acad. Sc., CCI, 21, 971-973. Paris (1935). **a - 659**

La plaine, ou le plateau du Saïs, qui s'étend de Meknès à Fès, est considérée par l'A. comme l'équivalent du Quaternaire marin dur. Ces calcaires contiennent une faune de Mollusques totalement différente de la faune pliocène du Maroc oriental. Comparaison avec les recherches précédentes et avec d'autres formations.

**Bourcart J.** - Le Quaternaire marin sur le littoral du Cap Saint-Vincent à l'estuaire du Sado [*De quaternario marino in litoribus promunturii* Saint-Vincent *ad accessum fluminis* Sado]. C. R. Acad. Sc., CCII, 10, 856-858. Paris (1936). **a - 660**

L'A. compare les résultats de l'étude morphologique conduite par M. Lautensach avec les faits stratigraphiques qu'il a observés au Cap Saint-Vincent et décrits dans une Note précédente (V.: C. R. Acad. Sc., CCI, p. 1403, 1935) concernant l'ablation par la mer de cette partie du littoral nord-marocain.

**Bowie W.** - The Origin of Continents and Oceans [*De origine terrarum continentium et oceanorum*]. Scient. Monthly, Nov. Lancaster, Pa. (1935). **a - 661**

Some hints of new theories about this geophysical problem. The problem considered by geodesists, mineralogists and seismologists. Planetesimal and isostatical hypothesis. Darwin - Fisher hypothesis.

**Chaput E.** - Les plissements tertiaires de l'Anatolie Centrale [*Plicae tertiariae in Anatolia centrali*]. C. R. Acad. Sc., CCII, 26, 1404-1405. Paris (1935). **a - 662**

Description des zones plissées dans les régions galates de l'Anatolie Centrale qui relient ici les chaînes pontiques et les chaînes tauriques; ces chaînes ont été plissées au Nummulitique après le dépôt de la série gypsifère.

**Cipolla F.** - Nuovi contributi alla geologia e geografia fisica di Mazara del Vallo e suoi dintorni (prov. di Trapani) [*Contributiones novae in geologiam et geographiam physicam regionis* Mazara del Vallo *eiusque propinquitatum*]. 9 tav., Boll. Soc. Sc. Nat. Econ., XVI, 28-35. Palermo (1934). **a - 663**

L'A. dimostra che la costituzione geologica di Mazara del Vallo e suoi dintorni è un po' diversa da quella indicata dalla carta geologica ufficiale e mette in evidenza alcune particolarità geografico-fisiche e paleontologiche.

**Cipolla F.** - Il terziario superiore e il quaternario dell'Italia meridionale e della Sicilia e l'opera di Giuseppe Seguenza [*De tertiario superiore et quaternario Italiae meridionalis et insulae Siciliae relate ad opera Josephi* Seguenza]. Giorn. Sc. Nat. ed Econ., XXXVIII, 3, 1-16. Palermo (1934). **a - 664**

L'A. prova, tenendo presenti i risultati di precedenti suoi studi e di quelli di geologi italiani e stranieri, che nella classificazione cronologica e stratigrafica del Terziario superiore dell'Italia meridionale e della Sicilia, non può disconoscersi, ancora dopo più di un cinquantennio, la grande importanza della creazione, fatta da G. Seguenza di un piano Zancleano nella parte inferiore del Pliocene, non che della di lui scoperta degli strati a strombi alla fine del Quaternario marino.

**Cipolla F.** - Sul quaternario della Sicilia meridionale [*De quaternario in Sicilia meridionali*]. 2 tav., Giorn. Sc. Nat. Econ., XXXVIII, 4, 1-8. Palermo (1934). **a - 665**

Si mettono in evidenza nuove caratteristiche del Quaternario della Sicilia meridionale, segnalandone specialmente interessanti tracce di livelli marini ad esso corrispondenti non che particolarità stratigrafiche e paleontologiche degne di rilievo nelle tre località di Sambuca sicula, Sciacca e Agrigento.

**Comte P.** - La série dévonienne du Léon (Espagne). [*De serie devoniana ad regionem* Léon (*in Hispania*) *pertinente*]. C. R. Acad. Sc., CCII, 4, 337-339. Paris (1936). **a - 666**

L'A. donne le résumé d'une étude qu'il a faite d'un remarquable développement de terrains primaires, non métamorphiques, généralement fossilifères et de là particulièrement instructifs au point de vue stratigraphique et que l'on rencontre dans la chaîne cantabrique dans le nord du Léon (Espagne). Il esquisse dans la présente note l'échelle, à laquelle ses recherches l'ont conduit. La coupe exécutée présente un grand intérêt, car on y voit les faunes marines évoluer plus progressivement que dans les régions ardennaises et rhénanes, types classiques du Dévonien de J. Gosselet.

**Comte P.** - Le Dévonien inférieur du Léon (Espagne) [*De aetate devoniana inferiore ad regionem* Léon (*in Hispania*) *pertinente*]. C. R. Acad. Sc., CCII, 9, 771-773. Paris (1936). **a - 667**

Quelques arguments et quelques comparaisons complétant une Note précédente concernant le Dévonien inférieur du Léon (V.: C. R., CCII, 337-339, 1936). L'analyse faite par l'A. éclaire la monographie de Verneuil et démontre que le Dévonien inférieur du Léon a d'étroites relations avec celui des Basses-Pyrénées et surtout avec le Dévonien de la Bretagne, avec lequel il présente des analogies frappantes.

**Darder Pericás B.** - Mapa geològic de les Serres de Llevant e de l'Illa de Mallorca [*Tabula geologica quae pertinet ad* Serres de Llevant *et ad Balearem majorem*]. 1 mapa. Palma (1932). **a - 668**

El trabajo del doctor Darder consta de dos hojas, denominadas respectivamente Santany-Felanitx y Artá-Manacor; la escala es de 1/50.000.

**D'Erasmo G.** - Il mare pliocenico nella Puglia [*De mari pliocenico in Apulia*]. 2 carte f. t., Mem. Geol. e Geogr. di Giotto Dainelli, IV, 1933-1934, 45-138. Firenze (1935). **a - 669**

L'A. rende noti i risultati dell'esame sulla costituzione geologica delle Puglie, mettendo in evidenza i limiti del mare Pliocenico e la varia intensità dei sollevamenti postpliocenici finora non sintetizzati da alcuno per detta regione. Questo studio giova a chi vorrà ulteriormente ricostruire l'interessante periodo di storia geologico delle Puglie. Corredato da copiosa letteratura, esso è diviso in cinque parti che trattano rispettivamente: 1° il Tavoliere e il subappennino; 2° la Regione garganica; 3° la Regione murgiana o Terra di Bari; 4° la Fossa premurgiana; 5° la Penisola salentina o Terra d'Otranto.

**Ermilov I. J.** - Explorations géologiques sur la péninsule de Ghydansk en 1927 [*De explorationibus geologicis in paeninsula* Ghydansk *A. 1927*]. (En russe). 1 carte. Trudy Polj. Komm. Acad. Naouk SSSR (Trav. Comm. Polaire Acad. Sc. URSS), 20, 11-25. Moskva-Leningrad (1935). **a - 670**

**Ermolaev M. M.** - Geological Work of the Expedition on the Icebreaker « Sadko » [*Opus geologicum peractum inter navigationem navis glaciei-ruptricis* « Sadko »]. (In Russ. & Engl.). Bull. Arct. Inst., V, 10, 328-329, 360-361. Leningrad (1935). **a - 671**

Brief account of the geological work carried out during the « Sadko » expedition in the summer 1935 to high latitudes. Special attention has been directed to the geology of the sea-bottom deposits and geological sections were made during landings. But the latter were very rare, so that the main results concern the survey of the sea-bottom. The chief objects of the investigations were problems of lithogenesis, the occurrence of various deposits in the whole area surveyed, and the study of the various facies in the epicontinental sea and in the open ocean.

**Frebold H.** - Untersuchungen über die Verbreitung, Lagerungsverhältnisse und Fauna des Oberen Jura von Ostgrönland [*Investigationes in propagationem, stratificationem et faunam jurassicam superiorem Groenlandiae orientalis*]. 14 Abb., 3 Taf., Medd. Grönl., XCIV, 1, 1-81. København (1933). **a - 672**

Zusammenfassende Wiedergabe der heutigen Kenntnisse über die Verbreitung des Oberen Jura in Ostgrönland. Die jurassische Transgression hat zwischen der Callovianischen und der Oxfordianischen Periode stattgefunden und hat sich auch in das Kimmeridgische Zeitalter gestreckt zur Zeit, wo das Meer sich von Ostgrönland zurückgezogen hatte. Es werden ausserdem die tektonischen und paläographischen Charakteristika besprochen und eine interessante Folgerung davon gezogen, bzw. über die Existenz eines insularischen Grenzlandes, welches sich ostwärts von den jurassischen Ablagerungen und westwärts von dem altertümlichen Skandischen Meere ausdehnte.

**Gorbatzky G. W.** - Geology of the Lower Pechora District [*De geologia inferioris partis fluminis* Petschora]. (In Russ., Engl. Summ.). Tabl., 1 pl. o. t., Trans. Arct. Inst., XV, 5-25. Leningrad (1935). **a - 679**

Results of the geological and geomorphological investigations of the entire district of Lower Pechora - 200 km. upstream from the mouth of the river and its tributaries, carried out by the Expedition of the Arctic Institute in 1932. The entire district consists of exclusively quaternary deposits, most fully and typically represented on the right shore of the Great Pechora, somewhat above Velikovissokhny Strait. At the present time the district is evidently in the stage of a rather intensive upheaval, which is dealt with by the author.

**Grabau A. W.** - Palaeozoic Formations in the Light of the Pulsation Theory; Part I: Lower Cambrian Pulsation. Part II: The Middle Cambrian or Albertan Pulsation. Parts III, IV: The Cambrovician Pulsation [*De formationibus palaeozoicis secundum rationem quae dicitur « ratio pulsationis ». Pars Iª: De pulsatione aetatis cambrianae inferioris. Pars IIª: De pulsatione aetatis cambrianae intermediae seu aetatis Albertanae. Partes IIIª et IVª: De pulsatione aetatis Cambrovicianae*]. Sc. Quart., Nat. Univ. Peking, IV-V, 1, 4; 1-2, 27-184, 355-832; 1-316. Peking (1934-1935). **a - 680**

Detailed survey of the stratigraphy and faunas (about 2000 species listed) of the Cambrian and Lower Ordovician formations throughout the world. Discussion on the regressive and transgressive phases on the basis of the pulsation theory according to which the « pulsations are due apparently to alternate swelling and contraction of the sea-bottom ».

**Grigorjev A.** - La géomorphologie de la presqu'île Kola d'après les récentes recherches [*De geomorphologia paeninsulae* Kola *ex investigationibus recentibus*]. 11 pp., C. R. Dél. Sov. Congr. Int. Géogr. Varsovie; Inst. Scient. Publ. Atl. Sov. Leningrad (1934). **a - 681**

**Isbary G.** - Das Inselgebiet von Ameland bis Rottumeroog. Morphologische und hydrographische Beiträge zur Entwicklungsgeschichte der friesischen Inseln [*Regio insularis ad* Ameland *pertinens usque ad* Rottumeroog. *Contributiones morphologicae et hydrographicae in historiam geologicam Insularum Frisiarum*]. 8 Taf. mit Karten a. T., 55 S. Aus d. Arch. Dtsch. Seew., LVI, 3. Hamburg (1936). **a - 683**

Nach einem eingehenden Studium über die einzelnen Dünenbildungen, die Umrissveränderungen der Inseln, die Watten und Gaten und ihre Stromsysteme schliesst Vf. folgendes: « Obgleich die friesischen Inseln (ausser Texel) allein vom Gezeitenmeer am Rande einer Flachlandsküste

geschaffene Gebilde sind, müssen sie ehemals über die Zwischenzone der heutigen Watten eine engere Verbindung mit dem Festland gehabt haben. Die Zerstörung dieser Zwischenzone, bereits beginnend mit der Entstehung der grossen Meereseinbrüche im Ablauf einer säkularen Senkung, steigerte sich, als nach dem Abschluss der Senkung die Ostwanderung des gesamten Küstensaumes wieder stärker in die Erscheinung trat. Die Tiefs der alten Meeresbuchten wurden unter dem Einfluss der Gezeitenströmungen von den Meeresbuchten abgelöst und nach O gedreht. Sie entwickelten sich dadurch zu selbständigen Stromsystemen, die mehr und mehr die Zwischenzone aufschlossen und die in Ruhezeiten landwärts gewachsenen Inseln von der Wattseite angriffen und aushöhlten ».

**Ivanov I. M.** - The Coal Deposits of Franz-Joseph Land [*De carboniferis depositis in Terra Francisci Josephi*]. (In Russ., Engl. Summ.)- 4 figs., 2 tables, Trans. Arct. Inst., XV, 27-37., Leningrad (1935). **a - 684**

Results of a geodetic survey carried out in the region of Nansen, Hooker and Nordbruck Islands, Queen-Alexandra Land and Prince-George Land during journeys in the spring 1930. A stratigraphic section and the geologic map of Hooker and Scott Kelty Islands have been executed and are appended to the article.

**Jirmounsky A.** - Histoire du relief du bassin de la rivière Loutchessa et la partie contiguë du partage des eaux de la Dvina et du Dnjepr [*Historia regionis fluminis* Lutchessa *et partium propinquarum fluminum* Dvina *et* Dniepr]. (En russe). 1 carte, 1 diagr., 1 tabl. Izv. Gos. Gheogr. Obstsch., (Bull. Soc. Géogr. Etat); LXVII, 6, 752-759. Leningrad-Moskva (1935). **a - 685**

Sur la base d'observations et de levés exécutés dans la région étudiée, l'A. trace l'histoire des bassins des fleuves Dvina et Dnjepr, avec référence spéciale à leur limite de séparation, qui représente en même temps la limite de séparation entre la Mer Noire et la Mer Baltique.

(—) Trudy Vses. Nautchno–Issl. Inst. Morsk. Rybn. Khoz. Okeanogr. (In Russ.) Trav. Inst. Rech.Scient. Pêches Marit. & Océanogr.), I, 3-49. Moskva-Léningrad (1935). **a - 686**

Die Untersuchungen umfassen den südlichen und westlichen Teil mit Fjorden und Inseln. Für jede untersuchte Region sind die verschiedenen Schichten an Hand Karten, graphisch-schematischer Skizzen und chemischer Analysen, angegeben und erläutert. Vergleich mit den Ergebnissen anderer Forscher. Störungen des symmetrischen Baues des südlichen Teiles und daraus gezogene Schlussfolgerungen.

**Kobayashi Teiichi** - Upper Cambrian of the Wuhutsui Basin, Liaotung, with special Reference to the Limit of the Chaumitian (or upper Cambrian) of Eastern Asia, and its Subdivision [*Stratum Cambrianum Superius in bacino* Wuhutsui. *Agitur particulatim de limite quoad stratum chaumitianum (seu cambrianum superius) Asiae orientalis eiusque partitione*]. 7 pls., 1 map, tabl. Jap. Journ. Geol. & Geogr., Trans., XI, 1, 2, 55-155. Tokyo (1933). **a - 687**

Geology of the Wuhutsui Basin. Upper Cambrian in the Taitzuho trough. Note on the Upper Cambrian of the Yokusen trough of South Korea. Correlation of the Upper Cambrian sections of Eastern Asia. The limits of the Upper Cambrian formations and their major correlations, with a discussion of the Ozarkian problem. Palaeontology.

**Koulik N.** - Travaux de la Section de Géologie de l'Institut Arctique de l'URSS en 1935 [*De operibus peractis a Sectione pro Geologia in Instituto Arctico ad URSS pertinente, A. 1935*]. (En russe). Bull. Arct. Inst., V, 9, 278-279. Leningrad (1935). **a - 688**

Bref résumé des recherches géologiques exécutées dans la zone occidentale de la Route Maritime du Nord, en particulier sur la Novaja Zemlja, Vajgatch, Tajmyr, et dans la zone orientale, à voire sur la péninsule de Tchoukhotsk, dans le delta du fleuve Léna et sur les Iles Novo-Sibirskijé, avec référence spéciale à l'ouvrage de D. V. Nalivkine sur « La faune silourienne et dévonienne de la Novaja Zemlja ».

**Kuenen Ph. K.** - Problemen in Ned. Indië in verband met het verschuiven van continenten [*Questiones quae pertinent ad motus terrarum continentium in Indiis Hollandesibus*]. Tijdschr. Kon. Ned. Aardr. Gen. Amsterdam LIII, 2, 300. Leiden (1936). **a - 689**

Kurzer Bericht über einen Vortrag von Kuenen gehalten an der Sitzung der Niederl. Geogr. Gesellschaft am 24. Januar 1935 in Groningen. Kritische Besprechung der Wegnerschen Theorie in Bezug auf die Entwicklung des Gebietes zwischen Asien und Australien.

**Lacroix A.** - Composition minéralogique des roches volcaniques de l'Ile de Pâques [*Compositio mineralogica saxorum vulcanicorum Insulae Paschae*]. C. R. Acad. Sc., CCII, 7, 527-530. Paris (1936). **a - 690**

Résultats de l'étude minéralogique que l'A. a entreprise sur la très ample collection pétrographique rapportée en France par une mission franco–belge après un séjour de plusieurs mois dans l'Ile de Pâques. Il rappelle tout particulièrement l'attention sur l'intérêt spécial qu'offre l'existence dans cette île des roches rhyolitiques, et singulièrement des obsidiennes, qui sont tout à fait exceptionnelles dans les îles volcaniques du Pacifique.

**Lacroix A.** - Composition chimique des laves de l'Ile de Pâques [*Compositio chemica quoad lavam vulcanicam Insulae Paschae*]. 2 tabl. C. R. Acad. Sc., CCII, 8, 601-605. Paris (1936). **a - 691**

L'A. complète l'étude minéralogique des laves de l'Ile de Pâques faites antérieurement (V.: C. R. CCII, 1936, p. 527) par leur étude chimique; il les compare ensuite aux laves des autres volcans du Pacifique austral et, étant donné leur caractère particulier, conclut que l'Ile de Pâques, avec l'île Tutuila, de l'archipel de Samoa, pour raient être dues à une modification endomorphe du magma effectuée aux détriments d'un substratum cristallin ancien immergé.

**Lacroix A.** - Les roches volcaniques de l'Ile Pitcairn (Océan Pacifique Austral) [*Saxa vulcanica in Insula* Pitcairn (*in Oceano Pacifico australi*)]. 1 tabl. C. R. Acad. Sc., CCII, 10, 788-791. Paris (1936). **a - 692**

Dans la présente Note l'A. complète ses observations sur les roches volcaniques de l'Océan Pacifique Austral, en faisant l'analyse des roches rapportées par M. Métraux de la mission franco-belge de l'Ile de Pâques, de la petite île Pitcairn, l'une des îles Gambier qui est entièrement volcanique et qui se distingue nettement de ces dernières, ainsi que des autres îles océaniques du Pacifique.

**Lapparent (de) A. F.** - La transgression nummulitique dans les Alpes de Provence [*De transgressione nummulitica in Alpibus Provincialibus*]. C. R. Acad. Sc., CC, 2, 157-159. Paris (1935). **a - 693**

L'étude de la faune des niveaux des calcaires à Nummulites entre La Penne et Briançonnet et des grès à végétaux et Nummulites, ont permis à l'A. de suivre avec une progression et une continuité particulièrement intéressantes la transgression nummulitique de la région susmentionnée. Il a pu ainsi déterminer que la mer lattorfienne s'arrêtait contre les crêtes émergées de Teillon, Destourbes, Pré-Chauvin. Le fait nouveau que, dans le synclinorium de l'Estéron, la mer s'est avancée vers le Sud en même temps que vers l'Ouest, amène l'A. à modifier partiellement, pour cette région, les reconstitutions paléogéographiques de J. Boussac (v.: « Etudes stratigraphiques sur le Nummulitique alpin », Mém. Carte Géol. de la France, 1912, pp. 95-98).

**Lees Everett J.** - Geology of the Laberge Area, Yukon [*De geologia in area* Laberge, Yukon]. 6 pls. Trans. R. Canad. Instit., XX, part I, 43, 1-48. Toronto (1934). **a - 694**

Physiography and glacial geology, structural and economic geology. Stratigraphy and petrography. Palaeontology.

**Lóczy L.** - Geologie van Nord Boengkoe en het Bongka Gebied tusschen de Golf van Tomini en de Golf van Tolo in Oost Celebes [*De geologia in* Boengkoe *septentrionali et in regione* Bongka, *inter sinum* Tomini *et sinum* Tolo, *in orientalibus insulis* Celebes]. Verh. Geol-Mijnb. Gen. Ned. e. Kol., Geol. Ser., X, 3, 219-322. ? (1935). **a - 695**

**Loupanova N. P.** - Geologico-Petrographical Work in the Region of Providence Bay [*Opus geologico-petrographicum in Sinu Providentiae*]. (In Russ. Engl. Summ.). 1 map, 2 photos. Bull. Arct. Inst., VI, 1, 19-23, 48-50. Leningrad (1936). **a - 696**

Results of a topographic survey made by the geological party at the Polar Station in the Providence Bay. The description of the rocks which form the area under investigation is given and their age determined. The geological collection gathered has been successfully treated *in situ*.

**Markov K. K.** - Histoire glaciaire tardive et post-glaciaire des environs de Léningrad sur le fond de l'histoire glaciaire tardive et post-glaciaire de la Baltique [*De tarda historia glaciali historiaque postglaciali terrenorum apud Leningradum relate ad historiam glacialem tardam historiamque postglacialem Maris Baltici*]. (En russe). Trudy Komm. Izutsch. Tchetv. Per. (Trav. Comm. Et. Quatern.) Ed. Acad. Sc., IV, 1, 5-70. Leningrad (1934). **a - 697**

**Markov K. K.** - La Mer yoldienne et le problème de la jonction de la Baltique et de la Mer Blanche dans la période tardi-glaciale (2ème article) [*Agitur de mari yoldiano deque coniunctione maris Baltici cum mari Albo aetate tardo-glaciali*]. (En russe). 1 carte. Izv. Gos. Gheogr. Obstsch. (Bull. Soc. Géogr.), LXVII, 1, 88-89. Moskva-Leningrad (1935). **a - 698**

Après avoir relevé que depuis l'apparition de son premier article sur le même sujet de nombreux travaux très importants et traitant le même problème de la jonction de la Mer Yoldienne à travers un détroit avec la Mer Blanche ont été publiés, l'A. examine les publications de A. Hellakoski, L. v. Post, A. Cleve Euler, M. Sauramo et S. A. Jakovlev, dont il compare les conclusions à celles, auxquelles il était précédemment arrivé. (V.: 1er Article: « Izv. Gheogr. Obstsch. », LXV, 4).

**Markov K. K. & Poretzkij V. S.** - Histoire post-glaciaire des environs de Léningrad [*De historia postglaciali terrenorum apud Leningradum*]. (En russe). 4 fig., Priroda, 5/6, 99-103. Leningrad (1933). **a - 699**

**Menchikoff N. & Monod Th.** - Coupe géologique de Hank à Taoudeni (Sahara occidental) [*Sectio geologica ab* Hank *ad* Taudeni (*in Sahara occid.*)]. C. R. Acad. Sc., CCII, 3, 230-232. Paris (1936). **a - 700**

Les A.A. ont pu établir, sur la base de leurs explorations, une coupe d'ensemble des terrains primaires, depuis leur base jusqu'au Carbonifère inférieur inclus, dans la région située entre Hank et Taoudeni, et donnent dans la note présente, une brève description de la faune des couches étudiées.

**Misch P.** - Der Bau der mittleren Südpyrenäen [*De structura Pyrenaeorum meridionalium*]. Beiträge zur Geologie der westl. Mediterrangebiete hrsg. v. H. Stille. 51 Abb., 6 Taf., vi + 168 S. Abhandl. Ges. Wiss. Göttingen, III. Folge, 12, Weidmannsche Buchhandl. Berlin (1934). **a - 701**

Die hier dargestellte Auffassung weicht wesentlich von der bisherigen (« Alpinen Orogen ») ab: Bildung des Geosynklinales, Wechsel der Bewegungsrichtung; verschiedene paläozoische Zonen mit besonderer Berücksichtigung der plastischen Salzmassen in der Trias.

**Munro Georg W.** - Power to move Continents [*Vis motoria terrarum continentium*] Science, LXXXII, 2134, 488-490. New York (1935). **a - 702**

Referring to the presidential address of the Brit. Ass. Adv. Sc., September 4, concerning the form, drift and rhythm of the continents A. here develops his theory about heat, i. e. dissolved gases exerting high pressure as the main factor of movement. The formations of the mid-Atlantic swell, the Pacific foredeeps and the Gulf of Mexico are considered.

**Nikoljskj A. P. & Volodenkov G. G.** - Short Preliminary Data on the Geological Structure of the Eastern Part of the Chukchee Peninsula (*Dati priores de structura geologica regionis orientalis paeninsulae* Chukchee]. (In Russ. Engl. Summ.). Bull. Arct. Inst., V, 12, 437–440, 465 Leningrad (1935). **a - 703**

Brief description of the region of Koliuchinsk, Mechigmensk and Lawrence Bays in the eastern part of the Chukchee Peninsula where a geological party sent out by the Arctic Institute of USSR was working in 1934. As a result of the investigation carried out a geological and topographical map of the area has been constructed on the scale 1 : 500 000. The geological ages of the formations observed have been determined.

**Obrutschew S. W.** - Geologie des Schubert Busens [*De geologia sinus* Schubert]. (Russ. Text. Dtsch. Rés.). Geol. works on Novaya Zemlya, Trans. Inst. Mar. Fish. & Oceanogr., I. 58–66. Leningrad (1935). **a - 704**

Ergebnisse der während der 14. Expedition des Staatl. Ozeanogr. Instituts gemachten Untersuchungen. Topographische Aufnahme des Busens. Geologischer Bau der Küstengegend und des Tales des Schubertflusses.

**Saurin E.** - Sur la constitution géologique de la province du Phu–Yên (Sud-Annam) [*De constitutione geologica provinciae* Phu-Yên]. C. R. Acad. Sc., CCII, 5, 431-433. Paris (1935). **a - 712**

Brève description de la constitution géologique de la province située en bordure de la côte d'Annam entre le Cap Varella au Sud et le Col de Cu-Mong au Nord.

**Schuchert Ch.** - Historical Geology of the Antillean-Caribbean Region [*De geologia historica Antillarum*]. xxvi + 811 pp., 16 pls., 107 figs. John Wiley & Sons, Inc. New York (1935). **a - 713**

This work forms the first part of a proposed three-volume treatise dealing with the stratigraphy and historical geology of Mexico, Central America, the Antillean Islands, the Northern South America as well as the Gulf Coastal States of America, being the result of twenty-five years' work on paleographic maps (See rev. in Science 2143, 81-83).

**Shimizu S.** - Kin-Emon Ozaki and Tahadiro Obata. Gotlandian Deposits of Northwest Korea [*Agitur de* Kin-Emona Ozaki *et* Tahadiro Obata, *depositis gotlandianis in* Korea *nordorientali*]. 10 pls., 1 map. o. t. Journ. Shangai Sc. Inst. Sect. II, v. I, Separ. Print. 8, 59-88. Shanghai (1934). **a - 714**

**Simpson G. G.** - Early and Middle Tertiary Geology of the Gaiman Region, Chubut, Argentina [*De geologia aetatis tertiariae superioris et mediae in regionibus* Gaiman, Chubut, Argentina]. 13 figs., Amer. Mus. Novit., 775, 1-29, Amer. Mus. Nat. Hist., New York, Publ. Scarritt Exped., n. 23 (1935). **a - 715**

Author emphasizes the importance of the Gaiman region, situated approximately in lat. 43°16′ S., long. 65°28′ W., on the north (left) bank of the Rio Chubut, Argentina, from the geological point of view and gives a summary of previous research in this region. The Scarritt Expeditions have also carried out some investigations in the exposures of Gaiman collecting fossils at different levels and measuring several detailed geological sections. The results he obtained are so different from what was anticipated and cast so much new light on all the problems concerned with the relationships of the marine Salamanca to the terrestrial Casamayor Formation, the position and nature of the Cretaceous-Tertiary contact, the beginnings of Andian orogeny, the relation of the terrestrial Colhué-Huapi to the marine Patagonian Formation, and the ages of these various formations, that it seemed necessary to publish them in the present report.

**Smith W. A.** - Fossils as Indicators of Continental Drift [*De fossilibus ac indicibus motus continentium*]. Nature, CXXX, 5, 3422, 900–901. London (1935). **a - 716**

Extended account of a contribution to the discussion on Wegener's hypothesis of continental drift at the meeting of the Geological Society of London on January 23, 1935.

Some examples of fossils showing the possibility and non-possibility of the Wegener theory. Necessity of distinguishing between identical forms and parallel developments from common ancestors before drawing conclusions as to former land connexions. (See also addendum Nature, 3426, p. 1074).

**Stecher E.** - Paläovulkanische Bomben [*De globis palaeovulcanicis*]. 11 Taf. In Komm. bei Max Weg. Leipzig (1935 ?). **a - 717**

Die hier beschriebenen, in der Nähe von Chemnitz vorbefindlichen, Porphyrkugeln stammen wahrscheinlich aus den aus der Tiefe des paläozoischen Meeres hervorwellenden vulkanischen Lavamassen her. Vergleich mit anderen ähnlichen Funden.

**Stetson H. C.** - Bed-Rock from the Continental Margin on Georges Bank [*De rupibus sedimentariis a margine continentali provenientibus regionis* Georges Bank]. Nat. Res. Counc., Amer. Geoph. Un., Trans. 16 Ann. Meet., Apr. 25-26, 1935, I, 226-228. Washington D. C. (1935). **a - 718**

(Contr. n° 76 from the Woods Hole Oceanogr. Instit.). After a brief account of the results of numerous closely-spaced soundings carried on by the U. S. Coast and Geodetic Survey for the recharting of Georges Bank; a short summary is given of the work performed on the « Atlantis » sent in August 1934 by the Woods Hole Oceanographic Institution for a dredging trip to three of the newly charted canyons cutting the southern edge of Georges Bank between 67°38′ and 68°11′ west longitude.

**Størmer L.** - Contribution to the Geology of the Southern Part of the Oslofjord [*Contributio in geologiam regionis meridionalis* Oslofjord]. 12 figs., 5 pls. o. t., 1 map. Norsk Geol. Tidsskr. XV, 43-113. Oslo (1935). **a - 719**

Previous research and conceptions of the rhombporphyry conglomerate. Description of localities. General description and discussion. Tectonics. Remarks on glacial features in the southern part of the Oslofjord. The submarine barrier at the mouth of the fjord is shown on a map.

Reproduction abrégée d'une partie des manuscrits conservés aux archives de la Société Russe de Géographie, parmi lesquels nous citerons: V. A. Roussanov: Glaciers fossiles et houille sur la Novaja Zemlja en rapport avec la structure géologique de l'île, I. D. Tcherskij: Liste de la collection réunie au Bajkal, K. Tikhonravov: Sur les fossiles que l'on trouve le long des rivières Kolotchka et Kolokcha, B. V. Sabanine: Exécution des recherches géologiques et hydrologiques dans la région et la ville de Mourmansk.

**Watts W. W.** - Form, Drift and Rhythm of the Continents [*Agitur de forma, declinatione et rhythmo terrarum continentium*]. Science, LXXXII, 2123, 203-213. New York (1935).

(—) See also Nature Suppl. CXXXVI, 3436, 369-380. London (1935). **a - 724**

Presidential address of the British Association for the Advancement of Science, Norwich, September 4. Recapitulation and discussion of existing theories: Lyell, Hutton, Suess, Kelvin, Huxley, Rutherford, Rayleigh, Joly, Holmes, Du Toit, Wegener, Bailey, Gregory, De la Beche. Importance of their work for the present standpoint. Comparison of the structures of the Pacific and Atlantic oceans. Glacial movements and following changes. Evolution of life.

**Wilson G. W., Edvards W., Knox J., Jones R. C. B., Stephens J. V., Watson D. M. S., Lang W. H. & Flett S. J.** - The Geology of the Orkneys [*De geologia insularum* Orkney]. 8 pls., 1 map on pl., 36 figs., 205 pp. Geol. Survey Mem. Scotl. Edinburgh (1935). **a - 725**

The first four chapters deal with the geological expeditions undertaken during 1927-1929, the topography and the geology of the archipelago. The following chapters give a detailed description of the principal islands, and information on fishes, fossil plants and the petrography of the whole archipelago.

**Zuffardi-Comerci R.** I depositi marini pliocenici subalpini del Piemonte considerati in rapporto ai movimenti epirogenetici postpliocenici [*De depositis marinis pliocenicis subalpinis Pedemontanis consideratis pro motibus epirogeneticis postpliocenicis*]. Atti R. Acc. Sc. di Torino, Cl. Sc. Fis., Mat. e Nat., v. LXX, tomo I, disp. III, 447-461. Torino (1934–35). **a - 726**

Riconoscimento di tre regioni subalpine: due estreme che presentano numerosi affioramenti di Pliocene marino ed una intermedia, fra le valli dell'Orco e della Stura di Cuneo, che ne è priva. La prima delle due presenta fatti particolarmente interessanti, per lo scopo cui tende l'A., nei dintorni di Gozzano, allo sbocco di Valsesia e nel bacino d'Ivrea; la seconda per l'estensione che il Pliocene marino presenta nel primo subappennino e nei confronti con gli spostamenti nell'opposta Riviera ligure occidentale.

**An.** - Continental Drift [*Declinatio terrarum continentium*]. Science Suppl., LXXXI, 2109, 6. New York (1935). **a - 727**

Short note on a report presented by C. C. Smith on the meeting of the R. Society of Canada, concerning the Wegener theory.

## Litora et orae maritimae - Erosiones.

**Albani D.** - Variazioni di spiaggia e fenomeni bradisismici in Italia [*De orarum variationibus phaenomenisque bradisysmicis in Italia*]. Atti Soc. Ital. Progr. Sc. (XXIII Riun., Napoli, ott. 1934), II, 591-599. Roma (1935). **a - 728**

Si riscontra una certa concordanza tra variazioni di spiaggia e lente variazioni di livello tra la terraferma e il mare: per cui a movimenti di sommersione di coste rocciose corrisponderebbero ritiri nelle linee delle spiaggie che ad esse si appoggiano, mentre avanzamenti di spiaggia si verificherebbero là dove lenti movimenti di emersione sarebbero in atto. Il fenomeno di ritiro, che si manifesta oggi nella maggior parte delle spiaggie italiane, potrebbe essere posto in relazione a lenti movimenti di sommersione riscontrati su molti tratti di coste alte, i quali potrebbero insieme con altri importantissimi agenti naturali ed artificiali, determinare, o quanto meno gravare, il fenomeno di ritiro suddetto [A.].

**Behrmann W.** - Geographische Charakterbilder. 5. Kliffe und Rutschungen an der Südküste Englands [*De peculiaribus geographicis picturis. 5. De differentibus formationibus geologicis Angliae*]. 6 Abb. Nat. u. Volk LXV, 9, 465-470. Frankfurt a. M. (1935). **a - 729**

Diese junge (postglaziale) Küstenbildung befindet sich noch heute im schnellen Zurückweichen und bietet dabei ein grosses Formenreichtum dar, von denen mehrere hier in sehr gut gelungenen Bildern wiedergegeben werden.

**Blanc A. C.** - Le dune fossili di Castiglioncello e la regressione marina post-tirreniana [*De arenosis cumulis fossilibus in* Castiglioncello *deque regressione orae maritimae post-thyrrenicae*]. Riv. Geogr. Ital., I-III, 1-54. Firenze (1935). **a - 730**

Vengono, fra l'altro, esaminate le variazioni di linea di costa prodottesi su quella costiera dal Tirreniano in poi, e ne viene tratteggiata la correlazione con movimenti analoghi, riscontrati sulle coste del medio ed alto Tirreno [A.].

**Bourcart J.** - Le Quaternaire marin dans le golfe de Cadix [*De aetate quaternaria marina in Sinu Gaditano*]. C. R. Acad. Sc., CCI, 27, 1493-1495. Paris (1935). **a - 731**

L'A. a réussi à suivre, depuis l'embouchure de l'Oued Dra jusqu'au Cap Spartel, le littoral quaternaire de l'Océan Atlantique et à constater que cette partie de l'Atlantique n'est que la moitié d'un grand golfe dont la côte nord va de l'Isla de las Palomas (Tarifa) au Cap Saint Vincent. Il a, par conséquent, cherché à voir si les formations caractéristiques du Quaternaire marocain s'y continuent et a pu établir que le littoral chelléen du Maroc se poursuit le long de la côte nord du golfe de Cadix, mais qu'il y est entièrement sous-marin.

**Bourcart J.** - Remarques sur les dépôts quaternaires du littoral portugais entre le Cap d'Espichel et la presqu'île de Feniche [*Observationes circa deposita quaternaria litorum Lusitanorum inter Promunturium* d'Espichel *et paeninsulam* Peniche]. C. R. Acad. Sc., CCII, 12, 1079-1081. Paris (1936). **a - 732**

Dans une Note antérieure (V.: C. R., CCII, p. 856, 1936) l'A. avait montré qu'il était très probable qu'aucun document n'existât pour retracer l'histoire quaternaire du littoral portugais entre le Cap Saint Vincent et l'estuaire actuel du Sado; dans la présente Note, par contre, il démontre qu'il n'en est pas de même sur la rive droite de ce fleuve que forme la Serra calcaire de l'Arrabida. Ses observations montrent qu'en ce point un fragment du littoral chelléen est conservé, mais qu'il représente le bord d'un chenal séparant Peniche (et les Berlenguas) du continent; sur la base de l'examen de la faune il met en évidence l'existence d'une zone de surélévation littorale à l'extrémité de l'Arrabida d'une part et à Nazare, de l'autre part.

**Bourcart J.** - Sur l'évolution du littoral de la Péninsule Ibérique de la presqu'île de Peniche (Portugal) au cap Finistère (Galice espagnole) [*De evolutione litorum paeninsulae hibericae a paeninsula* Peniche (*in Lusitania*) *ad* Finistère (*in Galitia hispanica*). C. R. Acad. Sc., CCII, 17, 1448-1450. Paris (1936). **a - 733**

L'A. avait établi (v. « C. R. Acad. Sc. », CCI, 1935, p. 1493, CCII, 1936, p. 1079) que les dépôts quaternaires le long de l'Atlantique sont les mêmes de l'Anti-Atlas marocain à Peniche au Portugal. Dans la présente note il communique les résultats de l'étude du littoral au nord de Peniche qui le conduit à des résultats analogues, mais cette fois, les faits stratigraphiques étant peu nombreux, il fait surtout appel aux résultats de l'analyse morphologique.

**Castaldi F.** - Forme di erosione alveolare nei tufi della penisola sorrentina [*De erosione alveolari in tuphis paeninsulae Surrentinae*]. Nota III. Atti Soc. Ital. Progr. Sc. (XXIII Riun., Napoli, 13-17, ott. 1934), II, 608–615. Roma (1935). **a - 734**

Richiamati alcuni suoi studii precedenti, l'A. riporta caratteristici esempi di sculture alveolari da lui notate sulle pareti tufacee tra Meta e Piana di Sorrento. Tali forme di erosione appaiono a oltre 50 metri sul mare ed hanno dimensioni variabilissime. Sembra all'A. che la causa debba essere l'azione meccanica del vento e a tal proposito l'A. ha elaborato i dati dell'Osservatorio metereologico dei Frati Bigi della Carità a Massalubrense e ha stabilito che i venti predominanti sono quelli provenienti dal mare.

**Cisneros (de) J.** - La existencia de antiguas playas en la provincia de Alicante [*De veteribus oris maritimis Lucentiae*]. An. Asoc. Españ. Progr. Ciencias, II, 2, Madrid (1935). **a - 735**

**Faura M. & Ferrán P.** - Experiéncies sobre l'avancament del delta del Llobregat [*De progressione in delta fluminis* Llobregat]. 3 fig., Arx. Esc. Sup. de Agricoltura, 2, 150-157. Barcelona (1935). **a - 737**

Continuación de otro articulo publicado el año 1920 por el Dr. Faura en unión del Sr. Vilaseca.

**Goldtwait R. P.** - The Damariscotta Shell Heaps and Coastal Stability [*De concharum cumulis in* Damariscotta *deque stabilitate litorea*]. 3 figs., 3 tables. Amer. Journ. Sc., XXX, 175, 1-13. New Haven, Conn. (1935). **a - 738**

Description of the shell heaps of Damariscotta River which represents a tidal estuary. These heaps are unique among hundreds of similar Indian shell heaps on the coast of Maine and are built exclusively of oyster shells and in more protected coves extend down to the very edge of the salt marsh. A. reports soundings made to determine the area occupied by the old oyster beds and discusses the antiquity of the heaps and the relation of sea level to location of heaps. Some conclusions concerned with the widespread coastal submergence, previous to the recent stability, are drawn.

**Gorbatzky G. W.** - On the Character of the Shore–Line of the District of Cape Desire [*De peculiaritatibus quoad lineam litoream ad promunturium* Desire *pertinentem*]. (In Russ., Engl. Summ.). 1 chart. Arctica, II, 65-71. Leningrad (1934). **a - 739**

Brief account of an instrumental survey on the scale 1/100 000 and a geologic-geomorphological work carried out at the north extremity of Novaya Zemlya, between Cape Desire (Hoek der begeerte) and Krassivaya Bay.

**Goussev A.** - Exploration géologique sur le Cap Bykovoj [*Exploratio geologica promunturii* Bykovoj]. (En russe). Bull. Arct. Inst., VI, 1, 23-24. Leningrad (1936). **a - 740**

Résultats d'observations faites sur le cap qui montrent clairement que la terre ferme dans cette région a subi plusieurs fois des déplacements verticaux ce qui est aussi confirmé par la présence de glace fossile dans le terrain au-dessous du niveau actuel de la mer.

**Häntzschel W.** - Erhaltungsfähige Schleifspuren von Gischt am Nordseestrand [*De vestigiis ut rimis in arena litorea maris Nordici, a maris spuma formatis*]. 4 Abb. Nat. u. Volk LXV, 9, 461-465. Frankfurt a. M. (1935). **a - 741**

Kurzer Bericht über die vom Vf. am 24. Mai 1935 am Nordseestrand bei Wilhelmshaven beobachteten Gischtmassen, die vom Winde über die flache Sandbank hinweg getrieben wurden und dabei Schleifspuren bildeten.

**Holtedahl O.** - Den norske landmasses begrensning mot havet [*De limite massae continentalis Norvegicae*]. (Engl. rés.). 1 map, 2 figs. Norsk. Geogr. Tidsskr. V, h. 8, 4, 453-466. Oslo (1935). **a - 742**

A detailed study of the submarine lines from North to South of the Norwegian coast: depths, character, origine, epoch and theory of formation.

**Holtedahl O.** - A new Example of a Submarine Fault Line along a Continental Border [*Exemplar novum submarinae cuiusdam lineae fractae* *praeter marginem quemdam continentalem*]. 1 map, Kgl. Norsk. Vidensk. Selsk. Forh., 1935, VIII, 27, 91-93. Trondheim (1936). **a - 743**

On the discovery of a line of fracture similar to that in the submarine topography of many parts of the Norwegian shelf (Eine unterseeische Dislokations-Linie ausserhalb der norwegischen Küste 1933) along the west coast of Greenland.

**Krejci-Graf K.** - Beobachtungen am Tropenstrand [*Observationes circa litora tropicalia*]. 13 Abb, Senckenbergiana, XVII, 1/2, 21-61. Frankfurt a. M. (1935). **a - 744**

## Sedimenta.

**Arland H.** - Le Turonien des environs de Cassis et les mouvements crétacés en Province Occidentale [*De aetate Turoniana in regione* Cassis *deque motibus cretaceis in Provincia Occidentali*]. C. R. Acad. Sc. CC., 24, 2029–2031. Paris (1935). **a - 761**

Le Turonien des environs de Cassis offre des possibilités spéciales pour étudier les passages de formations calcaréo-marneuses néritiques à des formations détritiques littorales. Le point principal, la coupe d'Oullier est caractérisée par l'instabilité du fond marin dont les phases de mouvement sont décrits ici. Enumération des fossiles.

**Baeckeroot G.** - Sur la présence de dépôts transgressifs pliocènes sur la Haute-Ardenne [*De depositis transgressivis pliocenicis in* Haute-Ardenne]. C. R. Acad. Sc., CCII, 6, 499-501. Paris (1936). **a - 762**

Courte description des dépôts de galets d'oolithe silicifiés, découverts dans la carrière Fagnoux-Dupont, de Cockaifagne, à l'altitude de 480 m., dont résulte nettement le caractère marin et transgressif de ces dépôts qui appartiennent à un seul et même cycle de sédimentation qu'il semble légitime de dater du Pliocène.

Ius A. Quomodo sedimenta obtinentur atque examinantur*]. Wiss. Ergebn. Dtsch. Atlant. Exped. Meteor. 1925–27. III, 3. Teil., Lief. 1. Walter de Gruyter & Co. Berlin & Leipzig (1933-1935). **a - 763**

**Dementjev V.** - Contribution à l'histoire du relief des versants occidentaux du Paj-Khoj durant le Quaternaire [*Contributio in studendas conformationes regionum occidentalium* Paj-Khoj *aetate quaternaria*]. 9 fig., 1 pl. h. t. Izv. Gos. Gheogr. Obstsch. (Bull. Soc. Géogr. Etat), LXVII, 6, 737-751. Leningrad-Moskva (1935). **a - 764**

Tentative d'illustration de quelques problèmes liés à l'histoire du relief des versants Ouest du Paj-Khoj et du littoral adjacent de la Baie Khajpoudyrskaja, entre le détroit Jougorskij Char au Nord et le fleuve Khej-Jaga au Sud.

Le caractère marin des sédiments étudiés est confirmé par la présence des algues *Diatomeae* et *Silicoflagellatae*, représentées par leurs formes marines exclusivement. Sur la base des résultats de ses observations l'A. essaie de tracer l'histoire de la formation de la région considérée.

**Emelianof G.** - Sur les bauxites de la Lika (Yougoslavie) [*De bauxite regionis* Lika (*in Yougoslavia*)]. C. R. Acad. Sc., CCII, 26, 1405-1407. Paris (1935). **a - 765**

L'objet de cette note est de préciser l'âge des bauxites à diaspore de la Lika, en Yougoslavie, dans lesquels la présence d'une brèche ferrugineuse, chargée de pisolite de la bauxite, comme toit, indique nettement une période d'émersion, après laquelle la mer serait de nouveau retournée et le rétablissement des anciennes conditions de sédimentation aurait eu lieu.

This paper records two examples of incrusting conglomerate developed in one case under sea-bottom conditions on the surface of an old cannon, and in the other on a stove lid of a lake bottom. The occurrence within

and on a steam pipe, discovered in shallow sea bottom dredging, of oolitic limestone in association with amorphous calcareous sediment is described as evidence that the formation of oolitic limestone is in some localities now developing on the sea bottom near the Florida coast.

Das Erdöl bildet sich aus den organischen Substanzen mariner Sapropelite. Die organische Substanz reichert sich zusammen mit dem feinen Korn an, d. h. in ruhigem Wasser, also in Buchten, engen Meeresstrassen, aber auch in Tiefstellen des freien Meeres. Beispiele verschiedener Ablagerungen mit besonderer Berücksichtigung derjenigen des Schwarzen Meeres.

**Kumata T.** - On the Marine Deposits in the Western Part of the North Pacific Ocean [*De maritimis sedimentationibus in parte occidentali Oceani Pacifici septentrionalis*]. (In Jap.). 1 pl. Suiro Yôhô (Hydrogr. Bull.), XIII, 265-270. Tokyo (1934). **a - 770**

The percentage of sand in the marine deposits in the shallow seas from the Liautung Gulf in the north to the Java Sea in the south is shown on a chart by contour lines. The percentage of sand is determined by the Toulet's method from the deposits collected by the Hayatomo Fisheries Institution. The author attributes the geographical distribution of the percentage of sand mainly to ocean current, the area of great percentage of sand corresponding to the area where the currents prevail. (S. Ogura).

Journ. Sedim. Petrol., V, 1, 37-39. Tulsa, Okla (1935). **a - 775**

Account of the analysis of seventy-five samples of the deep-sea deposits of the Southeastern and the North Pacific collected on the Cruise VII of the « Carnegie » from a very large area, and which therefore afforded an opportunity to reexamine many problems of deep-sea sedimentation in the light of modern methods of sedimentational and soil analysis. Author communicates the classification of the samples made on hand of a chemical analysis. A complete report on the results of several methods of investigation of the samples is given in a publication of the Department of Terrestrial Magneitsm of the Carnegie Institution of Washington.

**Stetson H. C., Schalk M. & Hough J. L.** - Studies in the Sedimentation and Sedimentary Environment [*De sedimentatione eiusque ambiente*]. Woods Hole Oceanogr. Instit., App., Rep., 1934, 32-33. Woods Hole, Mass. (1935). **a - 776**

Way for new investigations is opened by the recent discovery by the U. S. Coast and Geodetic Service of several deep canyons cutting the southern edge of Georges Bank, the study of which may permit to discover the origin of the Georges Bank, to determine the nature and structure of the continental shelf and to establish if the theory is correct that these canyons are submerged river valleys. Analyses of several types of sedimentary rocks containing fossils have been made and the investigation of the different types of sedimentay environment has been continued. An apparatus has also been developed for studying the permeability of beach sands in their natural conditions.

In der Aussenjade bilden sich in den tiefen Rinnen zwischen den grossen Sandbänken eigenartige zungenförmige Grossrücken, deren Kappe eine mehr oder weniger mächtige Bedeckung aus Muschelschalen, vermischt mit grobem und feinem Sand, trägt. Von 7 derartigen Grossrücken wurde die Oberflächenbedeckung durch Bodenprobenentnahmen untersucht. Aus der Kornzusammensetzung der Bodenproben wird die Entstehung der Grossrücken abgeleitet. An Hand von Lotungsvergleichen wird die Bildungs- und Wandergeschwindigkeit der Grossrücken ermittelt. (Vf.).

**Nakano M.** - On the Depth Distribution of Hakodate Bay as Influenced by the Action of Prevailing Winds [*De profunditatum distributione in baja* Hakodate *ex influentia ventorum praevalentium*]. 1 fig., Proc. Imp. Acad., XI, 5, 180-182. Tokyo (1935). **a - 794**

In a paper « On the Effect of Prevailing Winds upon the Depth of Bays » (See: Proc., X, 334-337, 1934) author described a method which allows to show the influence of prevailing winds upon the depth of bays in general and showed further the result of application of his method of investigation to an actual example, viz. Suttu Bay (Hokkaidô) when prevailing winds blow from the coast out to the offing. In the present paper he illustrates the application of his method to a contrary case, that of the Hakodate Bay, where prevailing winds blow from the offing towards the coast.

**Nakano M.** - Depth Distribution of Mano Bay (Sado Island) as Influenced by the Action of Prevailing Winds [*De profunditatum distributione in baja* Mano (*in Insula* Sado) *ex influentia ventorum praevalentium*]. 3 figs., Proc. Imp. Acad., XI, 5, 183-185. Tokyo (1935). **a - 795**

In two previous papers (Proc., X, 334, 1934, XI, 180, 1935) author showed the results of investigation on the influence of prevailing winds on the depths of bays, on the examples of the Suttu Bay and the Hakodate Bay, where it seems that the depths are more influenced by the action of prevailing winds, as by those of other factors. In the present paper author communicates his observations upon the influence of prevailing winds on the depth of Mano Bay (Sado Island) in which the depth seems to be influenced not only by prevailing winds, but by tidal or oceanic currents, transport of sand and mud by rivers, etc.

**Shepard F. P.** - Exploration of California Submarine Canyons. (Abstract). [*De exploratis stratis submarinis ad Californiam pertinentibus quae anglice* canyons *nuncupantur*]. Nat. Res. Counc., Amer. Geoph. Un., Trans. 16th Ann. Meet.,, Apr., 25–26, 1935, I, 245–246. Washington D. C. (1935). **a - 796**

Results of an investigation on the canyons which have been found in abundance along the slopes off the California Coast, showing that the submarine canyons are decidedly of the river–valley type, having close resemblance to the V-shaped canyons cut into the margins of plateaus. Considerations concerning the time of canyon-cutting and the cause of the emergent sea-bottom.

**Shepard F. P.** - The underlying Causes of submarine Canyons [*Quomodo formantur strata submarina quae anglicae* Canyons *nuncupantur*]. 3 figs., 1 map o. pl., Proc. Nat. Acad. Sc. U. S. A., XXII, 8, 496-502. Washington (1936). **a - 797**

A. ventilates different hypothesis as to the formation of submarine canyons claiming as his view that canyons, at least those of America, have been cut by rivers. A general explanation also with regard to the glacial lowering of the sea level is suggested at the end of the article.

**Smith P. A.** - Oceanographic Activities of the United States Coast and Geodetic Survey [*De operibus oceanographicis peractis ab* U. S. C. and G. S.]. 7 figs., Nat. Res. Counc., Amer. Geoph. Un., Trans. 16th Ann. Meet., Apr., 25-26, 1935, I, 216-221. Washington D. C. (1935). **a - 798**

Brief account of data collected incident to regular charting activity of the U. S. Coast and Geodetic Survey, such as the temperatures and salinities that are taken to obtain fathometer corrections, and the velocity of sound for use in radio-acoustic ranging. The results of these offshore surveys have disclosed some important and remarkable features of submarine topography which may have an influence on important geologic problems. In addition to the results of this offshore work, hydrographic surveys have been conducted along the coast.

In rapid flow waves are propagated down current only, and produce rhombic interference patters. If the current is very shallow, rapid flow may be attained at a velocity so low that the rhombic pattern may be impressed as rhomboid ripple marks upon a mobile, sandy or even muddy bed. Rhomboid ripple marks indicate relatively steep slopes, perhaps 5°, or 10° or 15°. The current direction bisects the acute angles of the rhombs. If a single pattern changes in rhomb size and shape, the larger and more acute rhombs are to be found down the slope. Rhomboid ripple marks are chiefly, but not exclusively, intertidal features. (Author).

**An.** - Research Project on Continental Shelf [*Ratio inquisitiones suscipiendi causa in plateam continentalem*]. Nat. Res. Counc., Amer. Geoph. Un., Trans., 16th Ann. Meet., Apr., 25-26, 1935. Append. C, I, 16. Washington D. C. (1935). **a - 802**

It is suggested that a detailed contour made of the sea-bottom from the present shore-line of New Jersey outward to the glacial shore-line, might furnish a very significant datum-plane for measuring post-glacial levels of the land.

Account of a flight from Boston to Cape Chidley and return made in the summer 1935 in connection with an aerial survey of northern Labrador begun in 1931 by an expedition sponsored by the American Geographical Society (S.: Preliminary Report by A. Forbes, Geogr. Rev., XXII, pp. 30-60, 1932). In the present note the preparations for the flight are discussed, and the flight itself described, with special reference to the area of Saglek Bay and Nachvak Fjord and to the explorations near Cape Chidley. The note is followed by two Appendices by O. M. Miller and Charles B. Hitchcock.

Author gives a brief survey of the natural regions of the world ocean according to Schott, who has been the first to apply the concept of the regional synthesis to oceanography in order to create a composite picture of a given region based on an analysis of the constituent elements that give it its character and set it off from other regions. After some general considerations on regional oceanography author deals with the zonal arrangement of the regions, the two polar belts, the two mid-latitude belts, and the tropical belts. The paper is completed by a list of references and notes.

The present is the first book in English containing a survey of the important part of recent Antarctic exploration represented by the Norwegian expeditions sponsored by the whaling industry. Author is head of the whaling firm that has sent out the vessels and fitted out the expeditions described which took place during the period 1926-1934. In addition to the accounts of the various expeditions the volume contains numerous details, some of them new, concerning the geographical features discovered, the technique of whaling, the questions of political sovereignty involved, and other matters.

Conférence du Chef de l'Expédition Scientifique Française sur la côte Est du Groenland, 1934-1935. Différence entre la côte Est et la côte Ouest du Groenland due à l'action, d'une part, du Gulf-Stream et, de l'autre, du grand courant polaire glacial qui descend directement du Pôle Nord. Bref récit du projet de l'expédition, de son organisation et de sa préparation. Le trajet du « Pourquoi Pas ? »; le séjour au Groenland, quelques renseignements sur le climat, les conditions des glaces, les explorations accomplies par les membres de l'expédition.

**Vlasenko A. V.** - L'île Boljchoj Diomid [*De insula* Boljschoj Diomid]. (En russe, rés. angl.). Izv. Gos. Gheogr. Obstsch., (Bull. Soc. Géogr.), LXVII, 1, 132-136. Moskva-Leningrad (1935). **a - 934**

Geological, meteorological, and climatological description given for the first time of the Island Boljshoj Diomede (Ratmanoff-Islands), situated in the Bering Strait, 21 miles from Cape Dezhneff and 22 miles from Cape Prince of Wales.

**Vogel V.** - Les communications sont interrompues pendant un certain temps [*Communicationes pro tempore rescinduntur. Enarratio quae pertinet ad castra per exploratorem* Schmidt *in glacie constituta*]. (En russe). 1 fig. Vokr. Svjeta, 7, 22-23. Leningrad (1934). **a - 935**

Episode de la vie du camp de Schmidt sur la glace.

**Wiese W.** - Comparaison des prévisions hydrologiques et glaciologiques, publiées par l'Institut Hydrologique de l'État pour la saison de navigation 1933 dans les Mers de Barentz et de Kara, avec les conditions des glaces observées en réalité [*Comparatio inter prognoses hydrologicas et glaceologicas quas edidit Institutum Hydrologicum Nationale pro navigatione per maria* Barentz *et* Kara *A. 1933 et reales condiciones quae in glacie observatae sunt*]. (En russe). Izv. Gos. Ghidrol. Inst., 66, 49-52. Leningrad (1934). **a - 936**

**Wiese W.** - Zur Geschichte der frühen russischen Tätigkeit auf Spitzbergen [*Historia de activitate russica, temporibus praeteritis, in* Spitzbergen]. (In Russ., Dtsch. Rés.). Arctica, III, 157-161. Leningrad (1935). **a - 937**

Aus dem 1818 erschienenen Buche von P. Swinjin « Otetschestvennyje Zapiski » entnimmt Vf. die vorliegende Beschreibung aus der Biographie des Bildhauers Suchanov, welcher den Winter 1784-85 in der Magdalene Bucht auf Spitzbergen verbracht hat.

**Woelcken K.** - Bericht über Schalluntersuchungen im Polargebiet [*Relatio de investigationibus in undas sonoras in regione Arctica*]. (In Dtsch., Russ. Rés.). 9 Fig. Arctica, II, 3-24. Arct. Inst. USSR. Leningrad (1934). **a - 938**

Bericht über Schalluntersuchungen zur Erforschung der Stratosphäre, die während des Internationalen Polarjahres 1932/33 im Polargebiet ausgeführt worden sind. Folgende Fragen sollten mit Hilfe der Ergebnisse der Untersuchung beantwortet werden: 1) ist es möglich, mit den heutzutage vorhandenen wissenschaftlichen und technischen Mitteln Untersuchungen über die Verbreitung von Schallwellen zum Zwecke der Erforschung der Stratosphäre auszuführen ? 2) existiert abnormale Schallverbreitung während der Polarnacht ? und 3) welchen Einfluss haben die besonderen meteorologischen Verhältnisse der Arktis auf die Schallverbreitung ? Vorliegender Bericht enthält die vorläufige Bearbeitung der an drei Polarstationen ausgeführten Registrierungen.

**Yourjev B. N.** - Exploration préliminaire de la Baie Kolokolkov en Juillet 1934 [*Exploratio prior bajae* Kolokolkov *mense Julio A. 1934*]. (En russe). 3 fig., 4 tabl. Izv. Gos. Gheogr. Obstsch. (Bull. Soc. Géogr.) LXVII, 1, 37–53. Moskva-Leningrad (1935). **a - 939**

Bref compte rendu de l'exploration de la Baie Kolokolkov, qui se trouve dans la partie nord-ouest du littoral de Timansk, entre le cap Rousskij Zavorot et l'île Senghejskij, et dont l'embouchure a les suivantes coordonnées: 68°32'6''N., 52°12'5'' O. Historique des explorations de la baie et de la construction en 1934 d'une base sur sa rive. Description d'une expédition organisée en juin 1934 dans la baie et résumé des résultats des observations physiques et géographiques, météorologiques et climatologiques, hydrographiques et morphologiques, géologiques et hydrologiques exécutées au cours de l'expédition.

**Zvantzev A.** - Les hommes du Nord [*De exploratoribus regionum septentrionalium*]. (En russe). 3 fig. Vokr. Svjet. 7, 29-32. Leningrad (1934). **a - 940**

L'A. a passé trois hivers sur l'Ile Wrangel. Il décrit son séjour et son départ en avion vers la terre ferme.

**Central Executive Committee of the USSR.** - Decision of the.... (Concerning the Unity of Geographical Denominations of the Soviet Arctic) [*Sententia sumpta ab institutione nomine* Central Executive Committee of the USSR *de unificatione denominationum geographicarum regionum ad Arctidem Sovieticam pertinentium*]. (In Russ. & Engl.). Bull. Arct. Inst., V, 7, 183-186, 220-222. Leningrad (1935). **a - 941**

List of the obligatory denomination of the Arctic Ocean and its parts adjacent to the territory of the USSR to be used in all scientific papers, manuals, maps, charts, etc., issued in the USSR. Determination of the limits of the above mentioned regions.

**Glavsevmorputj** édit. par... (Administration Centrale de la Voie Maritime du Nord) - La Voie Maritime du Nord. Recueil d'articles sur l'hydrographie et la navigation. II [*De via maritima nordica. Scripta collecta de hydrographia et navigatione*]. Fig. tabl., 1 carte h. t. 125 pp. Ed. Glavsevmorpoutj. Leningrad (193 ). **a - 942**

II-ème volume du recueil publié par l'Administration Centrale de la Voie Maritime du Nord, illustrant les derniers progrès accomplis dans l'exploration des régions polaires soviétiques.

**Narkomvod** (Commissariat du Peuple de la Marine) - Les transports maritimes en 1933 [*De maritimis subvectionibus A. 1933*]. (En russe). Tabl. 194 pp. Izd. Narkomvod. Moskva (1934). **a - 943**

Données statistiques - Transports des marchandises et des passagers - L'activité des ports maritimes et indices fondamentaux du travail des bâtiments de la Flotte Maritime Soviétique - Personnel et salaires.

**Trust Géologique, Hydrographique & Géodésique** - Les éditions du trust géologique, hydrographique et géodésique de la Sibérie Orientale

[*De publicationibus in lucem editis a* trust *geologico, hydrographico, et geodetico Siberiae orientalis*]. (En russe). 15 pp. Tomsk (1934). **a - 944**

**An.** - Stations polaires de l'Administration de la Voie Maritime du Nord (Glavsevmorputj) [*Stationes polo proximae quae pertinent ad Administrationem pro Via maritima Nordica*]. (En russe). Bull. Arct. Inst., V, 3/4, 78-79. Leningrad (1935). **a - 945**

Bref compte rendu des travaux exécutés par les stations de Vajgatch, Jougorskij Char, Mare-Sale, Cape Zhelanijé, Novyj Port, Ile Dickson, Ile Oujedinenijé, Cap Tchéljouskine, Baie Prontchichtcheva, Ile Vstretchnyj, Nordwick, Baie Tixi, Péninsule Kighiljakh, Iles Medvezhijé, Cap Chelagskij et Cap Navarine.

**An.** - Polar Stations [*Stationes polares*]. (In Russ. & Engl.). Bull. Arct. Inst., V, 3/4, 90 & 119. Leningrad (1935). **a - 946**

Brief account of reconnaissances made at the Station on Calm Bay and between Cape Schmidt and Wrangel Island.

**An.** - Les Stations Polaires de la Voie Maritime du Nord [*Stationes polares quae pertinent ad Viam Maritimam Nordicam*]. (En russe et part. en angl.). Bull. Arct. Inst., V, 5/6, 136-138, 180-181. Leningrad (1935). **a - 947**

Bref compte rendu des travaux exécutés par les Stations Polaires de la Baie Tikhaja (Calm Bay), de Matotchkine Char, Mar-Esalé, Cap Zhélanijé, Ile Belyj, Ile Dickson, Ile Oujédinénijé, Cap Nordwick, Cap Chalaourov, Cap Schmidt, Ile de Vrangel, Ouélen.

**An.** - Polar Stations of the Chief Administration of the Northern Sea Route [*Stationes polares quae pertinent ad Administrationem Centralem pro Via Maritima Nordica*]. (In Russ., Engl. Summ.). Bull. Arct. Inst., V, 7, 196-197, 226-227. Leningrad (1935). **a - 948**

Brief report on the work carried out by the following Polar Stations of the USSR: Calm Bay (Tikhaja), Matotschkin Schar, Bjelyj (White) Island, Barentsburg, Dickson Island, Cape Tscheljuskin, Wrangel Island, Uelen.

**An.** - Polar Stations of the USSR [*Stationes polares ad URSS pertinentes*]. (In Russ. Engl. Summ.). Bull. Arct. Inst., V, 8, 241-242, 264-265. Leningrad (1935). **a - 949**

Brief account of the work carried out and observations made on the Polar Stations at Calm Bay (Tikhaja), Sterlegov Cape, Cape Tscheljuskin, The Komsomoljskaja Pravda Islands (former Samuel Isl.), Tixi Bay, Cape Schelagskij, Cape Schmidt, Providenije Bay.

**An.** - The Transport of Cargoes along the Northern Sea Route [*De subvectionibus Via maritima Nordica*]. (In Russ. & Engl.). Bull. Arct. Inst., V, 9, 291, 310. Leningrad (1935). **a - 950**

Account of the accomplishment of transport of cargoes from Murmansk and Vladivostok along the Northern Sea Route.

**An.** - Polar Stations of the Glavsevmorputj (Chief Administration of the Northern Sea Route) [*Stationes polares quae pertinent ad Administrationem Centralem pro Via Maritima Nordica*]. (In Russ. & Engl.). 1 table. Bull. Arct. Inst., V, 10, 320, 354-355. Leningrad (1935). **a - 951**

Brief account of the work performed at the Polar Stations at the mouth of Tajmyr River, the Cape Olovjannyj, the Cape Tsheljuskin, the Bay Prontschistscheva, the Bay Providence (Providenjia), the Tixy Bay, the White (Bjelyj) Island, and Mostakh Island. On a table the results of aerological observations are also reported.

**An.** - Flight of V. S. Molokov, Hero of the Soviet Union [*De volatu a* V. S. Molokov *peracto*]. (In Russ. & Engl.). Bull. Arct. Inst., V, 10, 341-342, 368. Leningrad (1935). **a - 952**

Account of the flight undertaken in order to mark the beginning of systematical air- and sea-investigation in the eastern section of the Northern Sea route. The flight lasted from July 28th to 31st, 1935; its route was from the Lena River to the Okhotsk Sea.

**An.** - Polar Stations [*Stationes polares*]. (In Russ. & Engl.). Bull. Arct. Inst., V, 12, 436 & 463. Leningrad (1935). **a - 953**

Brief account of the activity during the end of 1935 of the Polar Stations at Little Karmakuly, on White Island, Cape Medvezhyj, Tixy Bay and Prontschistcheva Bay.

**An.** - Iles arctiques nouvelles [*Novae insulae arcticae*]. Géogr., Terre-Air-Mer, LXIV, 1, 66-67. Paris (1935). **a - 954**

Information de l'ingénieur hydrographe général, du Ministère de la Marine Française, concernant la position exacte des îles « Izvestija » et des îles « Institut Arctique », découvertes par les expéditions soviétiques de 1932 et 1933.

**An.** - La Antartida [*De Antarctide*]. 2 fig. Iberica, XLIV, 1093, 261-264. Barcelona (1935). **a - 955**

Los principales rasgos de la historia de la exploración antártica de 1821 a 1931. Expediciónes de James Cook, Bellingshausen, F. R. Scott, E. H. Shackleton, Wilson, Douglas Mawson. El actual estado de nuestros conocimientos acerca de la Antártida: Sector del mar de Ross – Sector del mar de Weddell.

**An.** - Lincoln Ellsworth's Flight Across West Antarctic [*De volatu a* Lincoln Ellsworth *peracto per Antarctidem occidentalem*]. 1 map. Geogr. Rev., XXVI, 2, 329-332. New York (1936). **a - 956**

On hand of accounts published in the « New York Times » the three flights made by Ellsworth over the Antarctic are described.

**An.** - Geographical Names. – Arctic Islands. – Noms géographiques. – Iles arctiques [*Nomina geographica. Insulae arcticae*]. (In Engl. & French). Int. Hydrogr. Bull. – Bull. Hydrogr. Int., 1, 7. Monaco (1936). **a - 957**

Information on the change of the name of the Samuel Islands in Islands of the Komsomolskaya Pravda.

**An.** - New Arctic Islands – Iles arctiques nouvelles [*Novae insulae arcticae*]. (In Engl. & French). Int. Hydrogr. Bull. – Bull. Hydrogr. Int., 3, 61-62. Monaco (1935). **a - 958**

Information on the discovery of two new Arctic islands which are in a position different from that assigned in the « Int. Hydr. Bull. » 1, 1933, according to « Terre, Air, Mer », LVIII, 1932, and which are probable those discovered by the Samoilovitsch expedition on board the « Roussanov », e. g., the Izvestija Islands and the Arctic Institute Islands.

**An.** - Antarctic Research – Exploration dans l'Antarctique [*De explorationibus in Antarctide*]. (In Engl. & French). Int. Hydrogr. Bull., 6, 122. Monaco (1935). **a - 959**

New commission of the R. R. S. « Discovery II »: the circumnavigation of the Antarctic continent in 1935–36.

**An.** - Activité de la Station Polaire de GOUSMP (Administration Centrale de la Voie Maritime du Nord) sur le Cap Dezhnev-Ouelen

**An.** - Travail de la Station de la Baie de la Providence (Providenija) [*De operibus pro statione in baja Providentiae*]. (En russe). Sovj. Arkt. 2, 3-7. Leningrad (1935). **a - 961**

**An.** - Synoptique sur le Cap Schmidt [*Synopsis de promunturio* Schmidt]. (En russe). Sovj. Arkt. 2, 83-84. Leningrad (1935). **a - 962**

## Relevationes hydrographicae (geodeticae, topographicae, bathymetricae) - Instrumenta hydrographica et bathymetrica - Naves hydrographicae.

**Adams O. S. & Claire C. N.** - Manual of Transverse Computation of the Transverse Mercator Grid [*Liber manualis ad calculandas repraesentationes Mercatorianas*]. 31 figs. & tables. U. S. Dpt. Comm., Coast & Geod. Surv., Spec. Publ. 195. Washington D. C. (1935). **a - 963**

Description of the transverse Mercator projection - Method of computation of the projection: the tables, description of the computation form, description of an actual computation – computation of the grid azimuth from coordinates, computation of the grid azimuths of a transverse, sea-level reduction, approximate method, length reductions, computation of the coordinates. - Computation of transverses in the vicinity of Rochester, N. Y. - Transverses in New Jersey. - Grid lines on Geological Survey quadrangle maps. - Method of constructing the meridians and parallels on the grid projection. - Transformation of a local system of plane coordinates to grid coordinates.

**Adams O. S.** - Azimuths from Plane Coordinates [*Azimuth depromptum a planis coordinatis*] 6 figs., 14 pp. Ser. No. 584, U. S. Dept. of Commerce Coast & Geod. Surv. Washington (1936). **a - 964**

**Aquilina C.** - Mire graduate [*De apparatibus pro mensuris metis praeditis cum gradibus*]. Riv. del Catasto e dei Servizi Tecnici Erariali. II, 4, 431-438. Roma (1935). **a - 965**

Innovazioni e perfezionamenti nella costruzione delle mire graduate.

**Atumi K.** - La déviation de la verticale au Japon [*De verticalis deviatione in Japonia*]. 4 figs. & 3 tabl. Jap. Journ. Astron. & Geoph. X, 3. 305-312. Tokyo (1933). **a - 966**

**Baker E. H. B.** - Travaux de levé au Labrador pendant l'hiver [*De operibus ad relevamenta perficienda in regione Labradorica, hieme*]. 1 carte, 6 fig. h. t. Rev. Hydrogr. XIII, 1, 9-20. Monaco (1936). **a - 967**

Levé accompli par une mission de l'H. M. S. « Challenger » pendant l'hiver 32-33.

**Balakschin L. L.** - Hydrological Work Aboard the Icebreaker « Sadko » [*De operibus hydrologicis peractis in navi glaciei–ruptrici, nomine* « Sadko »]. (In Russ. & Engl.). Bull. Arct. Inst., V, 10, 329-330, 361-362. Leningrad (1935). **a - 968**

Results of the hydrological observations carried out during the expedition of the « Sadko » to high latitudes in summer 1935, the scope of which was a thorough study of the seas lying along the Northern Sea Route and in particular the study of the Northern part of the Atlantic Ocean, namely the Greenland Sea, through which the warm waters of the Atlantic penetrate in the higher latitudes of the Arctic basin. The material collected during this cruise of the « Sadko » and during other previous voyages makes it possible to draw a chart of currents of the region to the north of latitude 76°N. in the Greenland Sea and further to the East up to the coasts of Severnaja Zemlja and to solve a number of questions connected with the study of the hydrological régime of the seas the Northern Sea Route passes through.

**Balen Garcia F.** - La rastra hidrografica [*Machina hydrographica everriculo praedita*]. Rev. Gen. de Marina. Nov. 721-737. Madrid (1935). **a - 969**

**Boaga G.** - Schema di compensazione di rilievi topografici eseguiti con sole misure lineari [*Ratio pro compensationibus in relevamentis topographicis ducendis mensurarum linearium tantum auxilio*]. Riv. del Catasto e dei Servizi Tecnici Erariali, II, 4, 422-430. Roma (1935). **a- 970**

Si dimostra che nei rilievi topografici eseguiti con sole misure lineari esiste un sicuro riscontro delle misure e che quindi si può contare sulla compensazione dei risultati. Si stabiliscono per alcune figure geometriche diversi tipi di formule atte al calcolo di tali compensazioni.

**Boaga G.** - Su alcune formule di geodesia ellissoidica [*De quibusdam formulis pro geodesia ellipsoidica*]. Ist. Sup. Ingegneria, Ist. Geod. e Topogr. Padova (1936). **a - 971**

Bericht über die Ergebnisse einiger ozeanographischen Untersuchungen, welche Vf. als landeskundiger Berater der Fanck-Universal-Grönlandexpedition im Rahmen derselben im Gebiet der grossen Eisfjorde des Umanaqbezirkes Westgrönlands (zwischen 70 und 72° n. Br.) im Sommer 1932 ausgeführt hatte. Die Messungen betreffen die Temperatur und den Salzgehalt in grösseren und kleineren Tiefenserien, sowie Sauerstoff- und Phosphatbestimmungen. Ausserdem hat Vf. Untersuchungen ausgeführt um zu bestimmen, ob es sich bei der Eisdrift um eine vorwiegende vom Wind oder von den Meeresströmungen bedingte Erscheinung handelt.

Description in a brief form of the photogrammetric operations carried out in the State of Aguascalientes, which constitutes the first application that has been made in Mexico of terrestrial photogrammetry for putting contour lines on geographic maps.

**Miyadi M.** - On the Variation of Longitude [*De variatione longitudinis*]. (In Jap.). Astron. Observ. Rep., 2, 177-184; Mem. Astron. Soc. Jap., III, 191-198. Tokyo (1934). **a - 1014**

The wireless time signals received at Tokyo, Washington, and various places in Europe during 1929-31, were analysed for the effect of motion of the terrestrial pole, and the result was compared with the variation of longitude calculated from the results of the international latitude observations. The observed variation has in general greater range (Author).

**Miyadi M.** - Theory of the Axis of the Transit Instrument [*De axis ratione seu de apparatu transitibus praedito*]. (In Jap.). Astron. Observ. Rep., 2, 208-215; Mem. Astron. Soc. Jap., III, 266-273. Tokyo (1934). **a - 1015**

The irregularity of the pivots of the transit instrument being expressed by a Fourier series, the author has shown that its effect on the time observation may be expressed by the formula supposing the V's angle is 45° as usual

$$\Delta\alpha_\delta = \sec\delta\,(A\cos 2\zeta\sin\zeta + B\sin 4\zeta\cos\zeta + C\sin 4\zeta\cos 2\zeta)$$

in which $\delta$ is the declination of the observed star and $\zeta$ is its zenith distance. The coefficient B is a constant depending on the variation of the level reading, while A is independent of it, and C depends on the eccentricities of the pivots (Author).

**Miyadi M.** - The Meaning of $\Delta\alpha_\delta$ of the Time Observation in the Tokyo Astronomical Observatory [*De significatione formulae* $\Delta\alpha_\delta$ *quoad temporis observationem in Observatorio Astronomico* Tokio *constituto*]. (In Jap.). Astron. Observ. Rep., 2, 216-222; Mem. Astron. Soc. Jap., III, 274-280. Tokyo (1934). **a - 1016**

The error $\Delta\alpha_\delta$, statistically detected by Mr. R. Mizuno in the time observation of the Tokyo Astronomical Observatory is discussed, and it is shown that it may be due to the irregularity of the pivots of the transit instrument. The author obtained in fact the equation

$$\Delta\alpha_\delta = \sec\delta\,(-0^s.066\cos 2\zeta\sin\zeta - 0^s.007\sin 4\zeta\cos 2\zeta)$$

from the results of observations during 1927, 1931 and 1932, the mean error of the equation being $-0^s.007\sec\delta$. (Author).

Geoph. Un., Trans., 16th Ann. Meet., Apr., 25-26, 1935, I, 63-67. Washington D. C. (1935). **a - 1019**

Description of the work needed for the completion, in 1934, of the Georgian Bay Section of Ontario triangulation, which resulted in the closure of a loop having an axial length of about 800 miles. It consists of an arc of triangulation extending eastward from the north end of the Georgian Bay, through the Sudbury mining district and along the Ottawa river as far as Ottawa. From Ottawa, it is composed of part of the Southeastern and Southwestern Ontario net, extending southerly to the St. Lawrence, thence westerly along Lake Ontario and Lake Erie, thence northerly as far as Georgian Bay. The method and the circumstances of the triangulation are dealt with.

This paper has been prepared in answer to repeated inquiries as to the accuracy of soundings, that is, the probable errors of soundings both in depth and in position. In order that the soundings of various hydrographic surveys may be interpreted with complete understanding of their weights, a brief description of the methods used in making such surveys by the Coast and Geodetic Survey is given and their limit of accuracy determined.

Beobachtungen von 21 Tiefseestationen im Tschuktschenmeer, im Gebiet zwischen der Kolyma-Mündung und den Bären-Inseln im Ostsibirischen Meer, zwischen den Bären-Inseln und den Neusibirischen Inseln. Angabe von Tiefe, Temperatur, Salzgehalt und Sauerstoffgehalt.

**Wood W. A.** - The Wood Yukon Expedition of 1935. An Experiment in Photographic Mapping [*De navigatione A. 1935 ad insulam* Wood

*in* Yukon. *Experimentum ad relevamenta carthographica aërea ducenda*]. 22 figs. Geogr. Rev., XXVI, 2, 228-246. New York (1936). **a - 1059**

Account of the Wood Yukon expedition of 1935 whose purpose was to carry out a piece of research in photographic mapping. The area selected was in southwestern Yukon territory, and it was chosen because of its mountainous character, ideal for the type of survey to be used; for its proximity of well established control points - those of the International Boundary Commission's Survey - for its relative accessibility, and because it was an unmapped country.

**Zagroubskij N.** - Levés exécutés sur la Terre de François-Joseph en 1932-1934 [*Relevamenta peracta in Terra Francisci Josephi A. 1932-34*]. (En russe). 1 fig. Zap. po Ghidrogr. (Bull. Hydrogr.), 2, 35-42. Leningrad (1935). **a - 1060**

**Hydrographer of the Navy** - Report by the Hydrographer of the Navy on the Surveys Carried out by H. M. Surveying Service and on the Work of the Hydrographic Department for the Year 1935 [*Relatio ab hydrographo Regiae Classis redacta de relevamentis peractis a* Surveying Service *deque operibus quae peractae sunt a Sectione pro Hydrographia, A. 1935*]. 3 tabl. H. D. 325, i + vii, pp. Hydrogr. Dpt. London (1936). **a - 1068**

Brief summaries of the work performed by H. M. Naval Surveying Service and by the Hydrographic Department, which has been chiefly concerned by coastline surveys and soundings of area in home waters and foreign stations. An account is also given of work received from sources others than H.M. Surveying Ships, as well as a summary of charts, Notices to Mariners and books published by the Hydrographic Department, and new rocks and dangers notified by Admiralty Notices to Mariners in 1935 and during the preceding ten years.

**Hydrographic Department, Admiralty, London** - List of Oceanic Depths Received at the Admiralty During the Year 1935 [*Elenchus oceani profunditatum ad Classis Praefecturam relatus, A. 1935*]. Hydrogr. Dpt. Publ., 324, 1-14. London (1936). **a - 1069**

List of results of echo soundings in the North and South Atlantic, in the Mediterranean, in the Red Sea, in the North and South Indian Ocean, in the North and South Pacific, and in the Southern Ocean, containing data on latitude, longitude, depth in fathoms, nature of bottom, surface and bottom temperatures.

Extract from the « Bulletin of the Arctic Institute », n° 8-9, 1934, Leningrad, containing the information on the beginning of the construction of three ice-breakers of 3720 tons displacement to the order of the Administration of the Northern Sea Route.

**An.** - Definition of the Words « Hydrographer » and « Hydrography » - Définition des mots « Hydrographe » et « Hydrographie » [*De nominibus « Hydrographus » atque « Hydrographia ». Definitio*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., III, 56. Monaco (1935). a - 1083

(See: « Hydrographic Review », XI, 1, 1934, pp. 8-11). Comments forwarded by J. Z. Lindquist, Hydrographer of the Norwegian Navy with reference to the Directing Committee's request on p. 11 of the above mentioned Review.

**An.** - General Bathymetric Chart of the Oceans - Carte Bathymétrique Général des Océans [*Tabula bathymetrica generalis Oceanorum*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., III, 57. Monaco (1935). a - 1084

Information on a grant of the American Philosophical Society, Philadelphia, which enables to accelerate the preparation of the successive sheets of the General Bathymetric Chart of the Oceans. Information on the sheets to be issued.

**An.** - Materials for Hydrography of Gulf of Riga - Matériaux pour l'étude hydrographique du Golfe de Riga [*Res collectae ad studendum Sinum Cylipenum e scientia hydrographica*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., III, 60. Monaco (1935). a - 1085

Account of a summary, compiled by Professor L. Slaucītājs on geodetic and astronomical work carried on along the Latvian coast in the Gulf of Riga, and published in a booklet entitled « Materiâli pie Rigas jûras lîca hidrografijas » (Technikas Apskats n° 6 (36), 1931. g. Riga). Some of the data contained in the booklet complete the information published in special Publication n° 24 of the International Hydrographic Bureau, List of Geographical Positions.

**An.** - Report of the Marine Department of the Chinese Maritime Customs, 1934, Shanghai, 1935 [*Relatio redacta a Sectione maritima pro Servitio portorio Sinensi. A. 1934*]. (In Engl. & French). Int. Hydrogr. Bull. – Bull. Hydrogr. Int., IV, 76. Monaco (1935). a - 1086

Brief summary of the report which details the different branches of the Department's work in each district under its jurisdiction with reference to hydrography, the upkeep of navigational aids and moorings, pilotage and few aerial navigation installations; statistics concerning buoyage and lighting and the situation of wrecks in Chinese waters.

**An.** - General Bathymetric Charts of the Oceans – Carte Générale Bathymétrique des Océans [*Tabula bathymetrica generalis oceanorum*]. (In Engl. & French). Int. Hydrogr. Bull. – Bull. Hydrogr. Int., IV, 96. Monaco (1935). **a - 1087**

Information on the completion by the International Hydrographic Bureau of the preparatory work for sheet A' 1 of the General Bathymetric Chart of the Oceans (South Atlantic Ocean). The limits of this sheet are Latitude 0° to 46°40′ S. and Longitude 0° to 90° W.

**An.** - International Hydrographic Bureau. Exhibition of Instruments. Bureau Hydrographique International. Exposition d'Instruments [*Officium Hydrographicum internationale. Instrumentorum expositio*]. (In Engl. & French). Int. Hydrogr. Bull. – Bull. Hydrogr. Int., IV, 97-98. Monaco (1935). **a - 1088**

List of additional instruments received by the Bureau for its permanent exhibition.

**An.** - Use of Aircraft for Surveying – Emploi de l'aviation pour les levés [*De utenda aëronavigatione ad relevamenta ducenda*]. (In Engl. & French). Int. Hydrogr. Bull. – Bull. Int. Hydrogr., V, 105-106. Monaco (1935). **a - 1089**

Brief account of a number of articles appeared on the use of photographs taken from the air for surveying purposes. The articles have been published in Germany, in Italy, in the Netherlands and in Great Britain.

**An.** - Bathymetric Chart – Atlantic Ocean – Carte bathymétrique-Océan Atlantique [*Tabula bathymetrica. Oceanus Atlanticus*]. (In Engl. & French). Int. Hydrogr. Bull. – Bull. Hydrogr., Int., V, 106-107. Monaco (1935). **a - 1090**

Description of the « Uebersichtskarte der Tiefenverhältnisse des Atlantischen Ozeans » (Synoptic Chart of the Depth Conditions of the Atlantic Ocean) published in the « Wissenschaftliche Ergebnisse der Deutschen Atlantischen Expedition auf dem Forschungs- und Vermessungsschiffe « Meteor », 1925-27 » and of which a copy has been sent to the International Hydrographic Bureau.

**An.** - Spanish Surveying Vessel – Navire hydrographe espagnol [*Navis hispanica pro hydrographia*]. (In Engl. & French). Int. Hydrogr. Bull., VI, 119. Monaco (1935). **a - 1091**

Information of the launching of the new Spanish surveying vessel « Malaspina », on 13th September 1935, at Cadiz.

**An.** - Deep-Sea-Soundings. Soundings in the North Atlantic – Sondages océaniques. Sondages dans l'Atlantique Nord [*De scandaliis in Oceano Atlantico Nordico*]. (In Engl. & French). 2 tables. Int. Hydrogr. Bull. – Bull. Hydrogr. Int., I, 2-3. Monaco (1936). **a - 1092**

Information on a complete list of the deep-sea soundings recorded by the Netherlands submarine K. XVIII during the 1934-35 cruises from the Netherlands to South America, the Cape of Good Hope, Australia and Batavia and the use made of it. Information on the soundings sponsored by the French Service Hydrographique in the North Atlantic.

**An.** - Geographical Positions – Positions géographiques [*Positiones geographicae*]. (In Engl. & French). Int. Hydrogr. Bull. – Bull. Hydrogr. Int., 11, 24. Monaco (1936). **a - 1093**

Brief report on observations for differences of astronomical longitudes carried out between Potsdam Observatory and Danzig and Kaunas.

**An.** - Proyección conforme. Coordenadas conformes de Gauss (Conclusión) [*Proiectio conformis. Coordinatae conformes ad* Gauss *pertinentes*]. Mem. Técn. Ejérc. Chile, III, 13, 1565-1578. Santiago (1935). **a - 1094**

En articulos anteriores l'A. desarrolla dos problemas: 1) Cálculo de las coordenadas planas $x$ e $y$ por medio de las coordenadas geográficas. 2) Cálculo de las coordenadas de $P_2$ $(x_2, y_2)$; dando las coordenadas $P_1$ $(x_1, y_1)$, la longitud, dirección de la linea geodésica $P_1 P_2$ y la latitud del origen del sistema X Y. Aquí l'A. desarrolla un tercer problema para mejor comprensión de la materia: 3) Calculo de las coordenadas geográficas $l$ y $\varphi$ por medio de las coordenadas planas $x$ e $y$.

**An.** - Consideraciones sobre Astronomia geodésica [*Considerationes de astronomia geodetica*]. 3 tabl. Mem. Tecn. Ejerc., Chile, III, 13, 1591-1608. Santiago (1935). **a - 1095**

Necesidad y objeto de las observaciones astronómicas de campaña en los trabajos geodésicos. - Empleo que se les dará a las observaciones astronómicas en el Instituto Geográfico Militar de Chile. - Métodos que empleará este Instituto en sus trabajos astronómicos. - Bibliografia y textos de consulta. - Métodos de Sterneck y Horrebow-Talcot de observaciones en el meridiano para determinación de latitudes. - Instrumentos y anexos necesarios. - Determinación de la hora y azimut por observaciones de estrellas en el vertical de Sigma Octantis. - Confección de un programa de observaciones; exigencias que éste debe cumplir; ejemplo de un programa.

**An.** - La Sección Levantamiento de la Carta en Magallanes [*Sectio tabula Magellanica delineanda*]. Mem. Tec Ejérc. Chile, IV, 14. Santiago (1936). **a - 1096**

Sobre la creación de la Sección que costituye una nueva actividad en orden a ejecutar trabajos geodésicos y topográficos en Magellanes, Patagonia Chilena.

**An.** - La Bouteille Isolante [*De buticula hydrographica*]. 2 fig. Rev. Hydrogr. XIII, 1, 122-125. Monaco (1936). **a - 1097**

Modèle en usage au Serv. Hydrogr. Britannique. Sert à mésurer les températures et à prendre des échantillons d'eau à des profondeurs moyennes.

**An.** - Une importante mission hydrographique sur les côtes de Provence [*De quadam missione hydrographica magni momenti in Litora Provincialia*]. Rev. Marit. Févr. 244-245. Paris (1935). **a - 1098**

**An.** - Unterwasserschallbeobachtungen mit dem Niederfrequenzverstärker [*Observationes peractae per scandalia sonora submarina amplificatoris auxilio demissa frequentia*]. 1 Tab. Seewart, IV, 3, 116-117. Hamburg (1935). **a - 1099**

Auszug aus einem Bericht von E. Willumsohn über Abhören der Unterwasser-Signale auf grosse Entfernungen (über 20 Sm), begleitet von einigen Anmerkungen der Schriftleitung von dem « Seewart » über die grossen Reichweiten der Unterwasserschall-Zeichen, die verschiedenen Faktoren, die das Abhören beeinflussen, sowie über die Anwendung des Elektrolots.

## Chartographia - Atlantes - Portulani.

**Almagià R.** - Intorno ad una carta di Bartolomeo Colombo (1513) [*De quadam tabula Bartolommaei* Colombo]. Riv. Geogr. Ital., I–III, 29-33. Firenze (1935). **a - 1100**

Nella Carta delle Grandi Antille e del Mar Caraibico di Pietro Martire d'Anghiera figura il contorno della costa della Florida, la cui ricognizione si attribuisce al viaggio di due anni posteriore di Ponce de Leon (1513). Lo Harrisse emise l'ipotesi che questa carta sia un'aggiunta posteriore. Sulla origine della carta getta luce la recente notizia che Bartolomeo Colombo aveva fatto una carta delle isole e l'aveva mandata al Re Ferdinando alla fine del 1512 o al principio del 1513.

**Baker J. N. L.** - Some original Maps of the East India Company [*Chartae quaedam geographicae ad* East India Company *pertinentes*]. Tijdschr. Kon. Ned. Aardr. Gen. Amsterdam LIII, 5, 665-667. Leiden (1936). **a - 1101**

Some information on a set of charts produced by Blaeu or by his firm for the Dutch East India Company and found in a College at Oxford. The charts cover the whole of a ship's course from South Africa to Japan and the East Indies.

**Belavine A. F. & Berzak D. S.** - Sur les cartes de la Région du Nord [*De tabulis quae regionem nordicam repraesentant*]. (En russe). Cartes et schémas (5 feuilles h. t.). 79 pp., Severn. Aerophotogeod. Trust, Arkhangheljsk (1933). **a - 1102**

Revue et classification des cartes existantes de la Région du Nord de l'URSS. Histoire de l'élaboration de la carte au 1/500 000 de cette région.

**Belfiore P.** - Cartografia coloniale ed impiego della fotogrammetria [*De chartographia coloniarum deque utenda photogrammetria*]. 22 fig., Riv. Catasto e Servizi Tecnici Erariali, III, 3, 215-231. Roma (1936). **a - 1103**

Vari tipi di carte. Procedimenti classici. Apparati di restituzione. Raffronti.

**Bowie W.** - Mapping the Country [*De chartographia in Americae Statibus Foederatis*]. Nat. Res. Counc., Amer. Geoph. Un., Trans. 16th Ann. Meet., Apr. 25-26, 1935, I, 61-62. Washington D. C. (1935). **a - 1104**

Importance of mapping for geophysicists, geodesists, geologists, and other scientists - Need for maps - Comprehensive plan for mapping the United States elaborated by the Federal Board of Surveys and Maps in October, 1934 - Geodetic surveys - Topographic maps.

**Bureus A.** - Orbis arctici nova et accurata delineatio. – (In Latin and Engl.). Malmö graf. anst. Malmö (1935). **a - 1105**

Facsimile edition of this old map of the North (1626) published by H. Richter and W. Norlind under the auspices of the Swedish Geographical Society. The work contains six folios with introduction in English.

**Eckert-Greifendorff M.** - Eine neue flächentreue (Azimutaloide) Erdkarte [*De nova quadam mappa mundi conformis*]. Peterm. Mitt. Juni. 190-192. Gotha (1935). **a - 1106**

**Eckert-Greifendorff M.** - Kartenkunde [*Chartographia*]. 66 Fig., 147 S. W. de Gruyter. Berlin, Leipzig (1936). **a - 1107**

**Frenzel K.** (Hrsg.) - Velhagen & Klasings Grosser Volksatlas. Das Jubiläumswerk des Verlages zum hundertjährigen Bestehen [*Atlas popularis editus a* Velhagen *et* Klasing *anno jubilari recurrente ab origine instituti*]. xii + 39 S. Text, 92 S. Karten, 112 S. Namenverzeichnis. Bielefeld & Leipzig (1936). **a - 1108**

Der Atlantische Ozean, der indopazifische Raum sowie die Polargebiete sind auf Sonderkarten dargestellt.

**Gernez D.** - Les Amstelredamsche Zeecaerten d'Aelbert Haeyen [*De Amstelodamensibus marinis chartis Alberto* Haeyen *auctore*]. 1 fig., 3 cartes, 1 carte h. t. 30 pp., Extr. « Compas d'Or », Bull. Soc. Biblioph. Anvers (1934). **a - 1109**

Résultats d'une étude au point de vue nautique des « Amstelredamsche Zeecaerten » d'Aelbert Haeyen, conservées au musée Plantin Moretus à Anvers. En outre l'A. réunit dans cet ouvrage tous les renseignements qu'il a pu trouver sur ce navigateur et cartographe dont la renommée dans les Pays-Bas a été très grande au XVI siècle.

**Hitchcock C. B.** - Physiography of the Cape Chidley Sheet [*De physiographia in tabula quae* Cape Chidley *repraesentat*]. Geogr. Rev., XXVI, 1, 56-58. New York (1936). **a - 1110**

Appendix II to the article by Alexander Forbes « A Flight to Cape Chidley », during which a map of the Cape district has been constructed from aerial photographs. In the present note some ideas on the nature of bedrock is expressed as has been gained from the study of the photographs of the region.

**Kawraisky W. W.** - Investigation in Mathematical Cartography [*Investigationes in chartographiam mathematicam*]. Ills. Allunion Cartographic Trust. Leningrad (1933).

(—) Mathematical Cartography. Ills. 276 pp. Allunion Cartographic Trust. Leningrad (1934). **a - 1111**

**Kovtun A.** - Cartographic and Astronomic Work in the Chaun Region in 1934-1935 [*De operibus chartographicis et astronomicis in regione* Tschaun, *A. 1934-35*]. (In Russ.). Bull. Arct. Inst., V, 11, 383-384. Leningrad (1935). **a - 1112**

Brief résumé of the exploration of the Chaun District during the Tschukhotsk Expedition of 1934-1935; as a result a map of the district on the scale of 1 : 500 000 instead of a map on a scale of 1 000 000, as first proposed, has been drawn, so that the program of cartographical work elaborated has been carried out in a higher measure as foreseen.

**Le Roux C. C. F. M.** - Boegineesche Zeekarten van den Indischen Archipel [*Tabulae marinae ad archipelagus Indianum pertinentes*]. 1 carte h. t. Tijdschr. Kon Ned. Aardr. Gen. Amsterdam, II, 5, 687-714. Leiden (1935). **a - 1113**

Description de trois cartes marines de l'Archipel Indien trouvées réspectivement dans la Bibliothèque de la Société Royale des Arts et Sciences à Batavia, au Musée naval, Madrid, et à l'Institut Géographique d'Utrecht. Discussion sur l'époque de leur origine, leur modèle et construction etc. Liste des noms géographiques.

**Levine M.** - Collection du matériel cartographique et des travaux ethnographiques de l'Extrême-Nord [*Collectio rerum chartographicarum et operum ethnographicorum regionum orientis extremi*]. (En russe). Sov. Krajeved. (Ethnogr. Sov.), 5, 17-19. Moskva (1935). **a - 1114**

**Lingel R.** - The Atlantic Neptune [*Collectio chartarum cuius titulus* The Atlantic Neptune]. 4 pls. Bull. New York Publ. Libr. XL, 7, 571-603. New York (1936). **a - 1115**

Investigation on the existing copies of « The Atlantic Neptune » published in 1780 and referred to as « the most splendid collection of charts, plates and views ever published ».

**Martonne (de) Ed.** - Cartographie coloniale [*Chartographia colonialis*]. 48 fig. 297 pp., Les Man. Colon., Larose. Paris (1935). **a - 1116**

Dans la première partie de son ouvrage l'A. examine, sous le titre « Les matériaux des cartes coloniales », les travaux définis sous la dénomination générique de « Topographie », depuis les opérations classiques de la géodésie jusqu'à la photo-topographie aérienne. La II^e^ partie est consacrée à la confection matérielle des cartes coloniales et dans la III^e^ partie sont illustrés tour à tour les différents types de cartes. La dernière partie traite de l'avancement présent de la cartographie coloniale officielle de France.

**Maurer H.** - Ueber die Stereodromo [*De stereodromo*]. 1 Abb. Ann. d. Hydrogr. XLIII, 12, 489-493. Berlin (1935). **a - 1117**

Kritische Bemerkungen zu dem von W. Immler (Ann. d. Hydrol. S. 275, 1935) gemachten Vorschlag, statt der bisherigen Merkator-Seekarten stereographische Karten und nach ihnen statt der loxodromischen Schiffahrt die stereodromische einzuführen.

**Messer P.** - Comparison of Navigation and Aviation Charts [*Comparatio inter tabulas pro navigatione et tabulas pro aeronavigatione*]. (In Russ.). Hydrogr. Ber. 3. Leningrad (1934). **a - 1118**

**Miller O. M.** - Notes on the Construction of the Cape Chidley Sheet [*De construendis tabulis ad* Cape Chidley *pertinentibus*]. 1 map. Geogr. Rev., XXVI, 1, 53-56. New York (1936). **a - 1119**

Appendix I to the article by Alexander Forbes « A Flight to Cape Chidley » describing the method employed in constructing the map of northernmost Labrador, of which Sheet n° I is published. The method is very much the same as in ordinary ground surveying except that the measurements are made from aerial photographs in which the horizon appears. Some specific details of the construction of the map are given, and the speed and accuracy of the work carried out emphasized.

Aus dem normalen azimutalen Netze der stereographischen Karte, deren Winkeltreue bewiesen wird, lassen sich mit Hilfe der Loxodrome leicht die Halbmessergesetze der winkeltreuen zenitalen Netze ableiten. Die zenitalen Entwürfe bieten den azimutalen gegenüber den Vorteil die Zonen der Erde in einem einheitlichen Massstabe darzustellen, wodurch ihre praktische Brauchbarkeit wesentlich erhöht wird. Den gleichen Vorteil bietet auch der zenitale Merkatorentwurf. Alle Entwicklungen sind elementar durchgeführt. Statt des schwer zu rechnenden und zu zeichnenden Netzes der Weltkarte von August wird ein Lambertsches Kreisnetz vorgeschlagen, das leicht zu entwerfen ist und der Karte von August an Güte nicht nachsteht. (Aus Vf:s Rés.).

Information on a new edition of the « West Coast of Scotland Pilot » which includes the coast from the Mull of Galloway to Cape Wrath, with the Hebrides.

**An.** - New Books - Ouvrages nouveaux [*De novis operibus*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., III, 62-63. Monaco (1935). **a - 1158**

Information on the publication by the Service Hydrographique de la Marine of a « Catalogue des cartes, plans et ouvrages qui composent l'hydrographie française au 1r janvier 1935; publication n° 11-7 » and on those by late prof. G. Magrini among which a vocabulary of the principal terms used in oceanography.

**An.** - Use of the Terms « New Edition », « Reprint », etc. - Emploi des expressions « Nouvelle édition », « Nouveau tirage », etc. [*De dictionibus* New Edition *etc. Quaestio de usu*]. Int. Hydrogr. Bull. - Bull. Hydrogr. Int., IV, 77. Monaco (1935). **a - 1159**

Reply of Yougoslavia to Bulletin 1934 Circular letter n° 1 referring to the use of the terms « New Edition », « Reprint », etc. by the Director of the Hidrografski ured Mornarice, Split » adopted by the Hydrographic Office of Yougoslavia for the purpose of distinguishing the different issues of editions of charts.

**An.** - Natural Scales of Charts - Echelles naturelles des cartes [*Tabularum moduli naturales*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., IV, 77-78. Monaco (1935). **a - 1160**

Reply of the Hydrographer of the British Navy to the note appearing in thick type on page 4 of the « International Hydrographic Bulletin » for March-April 1935 concerning the practical rules adopted for determining the Natural Scales of charts by the Hydrographic Department, London.

**An.** - Geographical Positions - Positions géographiques [*Positiones geographicae*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., IV, 79. Monaco (1935). **a - 1161**

Supplement to I. H. B. Special Publications n° 24 and 24*a*, concerned with the geographic position of Córdoba (Argentina) and the co-ordinates of the Military Geographical Institution at Santiago (Chile).

**An.** - Catalogues [*Catalogi*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., IV, 93. Monaco (1935). **a - 1162**

Information on the publication of catalogues by the Hydrographic Offices of Yougoslavia, Poland, and Siam.

**An.** - Index Charts - Cartes Index [*Tabularum indices*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., IV, 94. Monaco (1935). **a - 1163**

Information on a New Edition of the Division of Cartography of the Hydrographic Office of Finland, which terminates the series of Finland's coastal charts.

**An.** - Sailing Directions - Instructions nautiques. Canada. [*Praecepta nautica. Regio Canadensis*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., IV, 95. Monaco (1935). **a - 1164**

Information on a first edition (1934) of a volume of Sailing Directions entitled « Gulf of St. Lawrence Pilot (Canadian Edition), with the coasts of Quebec, New Brunswick, Prince Edward Island, Nova Scotia, Cape Breton Island and Newfoundland, bordering on the Gulf of St. Lawrence; including the Banks of Newfoundland and the Approaches to the Gulf by Cabot Strait, the Strait of Belle Isle, and the Strait of Canso ».

**An.** - New Charts - Cartes nouvelles [*Tabulae novae*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., IV, 98. Monaco (1935). **a - 1165**

List of charts recently received by the International Hydrographic Bureau from the British Admiralty; the charts are of the Solent and approaches, including Southampton, published on 25th June, 1935 on a natural scale of 1 : 20.000, and cancel the previous charts of the same numbers respectively.

**An.** - Use of the Terms « New Edition », « Reprint », etc. - Emploi des expressions « Nouvelle Edition », « Nouveau Tirage », etc. [*De dictionibus* New Edition *etc. Quomodo iis utitur*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., V, 103-104. Monaco (1935). **a - 1166**

Text of the reply given to the request appeared on page 20 of « Int. Hydrogr. Bull. », n° 11, 1934, in which the Hydrographer of Netherlands communicates to the International Hydrographic Bureau the equivalent names in the Netherlands languages of the definitions given by Great Britain and the U. S. A. in the above-named Bulletin.

**An.** - New Books. Cartographic Projections - Ouvrages nouveaux. Projections cartographiques [*Libri novi. Projectiones chartographicae*]. (In Engl. & Russ.). Int. Hydrogr. Bull. - Bull. Int. Hydrogr., V, 109-110. Monaco (1935). **a - 1167**

Brief account of two works published in U. S. S. R. dealing with cartographic projection and containing also a series of mathematical investigations of mathematical cartography.

**An.** - New Nautical Publications - Ouvrages nautiques nouveaux [*De novis operibus nauticis*]. (In Engl. & French). Int. Hydrogr. Bull., VI, 120. Monaco (1935). **a - 1168**

Information on publication of new Sailing Directions in France and Chile.

**An.** - New Charts. Antarctic - Cartes nouvelles. Antarctique [*Tabulae novae. Regio Antarctica*]. (In Engl. & French). Int. Hydrogr. Bull., VI, 121. Monaco (1935). **a - 1169**

Information on the publication in 1935 by the Norges Geografiske Opmåling of a series of four charts which show the entire periphery of the Antarctic situated between Lats. 50° S. and 73° S.

**An.** - New Charts - Cartes nouvelles [*Tabulae novae*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Int. Hydrogr., I, 1-2. Monaco (1936). **a - 1170**

Charts of the Russian coast - First Edition of Peruvian Chart n° 3 - Puerto del Callao - scale 1 : 10.000 - Sheet A III of the « Carte Aéronautique de base » published by the « Commission Internationale de Navigation Aérienne » based on transfers of the General Bathymetric Chart of the Oceans.

**An.** - Reports on the Work Carried Out and Projected by the Hydrographic Offices - Rapports sur les travaux exécutés et projetés par les Services Hydrographiques [*Relatio de operibus peractis et propositis a Servitiis Hydrographicis*]. (In Engl. & French). Tabl. Int. Hydrogr. Bull. - Bull. Hydrogr. Int., 11, 11-21. Monaco (1936). **a - 1171**

Work carried out: (A) Surveys made, (B) charts published, (C) books and publications issued, during the year 1935, and work projected: (a) surveys projected,

(b) charts or diagrams in hand, (c) books or publications in hand, for 1936 by the United States Hydrographic Office, and by those of Spain and Sweden.

**An.** - Coast Area Defined for Hydrography - Délimitation des zones côtières en vue de l'hydrographie [*Delimitatio regionum litorearum pro hydrographia*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., 11, 22. Monaco (1936). **a - 1172**

Definitions of coast areas to be adopted in all future Hydrographic Publications issued by the Hydrographic Department, China, and to be used when quoting locations in coastal waters of China.

**An.** - Symbols and Abbreviations - Signes conventionels et abréviations [*De symbolis et abbreviationibus*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., 11, 22. Monaco (1936). **a - 1173**

Information on the enclosure in a violet-coloured circle of the positions of Directions-finding stations on Netherlands charts.

**An.** - Special Fund for Keeping the General Bathymetric Chart of the Oceans up to Date - Dotations spéciales pour la tenue à jour de la Carte Générale Bathymétrique des Océans [*Fides pecuniaria specialis ad Chartam generalem Bathymetricam Oceanorum in dies redigendam*]. (In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., II, 24-26. Monaco (1936). **a - 1174**

Grants received - Utilisation of grants - Progress of the work (sheets completed during 1935-36).

**An.** - Maps Versus Charts [*Comparatio inter tabulas topographicas et tabulas hydrographicas*]. Milit. Engineer, Sept-Oct., 400. Washington (1935). **a - 1175**

Explanation of the principal characteristics of maps and charts.

## Maritimi Portus - Canales - Aestuaria.

**Adelborg F.** - Singapore, Asiens största hamnstad och porten till yttersta östern [*Asiae maximus omnium est portus* Singapore *qui considerari potest janua ad Extremi Orienti regiones*]. Jorden runt, 225-236. Stockholm (1934). **a - 1176**

**Antonov N. D.** - Amount of Heat Carried by the Rivers into the Kara Sea [*De summa calorica a fluminibus in Mare Karense relata*]. (In Russ., Engl. Summ). 2 figs., 12 tables, 1 map, Trans. Arct. Inst., XXXV, 23-50. Leningrad (1936). **a - 1177**

Results of a study of the basin of the Kara Sea with special regard to the amount of heat carried into it by the rivers, the area of the entire basin and the single rivers' basins, the total annual surface discharge into the Kara Sea, the characteristic of the thermal flow into the Kara Sea. The data communicated are to be considered as preliminary ones.

**Antral** - Porto. 3 fig. Mer et Outre-Mer. Octobre, 49-50. Paris (1935). **a - 1178**

Impressions d'une visite.

**Hanley W. M.** - The Suez Canal [*Canalis* Suez]. Geogr. Rev., XXVI, 1, 158-159. New York (1936). **a - 1199**

On hand of several articles by E. M. Wilson, A. Solletty, C. W. Hallberg, and Sir Arnold T. Wilson, author describes the main characteristics of the Suez Canal and gives some evidences which show that there is a real tendency to divert traffic from the Suez to the Panama Canal route and in part to benefit the United States trade in the Orient at the expense of European countries.

**Hitch M. A.** - The Port of Tientsin and Its Problems [*Portus* Tientsin *quaestionesque ad eum pertinentes*]. 9 figs., 2 tables. Geogr. Rev., XXV, 3, 367-381. New York (1935). **a - 1200**

After a brief introduction, summarizing the navigational and other problems of the port of Tientsin, author deals in particular with the flood problem, the trade of the port, which is illustrated by two tables of which one gives the value of trade and the other the record draft of vessels reaching Tientsin for the years 1910-1933; then Author treats the Hai Ho Conservancy Board and finally recalls the attention to the silting which represents the gravest problem of the port. To conclude, author gives an account of the palliative scheme for the solution for both flood and silt problems and a summary of the proposed permanent scheme put forth by the engineers of the North China River Commission, which could enable Tientsin to become a truly great port.

**Milone F.** - Il porto di Napoli [*Portus Neapolitanus*]. Atti Soc. It. Progr. Sc. (XXIII Riunione, Napoli, 10-17 ottobre 1934–XII), v. II, 1935, p. 28-43. Roma (1935). **a - 1204**

Attraverso l'esame dei dati statistici l'A. cerca di impostare il problema portuale di Napoli nella sua realtà, indicandone le correnti di navigazione che è prevedibile abbiano a svilupparsi di più in avvenire, mettendo in rilievo la stretta indipendenza tra il porto ed il suo retroterra, avvertendo ancora quali industrie del retroterra lascino prevedere un loro naturale sviluppo. Con l'analisi del movimento viaggiatori del porto, l'A. sfronda le cifre di tutto il traffico secondario, che assai poco contribuisce all'economia del porto e si ferma ad esaminare il traffico con l'estero. Passa, quindi, allo studio del retroterra, che distingue in *reale* e *potenziale*, e prospetta la funzione spiccatamente regionale del porto di Napoli.

**Bravo G. A.** - L'elettrodo ad antimonio per le misure di pH [*De elettrodo cum antimonio ad mensuras peragendas formulae* pH]. 521-523. La Chim. e l'Ind., 8. Milano (1935). **a - 1239**

Viene studiato il comportamento dell'elettrodo ad antimonio a varie temperature ed in presenza di sali diversi; e vengono dati alcuni suggerimenti pratici per ottenere la massima precisione possibile.

**Broujevitch S.** - L'aspect hydro-chimique de la Caspienne méridionale [*Aspectus hydro-chemicus regionis Caspicae meridionalis*]. (En russe). 1 carte, 27 tabl. Izv. Gos. Gheogr. Obstsch. (Bull. Soc. Géogr. Etat), LXVIII, 1, 5-34. Leningrad-Moskva (1936). **a - 1240**

Après une brève énumération des particularités physico-géographiques de la Mer Caspienne, l'A. communique les résultats des observations océanographiques faites à bord du vaisseau « Sextant » dans la partie méridionale de cette mer au mois d'août 1933. Sont communiqués les résultats des observations sur la température, la salinité, la réaction active, l'alcalinité, le contenu en $CO_2$ libre, en $O_2$, en $H_2S$, en sels ammoniacaux, en ammoniaque albuminoïde, en nitrite, en nitrates, en phosphates, en acide silicieux; l'A. décrit aussi la composition des couches d'eau voisines au fond de la mer, les oscillations journalières de $O_2$ et de pH, illustre la réaction active (pH) des terrains du fond de la mer et leur potentiel acidifiant et reconstituant; il donne en outre, un calcul hydro-chimique de la productivité du phytoplankton et, pour conclure, indique les caractéristiques hydro-chimiques essentielles qui distinguent la partie considerée de la Mer Caspienne. Les observations se rapportent essentiellement à deux sections latitudinales, à voire; section de l'Ile Jiloj au Cap Kouli selon 41° 4′ N, et section du rocher Kourinskij à l'Ile Ogourtchinskij, à 39°50′ N environ.

Discusion de los resultados obtenidos en 1933: 1° Régimen térmico superficial; 2° Salinidad del agua superficial: 3° Régimen térmico, salino y de densidades entre la superficie y 500 metros de profundidad. 4° El régimen de corrientes en la costa Catalana. Resultados obtenidos en 1934: Comparacion del régimen marino superficial en Cataluña con el de otras regiones del Mediterraneo occidental.

**De Las Heras A. R.** - Tablas para el cálculo de la densidad del agua de mar a 0° C., partiendo de las lecturas en el refractómetro de immersión a diferentes temperaturas [*Tabulae ad calculandam densitatem aquae marinae 0° C. Calculi ducuntur ex perscriptionibus apparatus refractometrici immergibilis, variis temperaturis*]. Tabl.. Inst. Esp. Oceanogr., Notas Resúm., II, 81, 1-23 Madrid (1934). **a - 1246**

Amplación de las tablas de Vaurabourg publicadas en el « Bulletin de l'Institut Océanographique », Monaco, n° 934, 1921, para obviar el inconveniente del procedimiento refractométrico, calculando los valores de la densidad de agua de mar correspondientes a décimas de división de la escala del refractómetro.

**Ercegovic A.** - Recherches sur l'alcalinité et l'équilibre de l'acide carbonique dans les eaux côtières de l'Adriatique oriental moyen [*Investigationes in alcalinitatem et aequilibrium acidi carbonici in aquis litoreis maris Hadriatici orientalis*]. 27 fig., tabl. Acta Adriatica, 7, 1-83. Split (1935). **a - 1247**

L'importance du calcaire et de l'acide carbonique pour les phénomènes géochimiques comme pour ceux biologiques. Première partie: Recherches sur l'alcalinité: Discussion des résultats (les causes de variations de la teneur relative et absolue en carbonate de chaux et de la teneur en borates). Deuxième partie: Recherches sur l'équilibre de l'acide carbonique. Discussion des résultats (les causes de variations du pH et de la tension de $CO_2$ et les causes de variations de l'acide carbonique total et de ses composantes. Aperçu sommaire des résultats. Bibliographie. Tableaux.

**Espil L.** - Chimie de l'eau de mer et des algues marines [*Chemica aquae marinae et algarum marinarum*]. Tables. Bull. Stat. Biol. Arcachon, XXXI, 81-100. Bordeaux (1934). **a - 1248**

Résultats de recherches effectuées au cours des années 1931–1932 au laboratoire de l'École des Hautes Études, à Arcachon, sur la composition de l'eau de mer (1) au point de vue minéral et (2) au point de vue organique, ainsi que des tissus des algues. L'étude de la composition en ions minéraux a permis de mettre en lumière les variations très nettes des rapports ioniques entre les cations principaux, tandis que l'étude du carbone organique a permis d'établir que les quantités de matière organique dans l'eau de mer sont relativement importantes.

**Frezouls J.** - Le dosage du brome dans l'eau de mer par colorimétrie avec le réactif de Denigès-Chelle [*De bromo eiusque gradatione in aqua marina per colorimetriam cum reagente* Denigès-Chelle]. 2 tabl. Stat. Océan. Salammbô, Notes 28, 3-15. Tunis (1934). **a - 1249**

Méthodes de dosage de petites quantités de brome combiné en présence d'un excès de chlorures. Méthode colorimétrique de Denigès-Chelle. Action de l'acide de Caro sur les bromures et chlorures en solution. Recherche et dosage du brome. Résultats obtenus avec quelques échantillons d'eau de mer. Conclusions: l'A. propose la substitution de l'acide de Caro au mélange sulfo-chromique pour la libération du brome en vue de sa recherche et de son dosage avec la méthode Denigès-Chelle. Cette méthode colorimétrique donne des résultats plus exacts que les autres méthodes exposées, car elle supprime l'influence perturbatrice des chlorures sur le dosage.

P.** - Geomorphological and Hydrological Observations on the Research-Vessel « Albatross » during the Summer 1932 in the Obj-Enissejskaja Bay and the adjacent Area of the Kara Sea [*Observationes geomorphologicae et hydrologicae in navi* « Albatross » *aestate 1932 in baja* Obj- Enissejskaja *et in adiacente regione Maris Karensis*]. (In Russ., Engl. Summ.). 17 figs. Zemlevedenije, XXXVI, 3, 211-258. Moskwa-Leningrad (1934). **a - 1255**

**Kimura K.** - Hydrographical Observation near Awasime Isle situated at the North-eastern End of Suruga Bay. (Further Note I). Daily Records in 1933 and 1934 [*De observatione hydrographica apud insulam* Awasime *in extrema regione nordorientali* Suruga. *Nota additicia Iª* (*Registrationes diuturnae, A. 1933 et 1934*)]. (Jap. Text., Engl. Rés.). 5 tabl., 2 diagr. Bull. Jap. Soc. Scient. Fish., IV, 1, 54-60. Tokyo (1935). **a - 1256**

Temperatures, salinities, transparence of water, currents, plankton etc. for two periods, the convection period from mid-April to early October, and the stratification period for the rest of the year.

**Kimura K.** - Hydrographical Observations near Awasima Isle situated at the North-eastern End of Suruga Bay. (Further Note II). Variations of and Mutual Relations among Water Temperature, Salinity and Transparency [*De observationibus hydrographicis apud insulam* Awasima *in extrema regione nord–orientali* Suruga. *Nota additicia IIª* (*Variationes et correlationes mutuae quoad aquae temperaturam, salsedinem et transparentiam*)]. Tabl., 7 figs. Bull. Jap. Soc. Scient. Fish., IV, 5, 339-352. Tokyo (1936). **a - 1257**

The remarkable changes in the temperature of the lower layers of water observed in July 1933 and August 1934 seem to be in relation with the tidal currents coming from the bottom of the wider north eastern area of Suruga Bay. The quality of the water is determined by the proportion of mixing of different water-layers and river water.

**Kondyrev N. V.** - Chemical Analysis of Water of the Japan Sea [*Analysis chemica aquae Maris Japonici*]. (In Russ., Engl. Summ.). 9 tabl. Bull. Pacif. Comm. Acad. Sc. USSR., 3, 9-16. Leningrad (1934). **a - 1258**

During the Oceanographical Expedition of the Pacific Committee of the Academy of Science of the USSR organized in 1928 jointly with the Hydrographic Department

of the Navy for the study of the Japan Sea, four samples of water were taken especially for the chemical analysis from the depth of 10 meters at different hydrological stations in the northern part of the Japan Sea. In the present paper author deals with the detailed analysis undertaken on these samples, and illustrates the method applicated and the results obtained.

Als Gesamtergebnis seiner Betrachtung stellt Vf. fest, dass die Metall- Ionen der Meeres- Salze den festen Primärgesteinen entstammen, wogegen die Bestandteile der Säurereste fortlaufend durch den Vulkanismus geliefert werden. (Vf.).

**Lumby J. R.** - Salinity and Temperature of the English Channel. Book and Atlas of Charts. [*Salsedo et temperatura Freti Britannici*]. Many fig. & tables. Fish. Invest., Ser. II, vol. XIV, 3, 1-58. London (1935). **a - 1266**

Estimation of mean values for the upper water layer for the 25- Year Period 1903-1927. The atlas of charts is separate.

**Maiorca V.** - Saline siciliane [*De salinis siculis*]. Ann. Merceol. Sicil., II, 102-144. Catania (1932-34). **a - 1267**

Delle saline marittime in generale; impianto di una salina e utilizzazione delle acque madri. La piscicoltura nelle saline. Importanza terapeutica delle saline. L'esportazione di sal marino. Le saline di Trapani. Le saline di Augusta e di Magnisi. La questione del monopolio.

**Maldura C. M.** - Ricerche chimiche sulla laguna di Orbetello in rapporto alla biologia. Nota I [*Investigationes chemicae in lacuna orbetellana pro biologia. Nota I*ª]. Atti R. Acc. Naz. Lincei, Rend. Cl. Sc. Fis. Mat. Nat., ser. 6, XXII, 1-2, 64-68. Roma (1935). **a - 1268**

Nella presente nota vengono prese in considerazione le variazioni stagionali della temperatura, della salinità, del rapporto solfati-cloruri e dell'ossigeno delle acque della laguna di Orbetello. L'A. mette in evidenza come certe apparenti anomalie siano in rapporto con i fenomeni vitali della laguna.

**Maldura C. M.** - Ricerche chimiche sulla laguna di Orbetello in rapporto alla biologia. Nota II [*Idem. Nota II*]. Atti R. Acc. Naz. Lincei, Rend. Cl. Sc. Fis. Mat. Nat., ser. 6, XXII, 3-4, 140-145. Roma (1935). **a - 1269**

A seguito di una precedente nota l'A. prende in esame il contenuto in azoto ammoniacale, nitroso e nitrico, in fosforo e in silice delle acque della laguna di Orbetello. Dei suddetti composti viene anche seguito l'andamento stagionale in rapporto allo sviluppo della vegetazione. Quindi l'A. mette in relazione con i fenomeni fotosintetici i valori del pH e dell'alcalinità, osservati mensilmente, e considera l'influenza che detti valori possono avere sulla presenza e lo sviluppo di certi molluschi riscontrati nelle acque di Orbetello.

**Maldura C.** - Sull'unificazione dei metodi di analisi dei sali nutritivi e della silice in soluzione nell'acqua di mare [*De unificandis rationibus pro analysi salis quod alimentum praebet atque analysi silicis solutae in aqua marina*]. Boll. Pesca Piscicolt. e Idrobiol., XI, 424-433. Roma (1935). **a - 1270**

L'A. passa in rassegna i metodi analitici in uso per la determinazione dei sali nutritivi nell'acqua di mare, e cioè quello di Denigès modificato da Atkins per i fosfati, quello di Denigès modificato da Harvey per i nitrati, quello

di Griess-Ilosvay, per i nitriti, quello di Nessler per l'ammoniaca e quello di Diénert e Wandenbulke riesaminato da Atkins per i silicati. Nota come analisi simili siano assai scarse per il Mediterraneo, e come queste ricerche assumano un carattere di particolare attualità in vista della prossima riunione plenaria a Bucarest della Commissione Internazionale per l'esplorazione del Mediterraneo.

**Maldura C. M.** - Etude de la valeur du stock biologique de la Méditerranée, en relation avec les quantités de nitrates et phosphates dissous [*De aestimatione quoad* stock *biologicum maris Mediterranei pro nitratis et phosphatis*]. 7 pp. Rapp. Réun. Scient. Comm. Int. Expl. Mer. Assemblée Bucarest, 1935. Paris (1935). **a - 1271**

**Matsudaira Y.** - Report of the Surface Observations Along the Route of the 18th Cruise of the Training Ship « Shintoku Maru » [*Relatio de observationibus praeter cursum maritimum XVIII$^{ae}$ navigationis speculatoriae a navi* « Shintoku Maru »]. (In Jap. Engl. Abstr.). 1 fig., 1 table, 1 pl. Journ. Oceanogr., VIII, 1. 3-4 & 113-136, Kobe, (1935). **a - 1272**

Account of the surface observations taken along the route across the North Pacific Ocean from Kobe to San Diego and then down in the South Pacific Ocean to Auckland, New Zealand. The cruise started on May 10th and finished on October 15th 1933. In this report meteorological observations are added to the oceanographical ones; they show the conditions of the seas during the so-called « north-summer », and emphasize above all the annual changes in the North Pacific.

**Matsue Y.** - On a Colorimetric Method for the Determination of Hydrogen Ion Concentration of the Sea Water by using Palitzsch's Buffer Solutions and Phenolphthalein [*De methodu quadam colorimetrica ad concentrationem ionhydrogenicam aquae marinae determinandam*]. (In Jap., Engl. Rés.). 2 figs. 4 tabl. Bull. Jap. Soc. Scient. Fish. II, 5, 251-256. Tokyo (1934). **a - 1273**

A. has studied the relation between colour ratio and its corresponding pH-value of the seawater as determined by Brandes with Palitzsch's buffer solution (boric acid-borax mixtures) and found that pH of it is a logarithmic function of $\alpha$ within a range 8.08-8.60 but not a linear one as obtained by Brandes.

**Mazure J. P.** - Onderzoekingen betreffende de op het Ijsselmeer te verwachten chloorgehalten [*Investigationes de continentia chlori quae a mari* Ijssel *obtineri potest*]. Water, Bodem, Lucht 25, 9. Amsterdam (1935). **a - 1274**

**Mc Donald W. F.** - Seasonal Variation in North Atlantic Surface-Temperatures [*De variatione pro anni tempore temperaturarum ad superficiem Oceani Atlantici Sept.*]. 11 figs. Nat. Res. Counc., Amer. Geoph. Un., Trans. 16th Ann. Meet., Apr. 25-26, 1935, I, 228-239. Washington D. C. (1935). **a - 1275**

The author illustrates the seasonal variation in North Atlantic surface-temperatures on hand of data discussed in the paper and reported on 11 charts, which reproduce the annual range of temperatures, the average monthly temperature curves, the epoch of maximum temperatures, those of inception of rising temperatures, the annual summary of temperature departures from latitude normals, the average frequency of larger anomalies (annual basis - June to November), the temperature departures experienced in January 1932, the distribution of larger anomalies (autumn 1932 and 1933), the two-year summary of larger anomalies for 1932-33. In his conclusions author claims that the causes and meaning of the demonstrated departures from the normal are entirely unexplored and constitute problems that invite further study in the hope of finding significant relations between atmospheric events and extensive variations in ocean-surface temperature.

**Mitchell P. H.** - Buffer Capacity of Sea Water [*De peculiaritate aquae marinae quae anglice dicitur* Buffer Capacity *idest capacitas occludendi*]. Woods Hole Oceanogr. Inst., App. Rep. 1934, 24. Woods Hole, Mass. (1935). **a - 1276**

Summary of investigations carried out in 1934 in order to test the accuracy and the applicability of recently published methods of determination of the specific buffer capacity and the pH of sea water.

**Möller L.** - Ueberblick über Methoden direkter und indirekter Dichtebestimmungen des Meerwassers [*Conspectus rationum pro determinatione directa et indirecta densitatis aquae marinae*]. Veröff. Inst. Meeresk., N. F., A. Geogr.-naturw. Reihe, 28, 1-7. Berlin (1935). **a - 1277**

**Möller L.** - Zur Charakteristik der Wasserkörper des Atlantischen Ozeans [*De peculiaritatibus massarum aquosarum Oceani Atlantici*]. 28 Abb., 2 Tab. Veröff. Inst. Meeresk., N. F., A. Geogr.-naturw. Reihe, 28, 191-239. Berlin (1935). **a - 1278**

Bericht über den Versuch die Dichte des Ozeans in vertikalen Kurven und Schnitten auf Grund der durch Messungen mit dem Interferometer und durch Chlortitration erhaltenen Werte darzustellen, mit besonderer Berücksichtigung des Wasserkörpers des Atlantischen Ozeans in den äquatorialen und den nördlichen Breiten. Ausserdem sind die Ergebnisse einer gleichzeitigen Bestimmung von Chlorgehalt und Dichte einiger atlantischen Wasserproben mitgeteilt.

**Mosby H.** - Scientific Results of the Swedish Norwegian Arctic Expedition in the Summer of 1931. Part XIII. Physical Oceanography [*Resultatus scientifici ex navigatione ad regiones arcticas a Suetiis et Norvegis peracta, aestate 1931. Pars XIII. Oceanographia physica*]. 4 figs. Geogr. Ann., XVIII, 1, 20-29. Stockholm (1936). **a - 1279**

103 hydrographical stations with determinations of temperature and salinity, in most cases also of oxygen, hydrogen ion concentration and phosphates at different depths have been taken north of West Spitsbergen and North East Land, in Hinlopen Strait and adjacent fiords, in the northern Barents Sea between North East Land and Franz Joseph Land and in Cambridge Channel, Franz Joseph Land. Soundings and current measurements.

**Namekawa T.** - A Theory of the Annual Variation of Temperature of Ocean and Lake. [*De variatione annua temperaturae oceani et lacus*]. 1 fig., 1 table. Mem. Coll. Sc., A. XVIII, 239-245. Kyoto (1935). **a - 1280**

Author adds to L. F. Richardsons's equation of eddy transfer of heat for mean state, a new term of the upward flux of heat due to the spontaneous mixing occurring only in the cooling stage of water, and in such a way obtains approximately the annual variations of water temperature in ocean and lake. He verifies the solution obtained by an actual example and gives also a physical explanation of the vertical distribution of the annual mean temperature and a new method of deriving the mean value of eddy diffusivity.

**Navarro F. de P.** - Nuevos datos sobre la continua variaciòn de la temperatura de las aguas submarinas en la bahia de Palma de Mallorca [*De variatione continua temperaturae aquarum submarinarum in sinu Majorchino*]. 10 fig., 11 quadr. I. Antecedentes. — II. Exposiciòn de los resultados adquiridos (1934). — III. Conclusiones.

**Okada T.** - Report of the Oceanographical Observations Taken on Board R. M. S. « Syunpû Maru » in the Ômura-Wan in November and December 1931 [*Relatio de observationibus oceanographicis in navi peractis* « Syunpû Maru » *in* Ômura-Wan, *mensibus Novembri et Decembri* 1931]. (In Jap. Engl. Abstr.). 6 tables, 50 pls. Journ. Oceanogr., VIII, 1, 1-64. Kobe (1935). **a - 1282**

Results of oceanographical observations taken in Ômura-wan, which is an almost enclosed basin situated in the neighbourhood of Nagasaki and connected with the East China Sea by means of two narrow channels. The data of the oceanographical and meteorological observations are recorded on tables and plates annexed to the report.

**Okada T.** - Report of the Oceanographical Observations Taken on Board R. M. S. « Syunpû Maru » in Osaka-Wan in April 1935 [*Relatio de observationibus oceanographicis in navi peractis* « Syunpû Maru » *in* Ômura-Wan *mense Aprili 1935*]. (In Jap.). Tabl. & pl. Journ. Oceanogr. VIII, 3, 265-312. Kobe (1936). **a - 1283**

**Okada T.** - Note on the Oceanographical Observations in Nagoya Harbour, December, 1932, with Special Discussions on the Chemical Properties of the Water in the Harbour [*De observationibus oceanographicis in portu* Nagoya *mense Decembri 1932. Agitur particulatim de peculiaritatibus chemicis*]. (In Jap.). Tabl. & pl., Journ. Oceanogr. VIII, 3, 313-332. Kobe (1936). **a - 1284**

The description chiefly concerns the distribution of chemical elements and variation of these elements during the period indicated. As an appendix, the results of oceanographical and meteorological observations in the route from Kobe to Nagoya are given.

**Okada T.** - Note on the Correlative Oscillations of the Surface Water Temperature of the Oyasio and the Kurosio [*De oscillationibus correlativis quoad temperaturam aquae superficialis in* Oyasio *et* Kurosio]. 1 map, 5 tables. Mem. Imp. Mar. Observ., VI, 2, 97-103. Kobe (1936). **a - 1285**

In order to examine the validity of the arguments, showing the influence upon the northern Japan temperature of the north equatorial current or the Kurosio and of the Oyasio current, author has compared the departures of water temperatures observed in the vicinity of these currents.

**Orr A. P.** - Physical and Chemical Conditions in the Sea in the Neighbourhood of the Great Barrier Reef [*De maris condicionibus physicis et chemicis apud* Great Barrier Reef]. 7 figs. Great Barrier Reef (Queensl). Exp. 1928-1929. Scient. Rep. Brit. Mus. (Natur. Hist.), II, 3, 37-86. London (1933). **a - 1286**

Analysis of seasonal changes in temperature, salinity, density, turbidity and plant nutrient salts and influencing factors; effect of the hydrographic conditions on plant life and corals; comparison with the conditions in temperate waters. Discovery of upwelling deep water on the seaward edge of the Barrier.

**Oster R. H.** - Measurements of the Penetration of the Red, Green and Violet Components of Daylight into Atlantic Waters [*De mensuris quoad componentes rubros virides et violaceos lucis diurnae in aquis Oceani Atlantici relate ad penetrationem*]. Woods Hole Oceanogr. Instit., App., Rep. 1934, 24. Woods Hole, Mass (1935). **a - 1287**

Brief account of measurements of penetration of the three components of daylight into the sea, made in coastal areas near Woods Hole, in the Gulf of Maine, and in the Sargasso Sea. A comparison between the velocity of penetration of the red, green, and violet components of daylight has also been made in coastal areas, as well as in inshore waters.

**Parr A. E.** - Report on Hydrographic Observations in the Gulf of Mexico and the Adjacent Straits made during the Yale Oceanographic Expedition on the « Mabel Taylor » in 1932 [*Relatio de observationibus hydrographicis in Sinu Mexicano et in fretis adiacentibus peractis perdurante navigatione oceanographica Yalensi in navi* « Mabel Taylor », *A. 1932*]. 33 fig., Bull. Bingham Oceanogr. Coll. V, Art. 1, 1-93. New Haven, Conn. (1935). **a - 1288**

Waters above 800 meters depth. Observations in the Gulf of Mexico proper: vertical profiles, horizontal distributions. Evidence of seasonal changes. Temperature-salinity correlations. Individual sections. General characteristics of Gulf waters, with comments upon method of computing average temperature-salinity correlations for special ocean areas. Observations in the Straits of Florida and in the Yucatan Channel.

**Peau E.** - Observations océanographiques faites de Barry (Angleterre) à l'Archipel de Kerguelen (12 Octobre-2 Décembre 1923) (à suivre) [*Observationes oceanographicae a* Barry *peractae in Archipelago* Kerguelen (*a die 12 Octobris ad diem 2 Decembris 1923*)]. Bull. Soc. Amis. Inst. Océanogr., XVII, 49, 4-5. Le Havre (1935). **a - 1289**

Compte rendu des observations faites du 27 au 29 novembre 1923 sur le trajet Barry - Cap de Bonne Espérance.

**Picotti M.** - Refrattometria dell'acqua marina e tavole per la misura della salinità [*De refractometria aquae marinae deque tabulis ad salsedinem mensurandam*]. 31 pp., 7 fig., 2 tav., Mem. CCXXI del Comitato Talassografico Ital., Ferrari. Venezia (1935). **a - 1290**

Si descrive una sistemazione strumentale atta a dare le determinazioni refrattometriche con la massima precisione di misura consentita dal refrattometro ad immersione. Precisate le varie cause d'errore, vengono determinate a diverse temperature le variazioni dell'indice di rifrazione.

**Picotti M. M.** - Développement et approximation de la réfractométrie de l'eau de mer. [*De refractometria aquae marinae. Quaestio de evolutione et approximatione*]. 8 pp. Rapp. Pr.-Verb. Comm. Int. Expl. Mer. Paris (1935). **a - 1291**

**Picotti M.** - I fattori chimici essenziali, e «al minimo» determinanti per lo sviluppo e la capacità biologica marina ed il loro controllo immediato [*Factores chemici maxime necessarii ad investigandam capacitatem biologicam marinam*]. Rapp. Réun. Scient. Assemblée Bucarest, 1935. Paris (1935). **a - 1292**

Il controllo dei componenti nutritivi «al minimo» dell'acqua marina è da estendere ai composti: 1° Sostanza organica disciolta o colloidale da determinare con il permanganato potassico in ambiente alcalino e rititolazione in ambiente acido, secondo Natterer. 2° Ammoniaca e sali ammoniacali valutabili molto esattamente senza distillazione, usando il trattamento preventivo di Witting e successiva nesslerizzazione. 3° Ammoniaca ex azoto proteico-valutabile al 90 % circa a titolo di controllo, con permanganato sec. Wanklyn, Chapman e Smith. Quando tale controllo risulti opportuno è consigliabile pure in parallelo. 4° Determinazione dell'azoto totale combinato, con il metodo di Kjeldahl, modificato secondo Jodlbauer e ciò per la contemporanea presenza di nitriti e nitrati. 5° Determinazione dell'acido nitroso con il reagente di Griess - Ilosvay. 6° Determinazione dell'acido nitrico con il metodo di Harvey alla stricnina ridotta. 7° Determinazione dell'ione fosforico a mezzo della reazione ceruleo-molibdica di Denigès. 8° Determinazione della silice solubile, secondo Atkins, a mezzo della colorazione gialla con molibdato ammonico in ambiente di pH = 2. (Autore).

**Rakestraw N. W.** - Physical Chemistry of Sea Water [*De chemica-physica aquae marinae*]. Woods Hole Oceanogr. Instit., App., Rep. 1934, 27-28. Woods Hole. Mass (1935). **a - 1293**

Account of the results of chemical analysis made on water samples from 270 stations in the Gulf of Maine during the year 1933-1934, on ten different cruises covering an interval of fifteen months. Extention of the work on nitrite in sea water; application of the method worked out before for the determination of the dissolved inorganic iron in sea water; improvement of the method of determination of the content in cupper of the sea water; determination of the content of dissolved inert gases (helium and neon) in water-samples.

Summary of the work performed on the chemistry of the water of the Gulf of Maine and the results of the analysis of the data obtained with a view to get an accurate picture of the distribution of substances important in the nutrition of animals and plants throughout the year.

**Sandström J. W.** - Geophysische Untersuchungen im Nordatlantischen Meer [*Investigationes geophysicae in oceano atlantico septentr.*]. Gerl. Beitr. Geoph. IV, Mitt., 45, 1-4. Leipzig (1935). **a - 1295**

**Seiwell H. R.** - Phosphate in the Western Basin in the North Atlantic [*De phosphato in regione occidentali Oceani Atlantici septentr.*]. Nature, CXXXVI, 3432, 206-208. London (1935). **a - 1296**

After having examined the transfer and amount of phosphate in different layers and factors concerned with it the A. comes to conclusions opposed to previous ideas that, throughout in the entire basin of the western North Atlantic, regardless of existing vertical density gradients, there is a significant eddy transfer of phosphate from the rich mid-strata to the impoverished surface layers.

**Seiwell H. R.** - The Cycle of Phosphorus in the Western Basin of the North Atlantic. I. Phosphate Phosphorus [*De phospori cyclo in parte occidentali Oceani Atlantici Sept.*]. Pap. Phys. Oceanogr. & Meteor. III, 4. Cambridge, Mass. (1935). **a - 1297**

**Seiwell H. R.** - Oxygen and Phosphorus Contents of Water and Sediments of the Western Basin of the North Atlantic [*De aquae oxygeno et phosphoro in aqua atque etiam in sedimentis regionis occidentalis Oceani Atlantici Sept.*]. Woods Hole Oceanogr. Instit. App., Rep. 1934, 29. Woods Hole, Mass (1935). **a - 1298**

Summary of the studies of the biological relationships of oxygen and phosphorus contents of water and sediments, especially dealing with (1) the oxygen, phosphorus and organic phosphorus content of the western basin of the North Atlantic; (2) the phosphorus and carbon contents in relation to the physical composition of marine sediments; (3) the chemical analysis of the marine plankton; (4) the theoretical interpretation of the biological significance of the results.

Monthly and annual mean sea-surface temperatures given in tables.

**Smith H.** - Physical Oceanography of Davis Strait, Labrador Sea and Grand Banks [*Oceanographia physica ad Fretum* Davis, *mare Labradoricum, et magna vada* (*anglice* Grand Banks) *pertinens*]. Woods Hole Oceanogr. Instit., App. Rep. 1934, 30. Woods Hole, Mass (1935). **a - 1300**

Account of surveys carried out by the U. S. Coast Guard vessels «Marion» and «General Green» in the years, 1928, 1931, 1933, and 1934 during which an observational material has been collected for a study of the distribution of temperature and salinity, and the prevailing circulation in the waters around the Grand Banks, and northward between Labrador and Greenland, to the 17th parallel of latitude.

**Soule F. M.** - Physical Oceanography of the Grand Banks Region and Labrador Sea [*Oceanographia physica quae pertinet ad regionem* Grand Banks *et mare Labradoricum*]. Woods Hole Oceanogr. Instit., App. Rep. 1934, 30-31. Woods Hole, Mass (1935). **a - 1301**

Account of the cruises of different vessels in the Grand Bank region and Labrador Sea, during which dynamic topographic charts of the region have been supplied, three current surveys of the critical area made, 172 oceanographical stations occupied and the temperature and salinity measurements extended to dephts of 1500, and where the depth of water permitted, to 2000 and 2500 meters. Other incidental data have been gathered, consisting of barograms, seawater surface thermograms and 969 sonic soundings, as well as of vertical sections of temperature, salinity and density.

**Tait J. B.** - Recent High Salinity Records from the Northern North Sea [*De maxima salsedine Maris Nordici. Recentiores registrationes*]. 5 tables, 1 fig. Rapp. Pr-Verb. Cons. Expl. Mer. XCIV. Appendices (1934-1935). 60-65. Copenhague (1935). **a - 1302**

Methods of determination used, and their validity. Dates (day, month), depths and salinities from 1930 to 1934 expressed graphically and in tables. The bearing of these results on the general question of hydrological anomaly.

**Thijsse J. Th.** - De Ontzilting van het Ijsselmeer in 1935 [*De salina deminutione in* Ijsselmeer *A. 1935*]. 2 fig., Tijdschr. Kon. Ned. Aardr. Gen. Amsterdam LIII, 3, 369-370. Leiden (1936). **a - 1303**

Fortschreitende Verminderung des Salzgehaltes im Winter 1935-1936 dank der grossen Zufuhr vom Rhein: leichte Erhöhung im Februar, mit einem mittleren Salzgehalt von O. 39 Gr. pro Liter, was nur die Hälfte des entsprechenden Gehaltes von April-Mai 1935 ausmacht.

**Thompson H. & Wilson A. M.** - Hydrographic Conditions in 1934 [*Condiciones hydrographicae A. 1934*]. 2 tables. Rep. Newfoundl. Fish. Res. Labor., II, 3, 15-19. Newfoundland (1935). **a - 1304**

After a brief description of the temperature conditions of the Newfoundland waters, author lists, for comparative purpose, in a table the approximate mean temperatures derived from an inspection of the isothermic charts published at the end of the Report of the Newfoundland Fishery Research Laboratory, and in another table the ranges of salinity, determined by inspection of the hydrographic charts. In a chapter he discusses the features of the chief courses taken by the drift bottles liberated during 1934, as well as during previous years (1931-33).

**Thompson Th. G. & Wilson Th. L.** - The Occurrence and Determination of Manganese in Sea Water [*De manganese in aqua marina. Agitur etiam de eius determinatione*]. 3 tabl., Journ. Amer. Chem. Soc., LVII, 233, 233-236. Easton, Pa. (1935). **a - 1305**

Method for the quantitative determination; variations in the manganese content of sea water; importance for plancton growth; samples from bottom muds.

**Urry W. D.** - Helium-Neon Content of Ocean Waters [*De helio-neon quod continetur in aquis oceanicis*]. Amer. Chem. Journ. 57, 657-659. Easton & Baltimore (1935). **a - 1306**

The variation of the helium-neon content of ocean waters measured. Possibility of fixing a base line for the oxygen content on such data as well as tracing the history of the present oxygen or the water masses involved.

**Utterback C. L.** - Submarine Illumination [*De illuminatione submarina*]. 6 figs., 4 tables. Nat. Res. Counc. Amer. Geoph. Un. Trans. 16th Ann. Meet., Apr. 25-26, 1935, I, 250-256. Washington D. C. (1935). **a - 1307**

The data presented in this paper are those of a series of studies on the penetration of several spectral bands of visible solar radiation into the inshore and ocean-waters of the Pacific Northwest. At two stations a series of monthly observations were made during the year 1934 for the purpose of determining any seasonal changes in the transparency of the water throughout the year. Several hundreds of total vertical absorption-coefficients have been determined for the Pacific Northwest waters.

**Wattenberg H.** - Aufgaben der chemischen Meeresforschung [*Proposita ad investigationes chemicas aquae marinae pertinentia*]. Ztschr. f. d. ges. Naturwiss. VI. Berlin (1935). **a - 1308**

**Wattenberg H. & Timmermann** - Ueber die Sättigung des Seewassers an $CaCO_3$ und die anorganogene Bildung von Kalksedimenten [*Quaestio de saturatione in aqua marina $CaCO_3$ deque formatione anorganogena sedimentorum calcii*]. 1 Tab,. 6 Abb., Ann. d. Hydrogr. LXIV, 1, 23-31. Berlin (1936). **a - 1309**

Es soll untersucht werden, ob sich im Meere durch rein chemische Ausfällung Ablagerungen von $CaCO_3$ bilden. Dies müsste der Fall sein, wenn kalkübersättigtes Seewasser mit festem $CaCO_3$ in Berührung kommt. Es wird daher durch Löslichkeitsbestimmungen von $CaCO_3$ in Seewasser der Sättigungszustand in der Natur als Funktion von Salzgehalt, Temperatur und $CO_2$ – Druck bzw. pH neu festgelegt. Auf Grund dieser Daten wird die Möglichkeit der anorganogenen Bildung von Kalksedimenten und der Kreislauf des Kalziumkarbonats im Weltmeer diskutiert. (Vf. Zus.).

**Wiese W. J.** - Ein Beitrag zur Hydrologie des Karischen Meeres [*Contributio in hydrologiam Maris* Kara]. (In Russ. Dtsch. Rés.). 1 Tab. Expl. Mers URSS, 14, 19-26. Inst. Hydrol., Léningrad (1931). **a - 1310**

Ergebnisse der in 1920 während der Rettungs-expedition des Eisbrechers « Swjatogor » (heute « Krassin ») ausgeführten hydrologischen Beobachtungen. Die Beobachtungen auf den vier Tiefseestationen sind vom besonderen Interesse, da sie sich auf eine Jahreszeit beziehen, wo das Karische Meer schwer zugänglich ist (Monat Juni). Ausserdem betreffen sie das Jahr 1920, welches den Anfang einer bis heute fortdauernden Periode von erhöhtem Temperaturzustande des Barentsmeeres bezeichnet.

**Wiese W. J.** - Temperatur und Salzgehalt des Oberflächenwassers [*De temperatura et quantitate salina in aqua ad superficiem*]. (Russ. Text, Dtsch. Rés.). 1 Abb. Trans. Arct. Inst., XXIX, 7-24. Leningrad (1935). **a - 1311**

Diese Beobachtungen sind während der Fahrt des « Lütke » von der Bering-Strasse bis Murmansk ausgeführt worden und sind hier in Tabellen mit Angabe von Monat, Anzahl, Stunde, Breite und Länge, Temperatur und Salzgehalt mit Bemerkungen über Eisverhältnisse wiedergegeben. Vergleich mit den Ergebnissen anderer Expeditionen.

**Wiese W. J.** - Tiefseestationen [*Observationes aquarum peraltarum*]. (In Russ. Dtsch. Rés.). 11 Fig., 2 Tab. Trans. Arct. Inst., XXIX, Scient. Res. Exped. Icebr. « Lütke », 1934, 25-39. Leningrad (1935). **a - 1312**

Bericht über die Tiefseestationen, welche während der Nordostdurchfahrt des Eisbrechers « Lütke » ausgeführt worden sind, und zwar 7 - im Tschuktschen-Meer, 3 - im Gebiet zwischen der Mündung des Flusses Kolyma und den Bären-Inseln, 11 - im Ostsibirischen Meere, zwischen den Bären-Inseln und den Neusibirischen Inslen. Es sind Isothermen und Isohalinen gezogen worden, und es wird ausserdem über den Sauerstoffgehalt im Ostsibirischen Meere berichtet.

**Wirth H. E., Thompson Th. G. & Utterback C. L.** - Distribution of Isotopic Water in the Sea [*De distributione marina aquae isotopicae*]. 3 figs., 3 tabl. Journ. Amer. Chem. Soc., LVII, 400, 400-404. Easton, Pa (1935). **a - 1313**

Apparatus and methods. Differences in density between water distilled from tap water and 21 samples water from different seas. Vertical distribution of isotopic water. Comparison of sea-samples.

**Wüst G.** - Fortschreitende Salzgehaltsabnahme im Suezkanal [*De continua deminutione salina in canali* Suez]. 2 Tab., 3 Abb., Ann. d. Hydrogr., LXIII, 10, 391-395. Berlin (1935). **a - 1314**

Die hier durch wiederholte Untersuchungen bestätigte fortschreitende Salzgehaltsabnahme ist offenbar eine Folge der fortschreitenden Auflösung der am Grunde des Grossen Bittersees befindlichen Salzlager. Praktische Folgen dieser Abnahme.

**Yasui Z.** - On the Lag of Deep-Sea Reversing Thermometers [*De retardatione thermometrorum reversibilium maris profunditatum causa*]. 1 fig., 4 tables. Mem. Imp. Mar. Observ., VI, 1, 33-41. Kobe (1935). **a - 1315**

Author carried out experimental observations on the lag of reversing thermometers in a metal tank filled with water, with 10 reversing thermometers Richter-Wiese and Negretti-Zambra. He found that the decaying modulus is nearly 1.53 and that the sufficient time interval from immersing the thermometers in the water is 6 minutes, considering every possible condition which might occur in oceanographic observations throughout the four seasons.

Après avoir mis en relief le rôle important qu'ont assumé, parmi les divers rayons lumineux, les rayons ultraviolets dans différents travaux et recherches scientifiques et après avoir constaté que les opinions les plus contraires ont été émises quant à la pénétration de ces rayons dans le milieu marin, l'A. définit tout d'abord les rayons ultraviolets, avec référence spéciale à l'ultra-violet solaire et enfin étudie et illustre les résultats des différentes observations et des nombreux travaux sur la pénétration de l'ultraviolet solaire dans l'océan.

**Kamiya S.** - The visible Distance of Objects immersed in Sea-water. 1. [*Res immersae in aqua marina. Agitur de maxima et minima earum visibilitate*]. 5 figs. Bull. Jap. Soc. Scient. Fish. IV, 6, 365-373. Tokyo (1936). **a - 1330**

A. Law of similarity in Optical systems: Superficial light source. Voluminal light source. Surface with diffuse reflection or diffuse transmission. Point source. Diffusing medium. Light experienced several scattering in surfaces or in media. Surface with regular reflection or refraction. Fluorescent surface or medium. Application to the colour of sea-water. Application to the study of the visible distance of objects immersed in sea-water. B. Observations of visible distance in sea-water.

**Katzaurov L. I.** - Sur la question de la propagation de la lumière dans l'eau de mer [*De lucis propagatione in aquam marinam*]. (En russe). 8 fig., Ztschr. f. Techn. Phys. (Zhurn. Tekhn. Fisiki), V, 1, 169-173. Leningrad (1935). **a - 1331**

L'A. décrit un dispositif construit pour les mesures de la luminosité volumétrique de la lumière diffuse dans les eaux de la Mer Noire. Les mesures exécutées démontrent que la luminosité volumétrique de l'eau de mer augmente avec la profondité de pénétration. On n'a pas pu parvenir aux profondités de la luminosité volumétrique maximum, parce que les expériences ont été faites dans une zone où l'eau était particulièrement claire. On a pu toutefois observer clairement l'augmentation de la pente de la courbe représentant la luminosité volumétrique avec l'augmentation du coefficient de diffusion de l'eau de mer.

# MARIS DYNAMICA

## Circulatio oceanica - Currentiae.

**Alexeev N. N.** - Contribution aux matériaux sur les courants dans le détroit Jougorskij Char [*Contributio in studendas currentiarum materias in strictu* Jugorskij Schar]. (En russe). Sev. Morsk. Putj, II, 51-53. Leningrad (1935). **a - 1334**

**Arakawa H.** - On the General and Secondary Circulations of the Ocean [*De oceani circulatione generali et secundaria*]. 6 figs. Mem. Imp. Mar. Observ., VI, 1, 43-62. Kobe (1935). **a - 1335**

In former papers (S.: H. Arakawa: « On the General Circulation of the Atmosphere and its Seasonal Variations », Ch. VI, The Oceanic Circulation, Geophys. Mag., 8, p. 284, 1935; H. Arakawa & S. Ooma: « On the General Circulation of the Ocean », Geophys. Mag., p. 83, 1935) author had illustrated the main features of the general circulation caused by the distribution of density *in situ* of sea water on the globe; he confined himself to the circulation that would exist if the earth were covered with water everywhere to a uniform depth. In the present paper he considers the modifications of this theoretical scheme and sees in what ways it is changed by the distribution of land and ocean. He discusses therefore the general circulation of the ocean caused by the distribution of the density of sea water and the secondary circulation of the ocean produced by winds.

**Arakawa H. & Ooma S.** - On the General Circulations of the Ocean [*De oceani circulatione generali*]. Geophys. Mag., IX, 1, 83-104. Tokyo (1935). **a - 1336**

Die Wasserbewegungen im Barents-Meer in ihrer Bedingtheit durch die Dichteverteilung: 1. Theoretische Grundlagen für die Berechnung der Geschwindigkeit des Wassers. 2. Die Geschwindigkeitsverteilung in meridionalen Schnitten auf 19°, 26°, 30°, 33 ½° und 38° östlicher Länge. 3. Die Darstellung der Wasserbewegung im westlichen Barents- Meer in Horizontalschnitten. - Spezielle Untersuchungen: Der Einfluss der oberflächennahen 50 Meter mächtigen Schicht auf die Gesamtbewegung. Die Zustände an der polaren Grenzfläche. Die Beobachtungen an den Dauerstationen.

**Mueller F. W.** - Salzgehalts- und Strömungsverhältnisse des Greifswalder Boddens [*De currentiis et salinitate in* Greifswalder Bodden]. 27 Fig., 14 Tab., 1 Karte a. T. Mitt. Naturwiss. Ver. Neuvorpommern & Rügen in Greifswald, LXI, 3-119. Greifswald (1934). **a - 1347**

Aufgabe vorliegender Arbeit ist eine Untersuchung der Strömungs- und Salzgehaltsverhältnisse des Greifswalder Boddens, der ein 514 km² grosses Teilbecken der mittleren deutschen Ostsee mit einer durschnittlichen Tiefe von 5.60 m. und einem Volumen von 2878. 106 m² ist. Nach einer kurzen Beschreibung des Untersuchungsgebietes und einer raschen Zusammenfassung der bisherigen Arbeiten über die hydrographischen Verhältnisse des Boddens, bespricht Vf. das Ergebnis der von ihm unternommenen Bearbeitung der hydrographischen Verhältnisse des Boddens. Die täglichen Salzgehalts- und Temperatur-Beobachtungen, Salzgehaltsschwankungen. Untersuchungen der Stromverhältnisse; Einfluss der Strömungen auf die Gestaltung des Bodenreliefs.

**Ogura S.** - The Analysis of the Result of Current Observations Made at Two Stations in the Northern Part of the Tung Hai [*De resultatibus ex observationibus currentiarum peractis in duabus stationibus in* Tung Hai *septentrionali*]. (In Jap.). 3 pls. Suiro Yôhô (Hydrogr. Bull). XIII, 431-440, 471-484. Tokyo (1934). **a - 1348**

Results of the observations of tidal currents made at two stations about 20 miles apart from each other, lying between Chusan Archipelago and Saisyû Tô in the northern part of the Tung Hai (East China Sea). The observations have been repeated for 24 hours at intervals of about one hour at various depths below the surface of the sea. The harmonic constants of the currents, previously decomposed into the north and east components, are given and the internal friction of sea-water about the time of maximum velocity to the north and to the east has also been calculated.

Counc., Amer. Geoph. Un., Trans. 16th Ann. Meet., Apr. 25-26, 1935. I, 246-250. Washington D. C. (1935). **a - 1349**

The present is an abbreviated report on hydrographic observations in the Gulf of Mexico, of which a full account is published in « Bulletin of the Bingham Oceanographic Collection », vol. V, article 1.

**Ratmanov G. E.** - Sur les courants dans la région du camp de l'équipage du « Tchéljouskine » dans la Mer de Tchoukhotsk [*De currentiis in regione in qua nautae navis* « Tcheljuskin » *castra posuerunt*]. (En russe, rés. angl.). Sev. Morsk. Poutj (Rec. Art. Hydrogr. & Navig.), I, 13-18. Leningrad (1934). **a - 1350**

**Rossby C. G.** - Dynamics of Drift Currents [*Dynamica currentiarum declinantium*]. Woods Hole Oceanogr. Inst., App., Rep. 1934, 28–29. Woods Hole, Mass (1935). **a - 1351**

Author has elaborated a theory for the velocity distribution in pure wind currents in the open ocean, which leads to reasonable values for the ratio between the surface current and the surface wind. Starting from these theoretical investigations, it seems possible to offer an adequate explanation for the great difference between the values of the ice drift obtained by Sverdrup on the North Siberian shelf and by Brennecke in the Antarctic deep water.

**Rossby C. G. & Montgomery R. B.** - The Layer of Frictional Influence in Wind and Ocean Currents [*De influentia quoad venti fricationem cum currentiis oceanicis*]. Pap. in Phys. Oceanogr. and Meteorol. III, 3. Cambridge, Mass. (1935). **a - 1352**

**Tchirikhine J.** - Sur la découverte en Norvège d'une autre bouteille mise à l'eau dans la Mer des Frères Laptev en 1927 [*De inventa buticula in Norvegia jam in mare* Laptev *iacta, A. 1927*]. (En russe). Sev. Morsk. Putj (Rec. Art. Hydrogr. & Navig.), I, 109. Leningrad (1934). **a - 1353**

**Thomsen H.** - Entstehung und Verbreitung einiger charakteristischen Wassermassen in dem Indischen und Südlichen Pazifischen Ozean [*De origine et distributione aliquarum aquae massarum in Oceano Indiano et Oceano Pacifico Meridionali*]. 1 Abb., 1 Taf. a. T. 1 Tab. Ann. d. Hydrogr., LXIII, 8, 293-305. Berlin (1935). **a - 1354**

Die Bildung von charakteristischen Wassermassen, auf welche die Gleichartigkeit der T- und S- Kurven beruht, muss immer auf die von der Oberfläche stammenden Komponente zurückgeführt werden. Beschreibung der für den Indischen und den Pazifischen Ossan charakteristischen Wassermassen: Bodenwasser, Antarktisches Zwischenwasser, südl. subtropisches Wasser, Äquatorialwasser (gemeinsam für beide Ozeane); Rotes Meer-wasser, nördl. subtropisches Wasser und Golfwasser (für den Indischen Ozean).

**Thorade H.** - Beständigkeit und Streuung bei Strömen [*De currentiarum calculis. Perfectio et oscillatio valorum*]. 2 Taf., 4 Abb. Ann. d. Hydrogr. LXIV, I, 13-23. Berlin (1936). **a - 1355**

An einem Beispiel wird gezeigt, dass der Wert einer einzelnen Strommessung äusserst gering war. Nur durch Häufung von Beobachtungen liessen sich die zahlreichen Schwankungen ausschalten. Zur Bewertung der Beobachtungen reichte der Begriff der Beständigkeit nicht aus. Verteilen sich die Beobachtungen gemäss dem Fehlergesetze, so wird zur Kennzeichnung der Streuung der « Streukreis » vorgeschlagen, in den etwa 2/3 aller Beobachtungen hineinfallen. Ausschaltung der Fehler bei Berechnung von Geschwindigkeit und Richtungswinkel. (Aus. Vf.: s Zus).

**Thorade H.** - Strombeobachtungen am Nordausgange des Kattegats [*De observatis currentiis in accessu septentrionali* Kattegat]. 4 Taf., 15 Abb. Ann. d. Hydrogr. XLIV, 6, 243-253. Berlin 1936). **a - 1356**

Am 19. August 1931 beobachtete « Poseidon » am Nordausgange des Kattegats an vier Punkten den Strom in je zwei Reihen mit Tiefenabständen von zwei Metern. Es wird gezeigt, dass die durch die Kürze der Beobachtungszeit entstehende Ungewissheit sich ausgleichen lässt, da sich mehrere Tiefen zu einem Mittelwerte zusammenfassen lassen. Die beobachteten Ströme sind durchaus uneinheitlich und lassen ein starkes Ueberwiegen von Mischbewegungen über das Zirkulationsschema erkennen, das vermutlich durch einen grossen Wirbel auf einen schmalen Streifen vor der schwedischen Küste eingeengt wird (Vf.).

Frühere Vorstellungen von der Transportfähigkeit der See- und Flussströme; gegenwärtige Messungen der Seesandströme in der Nordsee zwischen Holland und England, ihre Entstehung, kritische Schnelligkeit und Sandansammlung.

**Watson E. E.** - Physical Oceanography of the Bay of Fundy and Gulf of Maine [*De oceanographia physica in baja* Fundy *et Sinu* Maine]. Woods Hole Oceanogr. Instit., App., Rep. 1934, 38. Woods Hole, Mass. (1935). **a - 1361**

Account of the data obtained in the Bay of Fundy for the International Passamaquoddy Fisheries Commission, with special regard to the behaviour of bodies of homogeneous water such as occur in parts of the region under consideration, and of the rôle of the supply of fresh water for the existence of such bodies.

**Wattenberg H.** - Kalkauflösung und Wasserbewegung am Meeresboden [*Decompositio calcica atque motus aquae in fundo marino*]. 1 Tab. Ann. d. Hydrogr. LXIII, 10, 387-391. Berlin (1935). **a - 1362**

An Hand eines Beispieles wird versucht, die Abgabe des aus dem Sediment gelösten Kalzium-karbonats zur Berechnung des Massenaustausches über dem Boden zu verwenden, um damit zur Geschwindigkeit des Bodenstromes zu gelangen. Reservierende Schlussbemerkungen vom Vf.

**Wellman F.** - Oestliche Stromversetzung an der südostafrikanischen Küste im Juli [*De mutatione in regione orientali currentiae quae fluit ad litora Africae meridionalis, mense Julio*]. 3 Abb., Seewart V, 2, 72-73. Hamburg (1935). **a - 1363**

Bericht über eine am 18. Juli 1935 vom D. Baden bei einer Ansteuerung von Durban beobachtete, in dieser Gegend ganz ungewöhnliche, Stromversetzung. Folgt eine Anmerkung der Schriftleitung mit drei die Stromvorgänge veranschaulichenden Karten.

**Wendler O. H.** - Die Oberflächenbewegungen des Guineastromes [*De Guineae currentia eiusque motu superficiali*]. Gerl. Beitr. Geophys, XLIV, 176-198. Lepzig (1935). **a - 1364**

**Wiese W. J.** - Drift of Buoy from Kara Sea to Lofoten Islands [*De signis fluctuantibus quae declinant a mari* Kara *ad Insulas* Lofoten]. (In Russ. & Engl.). Bull. Arct. Inst., V, 7, 204-205, 229-230. Leningrad (1935). **a - 1365**

Some comments and conclusions concerning the buoy n. 5 (cast on August 1st, 1934 by the cargo icebreaker « Sedov » in latitude 79°16′ N and longitude 80°40′ E, east of Wiese Island) and found - three miles west of Andenes Lighthouse (Lofoten Islands), off the north-western coast of Norway, ten months later, i. e. on June Ist 1935. This drift indicates that a veritable « eruption » of ice had taken place in the Polar Basin through the gate between Greenland and Spitsbergen. Short information of the finding of two other buoys off the north-west shores of Norway.

**Wiese W.** - The Drift of Buoys from the Kara Sea to the Coasts of Norway [*De signis fluctuantibus quae declinant a Mari* Kara *ad Norvegiam*]. (In Russ. & Engl). 1 table. Bull. Arct. Inst., V, 9, 290 & 309-310. Leningrad (1935). **a - 1366**

Brief account of buoys discovered on the north-western coast of Norway; the buoys have been cast adrift in 1934 by the expedition of the « Sedov ».

**Wiese W.** - Drift of Buoys from the Laptev Sea to the Coasts of Groenland [*De signis fluctuantibus quae declinant a Mari* Laptew *ad litora Groenlandica*]. (In Russ. & Engl.). Bull. Arct. Inst., V, 10, 340-341, 367-368. Leningrad (1935). **a - 1367**

Drift of a buoy cast adrift by the Expedition on the « Sibirjakov » in the Laptev Sea on August 24th, 1932, 74°53′ N. and 122°20′E., and picked up on August 27th, 1935 in the sea 3 kilometres to the West of the village Lichtefels (south-west Greenland). This drift confirms the fact of a vigorous process of the clearing of the ice from the parts of Arctic bordering on the Atlantic during the last two years.

**Wrage W.** - Beobachtungen an Strombänken. Dritter Beitrag zur Kenntnis der Morphologie des Niederelbewatts [*De observatis vadis fluviatilibus. Contributio tertia in cognoscendam morphologiam accessuum* Elbe *inferioris*]. 1 Taf. Ann. d. Hydrogr., LXIV, 4, 168-173. Berlin (1936). **a - 1368**

Besprechung einer besonderen Form von Strombänken, die sich an einer im Niederelbelauf befindlichen schlickigen, zum Teil künstlich durch Baggersand aufgespülten, Insel befinden. Es sind sehr niedrige Sandbankbildungen, die erst bei Niedrigwasser auftauchen. Durch die Beobachtungen dieser Bänke versucht Vf. Strombau und Landgewinnung, sowie auch die Frage der Wanderung zu klären.

Charts showing the result of regular observations of ships for the British Meteorological Office, 1910-1935, indicating the currents observed in November, December, and January in the Southern portion of the South Pacific (Western, Middle, and Eastern).

**Deutsche Seewarte** - Westliche Stromversetzungen im Golfstrom [*De variationibus currentiarum in parte occidentali eius currentiae cuius nomen* Golfstream]. Seewart, IV, 4, 182-183. Hamburg (1935). **a - 1372**

Auszug aus dem von der Schiffsleitung des Dampfers Raimund erstatteten Bericht über die vom 17. bis 20. Juli beobachtete Stromversetzung, die eben das Gegenteil der gewöhnlichen Stromrichtung aufweist. Erläuternde Bemerkung der Schriftleitung.

**Deutsche Seewarte** - Stromversetzung bei Kap Guardafui im September [*De variationibus currentiarum ad promunturium* Guardafui *mense Septembri*]. Seewart IV, 4, 185-186. Hamburg (1935). **a - 1373**

Beobachtung einer Besteckversetzung im September 1933, welche für diesen Monat ungewöhnlich gross ist. Ursache.

**Deutsche Seewarte** - Treibkörpertriften [*De corporibus fluctuantibus eorumque velocitate*]. Seewart, IV, 6, 264-266. Hamburg (1935). **a - 1374**

Bericht über die in den Indischen und Nordatlantischen Ozeanen ausgesetzten und wieder gefundenen Flaschenposten. Erörterung ihrer Triften.

**Japanese Hydrographic Department** - Reports on Picked-up Current Bottles [*Relatio de collectis buticulis fluctuantibus*]. (In Jap.). Suiro Yôhô, (Hydrogr. Bull.). Vol. XIII. Tokyo (1934). (—) Id. Id. Suiro Yôhô, XIV. Tokyo (1935). **a - 1375**

The Hydrographic Department is throwing adrift several thousands of current bottles every year in the adjacent seas of Japan and at various places in the Pacific Ocean for the purpose of studying ocean currents. 297 bottles picked-up in the recent time are tabulated in the report, by the following data: Date and place of throwing overboard. Name of ship thrown from. Date and place where picked up. Name of finder. (S. Ogura).

**Japanese Hydrographic Department** - On the Currents in the Vicinity of Mikomoto Sima in Summer [*De currentiis apud* Mikotomo Sima *aestate*]. (In Jap.). 7 pls. Suiro Yôhô (Hydrogr. Bull.), XIII, 391-398. Tokyo (1934). **a - 1376**

The currents in the vicinity of Mikomoto Sima, off the Idu peninsula on the South coast of Honsyû, were observed during 11 days, excluding night time, from July 11th to July 28th, 1928. Three fishing boats were used to follow the current floats which were made so as to give the current 2.5 meters below the surface. The observations have been made in the sea areas, SE–SW–and NE– ward from the island, within a radius of 10 sea miles therefrom. In the present paper the results of these observations are summarized and the mean state of currents during day-time is derived.

**U. S. Department of Commerce** - Tide and Currents Surveys Methods, Instruments and Purposes [*Rationes instrumenta et proposita ad relevamenta ducenda currentiarum et aestuum*]. U. S. Govmt. Print. Off., Ser. n. 280, 1-16. Washington D. C. (1934). **a - 1377**

Tidal work of the Coast and Geodetic Survey which had its origin in the necessity of reducing to a common level or datum plane soundings taken at different stages of the tide during hydrographic surveys. Bench marks. Tide tables and tidal prediction of the Service. Types of tide and tidal theory. In the part dealing with the survey of currents the importance of them for navigation is emphasized and the various types of currents are dealt with. In the last additional part of the booklet other activities of the Coast and Geodetic Survey are briefly described.

**E. Rr.** - Bewegung von Flaschenposten in der Ostsee [*Buticularum amotiones mari Baltico*]. 1 Karte. Seewart V, 3/4, 104-108. Hamburg (1936). **a - 1378**

**Baulig H.** - The Changing Sea Level [*Variatio maris livelli*]. 11 figs., xii + 46 pp. Inst. Brit. Geographers, Publ. 3. George Philip & Son, Ltd. London (1935). **a - 1386**

Four lectures given at the University of London in November 1933 chiefly concerning French and English researches: 1. Critical review of early investigations. 2. New method of research (see Baulig's book: Le plateau Central de la France, 1928). 3. Changes of sea level. 4. Methods used in the investigations. See Rev. by D. Johnson in: Geogr. Rev. XXVI, 2, 299-301. New York (1936).

**Berezkin V.** - Ueber cotidale Karten des Barentsmeeres [*De tabulis cotidalibus maris* Barents]. (In Russ., Dtsch. Rés.). 2 Fig. Expl. Mers URSS, Inst. Hydrol., 14, 5-18. Leningrad (1931). **a - 1387**

Die Bedeutung der cotidalen Karten für die Untersuchungen von Ebbe und Flut. Besprechung einiger von verschiedenen Gelehrten zusammengestellten cotidalen Karten des Barentsmeeres sowie einer vom Vf. im Jahre 1930 über dasselbe Gebiet ausgearbeitete Cotidalkarte, welche auf die Prinzipien Schuleikins und Huygens' ruht und gute Ergebnisse aufgewiesen hat. Bedarf einer Karte der Isoamplituden für das Studium der Flutwelle.

**Billmyer J. H. S.** - An Empirical Method of Tidal Prediction [*Methodus empirica ad aestuus providendos*]. U. S. Nav. Inst. Proc., LXI, 393, 1609-1611. Annapolis, Md. (1935). **a - 1388**

The Author demonstrates how it is possible to construct a chart of tides in a port extrapolating the data of observations during several months.

**Chapman S.** - The Lunar Atmospheric Tide in the Azores, 1894-1932 [*De aestu atmosphaerico lunari in insulis* Azores *1894-1932*]. 7 tables. Quart. Journ. R. Meteorol. Soc., LXII, 263, 41-45. London (1936). **a - 1389**

This paper continues a series dealing with the lunar atmospheric tide in which determinations have been previously given for 19 stations. It determines the lunar atmospheric tide at two stations in the Azores, namely, Ponta Delgada (38° N., 26°W.) and Santa Cruz (39° N., 31° W.), from 39 and 26 years bi-hourly data (all days) for barometric pressure. The probable errors of the obtained mean results are 1.6 and 2.2 microbars. The harmonic coefficients for the first four components of the solar diurnal variation are also given.

**Everdingen (van) E.** - Raz de marée aux Pays-Bas et leur prévision [*De marismotibus in Hollandia eorumque provisione*]. 4 fig. Un. Géod. & Géoph. Int., Ann. Comm. Etude Raz de Marée, 4, 116-129. Paris (1934). **a - 1390**

L'A. communique l'institution en Hollande en 1916 d'une Commission de l'Etat pour rechercher les causes des crues extraordinaires qui se produisent dans les Pays-Bas et leur rapport éventuel avec les travaux exécutés dans l'intérêt de la navigation sur la rivière entre Rotterdam et la Mer du Nord (Nieuwe Waterweg). Au cours de ses

recherches, la Commission avait réuni un grand nombre de données sur les augmentations du niveau, causées par le vent, dont un extrait compose le présent ouvrage, avec référence spéciale à (I) l'augmentation du niveau de la mer, sur la côte ouest de la Hollande, causée par des vents de diverses directions, au (II) calcul de l'influence du vent dans un complexe de canaux de profondeur variable et à (III) la prévision des raz de marée causés par des tempêtes.

**Ferraton J. L.** - Note sur un envahissement du litoral à Mazagan (Maroc) le 18 mars 1934 [*De alluvione in* Magazan (*Mauretania*) *die 18 Martii, 1934*]. 1 fig., 1 pl. Un. Géod. & Géoph. Int., Ann. Comm. Etude Raz de Marée, 4, 90-93. Paris (1934). **a - 1391**

Brève description des caractéristiques du Port de Mazagan, dont la rade se distingue par une chaussée sous-marine de 2,5 milles de longueur environ, dite « épi de Mazagan » qui l'abrite mal vers le Nord-Ouest. Illustration d'un envahissement de la côte qui semble avoir été dû à plusieurs rouleaux de houle d'une amplitude exceptionnelle et dont les effets se sont composés, étant donné que l'envahissement a été favorisé par le fait que la mer était haute, le coefficient de la marée élevé et la côte très basse.

**Fontsere E.** - Les seixes de la costa catalana [*Sessae in litoribus Catalanis*]. Diagr. Serv. Meteorol. Catalunga, Notes Estudi, 58, 1-12. Barcelona (1934).

( — ) Les seiches de la côte catalane. Un. Géod. & Géophys. Int., Ann. Comm. Etude Raz de Marée, 4, 54-60. Paris (1934). **a - 1392**

Description des variations soudaines du niveau de la mer sur la côte catalane mentionnées dans les mémoires de la Commission des Raz de Marée au Port de Barcelone et dans la presse locale. L'A. ne s'occupe dans la présente note que des variations de niveau à période relativement courte, de ½ à 2 heures. Dans les deux graphiques qui illustrent la note, sont reportées les oscillations de la pression atmosphérique et la tendance périodique de l'allure du vent coïncidant avec les seiches dans le Port de Barcelone.

**Frolow V.** - Sur le mouvement du niveau moyen de la mer à Brest et à Marseille [*De motibus maris livelli medii*, Brest *et Massiliae*]. C. R. Acad. Sc., CCII, 11, 908-910. Paris (1936). **a - 1393**

Après un bref aperçu sur les deux séries des variations du niveau moyen de la mer à Brest et à Marseille, l'A. déduit que ces deux séries doivent être étudiées séparément: il indique qu'une partie des mouvements du niveau moyen de la mer, tant à Brest qu'à Marseille, est due toutefois à une suite de variations périodiques élémentaires, mais il signale quelques particularités de ces mouvements, pour lesquelles l'hypothèse d'une influence de l'écoulement fluvial, agissant sur la tenue du niveau moyen en plus de la pression atmosphérique et de la température, peut fournir une explication.

**Gomojunov K. G.** - Emploi de marégraphes construits avec les moyens locaux dans l'Arctique [*De mareographis qui constructi fuerunt in regione Arctica expeditione quadam perdurante*]. (En russe). 2 fig. Bull. Arct. Inst., V, 12, 429-431. Leningrad (1935). **a - 1394**

Bref compte rendu sur l'emploi, le fonctionnement et les résultats obtenus à l'aide de deux marégraphes construits avec des matériaux locaux et avec application de deux mécanismes d'horlogerie de deux bathographes non complètement en ordre. A l'aide de ces deux dispositifs on a pu obtenir au cours de la Deuxième Année Polaire Internationale des indications suffisamment exactes sur les oscillations du niveau des marées dans la baie Rousskaja Gavanj et au Cap Schmidt.

History. Notation and formulae. Expressions for the elevation. Observational data and solution. Exhibition and discussion of results.

**Heck N. H.** - Report of Special Committee on Cooperation with International Commission for the Study of Tidal Waves [*Relatio redacta a Comitatu speciali de operibus, consociatis rationibus peractis cum Commissione internationali undis aestuum studendis*]. Nat. Res. Counc., Amer. Geoph. Un., Trans. 16th Ann. Meet., Apr. 25-26, 1935, I, 18. Washington D. C. (1935). **a - 1396**

Information on the composition and the organization of the work of the Committee; it has the permanent function to collect all available information regarding unusual invasions of the shore by the sea; it collaborates with the International Commission for the Study of Tidal Waves.

**Hidaka K.** - Seiches Due to a Submarine Bank (Bank Seiches). [*Sessae quae formatae sunt a vado submarino*]. (In Engl., Jap. Summ.). 1 fig., 1 table. Mem. Imp. Mar. Obs., VI, 1, 1-8. Kobe (1935). **a - 1397**

The present paper deals with the problem if the existence of a coast is absolutely essential for seiches, and shows that seiches or stationary oscillations can take place in complete absence of the coasts when we suppose a sub marine bank.

**Hidaka K.** - A Theory of Shelf Seiches [*Sessae quae formatae sunt a vado*]. (In Engl., Jap. Summ.). 1 fig., 1 table. Mem. Imp. Mar. Observ., VI, 1, 9-12. Kobe (1935). **a - 1398**

This paper is the continuation of the previous paper (« Seiches due to a Submarine Bank », « Mem. Imp. Mar. Observ. Kobe », VI, 1, 1-8, 1935), on hand of which a theory of the very interesting case of shelf seiches is given, i. e. considering the case of a straight coast with a vertical wall.

**Köppen W.** - Schwankungen des Kaspischen Meeres [*De Maris Caspici livelli variationibus*]. 1 Tab., 1 graph. Fig. Ann. d. Hydrogr., XLIV, 2, 47-49. Berlin (1936). **a - 1399**

Referat mit Bemerkungen einiger von russischen Forschern über den Wasserstand im Kaspischen Meere veröffentlichten Arbeiten, deren Ergebnisse mit denen von E. Brückner in « Klimaschwankungen seit 1700 » teilweise übereinstimmen.

**Lange** - Einheitliche Nullpunktshöhe der Pegel im deutschen Tidegebiet [*De unificatione originis mensurae livelli marini*]. Ann. d. Hydrogr., LXIV, 1, 31-34. Berlin (1936). **a - 1400**

Anlässlich der vom Reichs – und Preussischen Verkehrsminister und dem Reichs – und Preussischen Minister für Ernährung und Landwirtschaft vom 5. April 1935 getroffenen Anordnung, die Nullpunkte der staatlichen Pegel einheitlich auf N. N. – 5000 m im neuen System der Landesaufnahme festzustellen, wird hier ein kurzer Ueberblick über die Gründe dieser Umlegung gegeben.

**Legrand J.** - Analyse des oscillations du niveau marin moyen annuel à Brest [*De oscillationibus livelli medii marini*, Brest]. 1 fig., 2 tables. C. R. Acad. Sc., CCII, 11, 911-913. Paris (1936). **a - 1401**

Après avoir rappelé que Ch. Lallemand et E. Prévot (C. R., CLXXXVIII, p. 1345, 1929) ont représenté les oscillations du niveau moyen annuel à Brest de 1851 à 1925 à l'aide de sept ondes composantes seulement, d'origine

astronomique, dont la plus importante est l'onde de 18 ans 2/3, l'A. dans la présente Note communique les résultats de l'analyse harmonique sur une série de 63 années dont 18 2/3 n'est pas une partie aliquote. Il déduit de ses calculs que les composantes sinusoïdales du graphique des niveaux marins moyens annuels à Brest ne sont pas les mêmes à toute époque, entre 1861 et 1935.

**Marmer H. A.** - The Variety in Tides [*Varietas aestuum*]. 7 figs. From the Smithsonian Report for 1934, 181-191. Publication No. 3313. Smithson. Instit. Washington (1935). **a - 1402**

Contribución al conocimiento del problema de las ondas de marea internas y exposición de los términos en que la cuestión está planteada. La revisión de la más interesante y reciente bibliografia permite al autor de señalar qué hechos parecen definitivamente establecidos y cuàles permanecen obscuros y sin explicación satisfactoria.

**Maximov I. V.** - Materials for the Study of the Tides of the Arctic Seas of the USSR. Part II [*Res collectae ad aestus studendos in maribus arcticis ad URRS pertinentibus. Pars II*]. (In Russ. Dtsch. Rés.). 51 figs., 25 tables. Trans. Arct. Inst., LII, Hydrology, 5-80. Leningrad (1936). **a - 1404**

Ergebnisse der Bearbeitung der Gezeitenbeobachtungen mit Hilfe der harmonischen Analyse für 14 Punkte der Soviet-Arktik. Die Resultate der Bearbeitungen der Tidebeobachtungen sind in einer Tabelle a. T. zusammengefasst. Im Vorwort von Prof. W. J. Wiese wird es darauf hingewiesen, dass in den arktischen Meeren, wegen zeitweiliger Bedeckung der Wasserfläche mit Eis, die harmonischen Konstanten jahreszeitlichen Schwankungen unterworfen sind.

**Ogura S.** - Further Notes on the Tides in the Liautung Gulf [*De aestibus in* Liautung Gulf. *Nota sequens*]. (In Jap.). 11 pls. Suiro Yôhô (Hydrogr. Bull.), XIII, 91-98, 133-144, 179-187. Tokyo (1934). **a - 1405**

In this paper new data of observations during 1932 and 1933 completing those of 1932, on the Liautung-Gulf are analysed, and the results compared. The theory assumes that the tide in the Gulf is composed of a longitudinal oscillation of sea-water caused by the tide at the mouth of the Gulf and a transversal oscillation provoked by the action of earth's rotation on the longitudinal motion of sea-water. The results obtained from observations of tides and currents are in good accordance with the theory.

**Ogura S.** - Current-Diagrams Along the Coast of Tyôsen [*De diagrammatis currentiarum ad litora regionis* Tyôsen]. (In Jap.). 4 pls. Suiro Yôhô (Hydrogr. Bull.), XIII, 313-316. Tokyo (1934). **a - 1406**

4 diagrams of tidal currents along the principal routes of ships on the coasts of Tyôsen are prepared. Each diagram shows the tides (time of high and low water) and the currents (time of turn and velocity) along the route by taking the distance as ordinate and the time as abscissa. It will be possible to observe from the diagrams, that the time of high water retards from Husan Kô to Zinsen Kô nearly at a constant rate with respect to distance, but the time of turn of current suddenly changes in the western part of the south coast of Tyôsen (Author).

**Ogura S.** - The Tides and Abnormal Fluctuation of Sea-level at Tukizi (Tokyo). [*De aestibus anormali praeditis livelli marini variatione in* Tukizi (Tokyo)]. (In Jap.). Suiro Yôhô (Hydrogr. Bull.), XIV, 247-262. Tokyo (1935). **a - 1407**

**Okada M. & Miyosi K.** - Experimental Studies of the Water Movement in Coastal Regions of the Sea. II. Tidal Oscillations in Sagami Bay. (II). [*Studia ad experimentum quoad aquae motum in zonis litoreis. II. Aestus marini oscillationes in bajá* Sagami (*II*)]. 5 figs., 2 tables, 12 pls. Journ. Imp. Fish. Inst., XXX, 4, 253-263. Tokyo (1935). **a - 1408**

In a previous paper (s.: « Journ. Imp. Fish. Inst. », XXIX, 1, 15-98, 1933) the authors have reported the results of their study accomplished in order to examine to what extent and under what conditions, the modelled water movements in coastal waters will reproduce various features of the original, but the results obtained fell short chiefly because of a too small number of points where the tidal motion of water surface was observed. The experiment reported in the present paper was carried out in improved conditions with respect to the wave generating arrangements; the reproduced tides and tidal currents have some features more or less in common with the original semi-diurnal tides of the Sagami Bay. Although the results obtained are not fully satisfactory they show the mode of propagation of tidal waves in the region under consideration.

**Pettersson O.** - The Internal Parallactic Tide in the Transitional Area [*De aestu interiore parallactico in area quae dicitur transitionis*]. 5 graph. fig., 2 tabl. Rapp. Pr.-Verb. Cons. Expl. Mer, XCIV, 3me partie, Appendices (1934-1935), 25-30. Copenhague (1935). **a - 1409**

On the basis of investigations dating principally from 1909-1911 (Sv. Hydrogr. Biol. Komm. Skr. V) the A. here draws the following conclusions: 1. That the interval between the two maxima as between the two minima is 13-14 days. 2. that the lowest niveau (the Ebb-period) of the internal parallactic tide in the Gullmarfjord is connected with the declination and occurs some days after the declination $\delta = 0$ of the moon when the force $\Sigma$ F is greatest. 3. and that the s. c. Moon-waves, discovered 1909-1911 in the Gullmarfjord, are caused by the internal parallactic tide in the boundary Surfaces of the Sea.

Renseignements empruntés aux rapports des fonctionnaires français, civils et militaires qui ont: soit subi un cyclone, soit été appelés à diriger des tournées de secours dans les régions sinistrées. Ils se rapportent à des envahis-

sements de la mer, ayant accompagné des cyclones. Les observations se rapportent aux Iles Tuamotu, à Papeete, à l'archipel des Iles Marquises et à celui des Iles Gambier: la période d'observation s'étend de 1878 à 1933.

**Sakuraba S.** - The Effect of Varying Depth on the Stability of Stationary Oscillations in a Lake or a Sea [*De effectu profunditatis variabilis in stabilitatem oscillationum fixarum in lacu vel in mari*]. Mem. Imp. Mar. Obs., VI, 1, 63-65. Kobe (1935). **a - 1414**

Author claims that « from the physical point of view it is reasonable to consider that the stable mode of wave motion breaks down and becomes unstable when the inclination of bed is relatively steep in comparison with the frequency of the wave and exceeds some critical value ». Such a condition is dealt with in the present problem i. e. a stationary oscillation in a bounded lake or sea of rectangular basin whose sides are given by $x = 0 \sim a$, $y = \pm b$, when depth $h$ of the basin varies according to the law $h = h_0 \left(1 - \frac{x}{a}\right)^2$.

**Thomas** - Madagascar. - Note sur les marées et courants côtiers produits par les cyclones tropicaux [Madagascar. *Notae de aestibus et currentiis litoreis a cyclonibus tropicalibus excitatis*]. 1 tabl., 3 graph. Un. Géod. & Géophys. Int., Ann. Comm. Etude Raz de Marée, 4, 67-89. Paris (1934). **a - 1422**

Remarques et observations relatives au fait de la production à l'avant des cyclones tropicaux d'une élévation sensible du niveau de la mer et, en outre, de courants parallèles à la côte. Dans ses conclusions l'A. affirme que le gonflement de la mer précédant à très grande distance le cyclone est un phénomène de peu d'importance au Madagascar, tandis que l'existence de très forts courants marins autour du centre du cyclone est indiscutable. Ces courants constituent la cause réelle des raz de marée et il faut tenir compte de leurs effets dans les travaux de construction et d'aménagement des ports de l'Ile de Madagascar.

**Tikhomirov I. K.** - L'état actuel de la question du régime hydrologique de la Mer Caspienne [*Quaestio de regimine hydrologico Maris Caspici*]. (En russe). Izv. Gos. Gheogr. Obstsch. (Bull. Soc. Géogr.), LXVII, 2, 217-228. Moskva-Leningrad (1935). **a - 1423**

L'A. donne un résumé des résultats des travaux faits au cours des dernières 50 années sur le régime hydrologique de la Mer Caspienne, tout en faisant observer que malgré l'abondance du matériel scientifique (v. liste bibliographique à la fin de l'article), le problème du bilan hydrologique de la Mer Caspienne est encore loin de sa solution. L'A. met surtout en évidence le manque d'exactitude des cartes existantes et des plans qui servent à la détermination du niveau de cette mer, et qui constituent la base fondamentale de toute étude du régime hydrographique d'un bassin aquatique.

**Gaye & Walther F.** - Der « Seebär » vom 19. August 1932 in der Deutschen Bucht der Nordsee [*De unda die 19 Augusti 1932 in regione nomine* Deutsche Bucht *Maris Nordici*]. 2 Tab., 1 Taf. Ann. d. Hydr., LXII, 8, 317-322. Berlin (1934). **a - 1440**

Berichte von Augenzeugen den Tageszeitungen entnommen und Betrachtungen über die Ursachen der am 19. August 1932 nachmittags an zahlreichen Küstenpunkten der Deutschen Bucht der Nordsee plötzlich aufgetretenen starken Wasseranschwellung, teilweise mit nachfolgenden Schwingungen. Nach der ganzen Art der Erscheinung handelt es sich um einen « Seebär ». In den vorliegenden Tabellen sind alle Stationen aufgeführt, für welche brauchbare graphische Aufzeichnungen über die Wasserstände, Windverhältnisse und den Luftruck an dem Tage vorliegen. In einer Abbildung sind für eine Anzahl besonders bemerkenswerter Stationen die Beobachtungen graphisch dargestellt.

**Habu K.** - Proper Oscillations of the Sea of Continental Shelf [*De propria oscillatione maris in platea continentali*]. 5 figs. Mem. Coll. Sc., Ser. A, 18, 247-253. Kyoto (1935). **a - 1441**

Author expresses the opinion that conspicuous oscillations indicated by mareograms on the straight coast of an open sea on occasions of marine earthquakes or cyclonic storms, are nothing but undulations of the sea of conti-

nental shelf. To confirm this view he has measured the dimension of the shelf seas on the charts of various parts of the Japanese coast and also of some foreign countries, and calculated the corresponding periods in order to show that the calculated periods fairly satisfactorily agree with the observed values.

**Havelock T. H.** - Ship Waves: The Relative Efficiency of Bow & Stern [*De unda navis de que relativa efficientia prorae et puppis*]. 3 figs. Proc. Roy. Soc., CXLIX, 868, 417-426. London (1935). **a - 1442**

The main effect of fluid friction in regard to the production of waves by a ship may be described as a decreasing efficiency of elements of the ship's surface with increasing distance from the bow. A reducing factor, of a semi-empirical nature, is introduced into the theory of ship waves to represent this effect. With certain assumptions, calculations are made for the wave profile for a simple model, and curves are also given; these are compared with available experimental data. It appears that, as a rough estimate for such forms at moderate speeds, the efficiency of the stern is of the order of 60 % of that of the bow. Curves are also drawn to show the corresponding change in the wave resistance. The introduction of the reducing factor leads to different wave resistances for a model going ahead and going astern, when the model is not symmetrical fore and aft; this is illustrated by calculations and curves for a particular case (A).

**Schumacher A.** - Ueber Stromkabbelungen, besonders im Guineastrom und seiner Umgebung [*Plicatio aquae currentiarum confluentiae causa. Agitur praecipue de currentia ad Guineam deque regionibus adiacentibus*]. 2 Taf., zahlr. Tab. a. T., 1 Tab. i T. Ann. d. Hydrogr., LVIII, 10, 273-382. Berlin (1935). **a - 1443**

Gebiete zahlreicher Beobachtungen nach vorhergehenden Literaturangaben, besonders den vom Meteorologischen Komitée London 1874 und 1876 herausgegebenen « Remarks to accompany Monthly Charts of Meteorological Data for Square 3 ». Verteilung der Kabbelungen nach Eingradfeldern. Natur der Erscheinung: Richtung und Fortbewegung, Stromlinien der Oberflächenbewegung und der Luftbewegung, Temperatur, Aussehen, begleitende Geräusche. Bedeutung der Kabbelungsbeobachtungen für die Entscheidung über den Charakter von Strömungen.

**Deutsche Seewarte** - Auffallende Beobachtungen von Meereswellen [*Observationes notabiles undarum marinarum*]. Seewart, IV, 6, 260-263. Hamburg (1935). **a - 1444**

Anführung verschiedener Beispiele von ungewöhnlich heftigen Brandungen; Erörterung ihrer Ursachen; empfehlenswerte Messungsverfahren.

**Deutsche Seewarte** - Brandende Dünung im Hafen von Callao [*De maris notanda undulatione in portu* Callao]. 1 Taf. Seewart, V, 3/4, 115-116. Hamburg (1936). **a - 1445**

Schilderung des an der Küste von Südperu auftretenden starken Schwells, der sogen. Braveza, der im Hafen von Callao eine besonders starke Heftigkeit aufweist. Anmerkung der Schriftleitung in Bezug auf die Ursache dieser Erscheinung.

**An.** - Die stürmische See wird durch Druckluft beruhigt [*Mare tempestosum placatur aëre compresso*]. 1 Taf. m. 4 Abb. Umschau, XL, 1, 12-13. Frankfurt a. M. (193 ). **a - 1446**

Kurze Notiz über eine deutsche Erfindung, die sich besonders für den Flugverkehr über das Meer eignet.

## Hydrodynamica theorica.

**Bonnet L., Blockmans J. & Lamoen J.** - Note sur le Laboratoire de Recherches Hydrauliques d'Anvers [*De laboratorio pro investigationibus hydraulicis Antuerpiae*]. 1 fig., 1 tabl., 1 pl. h. t. Ann. Trav. Publ., XXXVI, 3, 403-425. Bruxelles (1935). **a - 1447**

Description détaillée des recherches du Laboratoire des Recherches Hydrauliques d'Anvers en vue d'étudier les problèmes de l'Escaut maritime qui constituent un domaine très spécial. La description du Laboratoire est précédée par un aperçu général des lois de similitude hydrodynamique qui permettent de calculer les coefficients par lesquels il faut multiplier les quantités expérimentales pour obtenir celles de la nature. Pour conclure les AA. donnent un bref résumé des expériences actuellement en cours au Laboratoire d'Anvers et une description sommaire de l'appareil produisant la marée.

**Cisotti U.** - Sulla regolarizzazione idrodinamica degli estremi di una lamina rettilinea [*De regularisatione hydrodynamica in extremitatibus laminae cuiusdam rectilineae*]. Mem. Pont. Acad. Sc. Novi Lyncaei, ser. III, v. II, 51-78. Città del Vaticano (1936). **a - 1448**

L'A. tratta il problema della possibilità di regolarizzazione idrodinamica degli estremi di una lamina rettilinea investita da una corrente traslocircolatoria piana. La regolarizzazione è ottenuta per uno degli estremi in assenza di vortici o di sorgenti, e per entrambi gli estremi in presenza di un vortice fisso. Una corrente traslatoria, in presenza d'una sorgente aperta nel centro di un bordo della lamina, soddisfa altresì alla desiderata regolarizzazione.

**Dietrich G.** - Zur Dynamik des atlantischen Zweiges des Agulhasstromes [*De dynamica in parte atlantica Currentiae* Agulhas]. 1 Taf. Ann. d. Hydrogr., LXIII, 10, 383-387. Berlin (1935). **a - 1449**

Die hier gewonnenen Ergebnisse stützen sich auf die verschiedenen in 100 m Tiefe im Südsommer und im Südwinter beobachteten Temperaturverteilungen, wodurch gezeigt wird, dass an der Festlandsbegrenzung zwischen Saldanha- Bucht und Kap der Guten Hoffnung der jährliche Gang der Wassertemperatur in 100 m Tiefe zum gewohnten Gange im Ozean und in der Atmosphäre und selbst zum Temperaturverlauf in 100 km von der Küste invers ist. Dem Vf. nach hängt diese Erscheinung mit dem jährlichen Gang der Geschwindigkeit des Agulhasstromes zusammen, was hier näher erklärt wird.

**Dietrich G.** - Aufbau und Dynamik des südlichen Agulhas-Stromgebietes [*De structura et dynamica in regione meridionali Currentiae* Agulhas]. 66 Abb., 11 Tab. Veröff. Inst. Meeresk. N. F. A. Geograph.-naturw. Reihe, 27, 3-79. Univ. Berlin (1935). **a - 1450**

In der vorliegenden Arbeit sind der Aufbau und die Bewegung des gesamten Wasserkörpers im südlichen Agulhasstromgebiet abgeleitet und erklärt, und ein Versuch gemacht, das alte und neue Beobachtungsmaterial nach den jüngsten Arbeitsmethoden auszuwerten. Die Entwicklung der Erkenntnis von den Wasserbewegungen im südlichen Agulhasstromgebiet. Das Quellenmaterial und seine Verarbeitung. Aufbau der Wassermassen. Hydrodynamik des südlichen Agulhasstromgebietes.

**Favre Henry** - Etude théorique et expérimentale des ondes de translation dans les canaux découverts [*Studium ad experimentum undarum quae dicuntur translationis in canalibus apertis*]. Edit. Dunod. Paris (1935). **a - 1451**

Après avoir exposé ses recherches théoriques dans la première partie de son ouvrage, l'A. décrit, dans la seconde, l'installation utilisée pour ses essais pour l'étude de l'écoulement de l'eau dans les canaux ouverts, étude

qui est d'une extrême complexité. Ce problème présente un caractère pratique depuis la construction de grandes usines hydro-électriques à basse pression et celle des canaux de navigation intérieure pour bateaux de fort tonnage. Dans la troisième partie de son ouvrage, l'A. donne quelques exemples d'application pratique des données théoriques exposées dans les deux premières parties.

**Greco L.** - Impianti sperimentali per lo studio del moto ondoso nel porto di Napoli [*De muneribus ad motum undosum studendum in portu Neapolitano*]. 13 fig. f. t. Ann. Ist. Sup. Nav., IV, 2, 125-132. Napoli (1935). **a - 1452**

Descrizione della stazione dinomareometrica progettata dall'A. e costruita sulle opere foranee del porto di Napoli. per lo studio sperimentale delle azioni dinamiche esercitate dalle onde sul paramento esterno dei moli e delle dighe di tipo verticale.

**Hachey H. B.** - A Derivation of Bjerknes' fundamental hydrodynamical Concept [*Derivatio quaedam a fundamentali concepto dynamico Bjerknesiano*]. 1 fig. Int. Rev. ges. Hydrobiol. u. Hydrogr., XXI, 1934, 331-336. Leipzig (1935). **a - 1453**

The fundamental hydrodynamical concept as derived by Bjerknes, which deals with the value of the « circulation acceleration » for a closed curve in the sea has been obtained by using fundamental theorems of hydrodynamics. A direct derivation is presented by introducing the idea of « circulation acceleration » into the equations of motion of a compressible viscous fluid. (A:s rés).

**Hidaka K.** - Anwendung der Stokes'schen Methode auf die Theorie der winderzeugten Meeresströmungen [*Methodus* Stokes *applicatur ad theoriam currentiarum marinarum ventosarum*]. Mem. Imp. Mar. Obs., V, 2, 51-62. Kobe (1932).

( — ) Tidal Oscillations in a Circular Basin with an Elevation or a Depression at its Centre. Ibid., 63-67. Kobe (1932). **a - 1457**

**Hidaka K.** - A Mathematical Investigation on the Development of Wind Currents in Heterogeneous Waters [*Investigatio mathematica de progressu currentiarum ventosarum in aquas heterogeneas*]. (In Engl., Jap. Summ.). 2 figs. Mem. Imp. Mar. Obs., V, 3, 105-139. Kobe (1933).

( — ) Non Stationary Ocean - Currents. Part I. Ibid., 141-266. Kobe (1933). **a - 1458**

**Hidaka K.** - Contributions to the Theory of Stationary Drift Currents in the Ocean [*Contributio in cognoscendas currentias fixas declinationis in Oceano*]. (In Engl., Jap. Summ.). 4 tables 2 figs. Mem. Imp. Mar. Obs., VI, 2, 105-136. Kobe (1936). **a - 1459**

I. The drift currents when the coefficient of eddy viscosity depends on the rate of gliding between successive layers. - II. The drift currents when the coefficient of eddy viscosity depends on the square of the velocity of currents. - III. Relation between the apparent vertical distribution of eddy viscosity and the deflection angle on the sea-surface.

**Hidaka K.** - Tables for Computing the Mathieu Functions of Odd Order $se_1 (\varkappa, \theta)$, $ce_1 (\varkappa, \theta)$, $se_3 (\varkappa, \theta)$, . . . , $se_7 (\varkappa, \theta)$ e $ce_7 (\varkappa, \theta)$ and Their Derivates [*Tabulae ad calculandas functiones* Mathieu]. (In Engl. Jap. Summ.). 8 tables. Mem. Imp. Mar. Obs., VI, 2, 137-157. Kobe (1936). **a - 1460**

1. Introduction. - 2. Definition. - 3. Derivatives of Mathieu functions. - 4. Case $\Theta$ negative. - 5. Method of computation. - 6. Modified Mathieu functions.

**Hidaka K.** - Application of Ritz's Variation Method to the Determination of Seiches in a Lake [*Methodus variationis a* Ritz *inventa applicatur ad sessas in lacu determinandas*]. (In Engl., Jap. Summ.). Mem. Imp. Mar. Obs., VI, 2, 159-174. Kobe (1936). **a - 1461**

The method of Ritz based on the computation of variation has been applied to the solution of curious problems of mathematical physics, especially in the theory of elasticity. A series of very successful results were obtained on the vibration of elastic plates. In this paper author intends to apply Ritz's method to the integration of Chrystal's differential equation of seiches and to introduce a rather simple method of determining the seiches theoretically.

**Koenuma K.** - On the Seiches of Lake Tôya [*Sessae in lacu* Tôya]. (In Engl., Jap. Summ.). 3 figs. Mem. Imp. Mar. Obs., VI, 1, 13-32. Kobe (1935). **a - 1462**

On hand of data gathered on the seiches of Lake Tôya, which has a circular form with a nearly circular island in its center, author gives the theory of the oscillations of a circular lake consisting of two sectorial parts of different depths, being this the natural features of the Lake Tôya, as is shown on its bathymetric chart.

**Kurihara K.** - On the Transmissibility of Long Waves along a Canal when there Are Abrupt Changes in Depth [*De undarum longarum transmissibilitate per canalem cum in canali exstant variationes profunditatis*]. 1 fig. Trans. Imp. Acad., XI, 8, 316-318. Tokyo (1935). **a - 1463**

It is already known that a water wave is partly reflected and partly transmitted at a point where there is an abrupt change in the section of the canal. In the present paper the problem is extended to the case when there are two such points, so that the portion of the canal between them is shallower or deeper than other portions in order to determine the effect of such condition upon the transmissibility of long waves.

**Mattioli G. D.** - Sopra l'influenza della viscosità del fluido nei regimi turbolenti [*De influentia viscositatis fluidae in regiminibus turbulentis*]. Atti R. Acc. delle Sc. di Torino. Cl. Sc. Fis., Mat. e Nat., LXX, t. 1, disp. II, 220-239. Torino (1934-1935). **a - 1464**

Nella teoria dell'autore sulla turbolenza è introdotta la considerazione della viscosità del fluido; ciò che permette di valutare l'influenza del numero di Reynolds per l'efflusso nei tubi.

**Nomitsu T.** - Studies on the Coastal Ground-Water. (1) Effect of Sea-Salt, 2nd Report [*De aquis subterraneis litoreis. Salis marini effectus*].

(In Jap.). 5 figs. Nipp. Gakuzyutu Kyôkwai Hôkoku, 10, 628-633. Tokyo (1935). **a - 1465**

Example of the extension of author's theory of the contact surface of fresh- and salt-water, exposed in Mem. Coll. Sc. Kyoto, A, 10, p. 279, to (1) a case where rain-water is percolating over the ground-water table and (2) a case of artesian ground-water. The results are verified with data of actual measurements made by d'Arigo and by Pennick. Author discusses also the feeble salinity of fresh ground-water.

**Toyohara Y.** - A Study on the Coastal Ground Water at Yumigahama, Tottori [*De aquis subterraneis litoreis in* Yumigahama Tottori]. 6 figs. Mem. Coll. Sc., Ser. A, 18, 295-309. Kyoto (1935). **a - 1466**

To complete previous observations. author verifies the model experiments of Nomitsu's theory on the contact surface of fresh- and salt-water under the ground near a sandy shore by means of measurements on a real coast at Yumigahama. The results obtained show that the theory of coastal ground-water based on hydrodynamical considerations, holds good for the actual sea-shore as well as for model experiments.

**Tuboi I.** - Free Oscillations in a Lake Having non-Elongated and Smooth Boundary [*Oscillationes liberae in lacu qui limites habeat non-elongatos atque levigatos*]. (In Engl. Jap. Summ.). 1 table. Mem. Imp. Mar. Obs., VI, 2, 227-237. Kobe (1936). **a - 1467**

Attempt to solve the problem of free oscillations of water in a lake which has an irregular boundary. Instead of reducing, as usual, this problem to an one-dimensional canal of varying section, A. solves it as a two-dimensional one.

# GEOPHYSICA

## Meteorologia.

**Ångström A.** - The Temperature at Different Latitudes in Its Dependence of Atmospheric Circulation [*De temperatura, diversis latitudinibus, ex circulatione atmosphaerica*]. 1 fig. Un. Géod. & Géoph. Int., Assoc. Météorol., Pr.-V. V$^{e}$ Ass. Gén., Sept. 1933, Lisbonne, II Mém. & Disc., 211-218. Paris (1935). **a - 1468**

Author studies the influence of the radiation, the advection and the convection upon the distribution of the temperature at different latitudes, with especial regard to the influence of circulation upon the energy distribution. Account of the following discussion.

**Barlow E. W.** - Rainbows and Fog Bows [*De iride atque arcubus caliginosis*]. 4 figs., 1 table. Mar. Obs., XIII, 121, 15-17. H. M. Stat. Off. London (1936). **a - 1469**

Summary of the knowledge of rainbows and fog bows at sea, to which the British corps of voluntary marine observers has added some in recent years with special reference to the secondary rainbow, the supernumerary bows, the variation of rainbows, the formation of a rainbow, the conditions of rainbow observation, the other rainbows, the size of raindrops, the tog bow, the reflected and reflection rainbows, and the lunar rainbows.

**Barranjard S. A.** - Forecasting from Barometric Characteristics [*De providendis characteristicis barometricis*]. 9 diagrs. Monthly Weath. Rev., LXIII, 7, 222-223. Washington (1935). **a - 1470**

Some explanation of the connection between barometric characteristics and weather conditions, studied in nine stations, one of which – interesting – is Fernando de Moronha. The A. considers the probabilities found of use for short–period weather forecasting.

**Baur F.** - Der Wärmehaushalt der Lufthülle auf der Nord-halbkugel der Erde [*De oeconomia quoad calorem stratosphaericum in hemisphaerio nordico*]. 4 Abb. Umschau, XL, 17, 321-326. Frankfurt a. M. (1936). **a - 1471**

Kurzer Bericht über die neuen Untersuchungsergebnisse: kurzwellige Einstrahlung, die langwellige Ausstrahlung; das Strahlungsgleichgewicht; Einstrahlung, Ausstrahlung und Wärmetransport im Januar und Juli in Abhängigkeit von der geographischen Breite.

**Becker R.** - Ueber den jährlichen Temperaturgang auf dem Atlantischen Ozean [*De annua temperatura Oceani Atlantici*]. 3 Taf. Ann. d. Hydrogr., LXIV, 5, 198-203. Berlin (1936). **a - 1472**

Für 28 ausgewählte Punkte des Atlantischen Ozeans werden Tabellen der Monatsmittel der Lufttemperatur und der Differenz Luft-minus Wassertemperatur entworfen. Einige dieser Jahresreihen der Monatsmittel werden graphisch dargestellt; bei einem Teil geschieht dies auch unter Verwendung von Polarkoordinaten. Weiterhin werden unter Anlehnung an die Hauptschiffahrtswege Isoplethen entworfen, welche die Veränderungen des Jahresganges der Lufttemperatur von Ort zu Ort zur Anschauung bringen. Aus den Differenzen zwischen Luft- und Wassertemperatur ergeben sich für den Wärmehaushalt interessante Schlüsse, die aber schon durch kleine systematische Fehler der Lufttemperaturmessungen wesentlich beeinträchtigt werden konnten (Vf.).

**Bent A. E.** - Use of Ultra-High Frequencies in Tracking Meteorological Balloons [*De utendis frequentiis ultralongis in sphaericis meteorologicis adhibendis*]. Nat. Res. Counc., Amer. Geoph. Un. Trans., 16th Ann. Meet., Apr. 25-26, 1935, I, 141- 144. Washington D. C. (1935). **a - 1473**

Report on experiments conducted at the Blue Hill Observatory, concerning the detail of the balloon, the meteorograph, the radio sending, and the radio-receiving and recording.

**Bergeron T.** - L'utilisation des « Météorogrammes » pour les recherches synoptiques [*De utendis Meteorogrammatis ad investigationes synopticas ducendas*]. 5 fig. Un. Géod. & Géoph. Int., Assoc. Météorol., Pr.-V. V-e Ass. Gén., Sept. 1933, Lisbonne, II Mém. & Disc., 269-286. Paris (1935). **a - 1474**

Par le mot « météorogramme » l'A. entend dans le présent Rapport un diagramme où sont représentés simultanément, par rapport à un axe commun des temps (t) les variations détaillées de plusieurs éléments météorologiques, en fonction de t. Un météorogramme complet consiste donc en un *baro-thermo-hygro-anémo-ombrogramme*. L'A. indique la source et les origines de ces météorogrammes, en préconise l'emploi sur une large échelle et en illustre les extrêmes avantages.

**Birkeland B. J.** - Mittel und Extreme der Lufttemperatur [*De mediis atque extremis valoribus aëris temperaturae*]. 3 Textfig., Tab. Geofys. Publ., XIV, 1, 1-155. Oslo (1936). **a - 1475**

Die Beobachtungen, Monats- und Jahresmittel für 23 Stationen umfassen die Jahre 1861-1935.

**Blake D.** - Mexican West Coast Cyclones [*De cyclonibus in litoribus occidentalibus Mexicanis*]. 2 figs. Monthly Weath. Rev., LXIII, 12, 344-350. Washington D. C. (193 ). **a - 1476**

Discussion on two classes of storms occurring on the West Coast of Mexico: tropical hurricanes that originate in low latitudes over the Pacific during summer and fall and storms that develop off the coast of lower California frequently during autumn and winter. Analysis of these storms, theory as to their origin. Some remarkable storms recorded.

**Bliss E. W.** - A Forecast of Barbados Rainfall [*De praedictione quadam circa pluviam in* Barbados]. 3 figs. Quart. Journ. R. Meteorol. Soc., LXII, 263, 45-48. London (1936). **a - 1477**

In a previous paper a formula for the combined rainfall of several of the West Indian Islands have been given (Quart. Journ., LVI, p. 67, 1930), but only nine stations were used. On hand of data comprising some 150 stations of the Island, A here gives a formula elaborated for the Barbados island alone. By means of this formula it is possible to forecast rainfall with sufficient exactitude.

**Boy - Ed. E.** - Tropische Orkane und die Bedeutung des Orkan-Warndienstes für die Seeschiffahrt [*De tempestatibus tropicalibus deque momento circa tempestatum provisionem pro navigatione*]. Hansa, 4. Hamburg (1936). **a - 1478**

**Boy - Ed. E.** - Meteorologischer Warndienst und Schiffssicherheitsvertrag [*De muneribus ad condiciones meteorologicas providendas deque regulamentis pro securitate navis*]. 1 Taf. Seewart, IV, 4, 154-159. Hamburg (1935). **a - 1479**

Bericht über einige im September 1934 in den ostchinesischen und japanischen Gewässern beobachtete Fälle von Taifun, durch welche die Notwendigkeit eines besseren Wetternachrichtenaustausches gezeigt wird.

**Brooke Smith L. A.** - Comparison of the Severity of the Weather in the North Atlantic During the Last Five Winters [*Comparatio inter rigores in Atlantico nordico abhinc quinque proximos hiemes*]. 1 pl., 1 table. Mar. Obs., XIII, 121, 18-20. H. M. Stat. Off. London (1936). **a - 1480**

An attempt, based on the better information derived from the greatly improved system of observation, which has been in use since British Selected Ships were organized in 1930.

**Brooke Smith L. A.** - The Observation of Wind Force at Sea [*De venti vi in navi observata*]. 1 table. Mar. Obs., XIII, 122, 54. London (1936). **a - 1481**

Note emphasizing the importance of observation of wind force at sea completed by a German scale proposed for internationalization of these observations. The international Marine Meteorological Commission appreciated the scale, but agreed that it required further study. It is published in « Mar. Obs. », for examination by British seamen.

**Brooks C. E. P.** - Variations of Pressure near the British Isles during 1935 [*Pressionis variationes apud insulas Britannicas, A. 1935*]. Meteorol. Mag., Jan. London (1936). **a - 1482**

**Brooks C. E. P.** - The Classification of Meteorological Literature [*Classatio rerum meteorologicarum*]. Quart. Journ. R. Meteorol. Soc., LXII, 263, 134-144. London (1936). **a - 1483**

Information on the new classification, which has been provided, after discussions lasting for seven years, by a Commission for Bibliography appointed by the International Meteorological Organisation. The new classification was adopted by the International Meteorological Congress at Warsaw in September, 1935, and recommended for international use. As an appendix to the article author gives the full tables for meteorology, which are limited to pure meteorology. The new classification has been introduced into the Society's bibliography in the issue for January to March, 1936.

**Brooks Ch. F. & Harwood E. M.** - Cloud-Observations in Short-Time Forecasting of Snow-Storms [*De observandis nubibus, condicionibus atmosphaericis imminentibus providendis*]. 1 fig., 4 tables. Nat. Res. Counc., Amer. Geoph. Un., Trans. 16th. Ann. Meet., Apr. 25-26, 1935, 1, 110-114. Washington D. C. (1935). **a - 1484**

This paper presents another example of the usefulness of clouds as an areological aid in forecasting. (See Ch. F. Brooks. « The Value of Cloud-Observations », Trans. Amer. Geoph. Un., 14th Ann. Meet., 84-85, 1933).

**Burchard O.** - Klimatographische Witterungsschilderung. no. 52: Kanarische Inseln. Typischer Verlauf eines Sommertages in « La Mocana » bei La Orotava auf Tenerife [*Descriptiones climatographicae coeli condicionum. N. 52. Insulae Canariae. Ratio atmosphaerica ad diem quamdam aestivam pertinens in* « La Mocana » *apud* Orotava *in promunturio* Tenerife]. Ann. d. Hydrogr., LXIII, 11, 454-455. Berlin (1935). **a - 1485**

Witterungsschilderung am Beobachtungstag, 4. August 1935. (Aus der Sammlung des überseeischen meteorologischen Dienstes der Deutschen Seewarte).

**Byers H. R.** - On the Meteorological History of the Hurricane of November 1935 [*De historia meteorologica tempestatis mense Novembri 1935*]. 3 figs. Monthly Weath. Rev., LXIII, 11, 318-322. Washington D. C. (1935). **a - 1486**

Author discusses a few features of the tropical hurricane which took place during the first week of November 1935, and which had several outstanding abnormalities; principal among these were the high latitude and late season of its origin, the singular distribution of the meteorological elements around it, its unusual path, and its odd dissipation in the Gulf of Mexico; they are all dealt with in the present paper.

**Byers H. R.** - The Airplane as a Free-Air Sounding Medium (Abstract) [*De aeronavi ad scandalia ducenda in atmosphaera libera (Compendium)*]. Nat. Res. Counc., Amer. Geoph. Union, Trans 16th Ann. Meet., Apr., 25-26, 1935, 1, 162. Washington D. C. (1935). **a - 1487**

After showing that the airplane in proper hands and properly equipped can be the quickest, most dependable, and most economical means for carrying a meteorograph to ordinary height, author gives the required standards for obtaining flights of a reliable nature. A proposal of collaboration between meteorological services and commercial air-lines is formulated.

**Calvert E. B.** - The Hurricane-Warning Service and Its Reorganization [*Servitium tempestatibus providendis eiusque renovata ratio*]. Nat. Res. Counc., Amer. Geoph. Un., Trans. 16th Ann. Meet., Apr. 25-26, 1935, I, 117-121. Washington D. C. (1935).

(—) Montly Weath. Rev. LXIII, 3, 85-88. Washington D. C. (1935). **a - 1488**

History of the foundation and development of the hurricane-warning service, with especial regard to the activity of Father Vines, and the first reorganization of the Service in 1898 due to the Spanish-American War, after which steady improvements were made in the efficiency of the Service. Author illustrates therefore the reorganization of the service effective on July 1, 1935, which located the forecast-centers nearer to the regions where hurricanes are ordinarily observed. The reorganization program involves changes in the collection of observations from ships, the collaboration with the U. S. Coast Guard and the exchange of warnings issued at Washington, Jacksonville and New Orleans.

**Camm H. E. & Banfield H. E.** - The Frequency and Velocity of the Wind Above Sydney... From Pilot Balloon Observations at Sidney Weather Bureau During Period 1926-1932 [*De venti frequentia et velocitate super urbem* Sydney. *Ex observationibus deprompțis sphaericorum pilotorum auxilio in Officio Meteorologico urbis* Sydney, *A. 1926-32*]. 17 maps, 3 pp. Weath. Bur. Sydney (1934). **a - 1489**

**Cannegieter H. G.** - Pilotballonbeobachtungen im Passatgebiet an Bord des Dampfers « Stuyvesant » im Dezember 1934 [*De observationibus peractis in navi vaporali* « Stuyvesant », *sphaericorum auxilio in zona ventorum quorum nomen Etesiae, mense Decembri 1934*]. 1 Tab. Ann. d. Hydrogr., LXIII, 7, 286-287. Berlin (1935). **a - 1490**

Ergebnisse der Beobachtungen auf der Route von Madeira nach Paramaribo, welche mit dem Schouteschen Registriertheodolit mit Pendelaufhängung gemacht worden sind.

**Carpenter A. B.** - Subsidence in Maritime Air Over the Columbia and Snake River Basins [*Fixatio atque immobilitas aëris marini in bacino fluminum* Columbia *et* Snake]. 6 figs. Monthly Weath. Rev., CXIV, 1, 9-13. Washington D. C. (1936). **a - 1491**

Results of an investigation on the problem of the subsidence in the maritime air associated with low stratus clouds and fog in the Columbia and Snake River Basins, extended from January 19 to February 10, 1935 and from which it appears that dynamic heating, due to the movement of air from the sea to these basins and vice versa, plays an important part in the warm climate of the Pacific coast.

**Clarke C. B.** - Effect of the Atlantic Ocean on Temperatures in Eastern United States as Shown by Temperature-Wind Roses [*De effectu Oceani Atlantici in temperaturas regionum occidentalium ad Americae Status foederatos pertinentium. Effectus desumitur a rosis ventorum et temperaturarum*]. 5 figs., 2 tables. Monthly Weath. Rev., LXIII, 3, 88-91. Washington D. C. (1935). **a - 1492**

Part of a work containing an account of the results of a research concerned with some effects of the Atlantic Ocean upon the climate of Eastern United States, and especially with the effectiveness of the ocean in moderating temperature at various stations. To show, by some quantitative and graphical means, the influence of winds from the direction of the Atlantic Ocean upon the temperatures of coastal and inland stations temperature-wind roses were constructed: they are reproduced and commented in the text of the work.

**Clayton H. H.** - Meteorological Periods and Solar Periods [*Periodi meteorologicae et periodi solares*]. 3 figs. Nat. Res. Counc., Amer. Geoph. Un., Trans. 16th Ann. Meet., Apr. 25-26, 1935, I, 158-160. Washington D. C. (1935). **a - 1493**

Results of a study on the relations between meteorological and solar periods. A relation is shown between periods of solar radiation and air pressure.

**Crutchfield A.** - Flying Aroung a Waterspout [*De volatu circa columnam marinam*]. 5 pls. U. S. Nav. Inst. Proc., LXI, 6 (388), 845-851. Annapolis, Md. (1935). **a - 1494**

Account of observations made from the air at close hand of waterspouts, which explains some of the superstitions prevailing during the middle ages.

**Currie B. W.** - Ice Crystals and Halo Phenomena [*De crystallis glaciatis phaenomenisque halonis*]. 2 figs. Monthly Weath. Rev., LXIII, 2, 57-58. Washington D. C. (1935). **a - 1495**

Study of the vertical pillars of light frequently seen during the winter months above street lights, electric advertizing signs, and airport beacons in Western Canadian cities. The reason of the formation of the halo Observations show that the ice crystals which cause the artificial light pilars are also responsible for solar and lunar pillars, and 22° halos.

**Dedebant G. & Wehrle Ph.** - A propos de la « Théorie des Perturbations » de M. Giâo [*De theoria perturbationum a* Giâo *deprompta*]. Un. Géod. & Géoph. Int., Assoc. Météorol., Pr.-V. Ve Ass. Gén., Sept. 1933, Lisbonne, II Mém. & Disc., 92-111. Paris (1935). **a - 1498**

La présente critique est limitée au 2me volume « Les perturbations atmosphériques » de l'ouvrage publié par M. Giâo sur la « Théorie des Perturbations » dans le « Mémorial de l'Office National Météorologique de France », n° 21 et 22. Les AA. commencent par résumer aussi fidèlement et aussi clairement que possible les idées et les hypothèses de M. Giâo et font ensuite la critique de sa théorie de trois points de vue: physique, mathématique et valeur d'application.

**Dedebant G. & Wehrlé Ph.** - La circulation générale de l'atmosphère sur un globe uniforme déduite d'un principe de moindre dissipation [*Circulatio generalis atmosphaerica circa globulum uniformem deprompta a principio minimae dissipationis*] 5 fig., 1 table. Un. Géod. & Géoph. Int.,

Assoc. Météorol., Pr.-V. Ve Ass. Gén. Sept. 1933 Lisbonne, II Mém. & Disc., 181-210. Paris (1935). **a - 1499**

Après une introduction sur la circulation atmosphérique et l'application à l'atmosphère du « principe » de moindre dissipation, les AA. offrent une représentation cohérente et précise de la circulation générale bien plus satisfaisante que celle fournie par les partisans de la radiation solaire, considérée comme cause de l'entretien de la circulation générale. Ils indiquent pour conclure deux preuves de la faible influence de la radiation solaire sur les mouvements de l'atmosphère, dont la première est que l'expérience courante des cartes synoptiques montre l'indifférence de la situation météorologique à l'alternation du jour et de la nuit et la seconde est que le soleil, comme l'atmosphère, est un milieu fluide comportant une circulation générale et des perturbations.

Geschichtlicher Ueberblick der Entstehung von Wetterkarten und Wettervorhersage von Alters her bis jetzt mit Reproduktionen von der ersten synoptischen Wetterkarte nach H. W. Brandes (1820), den ersten auf Grund telegraphischer Wetterberichte im « Bulletin de l'Observatoire Impérial » veröffentlichten Probewetterkarte vom 7. und 10. September 1863, der ersten Wetterkarte der Deutschen Seewarte vom 16. Februar 1876 und einer modernen Isobarenkarte von 1935. Bedeutung der drahtlosen Telegraphie für die Wettervorhersage; die Polarfronttheorie von V. Bjerknes. Notwendigkeit einer Untersuchung der höheren Luftschichten.

**Eredia F.** - Sulle rapide perturbazioni atmosferiche dell'Adriatico [*De celeribus perturbationibus atmosphaericis maris Hadriatici*]. 35 fig., Boll. Comit. per la Geod. e Geof. del C. N. R. Serie II, A. VI 1/2, 44-73. Milano (1936). **a - 1508**

Osservazioni dell'A. portano alla conclusione che frequenti e rapide comunicazioni fatte dalle zone delle Alpi-Giulie agli Enti interessati in Adriatico possono favorire la previsione del tempo in questo mare.

**Eredia F.** - Considérations relatives aux recherches sur les ondes barométriques [*Considerationes de investigationibus in undas barometricas*]. Un. Géod. & Géoph. Int., Assoc. Météorol., Pr.-V. Ass. Gén., Sept. 1933, Lisbonne, II Mém. & Disc., 112-113. Paris (1935). **a - 1509**

L'A. rappelle l'importance et la nécessité d'intensifier les études des problèmes des oscillations de la pression, dont la solution, selon lui, pourrait donner la clef de nombreuses et importantes questions concernant la prévision du temps à des échéances suffisamment longues.

**Eredia F.** - Aerologia e Meteorologia [*De Aerologia et Meteorologia*]. 327 pp., R. Accad. Aeronaut., Roma (1935). **a - 1510**

Il presente volume rappresenta un libro di testo per gli allievi della R. Accademia Aeronautica. Esso tratta degli strumenti e dei metodi di osservazione, della distribuzione dei fattori aerologici e meteorologici, delle loro variazioni diurne e annuali, della termodinamica dell'atmosfera, della dinamica generale della stessa, e della natura delle differenti perturbazioni atmosferiche, quali le depressioni e i tifoni, e di vari concetti e sistemi applicati alla previsione del tempo. Il lavoro presenta un riassunto molto denso delle nostre conoscenze in materia.

Cette réponse contient des explications qui complètent ou justifient certains points du rapport.

**Giere W.** - Die Windverhältnisse an den Ostbaltischen Küsten [*De aërologicis condicionibus ad litora Maris Baltici Orientalis*]. Fig., 9 Taf. a. T. Arb. Naturf. Ver., N. F., XX, 34 S. Riga (1933). **a - 1515**

**Gregg Ray W.** - Progress in International Meteorology [*De progressibus meteorologiae internationalis*]. Monthly Weath. Rev. LXIII, 12, 339-342. Washington D. C. (193 ). **a - 1516**

During the past decade international meteorology has made advances that are without parallel in the previous history of science. Progress has been marked both in theory and in practical application to human activities, particularly to agriculture, engineering, hydrology, and marine and aerial navigation. Chief contributors to this progress are the standardization of methods of international exchange of continental and marine reports, the development of improved technique in upper-air exploration, and of the application of well-established physical laws to forecasting. (From A:s rés.).

**Grobon A.** - Un projet de centre de documentation météorologique international [*De instituendo quodam Centrali Officio documentatione meteorologica internationali perficienda*]. Météorologie, 11, 251-255. Paris (1935). **a - 1517**

**Harrison L. P.** - Analytical Approach to the Methods of Physical Weather-Analysis [*Conspectus analyticus circa methodus analyticas condicionum atmosphaericarum*]. Nat. Res. Counc., Amer. Geoph. Un., Trans. 16th Ann. Meet., Apr. 25-26, 1935, I, 114-117. Washington D. C. (1935). **a - 1518**

Air-mass analysis and dynamical weather analysis. The foundation upon which a system of physical weather-analysis might be constructed. Attempt to indicate some of the leads which may be followed by developing such a system.

**Hartung K.** - Die Wiedergabe periodischer Druckschwankungen auf gemittelten Isallobarenkarten [*Reproductio oscillationum periodicarum pressionis causa in chartis isoallobaricis mediis atque reductis*]. 1 Taf. a. T. Ann. d. Hydrogr., LXIII, 11, 421-429. Berlin (1935). **a - 1519**

Nach einer kurzen Einleitung über verschiedene Auffassungen der Druckverteilung in höheren Atmosphärenschichten und über die Verwendung der Druckänderungskarten im praktischen Wetterdienst in gleichem Masse wie die Isobarenkarten, berichtet Vf. über seine Untersuchungen in welchen er das geschilderte Schema der Darstellung von ausgeglichenen Druckänderungskarten auf einen vorgegebenen periodischen Durchgang in kinematischer Beschreibung anwendet. Durch verschiedene Berechnungen und Formeln wird die Möglichkeit bestätigt, langperiodische (lang vom Standpunkte des täglichen Wetterdienstes aus gesehen) Druckwellen aus dem komplexen Druckgang herausschälen zu können.

**Haurwitz B.** - The Height of Tropical Cyclones and of the «Eye» of the Storm [*De altitudine cyclonum tropicalium oculique, ut dicitur, tempestatis*]. 2 figs., 3 tables. Monthly Weath. Rev., LXIII, 2, Washington D. C. (1935). **a - 1520**

Author claims that the common arguments in favour of a small vertical extension of tropical cyclones are rather weak, and on the other hand, good reasons can be brought forth in favour of the view that tropical cyclones have about the same height as those of middle latitude. In order to confirm this assertion he studies the height of pressure equalization and required lapse rates, the observed lapse rates in typhoons, the warmth and dryness of the «eye» of the Manila typhoon, and the negligible effect of moisture and vertical accelerations on pressure distribution.

**Haurwitz B.** - A Theoretical Study of Wind-Direction in Curved Air-Currents (Abstract) [*Studium theoricum velocitatis et directionis ventorum in currentias aërias curvas*]. 1 fig. Nat. Res. Counc., Amer. Geoph. Un., Trans. 16th Ann. Meet., Apr. 25-26, 1935, I, 124-126. Washington D. C. (1935). **a - 1521**

Author studies the wind-velocity and wind-direction in the instances, when the simple assumption of straight-rain flow of the air does not hold, i. e. he takes into consideration the curvature of the isobars in the inner part of cyclones and especially in tropical cyclones. He gives formulae which permit to measure the variation of wind and the transport of air-mass across the circular isobar of cyclones.

**Haurwitz B.** - On the Structure of Tropical Cyclones [*De structura cyclonum tropicalium*]. Quart. Journ. R. Meteorol. Soc., LXII, 263, 145-146. London (1936). **a - 1522**

A. gives a derivation of the formula he has communicated elsewhere («Monthly Weath. Rev.», LXIII, 45-49, 1935, Washington) expressing the height of the boundary between the two air masses of the central part of a tropical cyclone by means of the hydrostatic equation. The same formula is also derived in a different manner by means of the expression for the inclination of a surface of discontinuity.

**Jeffreys H.** - The Function of Cyclones in the General Circulation [*De functione cyclonum quoad circulationem generalem*]. Un. Géod. & Géoph. Int., Assoc. Météorol., Pr.-V. V-e Ass. Gén., Sept. 1933, Lisbonne, II Mém. & Disc., 219-230. Paris (1935). **a - 1532**

Author points out that the customary attitude of meteorologists to cyclones seems to be to regard them as disturbances superposed in some way upon a general circulation of the atmosphere. He brings instead an alternative view, namely that cyclones are an essential part of the general circulation, which could not exist without them, and proves three propositions, one relating to the variation of the geostrophic wind with height, one to the existence of steady motion in the absence of friction, and one to the conservation of angular momentum for the air north of any given parallel of latitude. Account of the following discussion.

**Köppen W.** - Westindische Orkane im Herbst 1935. [*Tempestates in Indiis occidentalibus, autumno 1935*]. 2 Abb., Ann. d. Hydrogr. XLIV, 6, 253-256. Berlin (1936). **a - 1539**

Die ersten drei Wirbelzentren folgten den gewöhnlichen Bahnen; die beiden ersten Orkanen erreichten im August und Anfang September den westlichsten Punkt bei 27° bis 30° N, der dritte wanderte vom 25. bis zum 28. September von 15° bis 25°, der vierte dagegen machte eine ganz unregelmässige, kaum je beobachtete, Bahn vom 19. bis zum 22. Oktober im Karibischen Meere und die Bahn des fünften in etwa 32° N-Br. östlich von den Bermuden entstandenen Sturmwirbels ist sogar ohne Beispiel in der Geschichte der Orkane. Für weitere Beschreibung und Erklärung siehe den Washingtoner M. W. Review Aug. bis Nov. 1935.

Apparatus interpolatione graphica praeditus ad extremos determinandos cycli annui temperaturae*]. Figs., fold. charts. Univ. Calif. Publ. Geogr., VI, 5, 173-189. Berkeley, Ca. (1934). **a - 1547**

**Lehmann H.** - Austausch von Wetternachrichten auf dem Nord-atlantischen Ozean [*Permutatio relationum meteorologicarum in Oceano Atlantico Sept.*]. Seewart, V, 6, 177-179. Hamburg (1936). **a - 1548**

Zwei Beispiele von den im westlichen Teile des Atlantiks ungewöhnlich schnellen Witterungsänderungen, welche die Bedeutung eines noch öfteren Austausches der Wetterberichte von Schiff zu Schiff zeigen.

**Loewe F.** - Pressure Waves in Adelie Land [*De pressionis undis in* Adelie Land]. 2 fig. Quart. Journ. R. Meteorol. Soc., LVI, 262, 441-445. London (1935). **a - 1549**

Comparison of simultaneous pressure observations at McMurdo Sound, Adelie Land and Macquarie Island shows pressure waves radiating outward from the Antarctic continent. These waves, which seem to travel with considerable speed, can be traced distinctly as far as Macquarie Island, north of the sub-Antarctic low pressure belt.

Aplicaciones del estudio, para la averiguácion de la constitución de la atmósfera y de su dinamismo, que constituyen la Radiometeorologia.

**Lueders K.** - Beobachtungen bei einem Wirbelsturm im Gebiet der Aussenjade [*Observationes quoad columnam marinam in regione* Aussenjade]. 1 Taf. a. T. Ann. d. Hydrogr., LXIV, 4, 160-162. Berlin (1936).. **a - 1551**

Beobachtungen über die meteorologischen Verhältnisse, das Auftreten, die Bahn, die Störung der Gezeitenströmung und -bewegung während des am 4. August 1930 über Minsener Oldeooge, eine östlich von Wangerooge gelegene Strandinsel, stattgefundenen Wirbelsturmes.

**Lyr E. S.** - Types of the Season Circulations of the Atmosphere over Eurasia and Atlantic [*De typis circulationis pro anni tempore in atmosphaera Eurasiae et Oceani Atlantici*]. Meteorol. i. Hidrol. 1. Moskwa (1936). **a - 1552**

**Manegold W.** - Die Wetterabhängigkeit der Oberflächenströmungen in den Pforten der Ostsee [*Momentum coeli condicionum providendarum pro currentiis superficialibus ad accessus Maris Baltici*]. 11 Kart., 2 Taf. a. T. Aus d. Arch. Dtsch. Seew., LIV, 4, 1-40. Hamburg (193 ). **a - 1553**

Aus den vorliegenden Untersuchungen, wieviel man bei richtiger Betrachtung einer Wetterkarte über die Stromverhältnisse aussagen kann, zieht Vf. folgende Schlüsse: Für die Hauptrichtung des Oberflächenstroms ist in erster Linie das Wetter verantwortlich. Einstrom wird, mit einigen Ausnahmen, durch ein Tief auf einer der Zugstrassen hervorgerufen, sobald es die Linie Island- skandinavische Westküste - Jütland überschritten hat. Starker Ausstrom läuft bei einem Hoch über Nordosteuropa. Weitere Regeln für die Voraussage des Stromverlaufs sind am Ende dieser Arbeit enthalten.

**Manley G.** - Some Notes on the Climate of North-East England [*Notae de climate in regionibus nord-orientalibus Angliae*]. 3 tabl. Quart. Journ. R. Meteorol. Soc. LXI, 262, 405-410. London (1935). **a - 1554**

Characteristical features of the climate of the northeastern lowlands of England and the coasts of south-east Scotland. Comparison between the western and eastern coasts with regard to sunshine, cloudiness, winds etc.; temperature of the surrounding waters, factors concerned with the cooling of the waters. Presumed correlation between the depth of inversion at the coast and the persistence of low cloud inland. Example: North-easterly Weather analysis for May 1935.

Auf Grund der bei der Station Annen seit 1908 gemachten Berechnungen über die Sonnenscheindauer werden hier die Beziehungen zwischen den verschiedenen Elementen: Sonnenscheindauer gegenüber ihrer Streuung, Streuung von Sonnenschein und Höhe der Temperatur, Streuung von Temperatur gegenüber Sonnenschein untersucht. Es wird weiter versucht die Aufgabe zu lösen, ob die oben berechneten Beziehungen zwischen zwei Elementen unmittelbar sind oder ob sie mit einem dritten zusammenhängen.

**Namekawa T.** - A Study of the Minor Fluctuation of the Atmospheric Pressure (1) Part I. Theory of the Internal Gravitational Waves of the Atmosphere and its Application to the Waves of Pressure Recorded by the Microbarograph. [*De fluctuationibus pressionis atmosphaericae. Pars Iª. Theoria undarum gravitationalium internarum eiusque applicatio ad studendas undas prementes, microbarographo registratas*]. 12 figs., 6 tables. Mem. Coll. Sc., A, XVII, 405-430. Kyoto (1934). **a - 1571**

The author uses the simplifications and the graphical method to the Lamby's theory of the atmospheric oscillations to get some useful conclusions concerning the analysis of waves of pressure, shown by the microbarographs. This theory, which gives a combination of the Helmholtz's internal waves theory and D. Brunt's simple vertical oscillation due to the stabilizing effect, is examined and verified on hand of two actual examples and is found to agree with the observational results.

Un. Géod. & Géoph. Int., Assoc. Météorol., Pr.-V., V-e Ass. Gén., Sept. 1933, Lisbonne, II, Mém. & Disc., 35-66. Paris (1935). **a - 1580**

Treatise on the practical application of the formulae by means of which the future movement and change in structure of all kinds of pressure systems may be computed. (Kinematical and Dynamical Properties of the Field of Pressure, with Application to Weather Forecasting, abbreviated: K. & D. P.). Author deduces forecasting rules which may be applied when technical difficulties do not permit computation of future change in pression distribution. These rules are based on the theoretical deductions in K. & D. P. and are limited to the discussion of the paths of pressure centers, and their change in structure (deepening, filling, occlusion, cyclogenesis and anticyclogenesis). Summary of the following discussion.

**Petterssen S.** - Contribution to the Theory of Frontogenesis [*Contributio in frontogenesim*]. 54 figs. Geofys. Publ. XI, 6, 1-27. Oslo (1936). **a - 1581**

Die hier gewonnenen Ergebnisse, die sich auf die an Bord der deutschen Handelsschiffe während 1909-1913 zwischen 30° W und 25° und 5° N. ausgeführten Beobachtungen stützen, bestätigen die Ergebnisse früherer Untersuchungen auch in Bezug auf ein grösseres Gebiet. Der jährliche Gang der Gewitterhäufigkeit. Die Windrichtung am Boden während der Gewittererscheinungen. Die Verteilung der Gewittererscheinungen relativ zur Tropikfront.

**Piersig W.** - Schwankungen von Luftdruck und Luftbewegung sowie ein Beitrag zum Wettergeschehen im Passatgebiet des östlichen Nordatlantischen Ozeans [*Oscillationes perpenduntur pressionis aëriae atque motus. Contributio in coeli condiciones studendas in sectore Etesiarum in parte orientali Atlantici septentr.*]. 20 Abb., 4 Taf. a. T. Aus d. Arch. Dtsch. Seew., LIV, 6, 1-41. Hamburg (1936). **a - 1584**

Die vorliegende Bearbeitung hat zum Zweck, die Bedeutung der Schiffsbeobachtungen für das Studium klimatologischer und meteorologischer Erscheinungen zu untersuchen und zu sehen, wie weit die unperiodischen Schwankungen einzelner meteorologischer Faktoren in der Passatzone dazu berechtigen, von einem Wettergeschehen in diesem Gebiet zu sprechen.

**Poser H.** - Nebelbögen, kleiner Sonnenhalo und Luftspiegelungen im ostgrönländischen Packeise [*Fornices nebulosi, parvus halo solaris et fata morgana in glacie Groenlandiae orientalis*]. 1 Fig., 9 Tab. Ann. d. Hydrogr., LXIII, 7, 261-267. Berlin (1935). **a - 1585**

Wiedergabe einiger Beobachtungen von Luftspiegelungen und der gleichzeitigen Temperaturen aus dem ostgrönländischen Packeise. Den Luftspiegelungen stellt Vf. einige Beobachtungen über einen kleinen Sonnenhalo und den echten weissen Regenbogen voran. In seinen Schlussfolgerungen bespricht Vf. die engen Beziehungen zwischen Luftspiegelungen und kräftiger Temperaturinversion; letztere führt er auf die anhaltend abkühlende Wirkung des Eises auf die untere Luftschicht zurück.

**Regula H.** - Druckschwankungen und Tornados an der Westküste von Afrika [*De pressionis oscillationibus deque ventis* tornados *ad litora Africae occid.*]. 1 Taf. Ann. d. Hydrogr., LXIV, 3, 107-111. Berlin (1936). **a - 1586**

In der Zeit zwischen Juli und Oktober 1934 fanden an der Küste von Senegambien und der Sierra Leone mehrfach Druckschwankungen von etwa viertägiger Dauer statt. Während des Druckfalls wehten auflandige (westliche), während des folgenden Druckanstiegs ablandige (östliche) Winde, letztere in einem Falle in einer Breite von 2000 km. Soweit die Meldungen erkennen lassen, treten die westafri-

kanischen Tornados vorzugsweise während der Zeiten des Druckanstiegs auf. Ueber See nimmt die Gewittertätigkeit rasch ab, die östlichen Winde wurden dagegen noch in mehreren hundert Kilometern Abstand von der Küste beobachtet. (Vf.)

Ann. d. Hydrogr., LXIV, 7, 286-291. Berlin (1936). **a - 1587**

Meinardus' Theorie in Bezug auf den Zusammenhang zwischen den Schwankungen der atmosphärischen Zirkulation und der Wärmeführung des Golfstromes. Der von Helland-Hansen und Nansen nachgewiesene Zusammenhang zwischen dem Gang der Jahresmittel der Sonnenflecken und demjenigen der Wasser – und der Lufttemperatur im Nordatlantik. Die Eisverhältnisse bei Island und Neufundland und ihr Zusammenhang mit der Atlantischen Zirkulation.

**Reuter F.** - Die Witterungsverhältnisse an der Kerguelen-Station zugleich ein Beitrag zur Frage der Druckwellen auf der Südhalbkugel südlich 30° s. Br. [*Condiciones meteorologicae in statione* Kerguelen *et contributio in solvendum problema undarum pressionis in haemisphaerio merid.*]. Veröff. Geophys. Inst. Univ., 2-te Ser., Spezialarb. Geophys. Inst., V, 4, 211-339. Leipzig (1932). **a - 1588**

**Richardson B.** - Solar Radiation at the Scripps Institution, La Jolla, Calif., 1928-34. [*Radiationes solares in* Scripps Institution, La Jolla Calif. *1928-34*]. 1 fig., 4 tables. Monthly Weath. Rev., LXIII, 3, 92-93. Washington D. C. (1935). **a - 1589**

Summary of the results obtained by the Scripps Institution by measuring solar radiation, carried on because of investigations in evaporation rates of open bodies of water, seasonal weather forecasts, and the dynamical theory of ocean tides and currents.

**Richter N.** - Meteorologische Beobachtungen zwischen + 50° und — 35° Breite auf einer astronomischen Forschungsreise im Frühjahr 1933. [*Observationes meteorologicae inter + 50° et — 35° latitudinis perdurante navigatione astronomica vere 1933*]. 1 Tab. Ann. d. Hydrogr., LXIV, 4, 162-168. Berlin (1936). **a - 1590**

Die hier vom 23. März bis zum 17. Juni im Atlantischen Ozean ausgeführten Beobachtungen interessieren hauptsächlich die Bewölkungs- und Sichtverhältnisse: Allgemeiner Witterungscharakter und Bewölkungsverlauf. Tagesbeobachtungen. Spezielle und fortlaufende Beobachtungen bei Nacht auf hoher See. Zusammenstellung der mittleren Bedeckung.

**Rodewald M.** - Das norddeutsche Hochdruck-Gewitter vom 19. August 1932. Schlussmitteilung [*Tempestas alta pressione in Germania sept. die 19 mensis Augusti 1932*]. 19 Abb., 2 Taf., 1 Tab. Ann. d. Hydrogr., LXIV, 4, 143-153. Berlin (1936). **a - 1591**

Es wird gezeigt, dass das norddeutsche Hochdruckgewitter vom 19. August 1932 - als Vorläufer gleichartiger, weiter im Nordosten stattfindender Nachgewitter - dem Typus von R. Scherhag untersuchten nächtlichen Küstengewitter zuzuordnen ist. Scherhags Folgerungen betreffend das Zustandekommen dieser Gewitter ist durch die Untersuchung auch in diesem Falle bestätigt. Zum Schluss wird die Vorhersagemöglichkeit besprochen.

**Rodewald M.** - Die nordatlantische Lufttemperaturverteilung vor Entstehung einer langlebigen Oktober-Sturmzyklone auf dem 50. Breitenkreis [*De temperaturae distributione in Atlantico sept. ante cyclonis initium, mense Octobri*]. 1 Taf. Ann. d. Hydrogr., XLIV, 6, 264-266. Berlin (1936). **a - 1592**

Erläuternde Bemerkungen zu einem dem 4. Quartalsheft der Hoffmeyer-Karten (hrsg. v. Dän. Meteorol. Inst. u. d. Dtsch. Seewarte) entnommenen Fall von Sturmzyklonenbildung in mittleren Breiten.

**Rodewald M.** - Wetterskizzen. Nr. 8: Die Entstehungsbedingungen einer Labradorstrom–Sturmzyklone [*Adumbratio meteorologica. Condiciones formationis cyclonicae in currentia Labradorica*]. 1 Karte. Ann. d. Hydrogr., LXIV, 8, 371-373. Berlin (1936). **a - 1593**

Analyse eines den Hoffmeyerkarten entnommenen Falles von Sturmtiefbildung bei Labrador vom 17. bis 19. Oktober 1901.

**Rodewald M.** - Die Neuordnung des nordamerikanischen Orkan-Warnungsdienstes [*Ratio renovata quoad munera pro coeli condicionum provisione in America sept.*]. 1 Taf. Seewart, V, 1, 14-18. Hamburg (1936). **a - 1594**

Es wird, nach einem kurzen Rückblick auf die Geschichte des westindischen Orkanwarnungsdienstes, über dessen umfassende Neuorganisation im Jahre 1935 berichtet. Diese ist aufgebaut auf dem Prinzip der Dezentralisation; es wird gezeigt, wie hierbei der meteorologische Apparat mit den neuzeitlichen Hilfsmitteln von Funk und Fernschreiber eine möglichst rasche und gutfundierte Wetterberatung erreichen will, welches hierbei die Aufgaben der Schiffahrt sind und wie ihre meteorologische Sicherung vor sich gehen soll. (Vf.)

**Rodewald M.** - Die Bildung westindischer Orkane im Zusammenhang mit der nordatlantischen Wetterlage [*De tempestatibus in Indiis occid. pro meteorologia Atlantici sept.*]. 2 Taf. Seewart, V, 6, 205-214. Hamburg (1936). **a - 1595**

Es wird die nordatlantische Wetterlage bei drei westindischen Orkanbildungen des Jahres 1935 besprochen und gezeigt, dass gewisse Gesetzmässigkeiten in den gemässigten und subtropischen Breiten der Orkanbildung vorausgehen. Von Bedeutung für die tropische Zyklonentwicklung erscheint ein aus den gemässigten Breiten weit südwärts gehender Kaltluftvorstoss; dieser gibt sich im Luftdruckbilde durch einen interpassatischen Tiefausläufer mit Kaltfront und durch entsprechende Teilung des Rossbreitenhochs zu erkennen. (Vf.)

**Rothe E.** sous la direction de ..... - Annuaire de l'institut de Physique du Globe 1932. Première Partie: Météorologie [*Annuarium Instituti pro Physica Orbis A. 1932. Pars I<sup>a</sup>: Meteorologia*]. 20 tabl., fig., vii + 112 + 4 pp. Univ. Strasb., Fac. Sc. Strasbourg (1933).

(—) Annuaire de l'Institut de Physique du Globe 1933. Première Partie: Météorologie. 20 tabl., 1 pl. 87 + 5 pp., Univ. Strasb., Fac. Sc. Strasbourg (1934). **a - 1596**

Annuaire de l'Institut, contenant en dehors du rapport annuel sur l'activité de l'Institut dans le domaine de la météorologie, illustré par 20 tableaux, quelques travaux personnels de ses collaborateurs, ainsi que le « Bulletin annuel de la Commission Météorologique du département du Bas-Rhin, 1933 ».

**Rudloff W.** - Golfstromzyklonen. Eine synoptisch-dynamische Untersuchung über die Entstehung nordatlantischer Sturmzyklonen in ausgewählten Beispielen [*De cyclonibus ad* Golfstrom *pertinentibus. Investigationes synopticae dynamicae de cyclonibus in Atlantico Nordico*]. 3 Taf., 5 Tab. Ann. d. Hydrogr., LXIV, 5, 185-198. Berlin (1936). **a - 1597**

Zyklonen, die südlich von 50° N über dem vom Golfstrom beherrschten Gebiet des West-Atlantiks erscheinen, seien Golfstromzyklonen genannt. Sie entstehen durch den labilisierend wirkenden Vorstoss eines Hochs (Kaltluftaktivierung) meist nahe dem dreissigsten Breitenkreis und entwickeln sich alsdann durch das Hinzutreten eines hohen Fallgebietes zu Zyklonen, die grosse Teile des Weltmeeres beherrschen. Die oft beobachtete Umwandlung flacher, vom Festland kommender Tiefs in Sturmtiefs beim Betreten des Meeres lässt sich erklären durch das Vorhandensein der durch die aktivierte Kaltluft vorlabilisierten Luft, in der es aus Zeitmangel nicht mehr zur Entwicklung einer selbständigen Zyklone kam. Die untersuchten Beispiele lassen den Vf. die Vermutung aussprechen, dass hinreichend für die Entstehung winterlicher nordatlantischer Sturmzyklonen ist: 1. der Vorstoss eines hohen Drucksteiggebietes und dadurch erfolgende Kaltluftaktivierung über die warme Meeresluft, 2. Vertiefung der entstandenen Golfstromzyklone durch ein hohes Druckfallgebiet. (Vf.)

**Samuels L. T. -** Aerological Observations [*Observationes aërologicae*]. 2 tables. Monthly Weath. Rev., LXIII, 9, 277-278. Washington D. C. (1935). **a - 1598**

Data on mean free-air temperature and relative humidity observed in the United States by airplanes during September 1935, and free-air resultant winds based on pilot-balloon observations.

**Scherhag R. -** Eine bemerkenswerte Klimaänderung über Nordeuropa [*De notanda quadam variatione climatica in Europa sept.*]. 2 Taf., 6 Tab. Ann. d. Hydrogr., LXIV, 3, 96-100. Berlin (1936). **a - 1599**

Es wird die ausserordentliche Erhöhung der Wintertemperaturen über Grönland, der Ostgrönland-See und dem Ostspitzbergen-Meer untersucht und nachgewiesen, dass die Klimaänderung mit einem erheblichen Rückgang der Eisgrenze und einer bedeutenden Zunahme der atmosphärischen Zirkulation zusammenhängt. (Vf.)

**Scherhag R. -** Die Entstehung des Nordsee-Orkantiefs vom 19. Oktober 1935. Anwendung der Divergenztheorie auf eine herbstliche Sturmzyklone [*De origine et formatione depressionis in Mari Nordico die 19 Octobris 1935*]. 1 Taf. a. T., 1 Tab. Ann. d. Hydrogr., LXIV, 4, 153-160. Berlin (1936). **a - 1600**

1. Ausdehnung und Stärke des Sturmes vom 19. Oktober. - 2. Die rasche Entstehung des Sturmtiefs. - 3. Der Druckfall und die Divergenz der Bodenisobaren. - 4. Berechnung der Zunahme der kinetischen Energie über dem nordeuropäischen Raum bei der Bildung des Orkantiefs. 5. Berechnung der Dimension der energiedispendenden Frontalzone. - 6. Die Dimension der erzeugten Frontalzone erfüllt die Forderung der Divergenztheorie. - 7. Die gleichzeitige Zerstörung der Frontalzone. - 8. Folgerungen für die grossräumige Wetterentwicklung.

**Scherhag R. -** 1. Wetterskizzen. Nr. 1: Ungewöhnlich hoher Luftdruck in der Arktis und grosse Sturmhäufigkeit in der Biskaya im Winter 1935/1936 [*Adumbrationes meteorologicae. Pressio barometrica maxime demissa in Oceano Arctico atque frequentia tempestatum in Sinu Vasconico*]. 1 Abb., 2 Tab. Ann. d. Hydrogr., LXIV, 5, 215-218. Berlin (1936). **a - 1601**

Entstehen, Verbreitung und Verweilen dieses Hochs; Charakter der Sturme in der Biskaya. Intensität und Lage der Zentren der Druckanomalien im Winter 1935-1936, Abweichungen von Druck und Temperatur.

Wenn man berücksichtigt, dass über dem Meer eine semi-laminare Grenzschicht vorhanden ist, und dass die Meeresoberfläche eine mit wachsender Windgeschwindigkeit wachsende Rauhigkeit besitzt, kann man auf Grundlage der Ergebnisse der Turbulenzforschung in den Laboratorien eine theoretische Formel für die Verdunstung aufstellen, die zu einer weitgehenden Uebereinstimmung mit beobachteten Werten führt. (Vf. Rés.)

**Sverdrup H. U.** - Air Circulation over the Polar Sea [*Aëris circulatio per mare polorum*]. (In Engl. Russ. Summ.). 11 figs. Arctica, II, 47-63. Leningrad (1934). **a - 1613**

Review of the most important results of the study of some general features of the air circulation over the Polar Sea treated by the author in his discussion of the meteorological observations on the « Maud » -expedition. (S.: H. U. Sverdrup. Meteorology. Part. I. Discussion. - The Norwegian North Polar Expedition with the « Maud », 1918-1925. Scientific Results. Vol. II).

**Sverdrup H. U.** - Klima des Kanadischen Archipels und Grönlands. I. Uebersicht über das Klima des Polarmeeres und des Kanadischen Archipels [*De climate archipelagi Canadensis et Groenlandici. I. Conspectus climaticus Maris Polaris et Archipelagi Canadensis*]. Abb., Tab., Handb. Klimatol., II, Teil K, K 1- K 30. Berlin (1935). **a - 1614**

**Tannehill I. R.** - A Relation Between Temperature and Cyclone-Frequency in the Tropics [*Correlatio inter temperaturam et frequentiam cyclonum tropicalium*]. 5 figs. Nat. Res. Counc., Amer. Geoph. Un., Trans. 16th Ann. Meet., Apr. 25-26, 1935, I, 121-124. Washington D. C. (1935). **a - 1615**

On hand of records of the variation of the monthly temperature and those of monthly frequency of tropical cyclones, author concludes that the double period in the annual variation in insolation in equatorial regions is accompanied by a double variation in temperature which appears to be the cause of the two maxima of cyclone-frequency as recorded in the average year in some tropical regions.

**Travniček F.** - Zur Kenntnis der Quellgebiete atmosphärischer Unruhe [*De cognoscendis causis perturbationum atmosphaericarum*]. 2 graph. Fig. Ann. d. Hydrogr., LXIV, 3, 100-107. Berlin (1936). **a - 1616**

Diese Arbeit hat den Zweck, die Einsicht in Lage und Ursache der grossen Entstehungs - oder Quellgebiete atmosphärischer Unruhe in zwei übersichtlichen Darstellungen zu veranschaulichen. Die eine, kartographische, Darstellung, welche Vf. schon in der Meteorol. Ztschr. S. 241, 1928, entwickelt hat, wird hier wieder erörtert und die neue Darstellungsmethode, welche auf die Isolinien ruht, wird hier durch Kurven veranschaulicht.

**Väisälä V.** - New Method of Sounding by Radio [*Ratio nova mensurarum atmosphaericarum radio auxilio*]. 12 pp. Soc. Scient. Fennica, Acta & Comm. Phys. Math. VIII, 14. Helsinki (1935). **a - 1617**

Any change of pressure or temperature can be shown by the wave- lengths of radio waves thanks to alteration of the capacities of condensers due to changes in temperature and pressure.

**Voznesensky A. V.** - Under the Supervision of. . . . Materials for the Climatology of the Polar Regions of the URSS. Part I: The Climate of Dickson Island [*Res collectae circa climatologiam regionum polarium ad URSS pertinentium. Pars I et II: Insulae* Dickson *clima*]. (In Russ. Engl. Summ). 12 figs., 37 tables, 19 tables in app. Trans. Arct. Inst., XLVI, 5-70. Leningrad (1936). **a - 1618**

The present outline of the climate on the Arctic Station on Dickson Island (lat. 73°30′ N; long. 80°23′ E.) may be considered as a first attempt made by the Geophysical Section of the Arctic Institute to give a more or less systematic account of the climate of Soviet polar regions based on modern data. On hand of the main meteorological results of the three daily standard observations during 1916-1934 on the Dickson Station, data are communicated concerning the air pressure, temperature and humidity, wind cloudiness, precipitation, snow cover, blizzards, and fogs.

Après une introduction, dans laquelle certains détails sont donnés concernant l'organisation du service hydrographique yougoslave depuis la réunion du Royaume des Serbes, des Croates et des Slovènes, jusqu'à l'année 1932, sont publiées les données statistiques qui résument les résultats des observations faites sur les différentes stations hydrométriques et pluviométriques yougoslaves.

**Norsk Meteorologisk Institutt** - Meteorological Observations Made on 9 Norwegian Whaling Floating Factories During the International Polar Year 1932-1933 [*Observationes meteorologicae peractae in 9 ratibus fluctuantibus norvegicis, Anno polorum internationali perdurante. 1932-1933*]. Tables. Norw. Publ. Int. Polar Year 1932-33, 1, 3-53. Oslo (1935). **a - 1648**

In the autumn of 1931 the President of the Norwegian Committee for the Polar Year asked the Whaling Association to perform meteorological observations in the Antarctic during the International Polar Year 1932-33. In the present Report the results of those observations are published.

**Office National Météorologique & Société Météorologique de France** - Bibliographie météorologique [*Bibliographia meteorologica*]. Tome XII, Année 1932. Paris (1935). **a - 1649**

XIIème volume de la publication, contenant 1545 titres d'ouvrages météorologiques, groupés et classifiés selon la matière dont ils traitent. Le volume contient aussi un supplément, dans lequel sont indiqués les ouvrages de météorologie générale publiés avant l'année 1932, muni d'un index alphabétique des auteurs. Cet appendice contient 460 titres d'ouvrages et de nombreux sommaires.

**Organisation Météorologique Internationale** - Listes des stations climatologiques. 1. Europe [*Stationum meteorologicarum elenchus. I. Europa*]. Tables, 182 pp. Secr. Organ. Météorol. Int., 22. Utrecht (1934). **a - 1650**

**Royal Meteorological Society** - Some Problems of Modern Meteorology: A Series of Papers by Various Authors Reprinted from the Quarterly Journal of the Royal Meteorological Society [*De problematis meteorologiae hodiernae*]. Maps, diagrs. v + 170 pp. R. Meteor. Soc. London (1934). **a - 1651**

A series of sixteen articles, published in the « Quarterly Journal » from 1930 to 1934 and constituting a survey of outstanding problems in meteorology to day. They are concerned with the theories of the circulation of the atmosphere (E. W. Barlow), the origin of cyclonic depressions (D. Brunt) and anticyclones (C. E. P. Brooks), the stratosphere (G. M. B. Dobson and A. R. Meetham), the problem of weather forecasting (C. K. M. Douglas), the upper-air data from the Antarctic (E. Kidson), the seasonal foreshadowing (C. W. R. Normand), etc.

**Royal Meteorological Society** - Bibliography of Meteorological Literature. Prepared by the Royal Meteorological Society with the Collaboration of the Meteorological Office [*Bibliographia rerum meteorologicarum redacta a Societate Londiniensi pro re meteorologica consociata opera Officii Meteorologici*]. III, 7, ii + 245-291. London (1935). **a - 1652**

**Servicio Meteorologico Español** - Instrucciones para las observaciones meteorologicas a bordo y claves de meteorogramas [*Praecepta ad observationes meteorologicas ducendas in navibus. Agitur etiam de redigendis meteorogrammatis*]. Lam., 87 pp. Publ. Serv. Meteorol. Esp. ser. C., 6. Madrid (1935). **a - 1653**

**Statens Meteorologisk-Hydrografiska Anstalt** - Meteorologiska iakttagelser i Sverige [*Observationes meteorologicae in Suetia*]. (Rés. et titres en français). Tabl. 107 pp. Årsbok 1932, XIV. Stockholm (1935). **a - 1654**

Tableaux sur les observations diurnes, les résultats mensuels et annuels, la température des pentades. Avant-propos indiquant les modes de calcul, instruments, explication des signes etc.

**Statens Meteorologisk- Hydrografiska Anstalt** - Månadsöversikt över väderlek och vattentillgång [*Relatio menstrua condicionum meteorologicarum et livelli aquarum cum relatione annua ab Instituto redacta*]. Tabl., 76 pp. Årsbok, 1935, XVII, 1. Stockholm (1936). **a - 1655**

Detailed reports for every month concerning weather, wind and gales, atmospheric pressure, precipitation, water level, ice conditions of the ports, aurora borealis. Summary report for the whole year.

**Statens Meteorologisk- Hydrografiska Anstalt** - Årsberättelse för 1935 [*Relatio annua pro A. 1935*]. (Swed. & Engl. Text.). Tabl., 21 pp. Suppl. Årsb., XVII. Stockholm (1936). **a - 1656**

The Staff; observations and field work; meteorological section, surveys for wind and gale, ice-signal service, air-observations, military service, climate, hydrographical conditions, international co-operation; library and publications.

**Union Géodésique et Géophysique Internationale. Association de Météorologie** - Réunion d'Edimbourg (1936). Programme de discussion. [*Consessus Edimburgi. A. 1936 Ratio discussionum*]. Paul Dupont. Paris (1935). **a - 1657**

Sur le problème des perturbations atmosphériques.

**U. S. Weather Bureau** - Climatological Tables. Condensed Climatological Summary [*Tabulae climatologicae*]. Tabl., charts on pl. Monthly Weath. Rev., LXIII, 4, 148-155; 5, 175-182. Washington D. C. (1935). **a - 1658**

Pressure (sea level, reduced to mean of 24 hours), temperature, precipitation, wind, visibility etc. for each Station indicated.

**U. S. Weather Bureau** - Meteorological Data [*Data meteorologica*]. Charts. Monthly Weath. Rev., LXIII, 9, 84-94; 11, 106-117. Washington D. C. (1935). **a - 1659**

Departure of the mean temperature from the normal, September 1935. Tracks of centers of anticyclones, and cyclones Sept. 1935. Percentage of clear sky between sunrise and sunset. Total precipitation. Isobars at sea level and isotherms at surface; prevailing winds. Wind roses for selected stations. Weather map of North Atlantic Ocean, for some dates of Sept. and November.

**E. G. B.** - Conference of Empire Meteorologists [*Congressus meteorologicus Anglicus*]. Nature, CXXXVI, 3436, 404-405. London (1935). **a - 1660**

Account of the conference held at the Meteorological Office, London, on August 12–21. Questions connected with aviation, synoptic meteorology, meteorology for the Army and for the Navy, marine meteorology, instruments etc.

**S. J.** - Quelques notions sur la brise de mer [*Notitiae de halitu marino*]. Nature, LXIII, 2, 220-221. Paris (1935). **a - 1661**

**An.** - La visibilité horizontale dans les colonies françaises [*De visibilitate horizontali in Coloniis gallicis*]. Nombr. fig. Ann. Phys. du Globe France d'Outre-Mer, II, 11, 129-159. Paris (1935). **a - 1662**

**Blinov L. K.** - On the Chemical Nature of Sea-Ice [*De natura chemica glaciei marinae*]. (In Russ., Engl. Summ.). 4 figs., 7 tables. Bull. State Oceanogr. Inst., U. S. S. R., 18, 1-26. Moskva (1934). **a - 1675**

Account of observations carried out on board the « Persey » in the Barents Sea in 1929-30 in order to determine the salt content as well as the mechanical properties of the sea-ice. The different stages of development of the young ice and those of the one-year old ice have been investigated, with especial reference to the so-called pancake-ice and the homogeneous crusty ice. Both these varieties of ice have been studied from the standpoint of their content in ice and their solidity. The chemical composition of the ice has been determined together with the factors it depends on, i. e. the temperature, at which the ice is formed, the velocity of its formation and the structure of the ice. The data illustrating the solidity of the ice are not numerous enough to allow to draw definite conclusions.

**Blüthgen J.** - Die Eisverhältnisse des Bottnischen Meerbusens [*Glaciei condiciones Sinus Bothnici*]. 7 Taf. a. T. Aus. d. Arch. Dtsch. Seew., LV, 3, 1-62. Hamburg (1936). **a - 1676**

Die meteorologischen und hydrographischen Grundlagen der Eisverhältnisse. Die Eisverhältnisse: die Eisnomenklatur, die Eisverhältnisse von 27 Stationen, die Eiswahrscheinlichkeit der finnischen und schwedischen Stationen, die Eisgebiete des Bottnischen Meerbusens, die mittlere Dauer der Vereisung im Bottnischen Meerbusen. Der Einfluss des Eises auf das Klima. Bemerkungen zur Frage der periodischen Wiederkehr strenger und milder Winter und deren Bedingungen.

**Brown E.** - Ice Breakers. [*Naves glaciei ruptrices*]. U. S. Nav. Inst. Proc., LXI, 6 (388), 855-858. Annapolis, Md. (1935). **a - 1677**

Brief note showing that the first modern ice-breaker constructed was not the « Ermak » built in 1898 by the Russian Government, but the « St. Ignace » put in service in 1888 in the United States as a ferry on the Straits of Mackinac separating the northern and southern peninsula of Michigan.

During the voyage of the S/S. « Sibirjakov » in 1932 brown-black ice has often been observed in the Laptev and Tschuktschee Seas; this colouring depends upon the occurrence of a sediment of mineral origin. Author believes this sediment to be of eolian origin and formulates some considerations to support his hypothesis.

The stations are: The Byrd Antarctic Expedition Station at Little America, Antarctica, 1929-30; The United States Polar-Year Station at Barrow, Alaska 1932-33; and the Canadian Polar-Year Station at Chesterfield, Northwest Territory, Canada, 1932-33.

**Dijk** (van) **G.** - Measures of Terrestrial-Magnetic Activity [*Activitatis magneticae terrestris mensurationes*]. 3 tables. Terr. Magn. XL,4, 371-384. Baltimore, Md. (1935). **a - 1740**

Comment of Professor Bartels' paper Terrestrial-magnetic activity and its relation to solar phenomena (S.: Terr. Magn., XXXVII, 1-52, 1932, and XXXIX, 1-4, 1934), in which Prof. Bartels states, that a break in the homogeneity of the international character-figures in recent years is discovered and where it appears that by recent years especially the year 1930 is meant. Mr. van

Dijk presents evidence that the discrepancy between C (international character-number) and $u$ (or $u$ 1-measures of magnetic activity) especially for the year 1930, may not be due to a break in the homogeneity of C, and stresses the usefulness of the international character–figure C as a measure of magnetic activity not only for intervals of days and weeks, but also for months and years. The paper is followed by « Remarks on Doctor Van Dijk's Paper » by J. Bartels and by a Note of « The Magnetic Character of the Year 1934 and the Numerical Magnetic Character of Days 1934 » (2 tables), by J. van Dijk.

**Eickelberg E. W.** - Need for More Detailed Magnetic Observations Shown by Increasing Application of Results [*Applicatio resultatuum deductorum ab observationibus magneticis necessarias reddit observationes particulariores*]. Nat. Res. Counc., Amer. Geoph. Un. Trans., 16th Ann. Meet., Apr. 25-26, 1935, I, 168-171. Washington D. C. (1935). **a - 1741**

Author emphasizes the importance of magnetic observations and gives some examples of their practical usefulness; their practical use indicates the need of a more detailed magnetic survey, which would add greatly to the purely scientific knowledge in furthering the studies of the Earth's magnetism which is so intimately connected with aurorae, earth-currents, sunspots, cosmic rays, and communication of the radio, telephone, and telegraph.

**Ennis C. C.** - Correlations of Auroral and Magnetic Activity at Little America, First Byrd Antarctic Expedition [*Correlationes inter activitatem magneticam et auroram australem in* Little America. *Prima expeditio Antarctica a* Byrd *peracta*]. 1 fig., 1 table, Nat. Res. Counc., Amer. Geoph. Un., Trans. 16th Ann. Meet., Apr. 25-26, 1935, I, 165-166. Washington D. C. (1935). **a - 1742**

Purely statistical analysis made in order to contribute to the study of the possible relationship between the aurorae and magnetic disturbances. The A. states that the data obtained are not sufficient for definite and specific conclusions concerning auroral effects on the Earth's magnetism.

**Weinberg B. P. & Weinberg K. B.** - The Period of Secular Variation of Magnetic Declination [*De variatione saeculari declinationis magneticae*]. (In Russ., Engl. Summ.). 3 tables. Bull. Acad. Sc. URSS, Cl. Sc. Mathém. & Nat., 6/7, 927-932. Leningrad (1935). **a - 1795**

The questions concerning the value of the period of secular variation of the declination and of its being the same or different for different regions have not yet received a definite solution. In this paper the authors make an attempt to revise these questions using newly collected data concerning ancient observations made in the USSR and in the Arctic, and applying methods of investigation different from those used in the past.

**Department of Terrestrial Magnetism** - Exhibit of the Department of Terrestrial Magnetism of the Carnegie Institution of Washington. **An.** - Magnetic Measurements - Mesures magnétiques [*De magneticis mensurationibus*]. In Engl. & French). Int. Hydrogr. Bull. - Bull. Hydrogr. Int., III, 61. Monaco (1935). **a - 1801**

Information on a book edited by Professor L. Slaucītājs and sent to the International Hydrographic Bureau, containing a summary of all the material concerning magnetic observations made in Latvian territory, the data of which are scattered throughout a large number of publications.

**An.** - Magnetic Charts - Cartes magnétiques [*Tabulae magneticae*]. Int. Hydrogr. Bull. - Bull. Hydrogr. Int., IV, 94. Monaco (1935).

( — ) See: « Int. Hydrogr. Bull. », II, 1935, p. 43. **a - 1802**

List of a new series of magnetic charts published by the Hydrographic Office, Washington for the year 1935.

## Gravitas.

**Ballarin S.** - Effetto dell'ellissoidicità della terra nelle riduzioni delle misure di gravità [*De Terrae forma ellipsoidi eiusque effectu in reductionibus mensurarum gravitatis*]. Boll. Com. Geod. e Geof. C. N. R., ser. II, 2, 81-84. Milano (1935). **a - 1803**

Si mostra che è sempre trascurabile la correzione da portare alle formule di riduzione delle misure di gravità calcolate per la sfera, per tener conto della configurazione ellissoidale della Terra.

**Cassinis G.** - Questioni di gravimetria [*Quaestiones gravimetricae*]. (Estratto dai Rendiconti del Seminario Matematico e Fisico di Milano). Pubbl. Ist. Topogr. e Geod., 10, 43 pp. Milano (1935). **a - 1804**

Nella prima parte si espongono alcuni tra i progressi conseguiti nell'ultimo decennio nella determinazione dei valori dell'accelerazione della gravità e della direzione di questa, nonchè delle variazioni dei diversi elementi connessi con la gravità. Nella seconda parte viene accennato ai metodi per risolvere il problema fondamentale della geodesia e ai calcoli per la riduzione al geoide delle misure di gravità e delle deviazioni locali, con particolar riguardo alle teorie isostatiche. Si espongono infine i risultati fin qui ottenuti per l'Italia meridionale e mari adiacenti.

**Cassinis G.** - Relazione preliminare sulla seconda Crociera gravimetrica in sommergibile nel Mediterraneo [*Relatio prior de secunda navigatione gravimetrica in navi submergibili per Mare Mediterraneum*]. SIPS (Atti Soc. It. Prop. Sc.), II, 1, 48-50. Roma (1936). **a - 1805**

Sulla crociera del Somm. « De Geneys » per il completamento della rete del 1931. Le osservazioni eseguite. L'A. conta di poter dare dei risultati in breve tempo. Importanza delle ricerche specialmente nell'Egeo, ove si posseggono pochi dati.

**Cassinis G. & De Pisa M.** - La crociera gravimetrica del R. sommergibile « Vettor Pisani ». Anno 1931 [*Navigatio gravimetrica R. navis submergibilis* « Vettor Pisani ». *A. 1931*]. 66 pp. Tip. Ist. Idrogr. R. Marina. Estr. dagli Ann. Idrogr., III. Genova (1935). **a - 1806**

Organizzazione e itinerario - Strumenti - Cronometri e loro andamento - Osservazioni gravimetriche. Durate di oscillazione osservate - Elementi di riduzionè e riduzione delle osservazioni - Quota di navigazione e profondità del mare; Rotta; Velocità; Correnti - Valori osservati e ridotti della gravità - Posizioni geografiche; anomalie - Precisione delle determinazioni - Considerazioni riassuntive.

**Dietrich G.** - Die Ergebnisse der holländischen Schwereexpeditionen 1926-1932 [*De resultatibus ex navigationibus ab Hollandesibus peractis*

*ad maris gravitatem studendam, ab A. 1926 ad A. 1932*]. 1 Karte. Naturwiss., XXIV, 25, 395-397. Berlin (1936). **a - 1807**

Uebersicht und Besprechung der von Vening-Meinesz auf holländischen U-Booten in Ostindien auf den Reisewegen dorthin über Panama und Suez und im Atlantischen Ozean ausgeführten Untersuchungen.

**Forbush S. E.** - Gravity Determinations on the « Carnegie » [*Gravitatis determinationes in navi* « Carnegie »]. Proc. Fifth Pacific Sc. Congr. 1933, II, 887-893. Victoria and Vancouver B. C. Canada. Toronto & London (1934). **a - 1808**

**Gulotta B.** - Sullo spoglio dei fotogrammi gravimetrici [*De inspiciendis photogrammatis gravimetricis*]. Boll. Com. Geod. e Geof. C. N. R., ser. II, 2, 85-97. Milano (1935). **a - 1809**

L'Autore, dopo aver richiamato brevemente un metodo da lui precedentemente proposto, per lo spoglio dei diagrammi fotografici delle oscillazioni dei pendoli gravimetrici, ed averne confrontato teoricamente la precisione con quella del metodo comunemente impiegato, ne fa una applicazione pratica i cui risultati, d'accordo con le previsioni teoriche, mostrano che esso può dare una precisione notevolmente più grande.

**Heyl P. R.** - The Absolute Value of Gravity at Washington [*De gravitatis* Washington *valore absoluto*]. 1 table. Nat. Res. Counc., Amer. Geoph. Un., Trans. 16th Ann. Meet., Apr. 25-26, 1935, I, 60-61. Washington D. C. (1935). **a - 1810**

Account of the results of the absolute determination of gravity at the U. S. National Bureau of Standards which have been practically completed, and its comparison with the Potsdam determination.

**Lejay P.** - Nouvelles déterminations de la gravité au Tonkin, au Laos et en Annam [*Gravitatis determinationes in* Tonkin, Laos *et* Annam]. 2 tabl. C. R. Acad. Sc., CCII, 5, 362-365. Paris (1936). **a - 1811**

Bref commentaire d'un tableau donnant, pour 55 stations nouvelles, la valeur de la gravité obtenue à l'aide du gravimètre n° 42 et résultats de plus de 14 déterminations de contrôle, en des points où la gravité avait été déterminée antérieurement.

**Lejay P.** - Carte gravimétrique de l'Indochine [*Tabula gravimetrica Indosinensis*]. 1 carte. C. R. Acad. Sc., CCII, 8, 609-612. Paris (1936). **a - 1812**

L'A. illustre une carte, reproduite dans le texte, qui a été dressée par suite de la mesure de la gravité en Indochine sur 97 stations; cette carte, malgré quelques inévitables lacunes, est assez complète pour faire ressortir les caractères généraux de la pesanteur sur tout le territoire de l'Indochine.

**Lejay P. & Tsang Hung Chi** - Carte gravimétrique du Sud-Ouest de la Chine [*Charta gravimetrica regionis Sinensis sud-occidentalis*]. 1 carte, 2 tabl. C. R. Acad. Sc., CCI, 8, 445-447. Paris (1935). **a - 1813**

Quelques remarques explicatives à la carte reproduite dans le texte et qui représente les anomalies de Bouguer, par rapport à l'ellipsoïde international. Sur cette carte figurent des stations des campagnes des AA. de 1934, et quelques stations de l'Indochine qui feront l'objet d'une prochaine publication.

**Marti P.** - Sur la croisière gravimétrique du sous-marin « Fresnel » dans la partie nord-ouest du Bassin Méditerranéen en 1933-1934 [*De navigationis gravimetrica navis submergibilis* « Fresnel » *in regionem nordoccidentalem Maris Mediterranei ab A. 1933 ad A. 1934*]. 1 fig. C. R. Acad. Sc., CCI, 22, 1019-1020. Paris (1935). **a - 1814**

Note avec croquis sur la différence de la pesanteur observée et de la pesanteur normale selon les stations du « Fresnel » en 1933–34 et celles du « Vettor Pisani » en 1931. Voir rapport détaillé dans le Compte rendu du Comité national français de Géodésie et Géophysique 1933, 1934 et 1935.

**Albani D.** - Variazioni di spiaggia e fenomeni bradisismici in Italia [*De variationibus orarum maritimarum deque phaenomenis bradisysmicis in Italia*]. Atti Soc. Ital. Progr. Sc. (XXII Riun. Napoli, II, ottobre 1934, 591-599. Roma (1935). **a - 1822**

Si riscontra una certa concordanza tra variazioni di spiaggia e lente variazioni di livello tra la terraferma e il mare: per cui a movimenti di sommersione di coste rocciose corrisponderebbero ritiri nelle linee delle spiagge che ad esse si appoggiano, mentre avanzamenti di spiaggia si verificherebbero là dove lenti movimenti di emersione sarebbero tuttora in atto. Il fenomeno di ritiro, che si manifesta oggi nella maggior parte delle spiagge italiane, potrebbe essere posto in relazione a lenti movimenti di sommersione riscontrabili su molti tratti di coste alte, i quali potrebbero, insieme ad altri importantissimi agenti naturali ed artificiali, determinare, o quanto meno aggravare, il fenomeno di ritiro suddetto. [A.].

**Flores T.** - Las invaciones bruscas del mar a los litorales Mexicanos [*De rapidis invasionibus maritimis in litoribus Mexicanis*]. 1 carta. Un. Géod. & Géophys. Int., Ann. Comm. Etude Raz de Marée, 4, 94-99. Paris (1934). **a - 1826**

Descripción de las invaciones bruscas o anormales a los litorales mexicanos por el mar que han estado casi siempre en relación más o menos directa con los efectos de los grandes tremblores de tierra que con tanta frecuencia se sienten en el pais. En la Carta adjunta están señaladas las tres zonas que se distinguen en la Republica por su diferente grado de frecuencia sismica y en ella pueden verse algunas de la localidades que se citan en esta información.

**Fontserè E.** - Nota sobre la profunditat dels seismes catalans [*Nota de profunditate terrae motuum Catalanorum*]. Mem. 14 pp. Acad. Cienc. i Arts. III Epoca XXV vol. 7. Barcelona (1935). **a - 1827**

**Fukutomi T.** - On Crustal Deformations in Southern Idu Peninsula [*De corticis terrestris deformationibus in meridionali paeninsula* Idu]. 11 figs., 4 tables. Jap. Journ. Astron. & Geoph., XII, 3, 279-291. Tokyo (1935). **a - 1828**

Past upheavels of the sea coast in southern Idu Peninsula. Time of the later crustal deformation. Comparison of ancient and later (recent) crustal deformation. The earthquake associated with the crustal deformation in question.

**Heck N. H.** - List of Seismic Sea Waves [*Elenchus undarum sysmicarum idest maris motuum*]. 1 list. Un. Géod. & Géophys. Int. Ann. Comm. Etude Raz de Marée, 4, 20-41. Paris (1934). **a - 1829**

List of 224 tidal waves compiled from many sources with some information concerning the earthquakes they were connected with. Bibl.

**Heck N. H.** - Progress in Seismology of United States Coast and Geodetic Survey and Cooperating Institutions [*De progressibus in opera sysmologica ad* U. S. Coast and Geodetic Survey, *institutionesque affines pertinentia*]. Nat. Res. Counc., Amer. Geoph. Un., Trans. 16th Ann. Meet., Apr. 25-26, 1935, 96-99. Washington D. C. (1935). **a - 1830**

Teleseismic work. Cooperators furnishing records for interpretation. Earthquake information. Recording of strong earth-quake motion. Records of interest during last year. Instrumental development. Shaking-platform test. Crustal movements. Work which might be carried out.

**Imamura A.** - Some illustrations of the Effect of the Sanriku Tunami of 1933 [*Effectus maris motuum in* Sanriku *A. 1933*]. 5 pls. Un. Géod. & Géophys. Int., Ann. Comm. Etude Raz de Marée, 4, 63-66. Paris (1934). **a - 1831**

Effects of the San-Riku tunami at Kamaisi, Tôni-Kozirahama, Tarô-Mura, Ryôisi, Hunakosi, Atumari, Tadaide and Matusaki-Tomari on the Pacific coast of Japan.

**Katô Y.** - Magnetic Disturbance in the Seismic Area of the Semi-destructive Siduoka Earthquake of July 11, 1935 [*Perturbationes magneticae in area sysmica terrae motus semidestructorii in* Siduoka *die 11 Julii 1935*]. 11 figs., Proc. Imp. Acad. XII, 4, 91-92. Tokyo (1936). **a - 1832**

**Kishino-Uye F.** - Some Notes on the Sanriku Tunami in 1933 [*De* tunami *in* Sanriku *regione A. 1933*]. (In Jap.) Disin, 5, 760-763. Tokyo (1933). **a - 1833**

**Kuenen Ph. H.** - Contributions to the Geology of the East Indies from the Snellius Expedition [*Contributiones in studendam geologiam Indiarum Orientalium per expeditionem* « Snellius ». *Pars Ia*]. 46 figs. Leidsche Geol. Meded. VII, 273-331. Leiden (1935). **a - 1834**

Sketches and descriptions of several volcanic islands. A special chapter by Koomans is dedicated to the petrology of the East Indian volcanoes.

**Lacoste J.** - Remarques au sujet du premier mouvement du sol lors des tremblements de terre intéressant quelques régions européennes [*Observationes circa terreni priorem motum terrae mo-*

*tibus perdurantibus in quibusdam regionibus europaeis*]. C. R. Acad. Sc., CC, 25, 2106-2108. Paris (1935). **a - 1835**

L'A. étudie les premiers mouvements du sol au cours des séismes qui se sont produits depuis le 1 Juin 1923 jusqu'au 1 Juin 1935 dans la vallée du Rhin, la Forêt Noire, la Suisse, l'Italie, l'Autriche et la Yougoslavie et formule quelques conclusions, se référant, en particulier, à la surrection des Apennins (dans la région de Bologne) qui continuerait encore de nos jours, tandis que dans la région d'Udine et sur la côte italienne de l'Adriatique il y a tendance à l'effondrement.

**Lazurkin E. M.** - On the Seismic Character of the Ust-Lena Harbour District [*De peculiaritate sysmica portus* Ustj-Lena]. Bull. Arct. Inst., V. 12, 428-429, 462-463. Leningrad (1935). **a - 1836**

After recalling the attention to the fact that Tixy Bay has actually the right to be called the Ust-Lena Harbour, author emphasizes the seismic character of the region around it, which is in entire accordance with the geological phenomena that in the past few years have been recorded by him and other investigators in the Kharaulakh mountains, e. g. the presence of extremely young tectonics expressed in the vast disturbances intersecting the country in a NW direction and still reflected in its relief.

**Malladra A.** - Les raz-de-marée ou tunamis dans le Golfe de Naples [*De* tunamis *seu gallice* raz-de-marée *in Sinu Neapolitano*]. Bull. volcan. VI, Sept. Naples (1933). **a - 1837**

Etude des raz-de-marée accompagnant les éruptions du Vésuve, en se basant sur descriptions de l'histoire.

**Nagaoka H.** - The Ellipsoidal Geoid and the Distribution of Seismic Centres and Volcanoes [*De geoide ellipsoidali deque distributione centrorum sysmicorum et vulcanicorum*]. Proc. Imp. Acad., IX. Tokyo (1933). **a - 1838**

Positions of great volcanoes and seismic centres. Their distribution in zones of the neighbourhood of meridians passing through the axes of the equatorial ellipse.

**Nakamura S. T.** - The Geophysical Observations of the Tunami (Tidal Waves) on March 3, 1933 [*Observationes geophysicae de undis aestuosis die 3 Martii 1933*]. Zihô Saito Grat. Found, 88, 1-12 (?) (1934). **a - 1839**

Seismological, magnetic and electric data obtained in the Mukaiyama Observatory as regards the earthquake which was accompanied by the tunami. It was found that magnetic dip at Sendai increased with a considerable rate from 51°52' in August 1933, when the regular observation began in the observatory, to its maximum value 52°01' in December 1933. About two months after the maximum value was attained, the earthquake occurred. After the earthquake, the secular change of dip recovered its general tendency of gradual decreasing. Corresponding anomalous change in horizontal component is also noticed. It was found that such an anomalous dip occurred all over the eastern part of North-East Japan. A comparison is made between the data collected and those obtained by A. Takanadate and by the Hydrographic Department of the Imperial Navy in the case of the 1896 tunami. (Author).

**Nakano M. & Nakagawa J.** - Propagation Path of Sea Waves originated by Earthquakes (Tunami) [*De undis marinis a terrae motibus excitatis earumque propagatione*]. (In Engl.). Geophys. Mag., Sept., 215-221. Tokyo (1935). **a - 1840**

Deduction of a general expression for the path of such a wave on the basis of the results of the earthquake of March 3, 1933 recorded at Tukihama (Sanriku).

**Nasu N.** - Errors in the Seismic Triangulation [*De erroribus in triangulatione sysmica*]. 15 figs., 7 tables. Jap. Journ. Astron. & Geoph., XII, 3, 245-278. Tokyo (1935). **a - 1841**

Seismic triangulation. - Observation of the Tango after-shocks. (1) Errors in determining the duration of the preliminary tremors. (2) Errors in determining k (constant factor) in the formula D = kt (D - focal distance; t - duration of preliminary tremors). (2) Errors in the position of seismic focus due to errors in the durations of the preliminary tremors.

This paper has been prepared from a previous paper of A. in order to serve for investigations on the Tunamis caused by the typhoon that attacked the Kwansai district of Japan on September 21, 1934. It contains a correction to the ordinary formula for the steady value of surface elevation in shallow water and deals also with the development of tunamis and seiches under the condition of bottom slip in the case of varying causal action and in those of progressive action.

**Kluege G.** - Results of Biological Work on Cape Zhelanije [*Resultatus ex operibus biologicis in Promunturio* Zhelanije]. (In Russ.; Engl. Summ.). Bull. Arct. Inst., VI, 4, 170-172, & 195. Leningrad (1936). **a - 21**

This investigation shows the abundance of the bottom fauna of the Pospelov Bay near the cape, which is situated at the juncture of the Barents and Kara Seas and attracts for the richness of its plankton enormous quantities of fish, especially in autumn for spawning.

**Le Danois E.** - Plateau Continental Atlantique (Atlantic Slope). 1935 [*Relatio de area Plateae continentalis atlanticae A. 1935*]. 1 table, Cons. Expl. Mer, Rapp. & Pr.-Verb, C, 2ème partie, 44-45. Copenhague (1936). **b - 22**

Tableau sur les croisières effectuées pour chaque mois. France. Grande-Bretagne. État-Libre d'Irlande. Espagne et Portugal.

**Le Danois E.** - Comité Atlantique 1935 [*Comitatus Atlanticus A. 1935*]. Cons. Expl. Mer, Rapp. & Pr.-Verb., C, 2ème partie, 45. Copenhague (1936). **b - 23**

Brève note sur la création du Comité et la prochaine séance.

**Le Danois E.** - Océanographes au travail [*Oceanographi quidam laborantes*]. 6 figs., Mer et Outre Mer, II, 5, 50-53. Paris (1936). **b - 24**

Description de la vie à bord du navire « Prés. Théodore-Tissier » et des recherches poursuivies sur le fond de pêche. Échantillons d'eau rapportés par la bouteille à renversement, la récolte du plancton par le filet cylindrique et le grand filet vertical, la mensuration des poissons capturés.

**Malpas A. H.** - Administration Report of the Marine Biologist for the Year 1935 [*Relatio ad administrationem pertinens redacta a praefecto biologiae marinae pro A. 1936*]. Ceylon Govmt. Press, IV, 3-9. Colombo (1936). **b - 25**

Pearl fishery (Gulf of Mannar). Windowpane oyster fishery (Lake Tamblegam). Chank fishery. The local fishing industries. Miscellaneous.

**Mertens R.** - Der neue Wal-Saal des Natur-Museums Senckenberg [*Agitur de sede nova in qua exponitur exemplar speciei « Balaenoptera physalus » in museo Senckenbergensi pro historia naturali*]. 17 Abb., Natur u. Volk, LXV, 12, 574-586. Frankfurt a. M. (1935). **b - 26**

Beschreibung des oben genannten Gerippes (Gesamtlänge 24 m) und anderer naheverwandten Wale; Präparate von Keimlingen und Haut-Schmarotzern, sämtliche im Museum.

**Mill H. R.** - Obituary Dr. J. B. Charcot [*Necrologia*]. Nature, CXXXVIII, 3493, 608-609. London (1936). **b - 27**

Biography and explorations.

**Murray Luck J.** - The American Association for the Advancement of Science. The Seattle Meeting of the Pacific Division [*Relatio de consessu* Seattle *habito a Divisione pro Oceano Pacifico Associationis Americanae rebus scientificis colendis*]. Science, LXXXIV, 2172, 149. New York (1936). **b - 28**

Report on the Oceanographic Society of the Pacific: Papers.

**Paspalew G. W.** - Bericht über die dreijährige Tätigkeit (1932-1935) der biologischen Meeresstation und Aquarium in Varna, Bulgarien [*Relatio de triennali activitate (1932-1935) Stationis biologiae marinae et aquarii urbis* Varna *in* Bulgaria]. (In Bulg., Dtsch. Rés.). 9 Abb., Arb. Biol. Meeresstat. Schwarz. Meer Varna, Bulg., 6, 1-24. Sofia (1936). **b - 29**

Aufgaben. Wissenschaftliche Laboratorien. Heutiger Zustand der Station: Personal, Boote, Apparate. Bibliothek. Aquarien.

**Peau E.** - Observations océanographiques faites de Barry (Angleterre) à l'Archipel de Kerguelen (12 Octobre-2 Décembre 1923). (A suivre). [*Observationes oceanographicae confectae e* Barry (*in Anglia*) *usque ad archipelagus* Kerguelen (*a die 12 Octobris ad diem 2 Decembris 1923*)]. Bull. Soc. Amis Inst. Océanogr. du Havre, XVII, 50, 2-4. Le Havre (1936). **b - 30**

Extrait du journal tenu au bord. Conditions météorologiques, température; animaux marins observés.

**Pohl L.** - Louis Boutan (1859-1934). [*Necrologia*]. Inst. Océanogr. Indochine, Stat. marit. Cauda, 31, 7-14. Saigon (1936). **b - 31**

Notice nécrologique sur L. Boutan, ancien chef de la Mission Scientifique permanente de l'Indochine. Ses études de biologie marine dans le Détroit de Torrès; la mission dans la Mer Rouge; ses recherches sur les fonds marins environnant Banyuls-s-Mer ainsi que de la faune et de la végétation marines; sa découverte d'un procédé de culture des perles fines par la greffe épithéliale dans le manteau des Mollusques; son activité en général.

**Poteriayev E. A.** - Rapporto sull'attività della Stazione Biologica Arnoldi a Novorossiysk [*Relatio de activitate stationis biologicae nomine* Arnoldi *in* Novorossiysk]. (In russ.). 4 figs. Works Arnoldi Biol. Stat., II, 1, 1-16. Novorossiysk (1936). **b - 32**

Pubblicazioni uscite dal 1926. Studenti che lavorano nella stazione. Attività. Spedizioni. Sedute e conferenze.

**Remotti E.** - Raffaele Issel [*Necrologia*]. 1 fig., Boll. Mus. e Lab. Zool. e Anat. Comp., XVI, 91, 1-22. Genova (1936). **b - 33**

L'attività scientifica del prof. Issel, titolare della Cattedra di Zoologia all'Università di Genova. Ricerche sulle praterie dei fondi litorali marini, sulla biologia delle pozze di scogliera, sulla fauna di tipo abissale con ricostruzione della biocenosi del fondo a *Nephrops norvegicus*. Il complesso degli studi sul plancton.

**Richard F.** - Notice biographique sur le professeur Louis Joubin [*Notitiae biographicae professoris* Joubin]. 2 tabl., Bull. Inst. Océanogr., 707, 1-23. Monaco (1936). **b - 34**

Etudes des collections du « Travailleur », « Talisman », « Hirondelle », « Princesse Alice », « Discovery », « Belgica », « Siboga », « Dana » etc. Il s'est dédié particulièrement aux recherches sur les Céphalopodes, Brachiopodes, Némertiens et Chétognathes; il s'est aussi occupé de la distribution géographique des coraux et de certains animaux ainsi que des problèmes en rapport au développement de la pêche.

**Sandor W.** - A Roscoffi Tengerbiológiai intézet [*Institutum marinum biologicum urbis* Roscoff]. (In Ungh.). 2 fig., A Tenger, XXVI, 7/8, 77-80. Budapest (1936). **b - 35**

L'opera di Lacaze-Duthiers. I lavori compiuti nella stazione. La pubblicazione dei « Travaux de la station biologique de Roscoff ».

**Serène R.** - Rapport sur le fonctionnement de l'Institut Océanographique de l'Indochine pendant l'année 1935-1936 [*Relatio de ratione Instituti Oceanographici Indosinensis pro A. 1935-1936*]. Tabls., 7 pls., Inst. Océanogr. Indochine, Stat. marit. Cauda, 32, 3-22. Saigon (1936). **b - 36**

Personnel. Recherches d'océanographie biologique sur le plancton et sur la faune générale, celle du littoral comme celle des fonds marins. Recherches techniques sur la pêche. La pisciculture et l'ostréiculture. Publications.

**Siedlecki M.** - Salmon and Trout Committee 1935 [*Comitatus Salmone et Trutta studendis A. 1935*]. Cons. Expl. Mer, Rapp. & Pr.-Verb., C, 2ème partie, 106-111. Copenhague (1936). **b - 37**

Denmark. England. Finland. France. Germany. Irish Free State. Latvia. Poland. Free port of Danzig. Portugal. Scotland. Spain. Sweden. General reports, biological investigations, propagation, marking etc.

**Smith D. W.** - Leopoldo A. Faustino [*Necrologia*]. Science, LXXXIII, 2146, 152. New York (1936). **b - 38**

Obituary on Dr. L. A. Faustino, assistant director of the Bureau of Science in the Philippines, well known geologist and paleontologist. His researches embrace especially corals.

**Stejneger L.** - Report of the United States National Museum 1935. Department of Biology [*Relatio Musei Nationalis Americae Statuum Foederatorum. A. 1935. Sectio biologica*]. Rep. U.S. Nat. Mus. 1935, 27-44. Washington D. C. (1936). **b - 39**

Fishes, marine invertebrates, mollusks, corals, echinoderms: new accessions, cataloging, scientific workers.

**Sund O.** - North-Eastern Area 1935 [*Relatio de area Nord-orientali A. 1935*]. Cons. Expl. Mer, Rapp. & Pr.-Verb., C, 2ème partie, 37-39. Copenhague (1936). **b - 40**

Germany (market measurements, fishery, publications). - Norway: Work at sea and hydrography, plankton, fishing technique, biology of fish, etc., publications. - Scotland: herring.

Denmark, Faroes, Iceland: Cod, herring, plankton, bottom-sampling, hydrography, prawns. Denmark Strait. Greenland. England. Germany. Scotland. Literature.

**Thompson T. G.** - The Oceanographic Laboratories of the University of Washington [*Laboratoria oceanographica ad Universitatem pertinentia urbis* Washington]. Univ. Washington Publ. Oceanogr., suppl. ser. No. 46, (The collect. Net., X, 10), Seattle, Wash. (1935). **b - 42**

The Seattle laboratory, the Field Laboratories at Friday Harbor and the research motor vessel « Catalyst »: descriptions; cooperation with other institutions; members; researches.

**Zubkov A.** - Work of the Economic-Biological Section of the Arctic Institute in 1936 [*De operibus peractis a Sectione oeconomico-biologica Instituti Arctici A. 1936*]. (In Russ. & Engl.). Bull. Arct. Inst., VI, 5, 207-208, 226-227. Leningrad (1936). **b - 43**

Organization of local branches for scientific investigation-zonal economic-biological stations. Their program.

**Biological Board of Canada** - Publications [*Scripta*]. Ann. Rep. Biol. Bd. Canada 1935, Appendix VI, 49-55. Ottawa (1936). **b - 44**

General information. Alphabetical list of papers published during 1935 on the work of the Biological Board.

**Bollettino di Zoologia** - Raffaele Issel [*Necrologia*]. Boll. Zool., VII, 5/6, 221-222. Napoli (1936). **b - 45**

Necrologio del prof. Issel, titolare della cattedra di zoologia della R. Università di Genova, spentosi il 7 ottobre 1936 in quella città. Sua attività scientifica.

**Conseil Permanent International pour l'Exploration de la Mer** - Reports of the Proceedings of the Special Plankton Meeting Held on May 27th, 1935, at Copenhagen and of the Special Meeting, Held at Videnskabernes Selskab's Premises on May 31st, 1935 [*Relatio de operibus confectis perdurante consessu speciali de* Plankton, *Hauniae habito, die 27 Mensis Maii, 1935. Agitur etiam de speciali consessu Societatis Scientiarum, habito die 31 mensis Maii, 1935*]. Cons. Expl. Mer, Rapp. & Pr.-Verb., XCV, 1-61. Copenhague (1935-36). **b - 46**

The contents of this volume is as follows: A review of some aspects of zooplankton research, by F. S. Russell. Further investigations upon the photosynthesis of phytoplankton by constant illumination by H. Höglund and S. Landberg. The continuous plankton recorder: a new method of survey, by A. C. Hardy. Die Ergebnisse der internationalen hydrographischen Beobachtungen im Kattegat im August 1931, von B. Schulz.

**Conseil Permanent International pour l'Exploration de la Mer** - Procès-verbaux des Réunions [*Relationes Consessuum*]. (En franç. et en angl.). Cons. Expl. Mer, Rapp. & Pr.-Verb., C, 1, 1-62. Copenhague (1936). **b - 47**

Liste des délégués à la 29ème Réunion. Recommandations du Comité Consultatif; Programmes et rapports des Comités des Secteurs (Nord-Est; Nord-Ouest; Atlantique; Baltique; de la Mer du Nord et du Secteur de transition). Programmes et rapports des Comités: Hydrographique, Statistique, du Plancton, du Saumon et de la Truite, de la Baleine. Règles concernant les Publications.

**Conseil Permanent International pour l'Exploration de la Mer** - Rapport Administratif (1935-1936), Appendices [*Relatio ad administrationem pertinens (1935-1936). Appendices*]. Cartes, fig., Cons. Expl. Mer, Rapp. & Pr.-Verb., C, 2ème et 3ème partie, 1-25. Copenhague (1936). **b - 48**

Comptes rendus, séances, travail du Bureau Central, Publications etc. Rapports des Comités des Secteurs et des Comités Scientifiques. - Appendices: Six travaux sur courants, plancton et harengs (en anglais).

**Instytut Imienia Nenckiego** - Stacja morska w Helu [*Statio maritima in* Hel]. 2 pl. h. t., Inst. im. Nenck. Towarz. nauk. Warsz. 1928-1935, 60-65. Warszawa (1936). **b - 49**

Fondation, description, travaux et publications.

**Lancashire Sea-Fisheries Laboratory** - James Johnstone Memorial Volume [*Volumen redactum in memoriam Jacobi* Johnstone]. 348 pp., Univ. Press. Liverpool (1934). **b - 50**

This volume has been prepared to commemorate the death of James Johnstone. It contains articles of different authors dealing with physical and biological phenomena of the sea.

**Marine Biological Association of the United Kingdom** - Report of the Council for 1935 [*Consilii relatio pro A. 1935*]. Journ. Mar. Biol. Ass., n. ser., XXI, 1, 445-471. Plymouth (1936). **b - 51**

The Council and the officers. The laboratory. The Aquarium. The ship and the motor-boat. The staff. Investigators. The scientific work of the staff. The library. Publications. Finance. Annual subscriptions.

**Museum of Comparative Zoology at Harvard College** - Annual Report of the Director for 1935-1936 [*Relatio annua a Directore redacta A. 1935-1936*]. Ann. Rep. Mus. Comp. Zool. Harvard College for 1935-1936, 1-67. Cambridge U.S.A. (1936). **b - 52**

Reports on Marine Invertebrates, Oceanography, Mollusks, Fishes, fossil Echinoderms, Coelenterates, Sponges and Worms, Crustaceans, Publications.

**Scottish Marine Biological Association** - Annual Report 1935-36 [*Relatio annua 1935-36*]. 24 pp., Scott. Mar. Biol. Ass., Ann. Rep. 1935-1936. Glasgow (1936). **b - 53**

Office-Bearers 1936-37. Government grant. Research. Educational work. Workers at the station. Publications. Museum, aquarium and accessories, Staff, membership, subscribing bodies. Finance.

**Scottish Marine Biological Association** - Director's Report [*Directoris relatio*]. Scott. Mar. Biol. Ass., Ann. Rep., 1935-36, 6-9. Glasgow (1936). **b - 54**

Research: Herring; Plankton; Composition of the food of fish.

**An.** - Maurice Philbert [*Necrologia*]. Bull. Inst. Océanogr., 708, 16. Monaco (1936).

( — ) Bull. Lab. Marit. Dinard, XV, 8-9. Rennes (1936). **b - 55**

Notice nécrologique de M. Philbert, spécialiste dans l'étude des Hydraires.

**An.** - L'Istituto di Ricerche Biologiche di Rodi [*Institutum pro investigationibus biologicis Rhodos*]. 3 fig., Ric. Scient., Ser. 2, VII, 3/4, 1-6. Roma (1936). **b - 56**

Inizio del funzionamento di questo istituto capace di offrire agli studiosi la possibilità di dedicarsi sul posto allo studio della biologia marina in rapporto alla pesca, della fisiologia e della chimica.

# METHODICE

## Apparatus oceanographici et scientifici - Subsidia technica - Microscopia - Microphotographia.

**Chatton E. & Lwoff A.** - Techniques pour l'étude des Protozoaires, spécialement de leurs structures superficielles (cinétome et argyrome) [*Technica ad Protozoaria studenda praecipue quoad eorum structuras superficiales*]. Bull. Soc. Franç. Microsc., V, 1, 25-39. Paris (1936). **b - 57**

Notions nouvelles sur les éléments de la structure superficielle des Ciliés. Méthodes: examen du matériel vivant, fixations, colorations, les étalements dans la gélose, la micro-inclusion dans la gélose-paraffine, les imprégnations argentiques.

**Comandon** - Pour photographier les poissons [*Apparatus ad pisces photographandos*]. 10 figs., Rech. Invent., XVII, 256, 1-6. Bellevue (1936). **b - 58**

Détails techniques d'un dispositif d'éclairage pour la photographie des poissons d'un aquarium.

**Crozant (de) L.** - Nouvelles formules pour la détermination des grossissements utiles minima et maxima des objectifs de microscope [*Formulae novae ad amplitudines determinandas quoad utilitates maximas et minimas in objectivis microscopicis*]. Bull. Soc. Franç. Microsc., V, 1, 8-17. Paris (1936). **b - 59**

Examen des objectifs achromatiques à sec, grossissement des systèmes à immersion, application de la nouvelle méthode.

**Hall R. P., Johnson D. F. & Loefer J. B.** - Une méthode pour compter les Protozoaires [*Methodus ad Protozoaria numeranda*]. Trans. Amer. Microsc. Soc., LIV, 4, 298-300. Lancaster, Pa. (1935). **b - 60**

La méthode consiste dans l'utilisation d'une cellule de Sedgwick-Rafter circulaire de 1 cm³ de capacité.

**Hardy A. C.** - The Plankton Indicator. Experiments, Test, and now Ready for general Use [*Indicator planctonicus. Experientiae et comprobationes ad eum utendum*]. Fish Trad. Gaz., 12-V-34, 18-19. London (1934). **b - 61**

**Hardy A. C.** - The Continuous Plankton Recorder: A New Method of Survey [*Apparatus registrator continuus substantiae planctonicae. Investigationis ratio nova*]. 10 figs., 1 map, Cons. Expl. Mer, Rapp. & Pr. Verb., XCV, 36-47. Copenhague (1935-36).

( — ) Discovery Report 11, 457-510. London (1936). **b - 62**

Description of the construction and work of a machine, which can be towed at any required depth below the surface, and, by continually sampling, mile by mile as the ship proceeds on her course, enabling one to measure the size, density and frequency of patches, and compare the irregularity of distribution in different areas. Examples of applying the new methods and results obtained during wide and repeated surveys of the sea using the S. S. « Albatross » in June, 1932, in the North Sea, and following years.

**Krogh A. & Spärck R.** - On a new Bottom-Sampler for Investigation of the Micro Fauna of the Sea Bottom with Remarks on the Quantity and Significance of the Benthonic Micro Fauna [*Instrumentum novum ad specimina colligenda microfaunae in fundo marino jacentis. Notae adjunctae sunt de significatione microfaunae benthonicae*]. Kgl. Dansk. Vidensk. Selsk. Biol. Medd., XIII, 4, 1-12. København (1936). **b - 63**

This apparatus facilitates thorough investigations of the micro fauna on soft bottom making out communities on a quantitative basis similar to the communities of the macro fauna described by Petersen. It will also be possible to determine the importance of the micro fauna to the metabolism at different depths and in different localities in the waters.

**Lea E. & Went A. E.** - Plastic Copies of Microscopical Reliefs, especially of Fish Scales [*Methodus reproductionis per plasticam quoad microscopicas relevationes et particulatim piscium squamas*]. 6 pls. o. t., Hvalråd. Skr. Scient. Results, Mar Biol. Res., 13, 1-18. Oslo (1936). **b - 64**

Description of a method for making copies of microscopical reliefs, used in Norwegian herring investigations in 1928.

**Lejeune M.** - Sur un moyen d'isoler les microfossiles inclus dans le silex [*Quo modo liberantur microfossiles in silice praeclusi*]. C. R. Acad. Sc., CCIII, 7, 435-437. Paris (1936). **b - 65**

Cette méthode intéresse spécialement la paléo-océanographie.

**Mariani M.** - Due nuovi dispositivi di tecnica microscopica [*Apparatus duo novi pro technica microscopica*]. 4 fig., Ann. Clin. Odont., II, 114-130. Roma (1936). **b - 66**

L'A. descrive due apparecchi per la tecnica istologica (Zambelli, Torino): il primo è un vetro Jena per fissazione, lavaggio in acqua corrente, decalcificazione, disidratazione e rischiaramento senza toccare il pezzo; il secondo è una scatola per l'inclusione definitiva in paraffina che permette di ottenere anche due, tre, quattro blocchi contemporaneamente. Metodo per il raffreddamento rapido della paraffina e per il recupero del toluolo e dell'alcool puro.

**Maxia C.** - Un mezzo semplicissimo per conservare a lungo uova di riccio di mare in segmentazione [*Persimplex modus ad ova Echinorum, quae sint in segmentatione, servanda perdiu*]. Scritti Biol. racc. da L. Castaldi, X, 177-179. Cagliari (1935). **b - 67**

L'A. è riuscito a conservare per 4 anni in perfette condizioni di forma, struttura e colorito, uova di *Paracentrotus lividus* in varie fasi di segmentazione, fissandole in liquido del Pacini, diluito in acqua di mare.

**Pora E.** - Un nouvel appareil pour la contention et la saignée de nombreux Téléostéens marins et d'eau douce [*Apparatus novus ad Teleosteos marinos et ex aqua dulci continendos pro sanguinis detractione*]. 3 fig., Bull. Inst. Océanogr., 699, 1-4. Monaco (1936). **b - 68**

Par cet appareil on peut prélever du sang pur et en quantité suffisante pour les déterminations chimiques.

**Smith D. C.** - A Method for recording Chromatophore Pulsations in Isolated Fish Scales by means of a photoelectric Cell [*Methodus ad registrandas pulsationes chromatophoricas in squamis sejunctis piscium per cellulam photoelectricam*]. 1 fig., Journ. Cell. & Comp. Physiol., VIII, 1, 83-87. Philadelphia (1936). **b - 69**

# ANATOMIA ET PHYSIOLOGIA.

## Cytologia et histologia.

**Balli A.** - Le cellule a granuli cromaffini dell'intestino di *Patella vulgata* [*Cellulae cum granulis chromaffinibus, in intestino speciei « Patella vulgata »*]. Boll. Zool., VII, 1. 25-32. Napoli (1936). **b - 70**

L'A. studia le caratteristiche morfologiche ed istochimiche delle cellule cromaffini nell'intestino di *Patella vulgata*, usando vari fissativi: liquido di Regaud, formalina al 10 %, alcool, sublimato acetico, liquido Susa, liquido di Zenker. Nega l'esistenza di una qualsiasi omologia fra queste cellule e le enterocromaffini dei vertebrati.

**Biecheler B.** - Existence d'une cyclose chromatique chez les Péridiniens [*De cyclosi chromatica in Peridineis*]. C. R. Acad. Sc., CCI, 11, 503-505. Paris (1935). **b - 71**

Les observations de l'A. ont été faites sur *Peridinium balticum*, *P. sociale* et *Gyrodinium fissum*. En tâchant de reconnaître les causes de la cyclose chromatique chez ces espèces l'A. est d'opinion qu'il s'agit là d'une mise en jeu de forces physiques résultant sans doute d'échanges caryoplasmatiques. Ce qui paraît certain c'est que la cyclose chromatique est en relation avec la division du noyau.

**Bignardi C.** - Contributo alla conoscenza istochimica delle cellule testacee di *Ciona intestinalis* [*Contributio in cognoscendas ex histochemica cellulas testaceas speciei « Ciona intestinalis »*]. 1 fig., Pubbl. Staz. Zool. Napoli, XV, 2, 194-197. Napoli (1936). **a - 72**

Composizione chimica dei granuli contenuti nelle cellule testacee di *Ciona*, che devono essere costituiti da una sostanza a funzioni fenoliche, indizio di un processo di escrezione.

**Blake I. H.** - Studies on the Comparative Histology of the Digestive Tube of certain Teleost Fishes. III. A Bottom-feeding Fish, the Sea Robin (*Prionotus carolinus*) [*De histologia comparata quoad tubum digestionis aliquorum piscium Teleosteorum. III. Piscis quidam qui a fundo marino alimentum capit. Species « Prionotus carolinus »*]. 7 fig., Journ. Morphol., LX, 1, 77-102. Philadelphia (1936). **b - 73**

Effect of amount of food present in the tube on extent of mucosal folding; histological transitions from one region of the tract to another, particularly as regards epithelia; histology of peptic glands in the cardiac division of the stomach; origin and development of mucosal goblet cells; comparisons between the histology of the pyloric caeca and that of the adjacent intestine from which they arise, together with a detailed account of the histology of the former. (From A:s abstr.).

**Chadefaud M.** - Le Cytoplasme des Algues Vertes et des Algues brunes. Ses éléments figurés et ses inclusions [*De cytoplasmate Algarum. Constituentes morphologici et inclusiones*]. 33 figs., 38 pl. h. t., Rev. Algol., VIII, 1/2, 6-264. Paris (1936). **b - 74**

Morphologie comparée du plastidome des volvocales, des Protococcales, des Chlorophycées pluricellulaires, des Siphonées et des Conjuguées. Les constituants du plastidome des Chlorophycées: stroma mitochondrial, complexe pigmentaire, inclusions amylacées et carotinifères, pyrénoïdes et stigma. Le chondriome et le vacuome des Chlorophycées. Étude des éléments figurés et des inclusions du cytoplasme chez les Xantophycées et les Algues brunes; étude particulière de la « leucosine » des Chrysophytes et des « physodes » chez les Phéophycées. Le protoplasme des Algues et l'architecture du contenu cellulaire. Étude du cytoplasme fondamental. Bibl.

**Dehorne A.** - Notes histologiques sur *Sigalion*, *Nephthys* et *Sabellaria* [*« Sigalion », « Nephthys » et « Sabellaria »: Notae histologicae*]. 25 fig., Mém. Mus. R. Hist. Nat. Belgique, Sér. 2, 3, 680-700. Bruxelles (1936). **b - 75**

Présentations des particularités reconnues par l'A. dans la structure histologique de *Sigalion mathildae*, *Nephthys hombergii*, *Sabellaria spinulosa*. Chez *Sigalion* et *Sabellaria* le mésoderme syncytial si abondant représente à la fois l'ensemble des cellules d'origine du sang et l'ensemble des tissus histogénétiques. *Nephthys* représente un type intermédiaire dont les conditions sont semblables à celles des Phyllodociens.

**Duboscq O. & Tuzet O.** - Les Amoebocytes et les cellules germinales des éponges calcaires [*De amoebocytis deque cellulis germinalibus spongiarum calcarearum*]. 10 figs., Mém. Mus. R. Hist. Nat. Belgique, Sér. 2, 3, 209-226. Bruxelles (1936). **b - 76**

Observations sur les cellules germinales des Éponges hétérocoeles: *Sycon raphanus* et *Grantia compressa* et des Éponges homocoeles: *Clathrina*, *Leucosolenia*, *Leucandra*. Présence des amoebocytes éosinophiles et plusieurs sortes d'amoebocytes hyalins; ceux-ci comprennent les mégacytes qui n'ont pas de relation avec les cellules germinales tandis que les amoebocytes hyalins à gros noyau peuvent s'identifier avec les cellules germinales ou archéocystes. Les amoebocytes ont une origine indépendente, soit des cellules flagellées de la larve, soit des choanocytes de l'Éponge développée.

**Froutin, Gholam-Hossein** - Contribution à l'étude des « Rundzellen » de *Mytilus edulis* [*Contributio in studendas cellulas rotundas speciei « Mytilus edulis »*] .Bull. Soc. Zool. France, 61, 240-243. Paris (1936). **b - 77**

Analyse des « Rundzellen ». Leur développement. Recherches de Derrien, Turchini, Zacharias et Millon.

**Graupner H. & Fischer J.** - Das Tintendrüsenepithel von *Sepia* vor, während und nach der Pigmentbildung [*De epithelio in glandula nigra Sepiae, ante, inter et post pigmenti formationem*]. 5 Abb. Ztschr. f. Zellf. u. mikrosk. Anat., XXI, 329-341. Berlin (1934). **b - 78**

Mit der Pigmentbildung ist eine Steigerung des Stoffwechsels verbunden. Zwischen dem Melanin und dem Chromatin besteht, kein direkter morphologisch fassbarer Zusammenhang; ebensowenig lässt sich ein solcher zwischen Melanin und Nukleolarsubstanz erkennen. Das « Chondriom » (Turchini), bzw. Ergastoplasma, scheint bei der Pigmentbildung eine wesentliche Rolle zu spielen. (Vf.).

**Ishida J.** - Ciliated Intestinal Epithelium in Teleost [*Epithelium ciliatum intestinale in Teleosteis*]. (In Jap). Annot. Zool. Jap., XV, 2, 158-160. Tokyo (1935). **b - 79**

L'A. a observé une spermatogenèse non vraiment atypique, mais une ébauche de développement atypique qui n'aboutit pas. Description de la spermatogenèse typique et atypique. Les Hétéropodes sont de véritables Prosobranches.

**Vialli M.** - Ricerche preventive sulle cosidette « cellule a cloruri » secondo Keys e Willmer nelle branchie di anguilla [*Investigationes priores in « cellulas chloruratas », ut dicuntur, in anguillarum branchiis, secundum* Keys *et* Willmer]. Arch. Zool. It., XXII, 2, 25-31. Torino (1936). **b - 91**

L'A. studiando comparativamente le branchie di anguille, raccolte in acqua marina e in acqua dolce, trova che nelle prime sono presenti le cellule a cloruri, mentre tali elementi mancano nelle seconde. Importanza ecologica, fisiologica e anatomo comparativa del reperto - (dall'A.).

## Apparatus musculorum atque apparatus scheletricus. - Quaestio de motu. - Vesica natatoria.

**Acrivo C.** - Ueber die Neubildung von Kiemenlamellen bei Ganoiden und Teleostiern [*De nova formatione lamellarum branchialium in Ganoideis et Teleosteis*]. 2 Abb., Zool. Anz., CXIV, 101-105. Leipzig (1936). **b - 92**

Der Ausgangspunkt für die Neubildung der Kiemenlamellen ist das embryonale Bindegewebe. Diesbezüglich sind zwischen den Selachiern einerseits und den Ganoiden und Teleostiern andererseits grundlegende Unterschiede vorhanden. Während sich bei ersteren aus dem definitiven Bindegewebe ein sekundäres embryonales Gewebe bildet, das an der Neubildung teilnimmt, haben wir es bei Teleostiern und Ganoiden mit einem primären Embryonalgewebe zu tun. (Vf.).

**Bahrdt H.** - Beiträge zur Entwicklungsgeschichte der Sirenenflosse [*Contributio in studendam progressionem pinnarum in Sirenidis*]. 35 Abb., Jen. Ztschr., LXVIII, 193-276. Jena (1934). **b - 93**

Die Untersuchungen beziehen sich hauptsächlich auf die verschiedenen Embryonalstadien von *Manatus*.

**Budker P.** - Sur une ostéoclasie déterminant la chute des écailles placoïdes, ou dents cutanées des Squales [*De osteoclasia quae determinat casum in Squalis squamarum placoidalium quae etiam nuncupantur dentes cutanei*]. C. R. Acad. Sc., CCII, 6, 505-507. Paris (1936). **b - 94**

L'A. décrit un phénomène qu'il considère comme étant d'ordre général, par lequel s'effectuent la destruction et la chute des dents dermiques des squales. Il a étudié le processus de cette ostéoclasie dans toutes ses phases

chez *Catulus caniculus* (L.), mais il prétend que les différents stades qu'il décrit dans sa Note, ont été retrouvés, avec quelques variantes de détail n'affectant d'ailleurs en rien l'ensemble, chez différentes espèces des Sélaciens.

**Budker P.** - Sur la destruction et la chute des dents mandibulaires des Squales [*Destructio et casus dentium mandibularium in squalis*]. C. R. Acad. Sc., CCIII, 5, 386-387. Paris (1936). **b - 95**

L'étude a été portée sur *Galeocerdo arcticus* (Faber), trois espèces de *Carcharinus* et *Hypoprion brevirostris* Poey. L'A. est d'avis que le processus de déstruction aussi décrit ici est semblable à celui déjà constaté chez les denticules dermiques.

**Denil G.** - Qualités nautiques du poisson; méthodes locomotrices; capacités; etc. [*Piscis peculiaritates nauticae, motus rationes, capacitates, etc.*]. Ann. Trav. publ. Belgique, XXXVII, 4, 507-583; 5, 708-746. Bruxelles (1936). **b - 96**

Qualités nautiques et locomotion du poisson fuselé. L'anguille. Analyse des actions qui contrarient la nage du poisson, des résistances diverses qui lui sont opposées dans son mouvement au travers du fluide; travaux expérimentaux anciens et expériences nouvelles. Tableau des résistances dues aux vitesses comprises entre 1 et 6 m. par seconde, pour des poissons fuselés de taille allant de 10 à 120 cm. Détermination de la vitesse limite du poisson. Démonstration expérimentale de l'action de la pente sur les corps flottants.

**Edgeworth F. H.** - The Cranial Muscles of Vertebrates [*De cranii musculis Vertebratorum*]. 9 + 493 pp., 193 pls., 841 figs. Macmillan Co. New York (1935). **b - 97**

A. states that he has « attempted to give a summary of the knowledge that has resulted from investigations made during the last century and a half on comparative anatomy and embryology of cranial muscles of Vertebrates and of their motor nerves and used it to determine as far as possible the primitive cranial musculature and lower motor neurones in each of the Vertebrate phyla ».

**Fauré - Fremiet E.** - Les baguettes cornées des nageoires des Sélaciens [*De bacillis corneis pinnarum in Selachiis*]. C. R. Ass. Anat., XXX, 184-188. Paris (1935). **b - 98**

L'A. confirme les études de Krukenberg: les rayons cornés sont constitués par une substance voisine de l'élastine, appelée élastoïdine. Propriétés physiques de ces formations.

**Fontaine M.** - Le Calcium sanguin chez les Cyclostomes et les Poissons, ses rapports avec l'état d'ossification du squelette [*De calcio sanguineo in Cyclostomatis et Piscibus, eiusque correlationibus cum ossificatione scheletrica*]. Arch. Int. Physiol., XL, 374-384. Liège (1935). **b - 99**

Étude du rapport du calcium absorbable au calcium total qui, étant lié à l'état du squelette, est bas chez les Cyclostomes, un peu plus élevé chez les Sélaciens et plus fort chez les Téléostéens.

**Franz G.** - Ueber die reflektorische Regulierung des Gasgehaltes in der Schwimmblase der Fische [*De regulatione reflexa continentiae gasosae in vesica natatoria Piscium*]. Zool. Anz., Suppl. 9, 290-291. Leipzig (1936). **b - 100**

Vorläufige Mitteilung. Analyse der reflektorischen Vorgänge des Gasspuckens um eine Methode zur Klärung einiger Fragen der Schwimmblasenphysiologie zu erhalten.

**Friedrich H. & Langeloh H. P.** - Untersuchungen zur Physiologie der Bewegung und des Hautmuskelschlauches bei *Halicriptus spinulosus* und *Priapulus caudatus* [*Investigationes in physiologiam motus et in apparatum muscularem pellis in speciebus « Halicriptus spinulosus » et « Priapulus caudatus »*]. **Garrault H.** - Développement des fibres d'élastoïdine (actinotrichia) chez les Salmonides [*De progressione quoad fibras elastoidineas in Salmonidis*]. 18 fig., Arch. Anat. Microsc., XXXII, 1, 105-137. Paris (1936). **b - 102**

Les fibres en question sont les raies cornées qui appuient les nageoires des embryos de poisson et qui subsistent chez les Sélaciens adultes et chez certains Téléostéens. Structure et formation des fibres.

**Gray J.** - Studies in Animal Locomotion. IV. The Neuromuscular Mechanism of Swimming in the Eel [*Inquisitiones de animali locomotione. IV. Mechanismum neuromusculare quoad Anguillarum natationem*]. Journ. Exper. Biol., XIII, 170-180. Cambridge (1936). **b - 103**

The locomotory rhythm along the body of *Anguilla vulgaris* is determined by the intrinsic activity of the spinal cord when conditioned by stimuli of either peripheral or central origin. If the intensity of the applied stimuli be increased the direction of the resultant muscular waves is reversed. The mechanisms which determine the locomotion of *Anguilla* are similar to those which control a stepping rhythm in the limbs of mammals.

**Gray J.** - Studies in Animal Locomotion. V. Resistance Reflexes in the Eel [*Inquisitiones de animali locomotione. V. Reflexus resistentiae in « Anguilla »*]. Journ. Exper. Biol., XIII, 181-191. Cambridge (1936). **b - 104**

Analysis of the resistance reflexes. These reflexes are used by the intact eel when escaping from a confined environment.

**Gray J. & Sand A.** - The Locomotory Rhythm of the Dogfish (*Scyllium canicula*) [*Rhythmus locomotorius speciei « Scyllium canicula »*]. Journ. Exper. Biol., XIII, 200-209. Cambridge (1936). **b - 105**

Experiments of acceleration or inhibition of the persistent rhythm characteristic for the spinal dogfish. Localised stimuli elicit co-ordinated responses from all intact segments of the body, although at least 12 intermediate segments may have been deprived of their spinal innervation, so long as the spinal cord is intact. If two regions of the body are isolated from each other by a second transection co-ordinated responses occur no longer; if both such regions are of adequate length, each exhibits an independent spontaneous rhythm and responds indipendently to peripheral stimulation.

Mitt. *Crenilabrus-Labrus, Sargus, Uranoscopus* [*Fundamenta physiologiae comparatae quoad reflexus motorios piscium. Communicatio I*ª]. Ztschr. vgl. Physiol., 23, 223-236. Berlin (1936). **b - 108**

**Kimura Kinosuke** - On the Manner of Swimming of Sardines in a confined Space [*Modus natandi in speciebus « Sardinia melanosticta » et « Engraulis japonicus » in area circumscripta*]. (In Jap.; Engl. rés.). 3 figs., 3 tabl., Bull. Jap. Soc. Scient. Fish., III, 2, 87-92. Tokyo (1934). **b - 109**

The experiments described here concern the motion (velocity and direction in relation to the radial distance) and the layer of swimming, i. e. the number of fish and the frequency distribution of their body-length in mm-classes for each of the six compartments in which the bait-net had been divided.

**Krejci - Graf K.** - Beobachtungen über den Flug fliegender Fische [*Observationes de volatu piscium volantium*]. 3 Abb., Natur u. Volk, LXVI, 12, 623-625. Frankfurt a. M. (1936). **b - 110**

Bericht über die vom Vf. im Stillen und Indischen Ozean gemachten Beobachtungen. Analyse der Bewegungen auch an Hand von Abbildungen und schematischen Zeichnungen.

**Magne A.** - Recherches sur la variabilité des crêtes de la mandibule d'*Euparypha pisana* (Müller). [*Investigationes in variabilitatem marginum mandibularium speciei « Euparypha pisana »*]. 18 fig., tabl., Bull. Biol. d'Arcachon, XXXII, 2, 155-172. Bordeaux (1935). **b - 111**

Recherches sur plus de 500 exemplaires: poids, longueur de la mandibule, nombre de crêtes et plantes nourricières. L'A. conclut que la variabilité des crêtes de la mandibule est d'ordre purement anatomique sans dépendre de la nourriture, de l'âge ou d'autres facteurs non seulement chez *Euparypha pisana* mais aussi chez tous les *Helicinae*.

**Marceau F.** - Sur quelques propriétés spéciales des Muscles adducteurs des Mollusques acéphales en rapport avec leur disposition et leur structure [*Nonnullae peculiaritates quoad musculos adductores in Molluscis acephalis pro eorumdem dispositione et structura*]. 19 figs., Mém. Mus. R. Hist. Natur. Belgique, Sér. 2, 3, 941-975. Bruxelles (1936). **b - 112**

Rôle des muscles adducteurs des Acéphales admirablement organisés pour maintenir longtemps leurs valves fermées: aussi leur masse est très grande par rapport à la masse totale du corps. Données relevées chez *Mytilus edulis, Tapes decussata, Ostrea edulis, Pecten varius.* Fibres à fibrilles parallèles à leur axe et présentant des anastomoses latérales entre elles, fibres à fibrilles lisses enroulées en hélices, fibres à fibrilles striées parallèles à leur axe et leurs compositions. Fonctions des muscles adducteurs dans leur ensemble et rôle spécial de chacune de leurs parties constitutives. Propriétés spéciales des parties nacrées des muscles adducteurs. Contractilité.

**Nills C. A.** - Source of Propulsive Power used by Flying Fish [*De origine quoad impetum propulsorium piscium volantium*]. Science, LXXXIII, 2143, 80. New York (1936). **b - 113**

A. emphasizes the rôle of the tail to gain impetus for the flight. See also following comments on this subject in Science, 2150, 260-262.

**Neu W.** - Hydromechanische Untersuchungen an Fischen zur Lösung des Formproblems [*Investigationes hydromechanicae in pisces ad solvendum formae problema*]. Int. Rev. ges. Hydrobiol. u. Hydrogr., XXXII, 295-315. Akad. Verlagsg. Leipzig (1935). **b - 114**

Zoologisches System der Formen (« Systematik lebender Gefüge », Woltereck), Disposition für die hydromechanischen Untersuchungen (nach Osborn): Auftrieb im Wasser; Wasserwiderstand, Fortbewegung. Auftrieb und Schwere im Wasser, spezifisches Gewicht, Uebergewicht. Wasserwiderstand und Form: Fischtypen, Schwimmgeschwindigkeit, Formanalyse, Schleppversuche. Fortbewegung: Schwerpunkt, Stabilität, Schwimmbewegungen. Arbeitsplan. Bibl.

**Pantin C. F. A.** - On the Excitation of Crustacean Muscle. III. Quick and Slow Responses [*Excitatio musculorum Crustaceorum. III. Reactiones veloces ac tardae*]. Journ. Exper. Biol., XIII, 148-158. Cambridge (1936). **b - 115**

Results of experiments of interjection in the claws of *Maia*. Review of cases where a « quick » and « slow » contractile system seem to exist in the same crustacean muscle.

**Pantin C. F. A.** - On the Excitation of Crustacean Muscle. IV. Inhibition [*Excitatio musculorum Crustaceorum. IV. De inhibitione*]. Journ. Exper. Biol., XIII, 159-169. Cambridge (1936). **b - 116**

The definite treshold for inhibition in the muscles of *Carcinus mœnas* is normally higher than the treshold for excitation. Discussion on the causes and functional significance of inhibition.

**Parker G. H.** - Direction and Means of Locomotion in the Regular Sea-urchin *Lytechinus* [*Directio apparatusque motorii speciei « Lytechinus »*]. 6 figs., Mém. Mus. R. Hist. Natur. Belgique, Sér. 2, 3, 197-208. Bruxelles (1936). **b - 117**

Relation between the direction of the locomotion of *Lytechinus* and its structural axes. It creeps by means of its spines and ambulacral tube-feet. Velocity on a horizontal surface and on a vertical plate.

**Patanè L.** - Ricerche sul sistema tegumentale degli Isopodi [*Inquisitiones de apparatu tegumentali Isopodorum*]. 3 fig., 1 tav., Arch. Zool. It., XXIII, 209-240. Napoli (1936). **b - 118**

L'A. studia il tegumento in alcuni Isopodi terrestri e marini e le ghiandole tegumentali in *Porcellio laevis*. L'esoscheletro presenta due zone distinte; una interna, a struttura lamellare, e una esterna; quest'ultima è laminare in *P. laevis* e *Armadillidium vulgare*, ed è omogenea in *Ligia italica, Idothea baltica* e *Anilocra edwardsi*. Costituzione citologica ed anatomica delle ghiandole tegumentali in *P. laevis* loro distribuzione negli epimeri del pereion e del pleon e loro attività secretoria per la ricostruzione dell'esoscheletro ad ogni muta. Composizione del secreto. Fasi della muta in *P. laevis* e caratteristiche modificazioni di colore della superficie tergale che precedono e accompagnano tale fenomeno.

**Petit G. & Budker** - Contribution à l'étude de la différenciation des dents cutanées, liée à la présence de cryptes sensorielles, chez quelques espèces de Sélaciens [*Contributio in studendam dif-*

*ferentiationem quoad dentes cutaneos colligatam cum praesentia cryptarum sensorialium in quibusdam speciebus Selaciorum*]. 14 fig., Bull. Inst. Océanogr., 695, 1-44. Monaco (1936). **b - 119**

Étude sommaire et résultat de l'examen des fœtus, des adultes et des peaux des individus adultes, appartenant à 11 espèces différentes de Sélaciens qui ont révélé la présence de spicules ou dents cutanées, différents de ceux qui constituent le revêtement des ces animaux. Ces dents cutanées parfois très apparentes, parfois fort dissimulées, sont analysées dans le présent ouvrage qui se compose des chapitres suivants: (I) nomenclature du matériel, (II) répartition et morphologie des dents cutanées jumelées, (III) étude de la cavité qu'elles recouvrent et de l'organe sensoriel, (IV) résumé des faits acquis et conclusions.

**Petit G. & Budker P.** - Répartition des dents cutanées jumelées chez *Galeorhinus laevis* (Risso) [*De cutaneis dentibus duplicibus in specie « Galeorhinus laevis » quoad distributionem*]. 1 fig., Bull. Mus. Natur. Hist. Natur., VIII, Sér. 2, 4, 334-336. Paris (1936). **b - 120**

Les AA. ont complété une étude antérieure, par la description des dents cutanées de *G. laevis* et la comparaison des différences avec *G. mustelus.*

**Pietschmann V.** - Die Dornen von *Raja clavata* L. [*De spinis speciei « Raja clavata »*]. 1 Abb., Zool. Anz., CXV, 3/4, 109-110. Leipzig (1936). **b - 121**

Die eigenartige Gestalt der Bedornung, insbesondere auf der Innenseite, wird hier auf einem getrockneten Exemplares von *Raja clavata* gezeigt.

**Richardson E. G.** - The physical Aspects of Fish Locomotion [*De aspectibus physicis motuum piscium*]. 8 fig., Journ. Exper. Biol., XIII, 63-73. Cambridge (1936). **b - 122**

Following the investigations of Houssay and de Magnan, A. studies the locomotion with regard to the resistance the fish is submitted to in water, the more complicated case of sinusoidal motion and finally the propulsion caused by a watersport as is used by the *Cephalopodes.*

**Rizzo C.** - Sui movimenti dei teleostei in rapporto con lesioni sperimentali degli apparati periferici di moto e di senso. IV. Lesioni labirintiche [*De motibus Teleosteorum pro lesionibus experimentalibus apparatuum perifericorum motus et sensus. IV. Lesiones labyrintheae*]. 1 tav., Atti R. Acc. Naz. Lincei, Rend. Cl. Sc. Fis. Mat. Natur., XXIII, ser. 6, 9, 710-713. Roma (1936). **b - 123**

Nei teleostei l'A. ha praticato labirinto-lesioni unilaterali lasciando illesi l'encefalo e i suoi rivestimenti. I disturbi osservati dimostrano che il labirinto ha una fondamentale importanza nella regolazione e conservazione del tono e dell'equilibrio, per cui la sua distruzione unilaterale riproduce con grande esattezza quegli stessi disordini della statica e del movimento osservabili dopo lesioni mesencefaliche e cerebellari.

**Saunderson Campbell E.** - The Early Development of the Chondrocranium of *Salmo salar* [*De priore accretione chondrocranii speciei « Salmo salar »*]. 23 figs., Proc. & Trans. Nova Scot. Inst. Sc., XIX, 1, 121-147. Halifax N. S. (1934-35). **b - 124**

Account of an experimental study of 14 stages, from 3 wks. before hatching to 10 wks. after hatching. Contrarily to the conception of Stöhr no separate anterior center of chondrification was found. Detailed analysis of the process. The cartilage development shown graphically. The decrease in the cartilage development and its possible explanation.

**Shoulejkin V.** - Kinematics of the Dolphin [*Delphini cinematica*]. (In Russ.; Engl. Summ.). 14 figs., Bull. Acad. Sc. URSS, Cl. sc. math. & natur., VII, 4, 651-671. Moscou-Léningrad (1935). **b - 125**

Analysis of the movements of the Dolphin also expressed in equations and figs., comparison with the movements of Fishes and their velocity. The importance of the assymmetry of the Dolphin's head and skull for the rotation compared with the rôle of the second screw in the work of the screw propeller.

**Souche G.** - Contribution à l'étude des épines caudales de l'*Acanthurus chirurgus* Bl. [*Contributio in studendas pinnas caudales speciei « Acanthurus chirurgus »*]. 7 fig., Bull. Stat. Biol. d'Arcachon, XXXII, 1, 31-38. Bordeaux (1935). **b - 126**

Description des épines motiles, symmétriques, qui existent sur l'extrémité caudale du corps d'*A. chirurgus* près de la naissance de la nageoire caudale; les écailles voisines sont modifiées; divergence des fibres musculaires.

**Souche G.** - Nouvelles recherches sur l'adducteur de l'arc palatin chez les Poissons [*Investigationes novae circa musculum adductorem arcus palatalis in Piscibus*]. 25 fig., Bull. Stat. Biol. d'Archachon, XXXII, 1, 53-71. Bordeaux (1935). **b - 127**

Ce travail continue une série d'études déjà publiées dans le Bulletin XXIX 1932 et comprend descriptions de l'adducteur de l'arc palatin de 47 autres espèces. Note générale sur l'innervation.

**Souche G.** - Nouvelles recherches sur le muscle ptérygo-maxillaire des Poissons osseux [*Investigationes novae in musculum pterygo-maxillarem in Teleosteis*]. 6 fig., Bull. Stat. Biol. d'Arcachon, XXXII, 1, 71-77. Bordeaux (1935). **b - 128**

Suite de deux publications parues dans le Bulletin, XXIX et dans les Comptes Rendus, 2, XXIX, 1932. Description du muscle ptérygo-maxillaire chez 7 espèces.

**Souche G.** - Morphologie comparative des Muscles élévateurs de la mandibule chez les Poissons [*Morphologia comparata musculorum elatorium mandibularium in Piscibus*]. 14 fig., Bull., Stat. Biol. d'Arcachon, XXXII, 1, 79-103. Bordeaux (1935). **b - 129**

Nouvelles recherches sur 14 espèces, parmi lesquelles *Osmerus, Maurolicus, Merlangus, Solea, Mugil, Thynnus, Epinephelus, Dentex, Sebastes.*

*libus speciei « P. platessa » Oceani Pacifici nordorientalis*]. Tabl., Rep. Int. Fish. Comm., 11, 1-32. Seattle, Wash. (1936). **b - 131**

This paper is based on the study of fin-rays and vertebra of 2850 specimens of flounders from Puget Sound, Wash. to Pavlof Bay, Alaska. List of species recorded; key to Pacific Flatfishes based on meristic characters. Tables giving the different distributions of dorsal, anal and caudal rays, number of vertebrae, etc.

**Yonge C. M.** - The Evolution of the Swimming Habit in the *Lamellibranchiata* [*De progressibus quoad consuetudinem motoriam in Lamellibranchiatis*]. Mém. Mus. R. Hist. Natur. Belgique, Sér. 2, 3, 77-100. Bruxelles (1936). **b - 132**

The aim of this study is to indicate the nature and probable origin of swimming in the Lamellibranchiates. A. has come to the following conclusions: Alone in the Lamellibranchiates the ability to swim is not associated with a reduction of the shell but it depends on modifications of four sets of organs, shell, adductor muscles, velum, and receptors; the adaptations present in swimming Lamellibranchiates are no more than further developments of those originally acquired for the efficient cleansing of the mantle cavity.

**An.** - Las ballenas y las velocidades de algunos barcos [*De Balaenis atque velocitate aliquarum navium*]. Ibérica, XXIII, 1105, 69. Barcelona (1936). **b - 133**

Velocidades extraordinarias de estos cetáceos que pueden acompañar a los barcos durante varios dias consecutivos. Noticia proveniente de un barco británico que marchaba à razón de 25 nodos (46 km).

## Apparatus nervorum. Organa sensuum.

**Alexandrowicz J. S.** - The Innervation of the Heart of Crustacea II. *Stomatopoda* [*Cordis innervatio in Crustaceis. II Stomatopoda*]. 13 figs., 1 pl., 13 fig., Quart. Journ. Microsc. Sc., LXXVI, 4, 511-548. London (1935). **b - 134**

Referring to his former work on the innervation of the heart of the Decapod *Crustacea*, A. here describes the same corresponding system found in *Squilla mantis*.

**Atoda Kenji** - The Innervation of the cranial Nerves of the Catfish: *Parasilurus asotus* L. [*Innervatio nervorum cranialium speciei « Parasilurus asotus »*]. Sc. Rep. Imp. Tôhoku Univ., IV, 11, 91-113. Sendai (1936). **b - 135**

Comparison with *Ameiurus melas* Raf. with regard to the topography of the cranial nerves. Description of the cranial nerve system.

**Baldi E.** - Moti di maneggio per lesioni cerebrali nel gambero [*De motibus circularibus per lesiones cerebrales in cancris*]. 14 fig., 2 tav., Arch. Sc. Biol., XXI, 6, 533-569. Napoli (1935). **b - 136**

L'A. esamina la meccanica degli arti locomotori e la localizzazione delle lesioni nei casi di moto in circolo dei gamberi, provocati per ferite laterali ai gangli sopraesofagei. Le alterazioni motorie variano a seconda che le ferite siano nel protocerebro, nel deutocerebro, nel tritocerebro e nelle commissure periesofagee, o che abbiano leso solamente la sostanza punteggiata dei glomeruli proto- e deutocerebrali. Il maneggio meccanicamente risulta dallo sdoppiamento laterale della meccanica composita normale degli arti e varia d'aspetto, a seconda della intensità di tale dissociazione (dall'A.).

**Carere Comes O.** - Ricerche istiofisiologiche sull'ipofisi dei Selaci con particolare riguardo alle modificazioni gravidiche [*Investigationes histiophysiologicae in hypophysim Selaciorum. Agitur particulatim de modificationibus gravidicis*]. 8 fig., Pubbl. Staz. Zool., XV, 3, 339-354. Napoli (1936). **b - 137**

Nel lobo rostrale dell'ipofisi dei Selaci le cellule cromofobe dei tubuli producono un secreto che aumenta straordinariamente nel corso della gravidanza. Le cellule eosinofile producono invece un secreto che è particolarmente abbondante negli animali giovani. L'A. ha notato chiaramente un antagonismo fra i due tipi di secrezione; questi fatti sembrano convalidare l'ipotesi avanzata per i Mammiferi da Evans e Simpson; nel lobo intermedio dei Selaci ovovivipari si nota, nel corso della gravidanza, un quadro di iperfunzione caratterizzato da aumento dell'eosinofilia e del volume delle cellule. (dall'A.).

**Chabanaud P.** - Situation particulière de l'organe nasal nadiral des téléostéens dyssymétriques de la famille des *Achiridae* [*Positio particularis organi nasalis nadiralis in Teleosteis dissymetricis ad familiam « Achiridae » pertinentibus*]. 1 fig., C. R. Acad. Sc., CCII, 7, 586-588. Paris (1936). **b - 138**

L'A. décrit la position, déterminée par un déplacement caudo-rostral; de l'organe nasal nadiral chez les *Achiridae*, fait remarquable, dont les *Achiridae* sont seuls jusqu'ici à offrir l'exemple dans la classe entière des Poissons. Il illustre la position de cet organe par un dessin qui a été fait en partie d'après une radiographie d'*Achiropsis normani* Chab. et en partie d'après plusieurs dissections.

**Chaine G. & Duvergier J.** - Recherches sur les otolithes des Poissons, étude descriptive et comparative de la sagitta des Téléostéens [*Investigationes in otolitha piscium. Studium descriptivum et comparativum sagittae Teleosteorum*]. 13 pl., Act. Soc. Linn. Bordeaux, LXXXVI, 1-254. Bordeaux (1934). **b - 139**

Par l'étude comparatif sur les otolithes de l'oreille interne des Téléostéens, l'A. en tire des conclusions importantes sur la phylogénie et la systématique des Poissons osseux.

**Denny M.** - The Occurrence of Cupulae on Lateral–Line Organs [*Cupulae praesentes in organis lineae lateralis*]. Science, LXXXIII, 2152, 302-303. New York (1936). **b - 140**

Untersuchungen der Zirbeldrüse bei *Phoca vitulina* und *Ph. hispida larga, Delphinus longirostris, Balaenoptera borealis*, Seehund u. a. Das Inkret und die Art der Absonderung dieser Drüse ebenso wie die Wirkung ist noch nicht bekannt. Kritik der Marburgschen Ansicht in Bezug auf die Beziehung zwischen Vorkommen, Ausbildungsgrad der Zirbel und Vascularisation der Haut.

**Genschow I.** - Ueber den Bau und die Entwicklung des Geruchsorgans der Sirenen [*Structura et accretio organi olfactus in Sirenidis*]. 28 Abb., Ztschr. f. Morph. u. Oekol. XXVIII, 402-444. Berlin (1934). **b - 146**

**Gérard P.** - Sur l'homologie entre les appareils sensoriels du système latéral et ceux du système vestibulaire, chez les Téléostomes [*De homologia inter apparatus sensoriales systematis lateralis et apparatus systematis vestibularis in Teleosteis*]. 7 fig., Acad, R. Belgique, Bull. Cl. Sc., XXII, 5, 447-455. Bruxelles (1936). **b - 147**

Les organes sensoriels ou neuromastes sont innervés par les mêmes nerfs que les macules sensorielles des canaux latéraux. Ces appareils présentent la même structure histologique et une frappante homologie avec les appareils sensoriels du système vestibulaire.

**Gottbehüt V.** - Otolithen und Labyrinthe verschiedener Teleostier [*Otolitha et labyrinthi aliquorum Piscium*]. 23 Abb., 40 S. Dissertation Univ. Jena (1935). **b - 148**

Nicht nur innerhalb der Gattungen und Familien sondern auch unter verschiedenen Individuen sind Variationen zu unterscheiden. In den meisten Fällen tritt die Sagitta stärker hervor als die kleinen Utriculus- und Lagenaotolithen. Bei *Trachypterus taenia* fehlt der Asteriscus. Die Leistung des Ohrapparates.

**Gray J. & Sand A.** - Spinal Reflexes of the Dogfish (*Scyllium canicula*) [*De spinali reflexu in specie « Scyllium canicula »*]. Journ. Exper. Biol., XIII, 210-218. Cambridge (1936). **b - 149**

These spinal reflexes are not localised in any particular level but connected with the whole spinal cord. The theory is thus expressed that the persistert rhythm of the spinal fish is the expression of a basic rhythmic activity of the spinal cord.

**Holst (v.) E.** - Die Gleichgewichtssinne der Fische [*Piscium facultas aequilibrii*]. 4 Abb., Zool. Anz., 8. Suppl. 108-114. Leipzig (1935). **b - 150**

Bericht über Versuche mit *Crenilabrus, Sargus, Serranus* und *Gasterosteus*, denen die beiden Labyrinthe operativ entfernt worden waren. Vf. verficht die Ansicht, dass die Raumlage des Fisches nicht von einem einzelnen Organ sondern von mindestens drei Sinnen, dem statischen, dem optischen und dem taktilen abhängig ist.

**Katz B.** - Neuro-Muscular Transmission in Crabs [*Neuro-muscularis transmissio in Cancris*]. Journ. Physiol., 87, 199-221. Cambridge & London (1936). **b - 151**

**Komai T.** - The Nervous System in Some Coelenterate Types. I. *Coeloplana* [*De systemate nervorum in nonnullis Coelenteratis. I. Coeloplana*]. 3 figs., Mem. Coll. Sc. Kyoto Imper. Univ., Ser. B., XI, 3, 185-191. (Contr. Seto Mar. Biol. Lab., No. 49). Kyoto (1936). **b - 152**

*Cœloplana* has a nervous system of the cœlenterate type. As compared with the nervous system of the ordinary ctenophore, the following two features seem salient: first, the high development of nerves in the marginal region of the ventral, as well as of the dorsal side, and second, the absence of nerves on the dorsal side except in the marginal region. Conclusions as to the highly thigmotropic habit of the animal and its spasmodic reactions to narcotics. (From A.).

**Langworthy O. R.** - The Brain of the Whalebone Whale, *Balaenoptera physalus* [*De cerebro speciei « Balaenoptera physalus »*]. 1 fig., Bull. Johns Hopkins Hosp., LVII, 3, 143-147. Baltimore (1935). **b - 153**

Weight of the adult brain, greatest transverse diameter length of a cerebral hemisphere; the convolutional pattern of the cerebral cortices. Comparison with the brain of the porpoise.

**Löwenstein O.** - The Equilibrium Function of the Vertebrate Labyrinth [*De aequilibrii functione in labyrintho Vertebratorum*]. 10 figs., Biol. Rev. Cambridge Phil. Soc., XI, 1, 113-145. London (1936). **b - 154**

Review of results of recent investigations which are in opposition to the classical theory of the equilibrium function of the labyrinth in many important points. - Morphology and structural and functional subdivision of the labyrinth. Function of the labyrinth as a whole. The localisation of the equilibrium function in fishes and other animals. The function of separate parts of the pars superior. The mode of action of the utriculus and the semicircular canals. Bibl.

**Löwenstein O. & Sand A.** - The Activity of the Horizontal Semicircular Canal of the Dogfish, *Scyllium canicula* [*Activitas canalis horizontalis semicircularis speciei « Scyllium canicula »*]. Journ. Exper. Biol., XIII, 416-428. London (1936). **b - 155**

Spontaneous discharge of impulses when the fish is stationary in the normal position; increased discharge during ipsilateral rotation; diminution of the spontaneous discharge during contralateral rotation; prolonged after-discharge on stopping contralateral rotation.

**Meader R. G.** - Accommodation and its Reflex Pathways in the Teleosts [*Visus accomodatio eiusque reflexae directiones in Teleosteis perpensae*]. 3 figs., Yale Journ. Biol. & Med., VIII, 5, 511-522.

**Scharrer B.** - Ueber « Drüsen-Nervenzellen » im Gehirn von *Nereis virens* Sars [*De cellulis nervorum glandularium in cerebro speciei « Nereis virens »*]. 4 Abb., Zool. Anz., CXIII, 11/12, 299-302. Leipzig (1936). **b - 159**

Beschreibung und Abbildung der im Gehirn befindlichen Nervenelemente, welche von gewöhnlichen Ganglienzellen abweichen. Drei verschiedene sekretorische Zelltypen werden unterschieden; von denen die blasigen Zelltypen wahrscheinlich Reste ehemaliger Ganglienzellen darstellen. Inwieweit die sezernierenden Zellen mit den anderen zwei rundlichen Drüsen-elementen zusammenhängen, ist noch nicht bekannt.

**Scharrer E.** - Ueber den Geschmackssinn der Fische [*Piscium facultas gustandi*]. 3 Abb., Nat. u. Volk, LXVI, 7, 319-322. Frankfurt a. M. (1936). **b - 160**

Einige Beispiele aus der Gruppe de Knochenfische der karpfenartigen Fische und *Trigla*. Bei *Trigla* hat Vf. feststellen können, dass die zur Fortbewegung dienenden Brustflossen auch Zentren von Geschmacks-Sinnesorganen besitzen und dass weiter die Rückenmarks-Nerven Geschmacks-Erregungen zu leiten vermögen.

**Scharrer E.** - Ueber « vegetative » Kerne im Gehirn und Rückenmark der Fische [*De nucleis vegetativis quoad cerebrum et medullum oblungatum in piscibus*]. 7 Abb., Zool. Anz. Suppl. 9, 236-240. Leipzig (1936). **b - 161**

Die vegetativen Zentren des Zentralnervensystems, die Polymorphie der Zellkerne, gemeinsame Eigenschaften. Das zentrale vegetative System der Fische im Vergleich mit dem der übrigen Wirbeltiere einheitlich histologisch charakterisierbar.

**Shanklin W. M.** - The Cerebella of three deep Sea Fishes [*De cerebellis trium piscium in mare profundum viventium*]. 12 fig., Acta Zool., XV, 409-430. Stockholm (1934). **b - 162**

The morphology and the bundle of fibers of the cerebellum are studied in *Diaphus dumerilii*, *Bathypterois articolor phenox* and *Saurida suspicio*.

**Straus W. L. Jr.** - Note on the Spinal Cord of the Finback Whale (*Balaenoptera physalus*). [*Nota de chorda spinali speciei « Balaenoptera physalus »*]. 1 fig., Bull. Johns Hopkins Hosp., LVII, 6, 317-329. Baltimore (1935). **b - 163**

This is apparently the first description of the thoracic cord in the Mysticeti or whalebone whales. Comparison with other data pertaining to *Cetacea*. Evidence that both cutaneous and proprioceptive sensibility are poorly developed in *Cetacea*. The vascularity of the cord and its connection with submersion.

**Suzuki S.** - The Innervation of the Heart of Molluscs [*Cordis innervatio Molluscorum*]. Scient. Rep. Tôhoku Imp. Univ., 4 th ser., Biol. X, 1-27. Sendai (1936). **b - 164**

**Tirelli M.** - I bottoni di senso e le papille del lato nadirale dei Soleini [*Bullae apparatus sensorii et papillae lateris nadiralis in Soleinis*]. 19 fig., 14 tav., Mem. R. Comit. Talassogr. It., CCXXXII, 3-42. Venezia (1936). **b - 165**

L'A. ha studiato il sistema sensoriale che guarnisce il lato cieco del capo in sette specie di *Soleinae* e in un *Cynoglossidae*. Questo sistema è composto da bottoni di senso e da papille di conformazione diversa a seconda delle diverse specie, la cui presenza è carattere ben definito della famiglia *Soleinae*. Distinzione di tre tipi di conformazione del sistema sensoriale del lato cieco e costituzione istologica delle singole papille nelle quali l'A. non è riuscito a mettere in evidenza la presenza di reti nervose. Per quanto concerne l'origine delle papille, è da ritenere che si tratti di squame modificate.

**Tonner F.** - Das Hautnervensystem der Arthropoden [*Systema tegumentale nervorum in Arthropodis*]. 5 Abb., Zool. Anz., CXIII, 1/2, 125-136. Leipzig (1936). **b - 166**

**Wetzel A.** - Das Chordotonalorgan in der I. Antenne der Caprelliden [*De organo chordotonali in prima antenna Caprellidarum*]. 8 Abb., Zool. Jahrb. Abt. Anat. u. Ont., LIX, 4, 355-382. Jena (1935). **b - 168**

Beschreibung des Organes. Vergleich mit dem Chordotonalorgan der Insekten. Gebrauch.

**Wiersma C. A. G. & Van Harreveld A.** - The double Motor Innervation of a Crayfish Muscle [*De duplici innervatione motoria cuiusdam musculi in « Cambarus »*]. Proc. Nat. Acad. Sc., XXII, 3, 190-191. Washington (1936). **b - 169**

The muscles of the claws of crustaceans can react in two ways: twitch and slow contraction, which are evoked by different nerve fibres; AA. have reasons to believe that both kinds of contractions occur in the same muscle fibres.

**Wislocki G. B. & Geiling K. M. E.** - The Anatomy of the Hypophysis of Whales [*De anatomia hypophysis Balaenarum*]. Anat. Rec., LXVI, 1. Philadelphia (1936). **b - 170**

The structure of the pituitary glands has been studied in *Physeter megalocephalus*, *Balaenoptera physalus*, *B. sibbaldi* and *Tursiops truncatus*. The neural process is not considered to form any portion of the epithelial hypophysis.

**Wohlfahrt Th. A.** - Ein neuer Versuch über das Tonunterscheidungs-vermögen der Fische [*Experientia nova quoad possibilitatem distinguendi tonos differentes in Piscibus*]. Zool. Anz., Suppl. 9, 135-140. Leipzig (1936). **b - 171**

Beschreibung der mit der Elritze unternommenen Versuche, aus welchen es scheint, dass das Labyrinth in der Tonunterscheidung mehr leistet als der Tastsinn der Haut, was um so eigentümlicher ist, da ihm ja eine Basilarmembran als Analysator vollständig fehlt. Uebereinstimmung mit den Untersuchungen von v. Frisch und Stetter. Notwendigkeit weiterer Untersuchungen.

**Wolf E. & Zerrahn - Wolf G.** - Threshold Intensity of Illumination and Flicker Frequency for the Eye of the Sun-fish [*De limite quoad intensitatem illuminationis deque frequentia agitationis pro oculo in « Lepomis »*]. 2 figs., Journ. Gen. Physiol., XIX, 3, 495-502. New York & Baltimore (1936). **b - 172**

Account of investigations undertaken on *Lepomis*: relation of flicker frequency to critical intensity of illumination, curve of critical illumination; function of rods and cones; maximum frequency of flicker perceived by the fish's eye.

**Young J. Z.** - The Giant Nerve Fibres and Epistellar Body of Cephalopods [*Fibrae gigantes nervosae atque corpus epistellare in Cephalopodis*]. 20 figs., Quart. Journ. Microsc. Sc., LXXVIII, 3, 267-386. London (1936). **b - 173**

This system in decapod Cephalopods is supposed to produce the rapid contractions of the mantle muscles and ink-sac by means of which the animal shoots away behind a cloud of ink. The giant fibers arise from the fusion of the processes of a large number of cells, grouped together into a giant fiber lobe in *Loligo*. Instead of giant fibers Octopods have a closed vesicle, the epistellar body in the walls of which there are cells, called the neurosecretory cells, resembling neurons but whose processes (axons) end in a homogeneous substance filling the cavity. From experiments with removal of both epistellar bodies A. concludes that the epistellar body has arisen from the giant fiber lobe and that the neurosecretory cells produce a secretion which then passes into the blood.

## Apparatus circulationis atque sanguis.

**Bacq Z. M.** - Observations physiologiques sur le cœur, les muscles et le système nerveux d'une Ascidie [*Observationes physiologicae circa cor, musculos, systema nervorum alicuius Ascidiae*]. Arch. Int. Physiol., XL, 357-373. Liège (1935). **b - 174**

Action des substances chimiques sur le chronotropisme du cœur de *Ciona intestinalis*. Effet de l'ablation du ganglion nerveux.

**Biborski J.** - Ueber die Segmentalgefässe und die Gefässe der unpaaren Flossen der Scholle (*Pleuronectes platessa*) [*Vasa segmentalia et vasa pinnarum imparium speciei « Pleuronectes platessa »*]. 1 Taf. a. T., Bull. Int. Acad. Polon. Sc. et Lettr., Cl. sc. mathém. et natur., sér. B, II, 8/10, 280-291 (Trav. Stat. Marit. Hel). Cracovie (1935). **b - 175**

Material und Methoden. Die Hauptlängsgefässe. Die Segmentalgefässe. Die Gefässe der Schwanzflosse. Einfluss der Körperform auf die Verteilung der Blutgefässe. Abarten der Gefässe. Diskussion.

**Hopkins A. E.** - Pulsation of Blood Vessels in Oysters, *Ostrea lurida* and *O. gigas* [*De pulsatione in vasis sanguineis Ostrearum « Ostrea lurida » et « Ostrea gigas »*]. 4 figs., Biol. Bull., LXX, 3, 413-425. Lancaster, Pa. (1936). **b - 176**

The rate of transmission of the impulse of contraction is slow and the activity is compared to that of vertebrate smooth muscle. The pulsating vessels appear to be indefinite spaces within the sub-epithelial matrix of connective tissue and smooth muscle, and an endothelium and other well-defined structures characteristic of formed blood vessels may be lacking. (From A:s abstr.).

**Hopkins A. E.** - Pulsating Blood Vessels in the Oyster [*Vasa sanguinea pulsatilia in Ostreis*]. Science, LXXXIII, 2163, 581. New York (1936). **b - 177**

The newly described « accessory hearts » (Biol. Bull. 3, 345-355, 1934) in the oyster prove to be the most prominent of a great many pulsating peripheral blood vessels in the walls of the mantle. Description, hypothesis as to the pulsations.

**Marples B. J.** - The Blood Vascular System of the Elasmobranch Fish *Squatina squatina* (Linné) [*De systemate vasculari sanguineo Piscis elasmobranchii « Squatina squatina »*]. 12 figs., Trans. R. Soc. Edinburgh, LVIII, 3, 817-840. Edinburgh (1936). **b - 178**

The structure of the vascular system of the Elasmobranch fish *Squatina squatina* is described. It is remarkable that the mandibular arterial arch is complete in the adult, a condition found elsewhere in the Elasmobranchii only in the Holocephalan, *Callorhynchus antarcticus*. The vascular system of *Squatina* resembles that of the Sharks in all important points except the distribution of the anterior mesenteric artery, in which it resembles the Rays. In internal structure *Squatina* is much nearer to the Sharks, while in external form it lies intermediate between the Sharks and the Rays. (A.).

**Navez A. E.** - Observations sur le rythme cardiaque d'*Anomia simplex* (d'Orbigny) (*Lamellibranchiae*) [*Observationes circa rhythmum cardiacum speciei « Anomia simplex »*]. 4 tabl., 7 fig., Mém. Mus. R. Hist. Natur. Belgique, Sér. 2, 3, 701-737. Bruxelles (1936). **b - 179**

L'A. a suivi *in vivo* certains aspects du rythme cardiaque de ce Lamellibranche. Description de la technique adoptée. Le cycle cardiaque du cœur *in situ* est caractérisé par les éléments: fréquence et amplitude, qui à température constante sont remarquablement constants chez l'organisme quiescent. Observations du rythme cardiaque du cœur isolé dans l'eau de mer et dans un milieu artificiel. Par le rapport: fréquence cardiaque - température, chez *Anomia simplex*, il ressort que l'équation d'Arrhénius est suivie avec une très grande précision.

L'eau de mer saturée en oxygène augmente l'amplitude et la fréquence du rythme cardiaque; effet opposé de l'eau de mer désaérée. Étude des variations spontanées de la fréquence cardiaque.

**Schnakenbeck W.** - Untersuchungen über das Blut von Plattfischen [*Pleuronectes. Investigationes de sanguine*]. Naturwiss., XXIV, 12, 187-188. Berlin (1936). **b - 180**

Besprechung der Untersuchungen v. Buddenbrocks über Blut und Atmung der Plattfische, welche im Anschluss an die in der Ost- und Nordsee ausgeführten Brutungsversuche ausgeführt worden sind.

**White E. G.** - The Heart Valves of the Elasmobranch Fishes [*Valvulae cardiacae in piscibus Elasmobranchiis*]. 12 figs., Amer. Mus. Nov., 838, 1-21. New York (1936). **b - 181**

The variation of the number of valves may serve as a factor for classification. The question is whether the small number or the large number is primitive. A. here develops her theory of duplication of valves in preference to that of reduction.

**Zlabek K.** - Contribution à la connaissance de la structure du myocarde des Poissons [*Contributio in cognoscendam Piscium structuram myocardicam*]. C. R. Soc. Biol., CXVII, 178. Paris (1934). **b - 182**

Description de la couche corticale du myocarde qui englobe une couche spongieuse; entre elles on remarque un tissu formé de fibres conjonctives.

## Apparatus respirationis.

**Chen P. S.** - Zur Morphologie und Histologie der Respirationsorgane von *Grapsus grapsus* L. [*De morphologia et histologia apparatus respirationis speciei « Grapsus grapsus »*]. 55 Abb., Jen. Ztschr., LXVIII, 31-116. Jena (1934). **b - 183**

Eingehende Beschreibung der Kiemenblätter und ihrer Blutgefässe.

**Irving L., Solandt O. M., Solandt D. Y. & Fisher K. C.** - The Respiratory Metabolism of the Seal and its Adjustment to Diving [*Metabolismum respiratorium Phocae et eius aptatio immersioni*]. Journ. Cell. & Comp. Physiol., 7, 137-151. Philadelphia (1935). **b - 184**

A formula is given for the relation of surface area to body weight of seals aged 4 months and varying in weight from 19 to 30 kg. Periodicity of breathing, pulse, heart rate and blood pressure. Distinct control of respiration, pulse and B. P.

**Johnson M. L.** - The Control of Respiratory Movements in *Crustacea* by Oxygen and Carbon Dioxide [*Inspectio motuum respiratoriorum in Crustaceis per* $O_2$ *et* $CO_2$]. Journ. Exper. Biol., XIII, 467-475. Cambridge (1936). **b - 185**

The effect of lack of oxygen and excess of carbon dioxide on *Squilla mantis*, *Pandalus borealis* and *Idothea neglecta*. *Carcinus maenas*, *Anilocra physodes* and *Nerocila bivittata* seem to be apparently independent of the gas content of the medium. Great individual variation in the treshold of response and extent of recovery.

**Koschtojanz C. S.** - On the Participation of the Respiratory Rhythm of Fishes and Amphibia in Plastic Tonus [*Participatio rhythmi respiratorii Piscium et Amphibiorum quoad plasticum tonum*]. Arch. Sc. Biol., 41, 172-173. Léningrad (1935). **b - 186**

It is shown that operative interference with peripheral respiratory movements results in loss of skeletal muscular tone which is ascribed to the loss of rhythmic impulses to the central nervous system.

**Newcombe C. L., Miller C. E. & Chappell D. W.** - Preliminary Report on Respiratory Studies of *Littorina irrorata* [*Relatio prior de studiis circa respirationem speciei « Littorina irrorata »*]. Nature, CXXXVII, 3453, 33. London (1936). **b - 187**

Short note on experiments undertaken to show the effects of temperature and salinity on the respiratory rate of the intertidal gastropod *Littorina irrorata*.

**Rigg G. B. & Henry B. S.** - On the Origin of the Gases in the Float of Bladder Kelp [*De origine substantiarum gasosarum in pneumatocyste speciei « Nereocystis »*]. Amer. Journ. Bot., 22, 362-365. Lancaster, Pa. (1935). **b - 188**

Experimental results indicate that the interior of the float of bladder kelp is sterile, at least so far as bacteria are concerned. All available evidence is consistent with Langdon and Gailey's conclusion that the carbon monoxide present in this cavity is a product of respiration. (A.).

## Apparatus digestionis atque alimentatio.

**Austin F. O.** - The Habitat and Food Sea Mussel. The Rate of Digestion of Ingested Diatoms and Dinoflagellates [*Habitat alimentatioque Ostrearum. Modus agendi, quoad tempus, digestionis Diatomearum et Dinoflagellatorum ingestorum*]. 1 table., Bull. Scripps Instit. Oceanogr., Techn. Ser., IV, 1, 16-17. Berkeley, Ca. (1936). **b - 189**

The abundance, habitat, feeding habits, and digestive apparatus of the California sea mussel, *Mytilus californianus*, are briefly discussed. It is shown that digestive processes begin very soon after the ingestion of phytoplankton, especially when the animals are hungry. (A.).

**Austin F. O. & Fox D. L.** - The Habitat and Food Sea Mussel. Food, Method of Capture, and Rate of Digestion. The Organs of Feeding and Digestion [*Habitat alimentatioque Ostrearum. Alimentum, captandi ratio, digestio. Organa alimentationis et digestionis*]. Bull. Scripps Instit. Oceanogr., Techn. Ser., IV, 1, 13-15. Berkeley, Ca. (1936). **b - 190**

Brief account of the outstanding features of the organs and accessories of alimentation in *Mytilus edulis* and *M. californianus*, containing a summary of detailed descriptions made by other investigators, with special regard to those of Mr. Whedon. The results of a study of the ciliary current, made by the use of carmine, carborundum powder, Indian ink and various foods, are reported.

**Bahr K.** - Was fressen unsere Ostseelachse ? [*Quae res a nostris Salmonibus Balticis manducantur ?*]. 1 Diagr., Dtsch. Fischwirt., II, 52, 954-956. Berlin (1935). **b - 191**

Ergebnisse planmässiger Untersuchungen über die Nahrungszusammensetzung bei Angel- und Treibnetzlachsen aus der Ostsee, also Fischen von einer Länge von 70 bis 100 cm und darüber hinaus, über welche das Beobachtungsmaterial schwierig habhaft ist, da sie unausgeweidet sofort zum Versand auf die Märkte gelangen.

**Beebe W.** - Food of the Bermuda and West Indian Tunas of the Genera *Parathunnus* and *Neothunnus* [*De cibo generum « Parathunnus » et « Neothunnus » ad Insulas* Bermuda *Indiasque Occidentales pertinentium*]. 3 pls. o. t., Zoologica, XXI, part 3, 12/18, 195-205. (Contr. Bermuda Biol. Stat., 45, St. George's West, Bermuda). New York (1936). **b - 192**

This examination has revealed many interesting facts as to the fish fauna of certain areas, especially in depths of three hundred fathoms off Bermuda, where dredgings are impossible for the sake of the coral reefs. Several new species of fish and invertebrates have been recorded. The results are expressed in tables and plates.

**Brian A.** - Importanza dei Crostacei nell'alimentazione dei Potassoli del Mare Ligure (*Gadus poutassou* Düben) [*Momentum Crustaceorum pro alimentatione speciei « Gadus poutassou » Maris Ligustici*]. 3 fig., Boll. Mus. Lab. Zool. e Anat. Comp. Genova, XVI, 87, 1-14. Genova (1936). **b - 193**

Descrizione degli organismi che servono di nutrimento al *G. poutassou*, e specialmente dei Crostacei: *Meganyctiphanes*, *Nyctiphanes*, *Pasiphaea*, *Chlorotocus* e *Sergestes rubroguttatus*. I pesci e le altre prede.

**Buley H. M.** - The Habitat and Food Sea Mussel. Consumption of Diatoms and Dinoflagellates by the Mussel [*Habitat alimentatioque

*Ostrearum. De consumptione Diatomacearum et Dinoflagellatorum a specie « Mytilus »*]. Bull. Scripps Instit. Oceanogr., Techn. Ser. IV, 1, 19-27. Berkeley, Ca. (1936). **b - 194**

Results of a seven months' investigation on the percentages of the aggregate of diatoms and dinoflagellates in the water of the Pacific coast of North America and those contained in the mussel stomachs, showing the prominence of dinoflagellates, which suggests that this group largely contributes to the food supply of lamellibranches. The preponderance of smaller dinoflagellates and of smaller diatoms in the mussels may indicate a tendency to select in size as well as in kind.

**Clifford G. C.** - Food of the Coarse-scaled Sucker (*Catostomus macrocheilus* Girard) [*Alimentum speciei « Catostomus macrocheilus »*]. Journ. Biol. Bd. Canada, III, 1, 20-25. Toronto (1936). **b - 195**

Examination of 167 specimens shows that immature fish feed upon planktonic forms while mature fish feed upon larger bottom organisms and bottom detritus. The diet varies with habitat and season, depending upon what is available. Since it eats spawn of salmonids and takes much the same food organisms as they do, its presence in waters containing important salmonids is undesirable. (A.).

**Fox D. L. & Marks G. W.** - The Habitat and Food Sea Mussel. The Digestive Enzymes [*Habitat alimentatioque Ostrearum. De enzymatis digestivis*]. Bull. Scripps Instit. Oceanogr., Techn. Ser., IV, 1, 29-47. Berkeley, Ca. (1936). **b - 196**

This investigation was undertaken with a view to determine the kinds of food substrates that the California mussel, *Mytilus californianus*, a typical plankton feeder, is able to digest. A study is made on the proteases, lipases and esterases, carbohydrases contained in the entire digestive tract, digestive diverticula, and style, and of the optimum pH of style amylase and style glycogenase.

**Fuller J. L. & Clarke G. L.** - Further Experiments on the Feeding of *Calanus finmarchicus* [*Experientiae quoad nutricationem speciei « Calanus finmarchicus »*]. 2 graph. figs., 4 tabl., Biol. Bull., LXX, 2, 308-320. Lancaster, Pa. (1936). **b - 197**

Preliminary measurements on the rate of filtration of *Calanus* gave a result less than that calculated to be necessary for the copepod to obtain sufficient food if diatoms and peridinians are the sole source of supply. Since bacteria cannot be regarded as an important source of food, the other small and little known elements of the nannoplankton should be scrutinized, as their abundance in the sea may be greater than previously supposed. (A.).

**Hata K.** - Effect of Feeding with Red Pepper and Soy-Bean Oil Irradiated by Ultra-violet Rays upon the Growth, Egg-Production, etc. in Trouts [*Alimentationis effectus pipere rubro et oleo soyae per radios ultraviolaceos irradiato in tructae accretionem, ovorum productionem, etc.*]. Journ. Imp. Fish. Exp. Stat., VI, 229-237. Tokyo (1935). **b - 198**

Author claims that rainbow trout and brook–trout, when fed with food to which red pepper and soya-bean oil irradiated by ultra-violet rays are added, show an increase of growth and egg production. Fish hatched from eggs of fish fed as described above, are stronger and healthier than those hatched from eggs of ordinary fed fish.

**Hopkins A. E.** - Temperature optima in the Feeding Mechanism of the Oyster, *Ostrea gigas* [*Temperatura optima in apparatu alimentari speciei « Ostrea gigas »*]. 9 fig., Journ. Exp. Zoöl., LXXI, 2, 195-208. Philadelphia (1935). **b - 199**

The optimum temperature for the pumping activity of the gills of this species is about 27° to 28° C., while the optimum for maximum relaxation of the adductor muscle, which controls the size of the inhalent and exhalent apertures between the valves, is close to 20°. The adductor muscle therefore limits the activity of the gills, and the optimum temperature for rate of pumping, considering the organism as a whole, is the same as that for relaxation of the muscle (20°). (A.).

**Ishida J.** - The Stomach of *Mugil cephalus* and its Digestive Enzymes [*Stomachus speciei « Mugil cephalus » et enzymata digestiva*]. Annot. Zool. Jap., XV, 182-189. Tokyo (1935). **b - 200**

**Ishida J.** - Influence of Change in Food on Liver Glycogen in a Labroid Fish *Thalassoma umbrostigma* [*Cibi mutationis effectus in hepaticum glycogenum in specie « Thalassoma umbrostigma »*]. Annot. Zool. Jap., XV, 203-212. Tokyo (1935). **b - 201**

**Jespersen P.** - The Food of the Herring in the Waters round Bornholm [*Alimentum aringorum apud* Bornholm]. (In Engl., Dan. Rés.). 15 figs., tabl., Medd. Komm. Danm. Fisk- & Havunders., Serie Plankton, III, 2, 1-39. København (1936). **b - 202**

The relative numbers of feeding herring in the different months. Quantitative investigations on the herring food. Feeding in relation to development of genital organs. Plankton samples from the waters east of Bornholm. The occurrence of the different organisms in the herring food. Summary of the principal elements in the food of the Herring. Tables of stomach analyses.

**Johansen B.** - Sur la nourriture des Phoques caspiens [*De nutricatione phocarum Caspicarum*]. (En russe). 2 tabl., Zool. Journ., XIII, 584-587. Moskva (1934). **b - 203**

Crustacés, Mollusques et Poissons constituent la nourriture des Phoques, mais ces prélèvements ne sont guère nuisibles à l'économie de la pêche, pour l'intérêt économique qui présente la chasse des Phoques.

**Karpewitsch A. & Bokowa E.** - Verdauungstempos bei Seefischen [*De digestionis gradiis in Piscibus marinis*]. (In Russ.). 3 Diagr., 8 Tab., Zool. Journ., XV, 1, 143-168. Moskva (1936). **b - 204**

Ergebnisse der Untersuchungen über die verschiedenen Verdauungstempos bei Seefischen, besonders bei *Gadus virens, Cottus scorpius,* und *Pleuronectes flesus*: die verschiedenen Phasen der Verdauung, die Verdauungsorgane und die dem Alter folgenden Variationen der Schnelligkeit der Verdauung.

**Kubo Itsuo** - Feeding Velocity of the Eel *Anguilla japonica* T. & S. in Relation to Water Temperature and other Environmental Conditions [*Celeritas nutricationis in « Anguilla japonica » pro aquae temperatura aliisque condicionibus ambientis*]. (In Jap., Engl. Rés.). 3 tabl., Bull. Jap. Soc. Scient. Fish, IV, 5, 335-338. Tokyo (1936). **b - 205**

The « feeding velocity » of the eels cultured in two experimental ponds at the Yosida Piscicultural Laboratory was measured by the weight of the food consumed in a minute or in five minutes. Relation to the water and air temperatures and to the wind; the airpressure did not cause any effect on the feeding velocity.

**Lombardi D.** - Gli studi sull'alimentazione dei pesci e la loro importanza biologica [*Studia circa Piscium alimentationem eorumque momentum biologicum*]. Riv. Fis. Mat. e Sc. Nat., I, 5 182-187. Napoli (1936).

(—) Boll. Pesca Piscicult. e Idrobiol., XII, 5, 372-375. Roma (1936). **b - 206**

Stabilita l'importanza di tali studi non solo per le deduzioni dal punto di vista alimentare, ma anche per i dati sull'*habitat* e sulle possibili migrazioni orizzontali e verticali, diurne e stagionali dei pesci, vengono riferite le osservazioni sul contenuto gastrico del *Gadus poutassou* proveniente dal Tirreno, dallo Jonio e dall'Adriatico. L'A. conclude che la natura dell'alimento in un pesce sembra sia la resultante di due fattori: l'ambiente e il genere di vita.

**Mann H.** - Der Einfluss der Ernährung auf die Färbung der Fische [*De nutritionis influentia in Piscium colorationem*]. Sitz. ber. Ges. Naturf. Freunde, 19. Nov. 1935. Berlin (1935). **b - 207**

Feststellung einer Speicherung von den in der Nahrung vorbefindlichen Farbstoffen.

**Mazoué H.** - Etude du mode de nutrition d'un Infusoire marin de la famille des *Philasteridae*: *Porpostoma notatum* Mobius [*Ratio nutritionis alicuius infusorii marini*]. Bull. Soc. Zool. France, LX, 143-152. Paris (1935). **b - 208**

La nutrition s'accomplit d'une double façon: chimique, avec la production d'un acide qui paraît être l'acide chlorhydrique, et mécanique, par l'augmentation de son volume et la présence d'une structure vacuolaire particulière.

**Meschkat A.** - Untersuchungen über den Aufbau der Kabeljaunahrung im Bereich der Vestmannainseln [*Investigationes de compositione alimentari speciei « Gadus morrhua » in insulis* Vestmanna]. (In Dtsch., Engl., Rés.). 3 Abb., 3 Tab., Cons. Int. Expl. Mer., Rapp. & Pr.- Verb., XCIX, Rapp. Atlant., 1933-35, III, 3-19. Copenhague (1936). **b - 209**

Ort und Zeit der Untersuchung. Die Mageninhalte des Kabeljaus. Die Mageninhalte der vom Kabeljau gefressenen Tiere (Sekundäre Nahrungsuntersuchung). Die Nahrung der Planktoncrustaceen aus den Mägen der Nahrungstiere (Tertiäre Nahrungsuntersuchungen). Der Detritus. Schlussbetrachtungen. Bibl.

**Pierre M.** - L'hépatopancréas des Pagures [*De hepatopancreas in Paguris*]. Figs., tabls., 1 pl., Trav. Stat. Biol. Roscoff, 13, 177-210. Paris (1935). **b - 210**

Étude sur la morphologie et l'histologie de l'hépatopancréas de *Anapagurus*, *Eupagurus*, *Clibanarius*, *Diogenes*, *Pagurus et Paguristes*, qui se compose de nombreux tubes aveugles, répartis en deux masses drainées chacune par un tube collecteur, débouchant dans l'intestin moyen. L'hépatopancréas des Pagures est abdominal et asymétrique de même que les Thalassinidés.

**Rustad D.** - Der Filtermagen von *Aega stroemi* Lütken (*Crustacea Isopoda*) [*Apparatus digestionis ut philtrum constitutus in specie « Aega stroemi »*]. 8 Abb., Berg. Mus. Årb., naturv. r. I, 6, 2-17. Bergen (1936). **b - 211**

Uebersicht der bisherigen Forschungen und deren wichtigste Ergebnisse in Bezug auf den Verdauungsapparat der Malacostraken. Eingehende Beschreibung und Untersuchungsmethode des Verdauungstractus von *Aega stroemi*; Abweichungen dieser Struktur bei anderen Arten.

**Sawano E.** - Contributions to the Knowledge on the Digestive Enzymes in marine Invertebrates. I. Proteolytic Enzymes in *Polypus vulgaris* (Lamarck) [*Contributiones in cognoscenda enzymata digestionis in Invertebratis marinis. I. Enzymata proteolytica speciei « Polypus vulgaris »*]. 12 fig., Scient. Rep. Tokyo Bunr. Daig. B. II, 101-126. Tokyo (1935). **b - 212**

The optimum of pH has been determined for different digestions; it lies in general between 7,7 and 8,6.

**Schlottke E.** - Biologische, physiologische und histologische Untersuchungen über die Verdauung von *Limulus* [*Investigationes biologicae, physiologicae et histologicae de digestione in « Limulus »*]. 28 Abb., Ztschr. f. vgl. Physiol., XXII, 359-413. Berlin (1935). **b - 213**

**Shapovalov L.** - Food of the Striped Bass [*Cibus speciei « Roccus lineatus »*]. 3 graph. figs., 2 tabl., Calif. Fish & Game, XXII, 4, 261-271. Sacramento (1936). **b - 214**

The stomach contents of the Striped Bass from the Waddell Creek Lagoon, the San Francisco Bay region, the Atlantic and Pacific coasts have been examined and the results are expressed in tables. Bait used. Feeding habits of the Striped Bass.

**Suehiro Y.** - On the Development of the Digestive Tract and the Change of Food with It in the Fish, *Chasmichthys gulosus* [*De progressu quoad tractum digestivum deque consequente variatione alimentationis in pisce « Chasmichthys gulosus »*]. (In Jap.). 8 figs., Journ. Imp. Fish. Exp. Stat., VI, 3, 109-113. Tokyo (1935). **b - 215**

Description of the changes of the digestive tracts of *C. gulosus* with the growth of the fish followed by alteration of his diet. In the young stage, the food consists of microorganisms; the adult fish chiefly feeds on Crustaceans.

**Tomiyama T.** - Chemical Studies of the Proteins of Feeding-stuffs IV. The Comparison of Digestibility by the proteolytic Enzyme contained in Viscera of Eel [*Studia chemica de proteinis substantiarum alimentarium. Comparatio functionis digestivae per enzymata proteolytica in visceribus Anguillarum*]. Journ. Biochem., XXI, 367-370. Tokyo (1935). **b - 216**

**Ueda S. & Okada Y.** - On the Food of the Salmonoid Fish Ayu (*Plecoglossus altivelis* Temminck & Schlegel) [*De alimento Piscis salmonoidis « Plecoglossus altivelis »*]. (In Jap., Engl. Rés.). 2 figs., 1 table, Bull. Jap. Soc. Scient. Fish., V, 2, 113-115. Tokyo (1936). **b - 217**

The principal food of adult Ayu proves to be diatoms and bluegreen Algae and that of the small Ayu preferably Algae.

**White H. C.** - The Food of Salmon Fry in Eastern Canada [*Cibus larvarum salmonis in canadensi regione orientali*]. 2 figs., 3 tabl., Journ., Biol. Bd. Canada, II, 5, 499-506. Toronto (1936). **b - 218**

The general character of the food is determined by availability, preference of any food can only be determined by further research. The chief food of the newly emerged fry is formed by Chironomid larvae.

## Apparatus uro-genitalis.

**Acrivo C.** - Sur l'organisation et la structure du corps caverneux chez *Scyllium canicula* [*De corporibus cavernosis speciei « Scyllium canicula » quoad organisationem et structuram*]. Bull. Hist. Tech. Microsc., XII, 362. Paris (1935). **b - 219**

Position des corps caverneux et leur constitution histologique. Action de la sécrétion des cellules sur la destruction et la transformation des globules rouges vieillis.

**Bertolini F.** - Ricerche sulla escrezione degli Oloturoidi [*Investigationes de excretione in Holothuroideis*]. Pubbl. Staz. Zool., XV, 3, 322-338. Napoli (1936). **b - 220**

I polmoni acquatici, l'apparato digerente e le gonadi, hanno nelle oloturie funzione di organi escretori. Vi sono due modalità di escrezione, e l'A. ha potuto metterle in evidenza mediante colori diffusibili che si diffondono dal liquido celomatico attraverso le pareti degli organi escretori, e colori colloidali, che vengono fagocitati da piccoli amebociti che vanno all'intestino o ai polmoni acquatici o alle gonadi ed ivi eliminano le sostanze fagocitate. Negli Echinodermi ogni organo ha più di una funzione e ogni funzione più organi.

**Bliding C.** - Ueber die Fortpflanzungskörper einiger marinen *Cladophora* Arten [*De organis reproductionis in quibusdam Cladophoris marinis*]. Sv. Bot. Tidskr., 30, 529-536. Stockholm (1936). **b - 221**

*Cladophora glaucescens* bildet nur grosse zweigeisslige nicht kopulierende Schwärmer und unterscheidet sich also von *Cl. sericea*, welche Gametenpflanzen (zweigeisslige Gameten) und Zoosporenpflanzen (viergeisslige Schwärmer) bilden. Vf. glaubt, dass bei *Cl. glaucescens* die Reduktionsteilung nicht stattfindet. Notwendigkeit zytologischer Untersuchungen.

**Calzoni M.** - Ricerche sulla placenta del *Carcharias glaucus* [*Investigationes in placentam speciei « Carcharias glaucus »*]. 3 fig., Pubbl., Staz., Zool. Napoli, XV, 2, 169-174. Napoli (1936). **b - 222**

Studio istologico della placenta di un embrione di *Charcharias glaucus* Rond. La porzione del sacco vitellino che non aderisce alla parete dell'utero nella placenta di *C. glaucus* è molto simile alla porzione equivalente di placenta del *Mustelus laevis* ed è anche dello stesso ordine di grandezza la velocità di assunzione di sostanze organiche nel corso dello sviluppo embrionale.

**Edwards J. G.** - The Epithelium of the renal Tubule in Bony Fish [*De epithelio tubuli renalis in Teleosteis*]. 4 pls., Anat. Rec., LXIII, 3, 263-279. Philadelphia (1935). **b - 223**

Photographic reproduction of the tubule of 5 genera of *Syngnathidae* and some fresh water forms. Segmental differentiation is present in the glomerular tubule of marine and fresh water fish but lacking in aglomerular tubules or tubules with atrophic glomeruli. Comparison with higher vertebrates.

**Giacomini E.** - Ulteriori ricerche anatomomicroscopiche ed organogenetiche sul sistema interrenale e sui corpuscoli di Stannius dei Teleostei e dei Ganoidi [*Investigationes ulteriores anatomo-microscopicae et organogeneticae in systema interrenale et corpusculos* τοῦ Stannius *Teleosteorum*]. Rend. R. Acc. Sc. Ist. Bologna, Cl., Sc., Fis., XXXVIII, 127-140. Bologna (1933-34). **b - 224**

L'A. ha studiato il sistema interrenale in due specie di Condroganoidi: *Scaphirhynchus platyrhynchus* e *Polyodon spathula*. Anche in queste forme esiste soltanto l'interrenale con disposizione simile a quella che esso ha nell'*Acipenser* e negli Olostei od Euganoidi: *Lepidosteus* ed *Amia*, e mancano affatto i corpuscoli di Stannius, i quali invece coesistono insieme all'interrenale nel *Lepidosteus*, nell'*Amia* e nei Teleostei.

**Grafflin A L.** - Renal Function in Marine Teleosts. III. The Excretion of Urea [*Functio renalis in Teleosteis marinis. III. Ureae excretio*]. Biol. Bull., LXV, 2, 228-235. Lancaster, Pa. (1936) **b - 225**

The ability of the kidney to concentrate urea at widely varying urine flows has been investigated, particularly in the *Myoxocephalus octodecimspinosus* and to a lesser extent in the *Pseudopleuronectes americanus* as well as four other marine teleosts. Results are reported in tables. Comparison and conclusional remarks.

**Grafflin A. L.** - Renal Function in Marine Teleosts. IV. The Excretion of inorganic Phosphate in the Sculpin [*Functio renalis in Teleosteis marinis. IV. Excretio phosphati inorganici speciei « Myoxocephalus octodecimspinosus*]. 3 figs., 3 tabl., Biol. Bull., LXXI, 2, 360-374. Lancaster, Pa. (1936). **b - 226**

In line with Marshall and Grafflin's observations that the aglomerular kidney excretes phosphate that is derived from some unidentified precursor (other than inorganic phosphate in the plasma), the present observations establish the presumption that a similar process occurs in the glomerular kidney of the sculpin. (A.).

**Hickling C. F. & Rutenberg E.** - The Ovary as an Indicator of the Spawning Period in Fishes [*De ovario ac indicatore periodus reproductionis in Piscibus*]. 1 fig., 1 tabl., Journ. Mar. Biol. Ass., n. ser., XXI, 1, 311-317. Plymouth (1936). **b - 227**

Measurements of diameters of the eggs in the ripening ovaries of four species of fish, namely the hake and haddock, pilchard and herring, give frequency – distributions which are consonant with the known duration of the spawning period. It is suggested that this method may provide information as to the spawning habits of new or rare species of fish. (A.).

**Nagel H.** - Die Aufgaben der Exkretionsorgane und der Kiemen bei der Osmoregulation von *Carcinus maenas* [*De organis excretoriis et branchiis in osmoregulatione speciei « Carcinus maenas »*]. 9 Abb., Ztschr., f. vgl. Physiol., XXI, 468-491. Berlin (1935). **b - 228**

**Pérez Ch.** - Atrophie des glandes génitales de la Turritelle sous l'influence du parasitisme par les sporocystes d'un Trématode [*De atrophia glandularum genitalium in « Turritella » sub influentia parasitismi per sporocysta alicuius Trematodis*]. 9 figs., Mém. Mus. R. Hist. Natur., Belgique, Sér. 2, 3, 539-547. Bruxelles (1936). **b - 229**

L'examen de l'état des glandes génitales chez les individus de deux sexes de *Turritella communis*, parasités par le Trématode *Cercaria rhodometopa*, a montré que les testicules présentent une apparence absolument normale et que dans l'ovaire l'épithelium germinatif se dépouille de ses éléments sexuels déjà différenciés et tend à devenir stérile, son repeuplement en éléments jeunes étant manifestement inhibé.

**Resühr B.** - Ueber den Bau und den Öffnungsmechanismus der Fucusoogonien [*De constitutione atque deiscentia in oogonis in « Fucus »*]. Flora, CXXIX, 336-346. Jena (1935). **b - 230**

**Scatizzi I.** - L'apparato renale nei Molluschi Prosobranchi [*Apparatus renalis in Molluscis Prosobranchiis*]. 1 tav., Arch. Zool. Ital., XXII, 181-195. Torino (1936). **b - 231**

L'A. ha preso in esame l'apparato renale di *Bythinia tentaculata* L. e *Paludina Vivipara* L. In ambedue i casi il rene è un organo di origine celobastica legato alla differenziazione del sacco pericardico. Descrizione citologica del rene. L'escrezione avviene per osmosi (cellule semplici) o per effrazione (cellule a vacuolo); le concrezioni giallo-nerastre che si osservano nel rene di *Paludina* sembrerebbero formate da una melanina unita ad un substrato insolubile.

**Strunk C.** - Studien über die Niere der Wellhornschnecke [*Inquisitiones de renibus speciei « Buccinum undatum »*]. Biol. Zentralbl., LV, 53-57. Leipzig (1935). **b - 232**

Morphologie der Niere. Physiologische Farbstoffuntersuchungen. Untersuchungen auf Zucker und Eiweiss. Harnsäure– Nachweis. Die Entleerung der Niere nach aussen.

## Glandulae et Hormones.

**Bevelander G.** - Branchial Glands in Fishes [*Piscium glandulae branchiales*] Journ. Morphol., LIX, 2, 215-224. Philadelphia, Pa. (1936). **b - 233**

Three different types and seven subtypes of intraepithelial glands in intimate association with the branchial epithelium of fishes are distinguished. Classification of the glands. There does not seem to be any definite correlation between the structural complexity of the glands and the evolution of fishes.

**Kanizslai L.** - Ricerche sulla morfologia del pancreas dei Pesci [*Inquisitiones de morphologia pancreatica in piscibus*]. 11 fig., Scritti Biol. racc. da L. Castaldi, X, 193-213. Cagliari (1935). **b - 234**

Bericht über einige in Brasilien und in Deutschland unternommene Versuche mit Einspritzungen um die Laichreife zu beschleunigen.

**Matthews S. A.** - The Pituitary Gland of *Fundulus* [*De glandula pituitaria in « Fundulus »*]. Anat. Rec., LXV, 3. Philadelphia (1936). **b - 236**

Analysis of the structure of the gland and its variations according to the seasons. Discussion on the function of the teleost pituitary; necessity of further research.

**Maxia C.** - Il pancreas intraepatico dei Pesci [*Inquisitiones in pancreas intrahepaticum Piscium*]. 12 fig., 1 tav., Scritti Biol. racc. da L., Castaldi, X, 81-126. Cagliari (1935). **b - 237**

Esame istologico del fegato di 44 specie di Pesci appartenenti a Selaci, Teleostei e Ganoidi. In base alle presenti ricerche e a studi precedenti si può stabilire la presenza di un pancreas juxta e intraepatico in 51 specie di Pesci.

**Maxia C.** - Focolai emopoietici nel fegato di Vertebrati ad organogenesi ultimata [*Vertebratorum loca haematopoietica in hepate, organogenesi perfecta*]. 8 fig., Scritti Biol. racc. da L. Castaldi, X, 249-289. Cagliari (1935). **b - 238**

Esame in 96 specie (di cui 43 di Pesci e 22 di Mammiferi) della comparsa di focolai emopoietici in fegati ad organogenesi ultimata, della loro topografia e di alcuni dei loro caratteri più appariscenti.

**Richard J. & Neuville H.** - Foie et sinus intra–hépatique du *Grampus griseus* [*Hepar et sinus intrahepaticus speciei « Grampus griseus »*]. Rés. Campagnes Scient., Fasc. XCIV, 7-9. Monaco (1936). **b - 239**

Dimensions et description du foie d'un exemplaire mensurant m. 2,92 de longueur totale.

**Tarao S.** - Microscopical Study on the Purple Gland of *Tethys punctata* Cuv. [*Studia microscopica quoad purpurae glandulam speciei « Tethys punctata »*]. 4 fig., 1 pl., Journ. Fac. Sci. Hokkaido Imp. Univ., III, 221-232. Sapporo (1934). **b - 240**

The red colour of *Tethys punctata* is produced by unicellular glands situated on the free edge of the mantle. The grains of secretion which form the purple derive directly from the mitochondries. The secretion gives also rise to some other albuminoid, viscous and aqeous substances.

**Tarao S.** - Microscopical Study on the Hypobranchial Gland of *Haliotis japonica* Reev with a Note on the Restitution of the Secretion [*Studia microscopica de hypobranchiali glandula speciei « Haliotis japonica » atque de secretione*]. Journ. Fac. Sc. Hokkaido Imp. Univ., IV, 103-114. Sapporo (1935). **b - 241**

**Vogt W.** - Die Entwicklung der Antennendrüse der Mysideen [*Accretio glandulae antennariae in Mysidaceis*]. 27 Abb., Ztschr. f. Morphol. u. Oekol. Tiere, XXIX, 481-506. Berlin (1935). **b - 242**

## Color et influentia pigmentorum.

**Abramowitz A. A.** - Physiology of the Melanophore System in the Catfish, *Ameiurus* [*De physiologia systematis melanophori in « Ameiurus »*]. 1 pl., 3 tabl., Biol. Bull., LXXI, 2, 259-281. Lancaster, Pa (1936). **b - 243**

The experiments reported here, with special reference to those of Smith (1931) and Parker (1934), show that the chromatic responses are chiefly connected with the nervous system directed by optic impulses and with humoral materials in the blood stream, which have some properties characteristic of adrenalin. The rôle of the pituitary gland.

**Brown F. A. Jr.** - Control of Pigment Migration within the Chromatophores of *Palaemonetes* [*Inspectio migrationis pigmentorum inter chromatophoros in « Palaemonetes »*]. 8 fig., Journ. Exp. Zool., LXXI, 1, 1-16. Philadelphia (1935). **b - 244**

The red, yellow, blue and white pigments are shown to be independent one from another and due to four different humoral agents, some of which seem to originate in the eye-stalks and others in the central nervous organs and in the cephalotorax.

**Brown F. A. Jr.** - Color Changes in *Palaemonetes* [*Colorum mutationes in « Palaemonetes »*]. Journ. Morphol., LVII, 2, 317-334. Philadelphia (1935). **b - 245**

The four pigments, red, yellow, blue, and white are all found exclusively within chromatophores and can be either dispersed into chromatophore branches or concen-

trated into chromatophore centers depending on the colour of the background upon which the animal lies.

Concentration of the pigments was found to be more rapid than dispersion.

**Cornil L., Mosinger M. & Calen M.** - La désintégration physiologique de l'appareil pigmentaire chez les Holothuries [*Disintegratio physiologica apparatus pigmentarii in Holothuriis*]. C. R. Soc. Biol., CXIX, 106. Paris (1936). **b - 246**

Recherches sur *Holothuria nigra* et *H. tubulosa* ont démontré que les cellules en pigmentolyse sont entourées d'amibocytes souvent chargés de granulations pigmentaires.

**Fox D. L.** - Structural and Chemical Aspects of Animal Coloration [*Habitus structuralis et chemicus colorationis Animalium*]. Amer. Natur., LXX, 477-493. Boston (1936). **b - 247**

Structural coloration. Chemical constitution of colours. Animal pigments: Carotenoids, Anthraquinones, Flavones, Anthocyanins, Lyochromes, Pyrrolic compounds, Melanins, Indol and Purine derivatives.

**Fox D. L.** - Further Studies of the Carotenoids of Two Pacific Marine Fishes, *Fundulus parvipinnis* and *Hypsypops rubicunda*, and of a Marine Annelid *Thoracophelia* Sp. [*Studia recentiora de carotinoideis duorum Piscium marinorum* « *Fundulus parvipinnis* » *et* « *Hypsypops rubicunda* » *Annellidique marini* « *Thoracophelia* »]. Proc. Nat. Acad. Sc., XXII, 1, 50-54. Washington (1936). **b - 248**

Spectrometrical data on the carotenoid pigment. While the polychaete worm *Thoracophelia* seems to possess exclusively carotene and carotenoid pigment and *Hypsypops* yields a single pigment of the xanthophyll group, *Fundulus* feeding upon *Thoracophelia* or *Hypsypops*, stores in its tissues only a xanthophyll very similar to that of *Hypsypops*.

**Gudger E. W.** - A Reversed almost wholly ambicolorate Summer Flounder, *Paralichthys dentatus* [*Solea quaedam aestiva ambicolorata sensu inverso*]. 3 figs., Amer. Mus. Novit., 896, 1-5. New York (1936). **b - 249**

This specimen was taken at Freeport, Long Island July 21, 1935 and is the most abnormal flounder ever seen by A. The normal fish. The reversed fish: The upper and dark side, the lower and ambicolorate side.

**Gudger E. W.** - Ambicoloration partial and complete, in the Southern Flounder, *Paralichthys lethostigma* [*Ambicoloratio partialis et completa speciei* « *Paralichthys lethostigma* »]. 6 figs., Amer., Mus. Novit., 897, 1-7. New York (1936). **b - 250**

The normal fish. A partially ambicolorate fish without eye and dorsal fin anomalies. An almost totally ambicolorate fish with eye almost over dorsal crest and with a hooked dorsal fin. A completely ambicolorate specimen with incompletely rotated eye and hooked dorsal fin.

**Gudger E. W. & Firth F. E.** - Three partially ambicolorate four-spotted Flounders, *Paralichthys oblongus*, two each with a hooked dorsal Fin and a partially rotated Eye [*Pleuronectidae tres partialiter ambicoloratae quattuormaculatae speciei* « *Paralichthys oblongus* » *ex quibus duae pinna dorsali uncinata praeditae, oculoque partialiter rotato*]. 6 figs., Amer. Mus. Novit., 885, 1-9. New York (1936). **b - 251**

The normal fish. A partially ambicolorate specimen without eye or dorsal fin anomaly. Two partially ambicolorate specimens each with a partially rotated eye and a hooked dorsal fin. Historical note.

**Lederer E.** - Les caroténoïdes des animaux [*De carotinoideis Animalium*]. Actualités Scient. et Industr., 238, 3-62. Hermann Ed. Paris (1935). **b - 252**

Les caroténoïdes chez les Tuniciers, Mollusques, Crustacés, Echinodermes, Coelentérés et Spongiaires et leurs rapports avec la Vitamine A. Les caroténoïdes des vertébrés sont des pigments végétaux absorbés avec la nourriture: chez les invertébrés on trouve des caroténoïdes spéciaux, synthétisés par l'animal ou résultant d'une transformation des caroténoïdes de la nourriture.

**Parker G. H.** - The Chromatophoral Neurohumors of the Dogfish [*Liquidi chromatophorici speciei* « *Mustelus canis* »]. Journ. Gen. Physiol., XVIII, 837-846. New York & Baltimore (1935). **b - 253**

The changing color shades from light to dark of *Mustelus canis* are due to the uneven spreading of a pigment in connection with a secretion of the pituitary gland. This secretion is transported by the blood and under the control of the nerves.

**Parker G. H.** - Integumentary Color Changes in the newly-born Dogfish, *Mustelus canis* [*Coloris mutationes integumentariae in specie* « *Mustelus canis* », *modo nata*]. 1 pl., Biol. Bull., LXX, 1, 1-7. Lancaster, Pa. (1936). **b - 254**

From the experiments described here it is concluded that newly-born Dogfishes respond to the tint of their environment by appropriate melanophore reactions, and that, after a transverse cut in the fin, a pale band is formed from the cut toward the free edge of the fin just as by adult species. This shows that the newly-born *Mustelus*, has no primary phase of melanophore activity but begins life with a melanophore system that responds in the same way as in the adults.

**Parker G. H.** - Color Changes in Elasmobranchs [*Coloris mutationes in Elasmobranchiis*]. Proc. Nat. Acad. Sc., XXII, 1, 55-60. Washington (1936). **b - 255**

*Squalus acanthias* sometimes changes from a dark tint to a pale one. A:s investigations on the color changes have shown that the melanophore system of *Squalus* depends on the activation of its dark phase upon a pituitary neurohumor carried in the blood. Its pale phase is almost if not fully independent of nerves and probably results from the absence of pituitary neurohumor.

**Rodio G.** - Sui pigmenti delle Feoficee [*De pigmentis in Phaeophyceis*]. Bull. Orto Bot., R. Univ. di Napoli, XIII, 43-115. Napoli (1936). **b - 256**

Risultati di ricerche originali sulla funzione della fucoxantina. Si rileva il comportamento non uniforme delle alghe brune sperimentate, rispetto alle radiazioni della zona più rifrangibile e gli effetti diversi, dovuti alla concentrazione del filtro cupro-ammoniacale adoperato; effetto del filtro verde, dimostratosi più vantaggioso per l'alga bruna che per l'alga verde. L'adattamento cromatico si attua verosimilmente nelle alghe brune sperimentate, specialmente se viventi in zone superficiali, nel golfo di Napoli, nel settore del verde e del blu-verde; in profondità maggiori entrerebbe in gioco anche la fucoxantina, pur restando ampia possibilità di usufruire di radiazioni nel verde-blu, notevolmente penetranti.

**Sexton E. W. & Clark A. R.** - Variations in the White Pigment of the Eye in *Gammarus chevreuxi* Sexton, with a Description of a new Genetic Type, the « Clotted Eye » [*De variationibus pigmenti albi in oculo speciei* « *Gammarus chevreuxi* » *cum descriptione novi cuiusdam typi*

*genetici idest oculi grumosi*]. 1 fig., Journ. Mar. Biol. Ass., XX, 3, 691–699. Plymouth (1936). **b - 257**

Five different classes of variations from the normal type (according to the parts affected) have been determined during the work carried out from 1912 until now. Two classes are dealt with here: that of variations affecting the white pigment of the eye and that of variations in the structure of the eye involving also the structure of the head.

**Vasnetzov V.** - Ueber die Entwicklung des Musters bei den Knochenfischen [*De progressione circa adumbrationem a pigmento formatam in Teleosteis*]. 38 Abb., Trav. Lab. morphol. évol., II, 1, 5-81. Léningrad (1934). **b - 258**

Ursprüngliche und jetzige Färbung der Haut. Die Färbung einer Abart der Knochenfische. Möglichkeit das Muster in seiner weiteren Evolution zu verfolgen. Die oberflächliche Färbung unabhängig von der tiefliegenden.

**Verrier M. L.** - Pigments mélaniques, pourpre rétinien et cellules visuelles [*De pigmentis melanicis, purpura retinica et cellulis visivis*]. C. R. Soc. Biol., XCV, 1590. Paris (1934). **b - 259**

Importance du pigment mélanique dans la formation du pourpre rétinien. Comparaison entre *Scyllium* et la girelle.

**Verrier M. L.** - Pourpre et cellules visuelles de la fovea des oiseaux nocturnes et des autres vertébrés [*De purpura atque visionis cellulis in fovea avium nocturnarum aliorumque vertebratorum*]. C. R. Acad. Sc., CCII, 24, 2012-2014. Paris (1936). **b - 260**

Observations faites sur les fonds d'yeux et les rétines étalées de 5 oiseaux nocturnes et de 20 Téléostéens (Serrans, Blennies, Girelles) qui conduisent à penser que les divers modes de sensibilité de la fovea, comparés à ceux des régions rétiniennes extrafovéales ne relèvent pas de la forme des cellules visuelles et de la répartition du pourpre, et que d'autres dispositions anatomiques peuvent intervenir, telles que la répartition de la mélanine et du pigment jaune maculaire. (Après l'A.).

**Welsh J. H.** - Diurnal Movements of the Eye Pigments of *Anchistioides* [*Pigmentorum motus diurni in specie « Anchistioides »*] 2 figs., 1 pl., Biol. Bull., LXX, 2, 217-227. Lancaster, Pa. (1936). **b - 261**

The distal pigment cells and the reflecting pigment in the eyes of *Anchistioides* continue their characteristic movements under constant external conditions. The persistance of this diurnal rhythm indicates that an internal cyclical mechanism is responsible, in part, for pigment movements in crustacean eyes. Possibility of the function of the blood gland or X-organ in the diurnal rhythm. (From A:s summ.).

**Wykes U.** - Observations on Pigmentary Co-ordination in Elasmobranchs [*Observationes de adjunctione pigmentaria in Elasmobranchiis*]. Journ. Exper. Biol., XIII, 460-466. Cambridge (1936). **b - 262**

No chromatophore changes shown by the section of the spinal nerves to the pectoral fins, electrical stimulation of these nerves, or of the hoemal canal or of the skin. Slight paling was shown in *Raia brachyura* and *Rhina squatina* after the injection of adrenaline. After ligatura of the dorsal aorta white adapted specimens of *R. brachyura* became dark anterior to the point of ligature within three hours when placed on a black ground.

## Regeneratio, autotomia et muta.

**Abeloos M.** - La Régénération et les problèmes de la Morphogenèse [*De regeneratione deque problematis morphogeneticis*]. 54 fig., 253 pp. Gauthier-Villars. Paris (1935). **b - 263**

Aperçu des recherches des expérimentateurs sur les aspects de la régénération dans les différents organismes. Phénomènes connexes à la régénération et le pouvoir regénérateur dans le règne animal. Les problèmes de l'histogenèse dans la régénération et de la différenciation des régénérats. Croissance normale et croissance régénératrice. Les anomalies de la régénération.

**Andrews E. A.** - Shell Repair by the Snail *Neritina* [*Reconstructio conchae in « Neritina »*]. 9 figs., Journ. Exp. Zool., LXX, 75-107. Philadelphia, Pa. (1935). **b - 264**

The new shell starts from a line along the broken shell edge and grows away from this gradually. After the removed shell is regrown, the entire mantle border resumes its activity in advancing the shell edge. Growth of the shell lip involves sequential activities of the following parts: first, mantle groove, then mantle gland, then pigment cells, finally more remote epidermis, to make the hypostracum. (A.).

**Banz E.** - Zur Morphologie und Histologie der Flossenregeneration bei Knochenfischen unter besonderer Berücksichtigung von *Misgurnus fossilis* L. [*De morphologia et histologia regenerationis pinnarum in Piscibus osseis, praecipue relate ad speciem « Misgurnus fossilis »*]. 14 Abb., Zool. Anz., CXII, 209-230. Leipzig (1935). **b - 265**

Versuche. Morphologisches: Schwanzflossen - Rükkenflossen - und Schwanzregeneration. Histologisches: Wundbedeckung und Epidermisregeneration. Regeneration der Lepidotrichien. Strahlenregeneration in der Rückenflosse. Regenerationsvorgänge an der tief abgeschnittenen Rückenflosse. Muskelregeneration. Regeneration des straffen Coriums.

**Busson Y.** - L'autonomie et la régénération de la Pince chez le Bernard l'Ermite [*De autotomia et regeneratione quoad uncum in « Eupagurus Bernhardus »*]. 3 figs., 2 pls., Trav. Stat. Biol. Roscoff, 13, 133-152. Paris (1935). **b - 266**

Étude entreprise dans le but d'élucider les processus histologiques de l'autotomie réflexe et de la régénération de la pince chez *Eupagurus Bernhardus*. Formation de la membrane dans le plan d'autotomie, cicatrisation, prolifération intense des cellules. D'après les résultats de ce travail, la reconstruction des différents tissus de la pince, au cours de la régénération, est conforme à la théorie des feuillets.

**Dawes B.** - A Study of Normal and Regenerative Growth in the Pistol-Crab, *Alpheus dentipes* (Guér.), with special Reference to the Phenomenon of Chela Reversal [*De accretione normali et regeneraticia in specie « Alpheus dentipes ». Agitur particulatim de inversione chelarum*]. 13 figs., Roux Arch. Entwickl.– Mech. Organ., CXXXI, 4, 543-574. Berlin (1934). **b - 267**

Repeated regeneration of new chelae with little or no waning of growth intensity. Simultaneous regeneration of chelae. Autotomy of nipper and of crusher.

**Drach P.** - Le cycle parcouru entre deux mues et ses principales étapes chez *Cancer pagurus* Linné [*De cyclo inter duas mutationes eiusque*

*praecipuis periodis in « Cancer pagurus »*]. C.-R. Acad. Sc., CCII, 25, 2103-2105. Paris (1936). **b - 268**

L'A. communique les résultats de ses observations sur les 12 stades d'intermue qu'il a récupérés chez *C. pagurus* L. et dont la distinction, selon son opinion, devra servir de base à toute étude physiologique ou biochimique sur les Décapodes.

**Nouvel L.** - Sur un mode de régénération des appendices locomoteurs, particuliers aux Crangon [*De particulari regeneratione quoad appendices locomotorias in « Crangon »*]. C. R. Acad. Sc., CCII, 7, 584-586. Paris (1936). **b - 269**

Après avoir relevé que les processus régénérateurs après amputation des péréiopodes chez des crevettes appartenant à différentes familles dans presque tous les cas sont identiques à celles qu'il a décrit chez *Leander serratus* (V.: C. R., CXCVIII, 1934, p. 611), l'A. illustre dans cette Note ces processus régénérateurs qui présentent une évolution notablement différente chez la crevette grise. *Crangon crangon* (L.) (= *vulgaris* Fabr.).

**Stolte H. A.** - Die Herkunft des Zellmaterials bei regenerativen Vorgängen der wirbellosen Tiere [*De cellularum origine in phaenomenis regenerationis Invertebratorum*]. (Engl. Rés.). 12 Abb., Biol. Rev., Cambridge Phil. Soc., XI, 1, 1-48. London (1936). **b - 270**

Das Problem ist in *Porifera, Coelenterata, Turbellaria, Nemertines, Polychaeta, Oligochaeta, Gephyrea, Bryozoa, Tunicata,* und in einigen Fällen auch bei Arthropoden, Mollusken und Echinodermen vom physiologischen Standpunkt betrachtet worden. Nach jeder Gruppe folgt eine kurze Zusammenfassung und am Ende ist eine Gesamtauffassung in Bezug auf die Bedeutung der Zellen der drei Keimblätter bei der Regeneration gezogen.

**Vialli V.** - Un caso di rigenerazione in un Echinide [*Casus regenerationis in Echinide quodam*]. 2 fig., Riv. It. Paleontol., XLII, 1/2, 19-23. Pavia (1936). **b - 271**

L'A. descrive un fenomeno di rigenerazione avvenuto negli ambulacri di *Echinospatangus argillaceus.* Cott. del Neoconiano di Digues in Francia, in seguito probabilmente a ferita interessante il guscio e conseguentemente il sistema acquifero sottostante.

**Zirpolo G.** - Sul potere rigenerativo della regione del disco dell'*Astropecten aurantiacus* L. [*De potentia regeneratricia in disci regione speciei « Astropecten aurantiacus »*]. 3 fig., Arch. Zool. Ital., XXII, 2, 175-180. Torino (1936). **b - 272**

L'A. descrive un nuovo caso di rigenerazione osservato nell'*Astropecten aurantiacus* e discute sulle probabilità di rigenerazione delle varie specie. Ammette la localizzazione di blastomeri rigenerativi, totipotenti in punti vari del corpo, che entrano in attività quando una causa qualsiasi li cciti. (A).

## Squamae piscium – Determinatio aetatis animalium marinorum.

**Chevey P.** - La méthode de lecture des écailles et les poissons de la zone intertropicale [*Modus legendi squamas Piscium regionis intertropicalis*]. 5 fig., 5 pl., Inst. Océanogr. Indochine (Communic. 5e Congrès Pacifique Vancouver 1933), 29,51-66. Saigon (1936). **b - 273**

Détermination de la variation thermique minima nécessaire pour marquer les écailles et son effet pour le problème des migrations des poissons, dans les mers chaudes. Analyse du rythme du développement des poissons capturés sur les bancs du Mékong par l'examen des écailles: les arrêts de croissance indiquent des mauvaises conditions d'existence. Les écailles sont aussi des instruments enregistreurs de conditions physiques difficilement saisissables.

**Clark R. S.** - Age Composition of Haddock in European Waters. With a Contribution of D. S. Raitt [*Aetatis compositio speciei « Gadus aeglefinus » in aquis europaeis. Contributio redacta a* D. S. Raitt]. 1 graph., 1 table. Cons. Expl. Mer, Rapp. & Pr.-Verb., CI, 3e partie, 2, 4pp. Copenhague (1936). **b - 274**

Distribution and natural boundaries. Fishing grounds (statistical table). The age composition in the North-East Atlantic covering the period 1916–1935 (D. S. Raitt). Comparison of year-classes in different regions. Conclusional remarks: the stocks of the North-East Atlantic and the neighbouring seas are quite independent of each other.

**Dorofeew S. W. & Klumow S. K.** - Ueber Altersbestimmung des Weisswals (*Delphinapterus leucas* Pall.) und Zusammensetzung der Herde [*Aetatis determinatio et compositio turmae speciei « Delphinapterus leucas »*]. (In Russ., Dtsch. Rés.). 3 Abb., 3 Tab., Trans. Inst. Fish. & Oceanogr. U S S R (V N I R O), III, 24-34. Moscow & Leningrad (1936). **b - 275**

Die Vf. Vf. sind auf Grund ihrer Untersuchungen über Farbe, Masse der Wale, Ernährung und Geschlechtsreife zu der Schlussfolgerung gekommen, dass jede Altersgruppe eine charakteristische Farbe hat.

**Ebina Ken-ichi** - On the Growth of *Pagrosomus major* [*De accretione speciei « Pagrosomus major »*]. (In Jap., Engl. Rés.). 8 tabl., Bull. Jap. Soc. Scient. Fish., IV, 6, 411-414. Tokyo (1936). **b - 276**

Reading the number of the annual rings of the scales on several specimens of *Pagrosomus major*, the A. found that they ranged from 1 to 26 years. These teleosts collected from Mito seem to be slower in growth than the same species derived from the Inland Sea of Japan.

**Fach M.** - Zur Entstehung der Fischschuppe [*De origine squamarum Piscium*]. 19 Abb., Ztschr. Anat. u. Entwickl. gesch., CV, 3, 288-304. Berlin & München (1935). **b - 277**

Die verschiedenen Entwicklungsstadien der Schuppe können bei jungen Tieren sehr deutlich bei dem Schwanz gesehen werden, der in direkter Verbindung mit der Epidermis steht. Wachstum des Schwanzes. Bildung der Schuppe.

**Järvi T. H. & Menzies W. J. M.** - The Interpretation of the Zones of Scales of Salmon, Sea Trout and Brown Trout [*Interpretatio quoad zonas squamarum in speciebus « Salmo salar », « Salmo trutta » et « Salmo trutta var. fario »*]. 82 figs., tables. Cons. Expl. Mer, Rapp. & Pr.-Verb., XCVII, 3-63. Copenhague (1936). **b - 278**

The readings are applied to age determination and length calculations. The reproduction of scales from the North Sea and the Baltic are published side by side in order to compare more easily similiarities as well as differences.

**Koumans F. P.** - A Case of Increase of the Number of Scales during Growth in Fishes [*De numerica augmentatione squamarum inter Piscium accretionem*]. 3 figs., Temminckia, 1, 267-276. (?) (1936). **b - 279**

Large specimens of *Eleotris* (*Oxyeleotris*) *fimbriatus* have much more scales than small ones varying in a longitudinal line between 45 and 77. The same fact but to a lesser degree has also been found in *Cepola krusensterni* and *C. mesoprion.*

**Mac Farlane P. R. C.** - Salmon of the River Nith - 1935 [*De Salmone in flumine* Nith]. 1 table, 7 tables o. t., Fish. Bd Scottl., Salmon Fish., III, 3-16. Edinburgh (1936). **b - 280**

A collection of scales and measurements from 801 salmon caught in the Nith in 1935 forms the basis of this Report. The composition of the stock has been determined with especial reference to the age groups, the smolt ages, the average sizes, the calculated lengths, the growth increments of summer fish, and erosion.

**Mac Farlane P. R. C.** - Salmon of the River Tay, 1934 [*De Salmone in flumine* Tay]. 1 diagr., tables, 6 tables o. t., Fish. Bd Scottl., Salmon Fish., V, 3-22. Edinburgh (1936). **b - 281**

Report on the results of readings and measurements of 2,329 sets of scales from salmon and grilse taken in the Tay throughout the season 1934 correlated with percentage figures of total catch. The contents of the Report is as follows: Introduction. Material. Age groups. Smolt ages. Average sizes. Condition. Calculated lengths. Growth increments of summer fish. Erosion.

**Nardi F.** - Zur Genese der Fishschuppe [*De genesi squamarum Piscium*]. Biol. Zentralbl., LVI, 11/12, 630-639. Leipzig (1936). **b - 282**

Kritische und erörternde Uebersicht der Hypothesen verschiedener Autoren über die Schuppenbildung. Vf. ist der Ansicht, dass die Epidermis kein Material zur Schuppenbildung liefert, obwohl sie für die Festlegung des Ortes der Schuppenanlage, für die Determination und Anordnung zum Schuppenkeim gewisser Zellen eine ausschlaggebende Bedeutung hat. Neue experimentelle Forschungen nötig um dies Problem ganz aufzuklären.

**Neave F.** - Origin of the Teleost Scale Pattern and the Development of the Teleost Scale [*De origine constitutionis squamarum Teleosteorum deque progressu squamae Teleosteorum*]. Nature, CXXXVII, 3477, 1034-1035. London (1936). **b - 283**

A. gives an account of the general process of scale formation based on his own recent investigations and those of others which are contrary to the theory developed by Backman in this respect. (See Verhandl. anat. Ges., 41, Jena).

**Newcombe Curtis L.** - Validity of Concentric Rings of *Mya arenaria*, L. for determining Age [*Validitas annulorum concentricorum speciei « Mya arenaria » ad aetatem determinandam*]. Nature, CXXXVII, 3457, 191-192. London (1936). **b - 284**

Referring to preceding researchers A. states that *Mya arenaria* of the Bay of Fundy possess certain concentric rings more conspicuous than others and that variations occur according to different latitudes. The annual growth increments have been verified by experiments. (See also Nature, 3463, p. 462).

**Runnström S.** - A Study on the Life History and Migrations of the Norwegian Spring-Herring based on the Analysis of the Winter Rings and Summer Zones of the Scale [*De vitae cyclo deque migrationibus aringi vernini norvegici quorum fundamenta ponuntur in analysi annulorum hiemalium et in zonis aestivis squamarum*]. 15 figs., 3 pls., Fiskerid. Skr. Ser. Havunders. (Rep. Norw. Fish. & Mar. Invest.), V, 2, 1-163. Bergen (1936). **b - 285**

Analysis of the character of the winter rings, the growth and the bearing of these factors on the life history and migrations of the Norwegian spring herring.

**Tesch J. J.** - Length, Age Distribution and Growth of Herring in the Flemish Bight 1935-36 [*Longitudo, aetatis distributio et accretio Aringorum in baja nomine* Flemish Bight *1935-36*]. 3 figs., Cons. Expl. Mer, Rapp. & Pr.-Verb., C, 3e partie, 11-14. Copenhague (1936). **b - 286**

The data obtained verify those of preceding investigations. It has also been shown that the probable age of each particular herring can be determined in a general way by taking the unity of the number (in cm) above 20 cm of its length.

**Uno M.** - Age Composition of *Theragra chalcogramma* (*Pallas*) [*Determinatio aetatis speciei « Theragra chalcogramma »*]. (In Jap., Engl. Rés.). 2 tabl., Bull. Jap. Soc. Scient. Fish., V, 3, 173-174. Tokyo (1936). **b - 287**

Measurements of body lengths and weights, determination of age by counting winter rings on vertebra, sex ratio, composition of shoals, growth rate.

**White H. C.** - Age Determinations of Salmon Parr by Effect of Rate of Growth on Body Proportions [*Aetatis determinatio in salmonibus juvenibus ex effectu stadii accretionis in corporis proportiones*]. 4 figs., Journ. Biol. Bd Canada, II, 4, 379-382. Toronto (1936). **b - 288**

Rapidly growing fish (as shown by scales) have short heads and small eyes. Plotting eye diameter against length of fish places, with few exceptions, each year class in a separate zone. On this basis age may be determined. (A.).

## Varia.

**Ankel W. E.** - Die Frassspuren von *Helcion* und *Littorina* und die Funktion der Radula [*De ciborum vestigiis per « Helcion » et « Littorina » formatis deque radulae officio*]. 8 Abb., Zool. Anz., Suppl. 9, 174-182. Leipzig (1936). **b - 289**

Der Verlauf des Fressvorgangs bei *Helcion* und bei *Littorina* wird eingehend beschrieben und auf Grund der verschiedenen Frassspuren wird ein Vergleich zwischen der Funktion der Radula der beiden Arten gemacht.

**Barigozzi C.** - Il legame genetico fra i biotipi partenogenetici di *Artemia salina* [*Ligamen geneticum inter biotypos parthenogeneticos speciei « Artemia salina »*]. 1 fig., 2 tav., Arch. Zool. Ital., XXII, 2, 33-77. Torino (1936). **b - 300**

L'A. descrive l'ovogenesi del biotipo tetraploide partenogenetico e completa le conoscenze circa l'ovogenesi del biotipo octoploide partenogenetico di Margherita di Savoia e dell'Istria (Rovigno). In un piccolo gruppo di uova prodotte in ritardo, si osservano forme di divisioni abortite che permettono il raddoppiamento di cromosomi. L'A., ipotetizza che tali fenomeni maturativi aberranti siano in relazione con particolari proprietà plasmatiche delle uova prodotte in ritardo, forse indotte da cause esterne non ancora ben determinate, e ha osservato forme di autopoliploidismo nel biotipo octoploide che volgerebbero alla produzione di un biotipo ipotetico diacisoctoploide con 336 cromosomi (dall'A.).

**Boettger C. R.** - Ueber Arthybriden bei Mollusken [*De formis hybridis Molluscorum*]. 4 Abb., Sitz. ber. Ges. Naturf. Freunde, II, 4/7, 141-170. Berlin (1935). **b - 301**

Beispiele von Begattungen zwischen verschiedenen Arten: Kopulationen, die nicht zur Hybridation führen und Ursachen dazu; mögliche aber selten vorkommende Hybridation. Molluskenhybriden bei nahe verwandten Arten. Die Fruchtbarkeit der Molluskenhybriden. Nachschrift über einen Bericht von S. Emura über eine atypische Begattung.

On peut provoquer une évolution maturative des glandes génitales de l'anguille avec une injection, dans la région caudale, d'urine de femme enceinte.

**Brien P.** - Contribution à l'étude de la reproduction asexuée des Phylactolemates [*Contributiones in studendam reproductionem asexuatam quoad*

*Phylactolemates*]. 28 fig., Mém. Mus. R. Hist. Natur. Belgique, Sér. 2, 3, 569-625. Bruxelles (1936). **b - 303**

Etude des éléments régénérateurs dans les bourgeons d'accroissement et les bourgeons de dissémination chez les Bryozoaires Phylactolémates, les *Plumatella fungosa* et les *Fredericella sultana* dans le but de résoudre le problème de l'origine de ces éléments. Considérations générales sur le cystide et l'accroissement de la colonie d'un Bryozoaire, et observations personnelles. Dans chaque cystide individualisé, la paroi ventrale présente une zone spéciale près de la région orale du polypide, dans un état physiologique particulier, favorable au bourgeonnement et à la croissance indéfinie.

**Chaldinowa N.** - Study on the Spawning, Eggs and Larvae of *Eleginus* (*Gadus*) *Navaga* Pall. [*Studium circa fecundationem, ova et larvas speciei « Eleginus* (*Gadus*) *Navaga* ». (In Russ., Engl. Rés.). 8 figs., tabl., Zool. Journ., XV, 2, 321-339. Moskva (1936). **b - 304**

Distribution of *Eleginus* (*Gadus*) *Navaga* in the White Sea. Account of the artificial fertilization and incubation of eggs undertaken in different salinities and temperature in 1931, 1933 and 1934; results expressed in tables and figures. Some conclusions with regard to salt content and temperature necessary for development, pigment formation etc. Comparison with *Navaga* larvae from other regions.

**Coe W. R.** - Sequence of functional sexual Phases in *Teredo* [*De sequentia quoad phases sexuales functionales in « Teredo »*]. 1 fig., 2 tabl., Biol. Bull., LXXI, 1, 122-132. Lancaster, Pa. (1936). **b - 305**

This study is based on the examination of the gonads of 2.987 specimens of *Teredo navalis* of all ages, at all seasons and during three successive years. Factors concerned with the functional phase. Typical sequence of phases. Proportion of individuals in each functional sexual phase at successive ages and at different seasons. Comparison with the sexual changes in oviparous Oysters and *Venus*.

**Coe W. R.** - Environment and Sex in the oviparous Oyster, *Ostrea Virginica* [*De ambiente et sexu speciei « Ostrea Virginica », oviparae*]. 2 tabl., Biol. Bull., LXXI, 2, 353-359. Lancaster, Pa. (1936). **b - 306**

In the northern part of its range the Virginia oyster appears to be mainly or wholly protandric, while in somewhat warmer waters, a considerable proportion of the young oysters function as females during their first breeding season, which occurs at the age of one year. The more favorable the conditions are for the rapid growth of the young oyster, the more likely is the initial phase to be omitted or aborted. Hence the localities and seasons in which the yearling oysters reach the largest mean size usually have the largest proportion of females in the first breeding season. (A.).

**Coe W. R.** - Sexual Phases in *Crepidula* [*Phases sexuales in « Crepidula »*]. Journ. Exper. Zool., LXXII, 3, 455-477. Philadelphia (1936). **b - 307**

Association with older individuals, although usual, is not essential for the full development of the primary (♂) phase of sexuality. Contrary to widely accepted evidence, completely isolated young may become as fully functional ♂♂ as similar individuals which have been associated with adults in the ♀ phase. But the duration of the ♂ phase may be either abbreviated or prolonged by associations or other environmental conditions. (From A:s rés).

**Coe W. R.** - Sex Ratios and Sex Changes in Mollusks [*Relationes inter sexus et mutationes sexuales in Molluscis*]. 3 figs., Mém. Mus. R. Hist. Natur. Belgique, Sér. 2, 3, 69-76. Bruxelles (1936). **b - 308**

The sex ratios in a collection of Mollusks belonging to the forms: *Venus*, *Ostrea*, *Teredo*, *Patella* and *Crepidula*, depend upon the locality from which they come, the season, the age and size of the individuals selected and the associations.

**Crawford Dildine G.** - Studies in Teleostean Reproduction. I. Embryonic Hermaphroditism in *Lebistes reticulatus* [*De reproductione Teleosteorum. I. De hermaphroditismo embryonis in specie « Lebistes reticulatus »*]. 2 pl., 7 fig., Journ., Morphol., LX, 1, 261-278. Philadelphia (1936). **b - 309**

This study is based on the investigations of 155 *Lebistes* embryos. The embryonic hermaphroditism is followed through all stages from the formation of the genital ridges (3.0 mm) until birth (6.5 to 7.0 mm). Witschi's explanation of the sex determination in *Lebistes* is confirmed and it is suggested that in Teleosts as in some other animal groups the gonads develop from two distinct portions, a male medulla and a female cortex.

**Dalcq A., Pasteels J. & Brachet J.** - Données nouvelles (*Asterias glacialis, Phascolion Strombi, Rana fusca*) et considerations théorétiques sur l'inertie de l'oeuf vierge [*Data et considerationes novae theoreticae de inertia quoad ovum virginem*]. 9 figs., Mém. Mus. R. Hist. Natur. Belgique, Sér. 2, 3, 881-912. Bruxelles (1936). **b - 310**

Action de l'acide butyrique sur les oeufs d'*Asterias glacialis*; effet de l'eau de mer hypertonique sur les oocytes entrés en maturation; le procédé de parthénogénèse consistant à placer des oocytes d'Astérie dans un mélange convenable de Chlorures isotoniques à l'eau de mer et de même pH. L'action des solutions isotoniques a été expérimentée aussi sur les oeufs de *Phascolion Strombi*. On peut résumer: les agents effectifs de l'activation de la parthénogénèse pour tous les oeufs marins sont les constituants de l'eau de mer; l'intervention du $CO_2$ comme agent de l'inertie de l'oeuf n'est pas satisfaisant.

**Darby H. H.** - Intersexuality in the *Crustacea* [*Intersexualitas in Crustaceis*]. 1 pl. o. t., Pap. Tortugas Lab., XXIX, 147-149. Washington (1936). **b - 311**

A. tries to prove the existence of intersexuality in the Crustacean, the theory of which was put forward by Morgan in 1920. Concentrating his investigations on the claws instead of the abdomen as Morgan did, A. here reports some cases studied in *Uca pugilator*: female to male intersexes, male to female intersexes and symmetry in males.

**Davidson F. A.** - The Development of the Secondary sexual Characters in the Pink Salmon (*Oncorhynchus gorbuscha*) [*Accretio characterum sexualium secundariorum in specie « Oncorhynchus gorbuscha »*]. Journ. Morphol., LVII, 1, 169-184. Philadelphia (1935). **b - 312**

Body form of sexually immature male and female pink salmons. Time of development of the secondary sexual characters; morphological changes.

**Devold F.** - The Susceptibility of Plaice Eggs to Shock [*De ovorum susceptibilitate speciei « Pleuronectes platessa » contra collisionem*]. 2 figs., 1 table. Kgl. Norsk. Vidensk. Selsk. Forh., VIII, 22, 71-74. Trondheim (1936). **b - 313**

A. has followed the same methods as Rollefsen used for cod eggs with small modifications (See Rapp. et Proc.-Verb., LXV, 1930; Journ. Cons., VII, 3, 1932; Årsber. v. Norg. Fisk. 2, 1929 and 2, 1931). The results are shown in a table and a graph and compared to those of the codeggs.

**Duboscq O. & Tuzet O.** - Sur quelques points de l'ovogenèse et du développement des Eponges calcaires [*De ovogenesi et accretione spongiarum calcarearum*]. 1 fig., C. R. XII Congr. Int. Zool., 547-553. Lisbonne (1936). **b - 314**

L'A. a essayé de préciser l'origine des cellules germinales. Description de l'ovocyte, de la formation des globules polaires et de la segmentation. La gastrulation de l'Eponge présente un mélange de caractères de Protistes et de Métazoaires.

**Dworak I.** - Dojrzewanie komórek płciowych męskich oraz składniki cytoplazmatyczne w spermatogenezie u *Asellus aquaticus*. Przyczynek do gametogenezy u Crustacea [*De spermatozoidibus quoad maturationem deque componentibus cytoplasmicis in spermatogenesi speciei « Asellus aquaticus »*]. (En polon., rés. franç.). 2 pl., Folia Morphol., V, 4, 209-249. Warszawa (1934 & 1935). **b - 315**

Etude expérimentale sur la spermatogenèse de *Asellus aquaticus*. Avec l'exception des heterochromosomes, les 17 chromosomes peuvent être groupés deux à deux selon leur grandeur. Après la première division de maturation les spermatocytes secondaires, contenant 8 ou 9 chromosomes, poussent en formant ainsi les spermatides avec de chromosomes corréspondants. Le chondriome et le vacuome (nomenclature de Parat) apparaissent arrangés d'un certain caractère.

**Elster H. J.** - Ueber die Rolle der Eisekrete bei der Befruchtung der Echinoideen [*De secretionis momento ovorum in Echinodermatorum fecundatione*]. 1 Tab., Zool. Anz., Suppl. 9, 168-172. Leipzig (1936). **b - 316**

Die hier beschriebenen Versuche geben vorhanden, dass die Steigerung der Befruchtungsfähigkeit der Spermatozoen unter dem Einfluss des arteigenen Eisekretes auf einer Erhöhung der Agglutinationsfähigkeit beruht, wodurch ein innigerer Kontakt zwischen Ei und Samenzelle ermöglicht wird. Die Frage, ob die Spezifität der Befruchtung durch die Eisekrete bedingt ist, ist aber noch nicht endgültig aufgeklärt.

**Facciolà L.** - I due sessi nelle specie nostrane dei Murenoidi e le loro glandole generative [*De duobus sexibus in speciebus nostris Murenoidarum deque earum glandulis generationis*]. 2 tav., Atti Soc. It. Sc. Natur., Milano, LXXIV, 4, 394-418. Milano (1935). **b - 317**

Si descrivono i maschi e le femmine dei Murenoidi che vivono nelle nostre acque, e cioè: *Anguilla vulgaris* Flem., *Conger vulgaris* Lin., *C. simulatus* Facc., *Myrus vulgaris* Lin., *Congromuraena mystax* Delar., *C. balearica* Delar., *Muraena Helena* Lin., *M. unicolor* Delar., *Ophichthys serpens* Lin., *A. imberbis* Delar., *O. hispanus* Bellotti, *O. coecus* Bl.

**Fontaine M.** - Sur la maturation complète des organes génitaux de l'anguille mâle et l'émission spontanée de ses produits sexuels [*De completa maturatione organorum genitalium masculi anguillae deque emissione spontanea eius productionum sexualium*]. 1 fig., C. R. Acad. Sc., CCII, 14, 1312-1314. Paris (1936). **b - 318**

Dans le but de compléter les résultats antérieurs (v. : C. R. Soc. Biol., CXVI, p. 1284, 1934) sur l'influence des injections d'urine de femme enceinte sur la maturation des organes génitaux de l'anguille mâle, l'A. communique un nouveau résultat de ses recherches qui ont abouti non seulement à une maturation plus ou moins complète des testicules mais aussi à l'émission spontanée des produits sexuels. Ce résultat tendrait à confirmer l'hypothèse de la mort de l'anguille mâle immédiatement après la reproduction.

**Gallien L. & Larambergue (de) M.** - Cycle et dimorphisme sexuel de *Lacuna pallidula* Da Costa (*Littorinidae*) [*De cyclo et dimorphismo sexuali speciei « Lacuna pallidula »*]. C. R. Acad. Sc., CCIII, 6, 409-412. Paris (1936). **b - 319**

*Lacuna pallidula* est une espèce unisexuée et son dimorphisme accusé ne provient pas d'une transformation des jeunes mâles en femelles, mais d'une croissance différentielle des sexes. Ce dimorphisme ne paraît pas jouer un rôle important dans la reconnaissance des sexes. L'espèce, étant annuelle, ne présente qu'un seul cycle. (Après l'A.).

**Grave B. H. & Smith J.** - Sex Inversion in *Teredo navalis* and its Relations to Sex Ratios [*Sexualis permutatio in specie « Teredo navalis » correlationesque cum proportione sexuali*]. 6 figs., Biol. Bull., LXX, 2, 332-343. Lancaster, Pa. (1936). **b - 320**

Sex inversion continues to occur through the life of an individual, and in any shipworm population of adult animals there is no such significant difference in numbers of male and female. Histological investigations.

**Hörstadius S.** - Studien über heterosperme Seeigelmerogone nebst Bemerkungen über einige Keimblattchimären [*De merogonis heterospermaticis in Echino cum observationibus de quibusdam chimaeris germinis*]. 28 Abb., Mém. Mus. R. Hist. Natur. Belgique, Sér. 2, 3, 801-880. Bruxelles (1936). **b - 321**

Vererbung durch den Kern und durch das Plasma. Merogonieversuche an Echinodermen, an Amphibien und botanische Merogone. Vorversuche mit den folgenden Artkombinationen: *Sphaerechinus granularis - Paracentrotus lividus* oder *Psammechinus microtuberculatus; Ps. miliaris - Echinus esculentus; Ps. miliaris - Paracentrotus lividus*, aus welchen die systematische Stellung des *Paracentrotus lividus* und *Psammechinus microtuberculatus* hervorgeht. Die normale Entwicklung der vorhergehenden Spezies und der Hybriden. Homosperme und heterosperme Merogone. Studien über einige Keimblattchimären. Erörterung über den Wert der Merogonieversuche. Es wird darauf hingewiesen, dass die beiden *Paracentrotus* und *Psammechinus microtuberculatus* deren Plasma und Kern in den heterospermen Merogonen so gut zusammenarbeiten können, in ihren Chromosomengarnituren weitgehend übereinstimmen.

**Järvi T. H.** - Tvåkönade fiskar [*Pisces hermaphroditi*]. (In Sved.). 3 fig., Fiskeritidskr. f. Finl., XLIII, 8-9, 131-133. Helsinki (1936). **b - 322**

Alcuni esempi di ermafroditismo riscontrati in *Clupea sprattus* e in 2 altre specie di pesci di acqua dolce, provenienti dalle acque finlandesi.

**Kossiackina E. G.** - Concerning the Spawning of *Mugil auratus* [*De reproductione speciei « Mugil auratus »*]. (In Russ., Engl. Rés.). 1 fig., Works Arnoldi Biol. Stat., II, 1, 157-159. Novorossiysk (1936). **b - 323**

It is shown that *Mugil auratus* does not spawn in the estuaries but in the open parts of the Black Sea.

**Leloup E.** - Contributions à l'étude de la faune Belge. VI. Les transformations des gonades et les caractères sexuels externes chez *Pandalus montagui* Leach [*Contributio in studendam faunam Belgicam. De transformatione gonadum deque characteribus sexualibus externis in specie « Pandalus montagui »*]. 16 fig., Bull. Mus. R. Hist. Natur. Belgique, XII, 19, 1-27. Bruxelles (1936). **b - 324**

Le matériel a été recueilli lors de l'exploration de la mer du Nord. Description des pléopodes des formes jeunes, femelles, mâles et aberrantes. Caractères extérieurs et contenu cellulaire des gonades. Les mâles de *P. montagui* vivent trois années, les femelles grandissent plus rapidement et mènent une existence plus longue. Cette espèce comprend des femelles pures et des mâles gynandromorphes exclusivement androgènes.

**Linke O.** - Der Laich von *Littorina* (*Melaraphe*) *neritoides* L. [*Ova speciei « Littorina neritoides »*]. 1 Abb., Zool. Anz., CXII, 57-62. Leipzig (1935). **b - 325**

Ein sehr grosser Unterschied ist unter den vier an den europäischen Küsten befindlichen *Littorina* - Arten in Bezug auf den Laich und die Fortpflangungsbiologie vorhanden. Beschreibung und Erörterung.

**Loosanoff V.** - Sexual Phases in the Quohog [*Phases sexuales speciei « Venus mercenaria »*]. Science, LXXXIII, 2151, 287-288. New York (1936). **b - 326**

Protandry established in the primary gonads; many degrees of intersexuality; potentiality of changing the sex even in adult condition. Comparison with other Pelecypod Mollusca.

**Mazzeschi A. & Vannini E.** - Nuove ricerche sul precoce differenziamento sessuale delle anguille [*Investigationes novae in praecocem differentiationem sexualem anguillarum*]. Boll. Zool., VII, 2/3, 57-66. Napoli (1936). **b - 327**

Gli AA. affermano che nelle anguille il differenziamento sessuale possa essere dimostrato, in stadi giovanili, in base al diverso numero di protogoni. Tale differenziamento appare iniziarsi forse già dopo gli 11 cm. di lunghezza, certamente dopo i cm. 14.

**Meer Mohr (van der) J. C.** - Biologische Waarnemingen bij Pantai Tjermin. I. Eierkapsels van zeeslakken. 2. Wat de poekat ophaalt [*Observationes biologicae in* Pantai Tjermin. *I. Ovorum capsulae limacium marinarum. II. Quod rete trahit ex mare*]. Trop. Natuur, XXII, 7, 125-131 (1933); XXIV, 2, 23-30. Batavia (1935). **b - 328**

1. Descrizione ed illustrazione delle capsule delle uova di *Buccinum undatum*, *Melongena pugilina*, *Cuma javanica*, *Murex occa* (?), *Labiosa pulchella* and *Natica*. 2. Discussione sui *Crustacea*, *Pisces*, *Echinodermata*, e *Vermes* presi nelle reti da pesca.

**Meyer P. F.** - Ein Beitrag zur Frage der Laichperiodizität bei der Nordseekrabbe (Granat) *Crangon vulgaris* Fabr. [*Quaestio de periodicitate ovorum depositionis in specie « Crangon vulgaris »*]. 3 Abb., Zool. Anz., CIX, 23-32. Leipzig (1935). **b - 329**

Aus den vorliegenden Untersuchungen lässt sich entnehmen, dass der geschlechtsreife weibliche Granat dreimal im Jahr zur Eiablage schreitet und zwar in der sommerlichen Periode zweimal und im Winter einmal. Die sommerliche Periode wird von der winterlichen scharf getrennt durch eine Zwischenperiode, in der ausgesprochene « Laichmüdigkeit » herrscht. Uebersicht über die Laichperioden. (Vf.).

**Nakamura H.** - Ueber Intersexualität bei *Katsuwonus pelamis* (Linn.) [*De intersexualitate speciei « Katsuwonus pelamis*]. (In Jap.). 1 Fig., Trans. Nat. Hist. Soc. Formosa, XXV, 141, 197-198. Taihoku (1935). **b - 330**

Beschreibung eines Exemplars mit ausgesprochener Intersexualität bei *K. pelamis* L.

**Orton J. H.** - Observations and Experiments on Sex-change in the European Oyster *Ostrea edulis* L. Part V [*Observationes et experientiae circa sexus mutationem speciei « Ostreae edulis » europaeae*]. 4 figs., 11 tabl., Mém. Mus. R. Hist. Natur. Belgique, Sér. 2, 3, 997-1056. Bruxelles (1936). **b - 331**

During the year 1927 the A. studied the spawning of the European Oyster in two widely separated localities in England in order to make a comparison of the correlation between sea temperature and spawning.

This study demonstrates the dependence of the *Ostrea edulis* upon the environment, with respect to time and period of spawning, sex-proportion of the population and to some extent the rate of change of sex.

**Pape A.** - Ein Plattfischbastard in der Ostsee und seine fischereiwirtschaftliche Bedeutung [*Spuria species ex Pleuronectidis in Mari Baltico eiusque momentum quoad piscationis oeconomiam*]. Dtsch. Fischwirt., III, 10, 148. Berlin (1936). **b - 332**

Kurzer Bericht über Vorkommen und Entwicklung der Bastardierung zwischen Scholle und Flunder, welche in der Ostsee seit Jahren beobachtet worden ist. Das Ergebnis dieser Bastardierung nimmt, in bezug auf seinen Bau und seine Beschuppung, eine Zwischenstellung zwischen den beiden Fischarten ein. Vf. betont, dass infolge Unfruchtbarkeit dieses Tieres mehrere Prozente der wichtigsten Marktfische der Ostsee für die Fortpflanzung vollkommen fortfallen.

**Pasteels J. J.** - Recherches sur le déterminisme de l'entrée en maturation de l'œuf chez divers Invertébrés marins [*Investigationes de determinismo quoad ovi initium maturationis in variis invertebratis marinis*]. 7 fig., Arch. Biol., XLVI, 229-262. Paris (1935). **b - 333**

**Perceva T. A.** - Key to Pelagic Eggs of Fishes of the Barents Sea [*Determinatio ovorum pelagicorum Piscium Maris* Barents]. 36 figs., Vses. Naoutchn.-Issled. Inst. Morsk. Rybn. Choz. Oceanogr. (V N I R O) 1-34, Moskva (1936). **b - 334**

List of Barents Sea fishes having pelagic (floating) eggs. Glossary of technical terms. Tables for identifying the pelagic eggs of fishes in the Barents Sea.

**Poulsen E. M.** - Yearly Variations in the Number of Larvae of Autumn Spawning Herrings in the Southern Part of the Transition Area [*Variationes annuae numeri larvarum in aringis qui autumno generant in parte meridionali areae transitionalis*]. 1 map., tabl., Cons. Expl. Mer, Rapp. & Pr.-Verb., C, 2ème partie, 22-24. Copenhague (1936). **b - 335**

The relation between the number of larvae caught during October and the quantity of herrings caught in the whole spawning season has been studied in the waters east of Sealand, Møen and Falster during the years 1927-1934. Affirmative results as to the relation. The yearly variations expressed in tables.

**Ranzi S.** - Ipofisi e gestazione nei Selaci [*De hypophysi et gestatione in Selachiis*]. Atti Acc. Naz. Lincei, Rend. Cl. Sc. Fis. Mat. Natur., Ser. 6, XXIII, 5, 365-368. Roma (1936). **b - 336**

Man mano che la gestazione procede l'ipofisi dei Selaci subisce le seguenti modificazioni: generale iperemia, aumento del secreto contenuto nel lobo anteriore, variazione dell'eosinofilia delle cellule. (dall'A.).

**Ranzi S.** - Biologia sessuale dei Selaci [*De biologia sexuali in Selachiis*]. Atti Soc. Ital. Progr. Sc., Riun., 24, IV, 1, 89. Roma (1936). **b - 337**

L'A. espone quanto è noto sulla biologia sessuale dei Selaci: epoca degli amori; epoca di deposizione delle uova e della gestazione; durata dell'incubazione e della gestazione; modalità del parto; habitat delle femmine gravide.

**Ranzi S.** - Zur Kenntnis der Fortpflanzung bei den Selachiern [*De cognoscenda reproductione Selachiorum*]. 1 Tab., 1 graph. Fig., Naturwiss., XXIV, 41, 642-646. Berlin (1936). **b - 338**

Nach einigen einleitenden Worten über die grossen Verschiedenheiten in der Fortpflanzung der Selachier versucht Vf. die folgenden Fragen zu beantworten: Finden sich Unterschiede im Wachstum der Embryonen zwischen ovi-, ovovivi- und viviparen Formen? Nehmen die Embryonen ovoviviparer Formen organische Substanzen aus dem Mutterkörper auf? Und wenn das der Fall ist: Auf welchem Wege werden diese absorbiert? Gibt es Beziehungen zwischen der Histophysiologie des Uterus, der Zusammensetzung des Uterussaftes und dem Wachstum der Embryonen? Was für Änderungen ruft die Schwangerschaft im mütterlichen Organismus hervor? (Nach Vf.).

**Ranzi S. & Zezza P.** - Fegato, maturità sessuale e gestazione in *Trygon violacea* [*Jecur, maturitas sexualis et reproductio speciei « Trygon violacea »*]. 9 fig., Pubbl. Staz. Zool., XV, 3, 355-367. Napoli (1936). **b - 339**

I cambiamenti in dimensione del fegato di *Trygon violacea* in rapporto alla maturità sessuale sono dovuti alle variazioni quantitative degli inclusi lipidici delle cellule epatiche e cioè un deposito, quando si avvicina l'epoca degli amori ed una diminuzione nell'epoca degli amori. Durante i processi di accumulo e successiva utilizzazione di lipidi, lo squalene subisce la stessa sorte (André e Canal); non si hanno dati circa il comportamento dei protidi. Poichè l'impicciolimento del fegato è dovuto a riduzione del volume delle cellule epatiche, in base al numero di cellule contenute in egual volume di fegato, si può calcolare la riduzione di quest'organo durante la gravidanza (dall'A.).

**Rass T. S.** - Quelques régularités dans la structure des œufs et des larves de poisson dans les eaux septentrionales [*Regularitates nonnullae in ovorum atque larvarum Piscium structura in maribus septentrionalibus viventium*]. **Onoda K.** - Notes on the Development of Some Japanese Echinoids with Special Reference to the Structure of the Larval Body [*Notae de accretione aliquorum Echinodermatorum Japonicorum particulariter quoad pertinet ad structuram corporis larvalis*]. 9 figs., 5 pls. h. t., Jap. Journ. Zool., VI, 4, 637-654. Tokyo (1936). **b - 378**

Results of the working out of the embryology of the following species of Japanese sea-urchins: *Mespilia globulus* A. Ag., *Echinometra Mathaei* (Riv.) *Toxopneustes pileolus* (Lamk.), *Echinostrephus moralis* A. Ag., *Temnopleurus toreumaticus* (Klein), *Tripneustes gratilla* (Linn.), *Diadema setosum* Gray, *Strongylocentrotus pulcherrimus* (A. Ag.), *Pseudocentrotus depressus* (A. Ag.)

**Oppenheimer J. M.** - Processes of Localization in developing *Fundulus* [*Actiones effectionis constitutionis in embryonibus generis « Fundulus »*]. 32 fig., Journ. Exp. Zoöl., LXXIII, 3, 405-444. Philadelphia (1936). **b - 379**

Vitally stained blastomeres of the 16-cell stage have been followed through to gastrulating stages, and locally stained areas of the gastrula have been traced to their sites in the differentiated embryo. By combining the results of these two series of experiments a tentative scheme of cell lineage has been worked out. The *Fundulus* egg is characterized by non-determinate cleavage, but study of its cell lineage demonstrates the rôles played by the various blastomeres in normal embryo formation (A.).

**Pasquini P.** - Studio sullo sviluppo di uova centrifugate di ricci di mare (*Arbacia punctulata* Gray [*De accretione ovorum centrifugatorum echini « Arbacia punctulata »*]. 4 fig., Pubbl. Staz. Zool., XV, 3, 285-316. Napoli (1936). **b - 380**

La centrifugazione delle uova di *Arbacia* produce costanti anomalie dello sviluppo che dipendono dalle condizioni di atipia della segmentazione e da fattori intrinseci alla configurazione viscosa ooplasmatica nel periodo di sperimentazione.

**Pchelina Z. M.** - Some Preliminary Data concerning the Larvae and Post-Larvae of the Bay of Novorossiysk [*Data quaedam priora de larvis et post-larvis ad Bajam* Novorossiysk *pertinentibus*]. (In Russ., Engl. Rés.). 3 fig., Works Arnoldi Biol. Stat., II, 1, 27-35. Novorossiysk (1936). **b - 381**

Report on the occurrence of larvae of *Clupeidae, Gadidae, Atherinidae, Blenniidae, Gobiidae, Labridae, Gobiesocidae, Engraulidae, Callionymidae, Sparidae* and *Belonidae.* The greatest quantity and variety of larvae and post-larvae observed from May to September.

**Pitotti M.** - La gastrulazione dell'uovo di Lampreda (*Lampetra fluviatilis L.*). Spostamenti dei materiali durante la gastrulazione [*De gastrulatione ovi Lampetrae. Materiarum amotiones inter gastrulationem*]. 1 fig., Atti Acc. Naz. Lincei, Rend. Cl. Sc. Fis. Mat. Natur., XXIII, 3, 209-211. Roma (1936). **b - 382**

Risultati di alcuni esperimenti eseguiti con le colorazioni vitali localizzate sull'uovo di Lampreda per identificare i movimenti che avvengono alla superficie del germe durante la gastrulazione. Tali movimenti sono uno dorsale limitato; uno ventrale esteso; due laterali estesi; uno latero-dorsale e uno latero-ventrale, che accompagnano i precedenti. (A).

**Pitotti M.** - Sull'assorbimento del tuorlo negli embrioni di Torpedo [*De absorptione vitelli in embryonibus Torpedinis*]. 5 fig., Pubbl. Staz. Zool. Napoli, XV, 2, 217-222. Napoli (1936). **b - 383**

Sviluppate proprietà enzimatiche dell'apparato digerente dell'embrione di *Torpedo ocellata* di mm. 46. Il succo intestinale attacca rapidamente i granuli di tuorlo, il succo gastrico attacca il liquido uterino ingerito, i granuli di tuorlo del sacco vitellino esterno invece sono, fin dai primi stadi, fagocitati dal sincizio perilecitico dove subiscono una vera e propria digestione.

**Raja M.** - Ricerche sull'accrescimento post-embrionale del *Loligo vulgaris* Lam. [*Investigationes in accretionem post-embryonalem speciei « Loligo vulgaris »*]. Arch. Zool. It., XXI, 447-474. Napoli (1935). **b - 384**

È stato esaminato, nel primo anno di vita, l'accrescimento del *Loligo vulgaris* del golfo di Napoli e le variazioni ponderali del mantello, dei gangli dell'occhio, dei cuori branchiali, delle branchie, del fegato, della borsa del nero, del becco e del guscio. Il rapporto fra il peso dei singoli organi e il peso del tutto sono stati studiati servendosi dell'equazione di Huxley: $y = bK$.

**Ranzi S.** - Ambiente e fisiologia dell'embrione [*De ambiente atque physiologia embryonis*]. 1 tav., Arch. Sc. Biol., XXII, 1, 80-94. Bologna (1936). **b - 385**

Trattazione sintetica dei problemi sui rapporti tra embrione e ambiente dal punto di vista fisiologico.

**Ranzi S.** - Ricerche sull'assunzione di sostanze minerali per parte dell'embrione di *Sepia officinalis* [*Investigationes in absumptionem substantiarum mineralium per embryonem speciei « Sepiae officinalis »*]. Atti Acc. Naz. Lincei, Rend. Cl. Sc. Fis. Mat. Natur., XXII, 12, 605-608. Roma (1935). **b - 386**

L'embrione di *Sepia officialis* è capace di concentrare, prendendoli dal mare, parecchi elementi tra cui Cu, Fe, Mn, Li, Sr. Si può concludere che una porzione del Cu necessario per l'emocianina che viene sintetizzata nel corso dello sviluppo, viene presa dall'ambiente (dall'A.).

**Richard A., Porter R. P. & Shumacher B. L.** - Analysis of early Development of Fish Embryos by means of the Mitotic Index. I. The Use of the Mitotic Index. II. The Mitotic Index in pre-neural Tube Stages of *Fundulus hetero-*

*clitus*. III. The Mitotic Index of young Embryos of *Coregonus clupeiformis* [*Explicatio primae progressionis in embryonibus Piscium, per mitoticum indicem. I Quomodo utitur mitotico indice. II Mitoticus index in stadiis tubi praeneuralis in specie «Fundulus heteroclitus». III Index mitoticus in embryonibus speciei «Coregonus clupeiformis»*]. Amer. Journ. Anat., LVI, 3, 355-363; 365-392; 395-408. Philadelphia (1935). b - 388

The purpose of this series of papers is to correlate mitotic index data of various cells and tissues of fish embryo with developmental processes and with differentiation. I. The relation of mitosis to growth and differentiation, the use of the mitotic rate as one method for the analysis of differentiation, the meaning of the mitotic index, its calculation, previous studies involving it and its value for recognizing localized centers of developmental activity. Critique of the validity of the method. (A.). II. Study of mitoses in *Fundulus* embryos from early blastodiscs (with index of 61.0) to stages (index of 1.70) showing the formation of the neural tube. III. The actual figures for the development of *Coregonus* are much lower than those for *Fundulus*. General conclusions regarding embryological processes.

**Ries E. & Gersch M.** - Die Zelldifferenzierung und Zellspezialisierung während der Embryonalentwicklung von *Aplysia limacina* L. Zugleich ein Beitrag zu Problemen der vitalen Färbung [*De differentiatione et specialisatione cellulari inter accretionem embryonalem speciei «Aplysia limacina» Contributio in cognoscenda problemata de coloratione vitali*]. 18 fig., 1 tab., Pubbl. Staz. Zool. Napoli, XV, 2, 223-273. Napoli (1936). b - 389

Die Vorgänge im Ei bis zum Beginn der Furchung: Das Ei vor der Richtungskörperbildung, die Richtungskörperbildung und die Plasmasonderung. Plasmasonderungsvorgänge während der ersten Furchungsteilungen. Differenzierungen und Spezialisierungen während der späteren Embryonalentwicklung. Ergebnisse und Schlussfolgerungen: Die Bedeutung des pH für die Vitalfärbung. Die Ergebnisse der Vitalfärbung für die Cytologie. Die Sonderungsprozesse in der Eizelle und ihre Bedeutung für die Determination der Furchungszellen.

**Russell F. S.** - On the First Stage of the Medusa *Eucheilota clausa* (Hincks) (= *E. hartlaubi* Russell) [*De priore stadio medusae «Eucheilota clausa»*]. 3 figs., Journ. Mar. Biol. Ass., n. ser., XXI, 1, 131-133. Plymouth (1936). b - 390

A gives an account of his observations on the medusae liberated by *Lovénella clausa* and emends the name *Eucheilota hartlaubi* to *Eucheilota clausa* (Hincks).

**Sanzo L.** - Allevamento di una larva pelagica di *Cerianthus* fino all'acquisto di caratteri definitivi [*Cultura cuiusdam larvae pelagicae ad genus Cerianthus pertinentis, usque ad acquisitionem characterum constitutorum*]. 3 fig., Atti Acc. Naz. Lincei Rend. Cl. Sc. Fis. Mat. e Natur., XXIV, 7/8, 227-231. Roma (1936). b - 391

Uova o larve di Teleostei costituiscono un ottimo alimento per le larve pelagiche di Ceriantari ed Actinari, che poterono per tale via essere allevate per oltre un anno, trasformandosi alcune in due diverse specie di *Cerianthus* con costruzione delle rispettive diverse gallerie, e le altre in Actinari (dall'A.).

**Sanzo L.** - Contributi alla conoscenza dello sviluppo embrionario e post-embrionario nei Mugilidi [*Contributiones in cognoscendam accretionem embryonalem et post-embryonalem in Mugilidis*]. 2 tav. f. t., Mem. R. Comit. Talassogr. It., CCXXX, 3-12. Venezia (1936). b - 392

Periodo di maturità sessuale e sviluppo embrionale fino all'ottavo giorno dalla schiusa delle uova di *Mugil cephalus*, fecondate artificialmente. Uova libere e fecondate di *M. chelo* furono seguite fino al ventiduesimo giorno dalla schiusa; interessanti dati sulla pigmentazione.

**Sparta A.** - Contributo alla conoscenza di uova, stadi embrionali e post-embrionali in *Macrorhamphosus scolopax L.* [*Contributio in cognoscenda ova, stadia embryonalia speciei «Macrorhamphosus scolopax»*]. 1 tav., Mem. R. Comit. Talassogr., CCXXV, 1-14. Venezia (1936). b - 393

Descrizione di alcune uova di *Macrorhamphosus scolopax L.*, galleggianti nel plancton dello stretto di Messina e delle larve che l'A. ha potuto coltivare fino al decimo giorno di vita, fino cioè agli stadii descritti da precedenti AA.

**Sparta A.** - Uova e larve di *Gobiidae*. III *Gobius ferrugineus* Kolomb [*Quaestio de ovis et larvis Gobiidarum*]. 1 tav. f. t., Mem. R. Comit. Talassogr. It., CCXXVIII, 3-6. Venezia (1936). b - 394

Si fanno conoscere le uova e le larve fino all'ottavo giorno dalla schiusa per *Gobius ferrugineus*, ottenute da fecondazione artificiale, con cenni sul dispositivo degli organi ciatiformi dell'adulto (A.).

**Tåning V. Å.** - Herring Larvae in Icelandic Waters, 1924-1934 [*De larvis ad aringum pertinentibus in maribus Islandicis. A. 1924-1934*]. 15 figs., 9 tables. Cons. Expl. Mer, Rapp. & Pr.-Verb., XCIX, Rapp. Atlant., 1933-1935, VI, 3-20. Copenhague (1936). b - 395

The aim of this work was first and foremost to determine how far our present knowledge extends with regard to spawning times and places of the herring communities which spawn in spring und summer at Iceland. Shortcomings in our knowledge are empasized.

**Tåning V. Å.** - On the Eggs and young Stages of the Halibut [*De ovis et stadiis juvenilibus speciei «Hippoglossus vulgaris»*]. (In Engl., Dan. Rés.). 8 figs., tabl., Medd. Komm. Danm. Fisk. o. Havunders., Ser. Fiskeri, X, 4, 1-23. København (1936). b - 396

Eggs of the Halibut were obtained pelagically for the first time between the Faroes and Iceland at a depth of about 200-700 m; the depth at the place was about 1100-2000 m., from which we may conclude that the Halibut migrate out at any rate to these depths in order to spawn. Dimensions and appearance of eggs. Pelagic postlarvae. Description of the smallest bottom-stages of the O-group for the first time and of various features in the metamorphosis and changes during the further growth. Principal period of spawning as well as hydrographical conditions in the spawning area. Occurrence of pelagic postlarvae of the Greenland Halibut in the Denmark Strait. (From A: s rés.).

**Templeman W.** - Fourth Stage Larvae of *Homarus americanus* intermediate in Form between normal third and fourth Stages [*Larva quarti stadii speciei «Homarus americanus» formae intermediae inter stadium tertium et quartum normale*]. 1 fig., 1 table, Journ. Biol. Bd Canada, II, 4, 349-354. Toronto (1936). b - 397

Thirteen out of 379 fourth stage lobster larvae reared at St. Andrews were definitely intermediate in form, in length of fourth stage period, and in habit, between the recognized third and fourth stages. They usually occur under unfavourable rearing conditions. The fifth stage produced by moulting of the intermediate fourth stage is intermediate in metamorphosis between normal fourth and fifth stages. (A.).

**Turner C. L.** - The Absorptive Processes in the Embryos of *Parabrotula dentiens*, a viviparous, Deep Sea Brotulid Fish [*De absorptione in embryonibus speciei « Parabrotula dentiens » Piscis vivipari in maris profunditatibus viventis ad Brotulidas pertinentis*]. Journ. Morphol., LIX, 2, 313-326. Philadelphia (1936). **b - 398**

The embryos of *Parabrotula dentiens* are equipped with external processes which are attached around the anus and to the ventral wall of the embryo for a short distance in front of the anus. The processes have a spongy connective tissue stroma and are covered with a syncytial layer. It is assumed that the processes augment the body surface of the embryos and have a nutrition-absorbing and an oxygen- absorbing function. (A.).

**Ubisch von L.** - Ueber die Organisation des Seeigelkeims [*Ratio embryonum in Echinis*]. 7 Abb., Arch. f. Entw. Mech. Organ., CXXXIV, 599-643. Berlin (1936). **b - 399**

**Weill R.** - Existence de larves polypoïdes dans le cycle de la Trachyméduse *Olindias phosphorica* Delle Chiaje [*De larvis polypoidibus in cyclo speciei « Olindias phosphorica »*]. 1 fig., C. R. Acad. Sc., CCIII, 20, 1018-1020. Paris (1936). **b - 400**

Des individus sexuellement mûrs furent récoltés sur les côtes des îles Bermudes et la fécondation fut réalisée expérimentalement. Développement et anatomie du polype. *Olindias* et *Protohydra caulleryi* sont les seules larves marines, non tentaculées, bourgeonnant des Trachyméduses.

**Wilson H. V.** - Some Critical Points in the Metamorphosis of the Halichondine Sponge Larva [*Reinspectio critica de metamorphosi spongiarum larvae*]. 4 pl., Journ. Morphol., LVIII, 285-345. Philadelphia (1935). **b - 401**

The object of this paper is to describe some steps of the process of ontogeny which have not been described before. A. is not of the opinion that the larval epithelial cells become the choancytes although the nuclei of the former do persist as the nuclei of the latter. Motile larva. Early metamorphosis (first stage). Later metamorphosis. Discussion on the structure of the larva, and the metamorphosis.

# BIOCHEMIA

## Chemia biologica et metabolismum vitale — Actio substantiarum chemicarum in organismis.

**Bachrach E.** - Biologie des diatomées (métabolisme de la silice. Pigmentation bleue) [*Diatomaearum biologia. (Silicis metabolismum. Pigmentatio caerulea)*]. Ass. Franç. Avancement Sc. 301-304. (59 Sess., 22-27, VII, 1935). Nantes (1935). **b - 402**

Résumé de 16 travaux de l'A. Etude sur *Nitzschia, Fragilaria, Navicula* et *Licmophora.*

**Bacq Z. M. & Florkin M.** - Action pharmacologique d'un extrait d'hypophyse et de ganglions nerveux d'une Ascidie (*Ciona intestinalis*) [*Actio pharmacologica extracti hypophysis et gangliorum nervorum cuiusdam Ascidiae*]. C. R. Soc. Biol., CXVIII, 814. Paris (1935). **b - 403**

Comparaison entre la glande blanchâtre située entre les deux siphons, chez les ascidiés, et l'hypophyse postérieure des vertébrés. Action de l'extrait de cette glande.

**Barker H. A.** - The oxidative Metabolism of the Colorless Alga, *Prototheca zopfii* Krüger I, II [*Metabolismum oxidativum Algae « Prototheca zopfii »*]. 16 tabl., 3 fig., Journ. Cell. & Comp. Physiol., VII, 1, 73-93; VIII, 2, 231-250. Philadelphia (1936). **b - 404**

On the basis of these investigations it is concluded that the process of assimilation of these compounds proceeds in two experimentally distinct stages, the primary process of assimilation and the subsequent decomposition in the processes of cell synthesis.

**Benazzi M.** - La regolazione della irritabilità nelle attinie per opera dei sali dell'acqua di mare. [*De regulatione quoad irritabilitatem Actiniarum salis marini causa*]. Boll. Zool., VII, 2/3, 73-81. Napoli (1936). **b - 405**

La irritabilità delle attinie è regolata dal Ca + + e dal Mg + + i quali agiscono in senso antagonistico; il Mg risulta un elemento assolutamente indispensabile per la vita di questi organismi marini. Lo stronzio ha sulla irritabilità delle attinie un'azione in tutto simile a quella del calcio [A.].

**Berthoumeyroux M.** - Recherches sur le pouvoir réducteur des liquides du milieu intérieur de quelques invertébrés marins [*Investigationes in potentiam reductionis liquidorum medii interni aliquorum invertebratorum marinorum*]. tabl., Bull. Aperçu historique. Liste des animaux marins: Echinodermes, Vers, Crustacés, Mollusques. Etude critique du dosage du glucose dans l'eau de mer, exposé des résultats obtenus par la méthode des recherrcheurs. Etude analytique, résultats actuels et antérieurs pour chaque espèce. Conclusions: signification au point de vue biologique. Bibl.

**Cantacuzène J. & Damboviceanu A.** - Caractères physico-chimiques du poison des acconties d'*Adamsia palliata* [*Characteres physico-chemici quoad virus accontiarum in specie « Adamsia palliata »*]. C. R. Soc. Biol., CXVII, 136-138, & 269. Paris (1934). **b - 407**

Action de la température, de la lumière, des substances chimiques et de la cataphorèse sur l'extrait des Acconties de cette actinie, qui est très toxique pour tous les Décapodes sauf pour *Eupagurus prideauxi* qui vit en symbiose avec elle.

**Castaldi L. & Fontana Zanco F.** - Ricerche sperimentali sulla influenza della corteccia surrenale sulla divisione cellulare [*Experimentales

*inquisitiones de corticis surrenalis effectu in mitosim cellularem*]. 2 tav., Scritti Biol. racc. da L. Castaldi, X, 127-159. Cagliari (1935). **b - 408**

Il Cortical e il Cortigen, usati in dosi opportune e con particolari cautele negli allevamenti di uova artificialmente fecondate di *Paracentrotus lividus*, hanno dimostrato un effetto eccitativo sulla velocità di segmentazione e di differenziazione ontogenetica di questo materiale. Esagerando nelle dosi di estratto o commettendo errori tecnici negli allevamenti, si sono ottenuti effetti inibitori sulla velocità di divisione e differenziazione, produzione di anomalie e mostruosità, fatti di degenerazione e morte.

**Ciaranfi E.** - Sulla esistenza di fermenti deidrogenanti gli acidi grassi nel fegato di *Serranus cabrilla* [*De fermentis quae acida crassa dehydrogenant in hepate speciei « Serranus cabrilla »*]. Pubbl. Staz. Zool., XV, 3, 317-321. Napoli (1936). **b - 409**

Azioni ossidative di sezioni isolate di fegato di *Serranus cabrilla*. Particolarità di struttura del fegato di *Serranus*, cui corrisponde un diverso comportamento funzionale.

**Cori M.** - L'ossidazione dei protidi nello sviluppo embrionale di *Sepia officinalis* [*Oxydatio protidarum quoad accretionem embryonalem speciei « Sepia officinalis »*]. Pubbl. Staz. Zool., XV, 3, 368-376. Napoli (1936). **b - 410**

Il 13,7 % dei protidi contenuti nell'uovo di *Sepia officinalis* viene ossidato nel corso dello sviluppo dell'embrione, quindi le uova acquatiche possono utilizzare, come materiale dinamogeno, notevoli quantità di protidi. L'ossidazione, scarsa nei primi stadi dello sviluppo, nei quali viene ossidata una notevole quantità di altro materiale (glucidi), è intensa allo stadio XIII di Naef e intensa resta fino alla fine dello sviluppo embrionale.

**Davidson F. & Shostrom O. E.** - Physical and chemical Changes in the Pink Salmon during the Spawning Migration [*Mutationes physicae et chemicae in specie « Oncorhynchus gorbuscha » inter migrationem reproductionis causa*]. 15 figs., 9 tabl. U. S. Dpt. Comm., Bur. Fish., Invest. Rep. 33, II, 1-37. Washington D. C. (1936). **b - 411**

Relation of fishery to life history of salmon. Effect of sexual development on physical structure of pink salmon. Physical changes in pink salmon during spawning migration. Chemical changes. Effect of physical and chemical changes in pink salmon on the quality of commercial pack. Bibl.

**Drilhon A.** - Quelques constantes chimiques et physicochimiques du milieu intérieur de crabe sacculiné (*Carcinus maenas*) [*Constantes chemicae et chemico-physicae quoad medium internum cancri post sacculinae actionem*]). 1 fig., 1 tabl., C. R. Acad. Sc., CCII, 11, 981-982. Paris (1936). **b - 412**

Dans la présente Note l'A. communique les résultats d'un sérodiagnostic de la sacculine chez le crabe *C. maenas*, obtenus au moyen du dosage dans l'hémolymphe des animaux des cathions alcalins et alcalino-terreux d'une part et des protéines de l'autre.

**Drilhon A. & Florence G.** - Recherches physicochimiques sur le sang des Poissons [*Investigationes physico-chemicae de sanguine Piscium*]. Arch. Phys. Biol., XII, 180-193. Paris (1935). **b - 413**

**Drilhon A. & Florence G.** - Nouvelle contribution à l'étude physico-chimique du sang des poissons [*Contributiones novae quoad studium sanguinis Piscium e physico-chemia*]. Bull. Soc. Chim. Biol., 18, 1055-1073. Paris (1936). **b - 414**

L'influence du changement de la concentration du medium extérieur sur la courbe de pH du serum et la position du point isoélectrique des protéines du serum chez *Anguilla anguilla* et *Muraena Helena* ont été étudiées.

**Drilhon A. & Pora E. A.** - Ionisation et tampons du milieu intérieur du crabe parasité (*Carcinus maenas* sacculiné) [*De ionisatione et obturatione medii interioris cancri parasitati*]. Graph., C. R. Acad. Sc., CCII, 14, 1309-1311. Paris (1936). **b - 415**

Dans une précédente Note les A.A. ont montré l'influence de la sacculine sur les cathions alcalino-terreux et sur les protéines du sérum de *C. maenas*; dans la présente Note ils apportent des résultats ayant trait à la mesure de la réserve alcaline, du pH et de la courbe du coefficient tampon.

**Florkin M.** - Sur l'activité anhydrasique du milieu interne des Invertébrés [*De activitate anhydrasica medii interni Invertebratorum*]. Acad. R. Belgique, Bull. Cl. Sc., XX, 5, 922-930. Bruxelles (1934). **b - 416**

Dans le sang d'*Arenicola marina* et de *Marphysa sanguinea* et dans le liquide cœlomique de *Dasybranchus caducus* et de *Sipunculus nudus* l'A. a pu mettre en évidence la présence d'anhydrase. L'activité de ce ferment.

**Glaister D. & Kerly M.** - The Oxygen Consumption and Carbohydrate Metabolism of the Retraction Muscle of the Foot of *Mytilus edulis* [*De oxygeni consumptione et carbohydrati metabolismo in musculo pedis speciei « Mytilus edulis »*]. Journ. Physiol., LXXXVII, 56-66. Cambridge & London (1936). **b - 417**

Occurrence of glycogen in the retraction muscle. Influence of temperature and pH on the oxygen consumption of the muscle.

**Haas P., Hill T. G. & Karstens W. K. H.** - The Metabolism of Calcareous Algae. II. The Seasonal Variation in certain Metabolic Products of *Corallina squamata* Ellis [*De metabolismo Algarum calcarearum: II. Variationes pro anni tempore aliquarum productionum metabolicarum speciei « Corallina squamata »*]. 6 figs., 2 tabl., Ann. Bot., XLIX, 609-619. London (1935). **b - 418**

The quantity of Ca and Mg contained is higher in winter than in spring; maximum and minimum periods. Seasonal variation of ammoniacal nitrogen.

**Jacques A. G.** - The Kinetics of Penetration, XII. Hydrogen Sulfide [*De cinetica penetrationis II. De Hydrogeno sulphorato*]. 4 figs., 4 tabl., Journ. of Gen. Physiol., XIX, 3, 397-418. St. Georges West, Bermuda (1936). **b - 419**

The penetration of $H_2S$ from sea water into *Valonia* in various circumstances is shown in three tables.

**Kellaway C. H.** - The Action of Mussel Poison on the Nervous System [*Actio viri molluscorum in systema nervorum*]. Austr. Journ. Exp. Biol., & Med. Sc., XIII, 79-94. Sydney (1935). **b - 420**

This poison is a neurotoxin which has a central as well as a peripheral action at the same time, the first being exercised on the cardio-vascular and respiration centres and the second on the nervous system.

**Lami R.** - Sur la variation d'alcalinité de l'eau de mer produite par des Algues calcaires de profondeur [*De variatione alcalinitatis aquae maris

*ex Algis calcareis in profunditatibus maris*]. Bull. Lab. Marit. Dinard, 16, 15-18. Rennes (1936). **b - 421**

L'élévation du pH produite par trois espèces de *Lithothamnium* est lente et progressive: l'assimilation se continue donc pendant la belle saison, ainsi que le laissait à supposer la teinte vive de leur thalle.

**Lindahl P. E.** - Ueber die Rolle des $SO_4$ - Jons in der Entwicklung des Seeigelkeims [*Momentum jonis $SO_4$ pro accretione embryonum in Echinis*]. Ark. f. Zool., XXVIII B, H. 2, 4, 1-4. Stockholm (1935). **b - 422**

Vf. hat die Wirkung von $SO_4$ - Mangel auf der Atmung des Seeigeleies studiert und ist zu der Schlussfolgerung gekommen, dass die $SO_4$ - Jonen, um die bei dem Stoffwechsel entstehenden Phenole zu entgiften, nötig sind.

**Marks G. W.** - The Inactivation of Catalases of certain marine Plants by Oxygen [*De catalasica inactivatione aliquarum plantarum marinarum per oxygenum*]. Biochem. Journ., XXIX, 509-512. Cambridge & London (1935). **b - 423**

**Mieller H.** - Die Beziehungen zwischen dem Nahrungs - und Speicherfett der Fische [*Correlationes inter substantias crassas alimentationis et substantias crassas in Piscium corporibus conditas*]. Tab., Ztschr. f. Fisch., XXXIV, 2, 163-169. Neudamm & Berlin (1936). **b - 424**

Untersuchungen sind auf 16 verschiedenen Fischen, unter denen *Anguilla vulgaris, Salmo salar*, und *Pleuronectes flesus*, ausgeführt worden. Angabe von Nahrungstieren und Jodzahlwerten der Fette. Uebereinstimmung zwischen diesen Fetten und denjenigen höherer warmblütiger Tiere. Abhängigkeit der Speicherfette vom Nahrungsfett.

**Munro Fox H.** - Metabolism of Cold- blooded Animals in Different Latitudes [*De metabolismo animalium sanguine frigido, differentibus latitudinibus*]. 1 graph., Nature, CXXXVII, 3474, 903-904. London (1936). **b - 425**

A. has compared seven species of cold-water invertebrates from the west coast of Sweden with seven nearly related species from the waters of Plymouth with regard to the oxygen consumptions or respiratory movements and the ciliary movements (results expressed graphically). In addition, comparison has also been made between single eurythermal species of different latitudes ,the preliminary results of which show adaptations within single species. (Further information will be published in Proc. Zool. Soc.).

**Oshima S.** - On the Property of the Fat in Cultured Eel and Carp [*Peculiaritas substantiae crassae anguillae et carpae per artificium nutricatarum*]. (In Jap., Engl. Summ.). Journ. Imp. Fish. Exp. Stat., VI, 221-229. Tokyo (1935). **b - 426**

Results of a study on the effect of different feeding on the content in bromine of the fat of cultured eel and carp.

**Pora E. A.** - Différences chimiques et physicochimiques du sang suivant le sexe [*Differentiae chemicae et physico-chemicae sanguinis ex sexu*]. Ann. Physiol. et Physico-chim. Biol., XII, 206-237. Paris (1936). **b - 427**

Comparaison entre mâles et femelles par l'étude des caractères chimiques et physiques du sang sur des invertébrés, tels *Paracentrotus lividus, Maja squinado* et *Sepia officinalis* et des Poissons: *Raia, Scyllium* et *Labrus bergylta.*

**Pora E. A.** - Sur les différences chimiques et physico-chimiques du sang des deux sexes de quelques Invertébrés marins [*Differentiae chemicae et physico-chemicae sanguinis ambisexualis aliquorum Invertebratorum marinorum*]. 3 tabl., Bull. Inst. Océanogr., 689, 1-4. Monaco (1936). **b - 428**

Ayant trouvé des différences chimiques et physicochimiques au cours de ses études antérieures dans le sang des deux sexes des Vertébrés inférieurs, Sélaciens et Téléostéens (v. C. R. Soc. Biol., CXIX, p. 373, CXXI, p. 102 et p. 105) l'A. a porté ses recherches aussi sur les Invertébrés. Dans la présente Note il communique les résultats obtenus sur des Echinodermes (*Paracentrotus lividus*, mâle et femelle), Crustacés (*Maia squinado*) et Céphalopodes (*Sepia officinalis*).

**Richet C. & Portier P.** - Recherches sur la toxine des Coelentérés et les phénomènes d'anaphylaxie [*Investigationes in toxinam Coelenteratorum et phaenomena anaphylactica*]. Rés. Campagnes Scient., XCV, 1-23. Monaco (1936). **b - 429**

Expériences réalisées par les A.A. dans le Laboratoire de la « Princesse Alice » durant la campagne du 1901. La physalie et l'action des nématocystes sur la grenouille. **Spärck R.** - On the Relation between Metabolism and Temperature in some Marine Lamellibranches, and its zoogeographical Significance [*Correlationes inter metabolismum et temperaturam in Lamellibranchiatis marinis earumque significatio zoogeographica*]. Kgl. Dansk. Vidensk. Selsk. Biol. Medd., XIII, 5, 1-27. København (1936). **b - 430**

There seems to be a marked relation between the type of oxygen consumption and the ecology of the species, so that species which can move or are living above the bottom have a relatively higher consumption than that of the species living more or less sedentary in the bottom. It is also likely that an important influence of the temperature on the distribution of marine animals is due to the effect of temperature on the metabolism, and thereby on the food problem and competition among the species (A.).

**Van der Ghinst** - Mise en evidence de ferments dans le syncytium vitellin de la Truite [*De fermentis in syncytio vitellino Truttae*]. Bull. Histol. appl., XII, 257. Paris & Lyon (1935). **b - 431**

L'A. a remarqué, que le syncytium de blastulas de deux jours de Truite peut digérer de l'amidon. Les expériences ont été entreprises à l'aide de la méthode de Pickford et Darris.

**Waris H.** - Ueber das Calciumbedürfnis der niederen Algen [*Necessitas calcica Algarum inferiorum*]. Planta, 25, 465-470. Berlin (1936). **b - 432**

Untersuchungen an *Eremerosphaera viridis* und zwei *Microspora*-Arten.

**Welsh M. F.** - Oxygen Production by Zoöxanthellae in a Bermudan Turbellarian [*Productio oxygeni a Zoöxanthellis in specie quadam Turbellaria ab insulis* Bermuda]. 3 tabl., Biol. Bull., LXX, 2, 282-287. Lancaster, Pa. (1936). **b - 433**

The object of the present investigation is to determine whether a sufficient amount of oxygen might be produced by Zoöxanthellae to be of value to flatworms harboring them and if so, to determine the quantitative relations between oxygen production and consumption in the light and in the dark. Affirmative results.

**Zo Bell C. E. & Wells N. A.** - Tolerance of *Fundulus parvipinnis* to certain bactericidal Substances [*Tolerantia speciei « Fundulus parvipinnis » ad substantias quasdam bactericidas*]. Proc. Soc. Exper. Biol. and Med. XXXII, 704-706. New York (1935). **b - 434**

## Compositio chemica organismorum marinorum.

**Baldwin E. & Needham D. M.** - Phosphagen in Echinoid Muscle and in Electrical Tissue [*De phosphagene in muscolo et texto electrico Echinodorum*]. Nature, CXXXVIII, 3490, 506. London (1936). **b - 435**

A.A. have confirmed the existence in the jaw muscle of *Sphaerechinus granularis* of enzymes analogous to those found in electrical muscles of *Torpedo*. Phylogenetic interest of the results.

**Białaszewicz K. & Kupfer Ch.** - O składzie mineralnym miesni zwierzat morskich [*De compositione minerali musculorum animalium marinorum*]. (En pol.; rés. franç.) Acta Biol. Exper.. IX, 13, 228-235. Varsovie (1935).

(—) Arch. Int. Physiol., XLII, 398-404.. Paris (1936). **b - 436**

Dans le but de comparer la composition minérale des muscles des animaux marins avec celle des animaux d'eau douce on a effectué des dosages microchimiques de quatre bases (K, Na, Ca, Mg) dans les cendres des muscles d'*Astacus* et *Perca* et d'animaux marins provenant en partie de la Mer Baltique (*Mesidothea entomon, Mytilus edulis*) et en partie de la Méditerranée (*Aphrodite aculeata, Holothuria tubulosa, Stichopus vulgaris, Squilla mantis, Eriphia spinifrons, Torpedo ocellata*).

**Bifano M.** - Variazioni del contenuto in insaponificabile di oli di tonno di diversa provenienza. Nota preliminare [*Variationes materiae insaponificabilis oleorum thynnorum ex variis locis provenientium*]. Boll. Soc. It. Biol. Sper., XI, 9, 847-848. Napoli (1936). **b - 437**

I fegati di tonni di provenienza spagnola danno il 54 % di sostanze estraibili con cloroformio, con una resa di olio del 43,04 %, calcolata sul peso del fegato secco, che dà il 5,83 % di insaponificabile, contenente il 59 % di colesterina. Nei fegati di tonni di provenienza italiana l'estratto cloroformico costituisce il 44,8 % riferito al fegato secco, con un contenuto in insaponificabile del 2,20 % e ricchissimo di colesterina. Le variazioni sono probabilmente dovute alla diversa alimentazione.

**Borei H.** - Ueber die Zusammensetzung der Körperflüssigkeiten von *Myxine glutinosa* L. [*De fluidorum compositione in corpore speciei « Myxine glutinosa »*]. Ark. f. Zool., XXVIII B, H. 2, 3, 1-5. Stockholm (1935). **b - 438**

Blut und Flüssigkeit des venosolymphatischen Saftraumsystemes von *Myxine glutinosa* L. ist auf Chlor und Harnstoff analysiert worden. Die Körpersäfte zeigen durch höheren Chlor- und niedrigeren Harnstoffgehalt abweichende Verhältnisse von denen der Elasmobranchier und durch höheren Chlor- und Harnstoffgehalt von denen der marinen Teleostier. Die Körpersäfte müssen gegen das Aussenmedium hypotonisch sein. (Vf.).

**Carteni' A. & Morelli A.** - Ricerche sulla costituzione chimica dei muscoli di alcuni animali marini. III. Le proteine del tessuto muscolare di *Mustelus laevis* M. T. IV. Sostanze azotate estrattive del tessuto muscolare di *M. laevis* [*Investigationes in constitutionem chemicam musculorum aliquorum animalium marinorum. III. Proteinae texti muscularis speciei « Mustelus laevis ». IV. Substantiae azotatae extracticiae texti muscularis speciei «M. laevis»*]. Quad. Nutr., III, 1/2, 127-129; 130-132. Napoli (1936). **b - 439**

Con il metodo di Van Slyke sono state esaminate le proteine del tessuto muscolare del *Mustelus laevis*. Confrontando questi valori con quelli trovati per i Teleostei, non esistono differenze sostanziali. L'N. estrattivo totale del *Mustelus* è più abbondante che nei muscoli dei Teleostei e ciò perchè nei muscoli e nei liquidi dei Selaci si trovano notevoli quantità di urea. In *Mustelus* è anche più abbondante l'azoto lisinico.

**Carteni' A. & Morelli A.** - Ricerche sulla costituzione chimica dei muscoli di alcuni animali marini. V. Le proteine del tessuto muscolare di *Octopus vulgaris* Lam. VI. Le sostanze azotate estrattive del tessuto muscolare di *Palinurus vulgaris* Latr. [*Investigationes in constitutionem chemicam musculorum aliquorum animalium marinorum. V. Proteinae texti muscularis speciei « Octopus vulgaris ». VI. Substantiae azotatae extracticiae texti muscularis speciei « Palinurus vulgaris »*]. Quad. Nutr., III, 3/4, 225-226; 227-228. Napoli (1936). **b - 440**

Gli AA. hanno analizzato col metodo di van Slyke, le proteine del tessuto muscolare di *Octopus vulgaris*; confrontando i valori ottenuti con quelli del *Mugil cephalus* e del *Mustelus laevis* si rileva che non esistono differenze notevoli nel contenuto di N totale e delle singole frazioni di N, tra le classi di animali esaminate. In *Palinurus vulgaris* gli autori hanno determinato l'azoto totale e le sue varie frazioni, osservando l'assenza di creatina.

L'N estrattivo dei muscoli del *Palinurus* è quasi doppio di quello dei Teleostei, ma risulta notevolmente inferiore a quello dei Selaci.

Study on the relations between Phosphate percentage in the skeletal muscles and those in the cardiac muscles. Difference in distribution ascertained.

**Fujikawa K. & Naganuma H.** - Chemical Composition of Sardine, *Sardinia melanosticta* (C. & V.) from Tyôsen. I. Comparative Study on Dark Muscle and White Muscle [*Compositio chemica speciei « Sardinia melanosticta » a Tyôsen provenientis. I. Studium comparativum musculi nigri et musculi albi*]. (In Jap., Engl., Rés.). 5 tabl., Bull. Jap. Soc. Scient. Fish., V, 2, 95-97. Tokyo (1936). **b - 443**

The dark muscle is richer in crude fat, sulfur, and iron but poorer in total nitrogen than the white muscle.

**Garrault H.** - L'élastoïdine des Poissons Téléostéens [*De elastoidina Piscium Teleosteorum*]. Ann. Physiol. Physicochim. Biol., XII, 291-300. Paris (1936). **b - 444**

Les ligaments cornés qui soutiennent les nageoires des Téléostéens sont formés par l'élastoidine: une substance voisine du collagène. Propriétés chimiques et physiques de cette substance, découverte par Krukenberg.

**Kessel E.** - Ueber Verfärbung mariner Molluskenschalen durch Einlagerung von Eisen [*De coloratione cochlearum molluscorum continentiae ferri causa*]. 6 Abb., Zool. Anz., CXV, 5/6, 129-139. Leipzig (1936). **b - 445**

Beschreibung der an *Buccinum, Cardium, Ostrea* u. a. marinen Mollusken beobachteten Erscheinung von dunkler Schalenfärbung. Das durch chemische Analyse aufgewiesene Eisen ist zum Teil an Schwefel gebunden und stammt aus dem eisenhaltigen Schlick.

**Lederer E. & Moore T.** - Echinenone as a Provitamin A [*Substantia nomine* Echinenone *ut provitamina A*]. Nature, CXXXVII, 996. London (1936). **b - 446**

Chemical properties of this pigment, which has been isolated from the sexual apparatus of *Echinus esculentus.*

**Lönnberg E.** - On the Occurrence of Carotenoid Pigments in the Eyes of certain Animals [*De pigmentis carotinoidibus in oculis aliquorum animalium*]. Ark. f. Zool., XXVIII A, H. 1, 4, 1-14. Stockholm (1935). **b - 447**

Except birds, A. has also investigated marine fishes and crustaceans, together about 40 species, and in most cases found carotenoid pigments present, which can be extracted by organic solvents. Whether the substance is the same in all cases is difficult to say at the present standpoint. It is, however, characterized by a spectrum which, with some variations, very closely resembles that of xanthophyll.

**Lönnberg E.** - Note on the presence of Carotenoids in the « Liver » organs of Invertebrates [*Nota de substantiis carotinoidibus in organis Invertebratorum quae organa considerari possunt ac hepar Vertebratorum*]. Ark. f. Zool., XXVIII A, H. 1, 6, 1-4. Stockholm (1935). **b - 448**

From his examinations on some *Mollusca, Crustacea* and *Asteroidea* A. concludes that the so-called « liver »-organs of *Mollusca* and *Crustacea*, and the hepatic diverticles of the *Asteroidea* in addition to their digestive functions also serve to store up carotenoid substances, like the real liver of the Vertebrates. (From A.).

**Lönnberg E.** - On the Occurrence of Carotenoid Pigments in various Organs of Fishes [*De pigmentis carotinoidibus in differentibus Piscium organis*]. 3 figs., Ark. f. Zool., XXVIII A, H. 3, 15, 1-7. Stockholm (1936). **b - 449**

Examination of carotenoid substances in the eyes, blood and liver of respectively eight, ten and seven Teleostean species.

**Lönnberg E.** - On the Occurrence of Carotenoid Substances in Cephalopods [*Substantiae carotinoides in Cephalopodis*]. 2 figs., Ark. f. Zool. XXVIII B, H. 3, 8, 1-4. Stockholm (1936). **b - 450**

Examinations of livers, eyes and eggs of *Sepiola scandica, Rossia macrosoma* and *Eledone cirrosa* show some traces of carotenoid substances. Comparison with the carotenoids of Teleostean fishes. Importance of these substances.

**Nagata Y.** - Iodine Content in Powdered *Laminaria* [*Quod jodii continetur in Laminariis pulverulentis*]. (In Jap., Engl. Summ.). 2 tables, Bull. Jap. Soc. Scient. Fish., V, 1, 45-46. Tokyo (1936). **b - 451**

Account of the richness of the powdered sea-weed *Laminaria* in iodine, of *L.* immersed in dilute acetic acide, and established in relation on the successive layers, which differ in iodine content.

**Naylor G. L. & Russel-Wells B.** - On the Presence of Cellulose and its Distribution in the Cell-walls of brown and red Algae [*De cellulosae distributione in cellulis externis Algarum*]. 5 fig., Ann. Bot., XLVIII, 635-641. London (1934). **b - 452**

Results of the microchemical investigations on the distribution of cellulose in the cell-walls.

**Norris R. & Rao Rama** - Phosphatases of marine Invertebrates [*De phosphatasi Invertebratorum marinorum*]. 2 tabl., Journ. Biol. Chem., CVIII, 3, 783-790. Baltimore (1935). **b - 453**

Distribution of phosphatase, its relative activity and optimum pH studied in tissues and body fluids of *Coelenterata, Annulata, Echinodermata,* and *Mollusca.* Results expressed in tables.

Untersuchungen über den Lebergehalt, Fettgehalt der Leber und Tintometerzahl des Trans und die Beziehung zwischen je zwei dieser Grössen sowie den relativen Vorrat des Fisches an Vitamin A bei *Macrurus rupestris*, *Gadus Esmarkii*, *G. merlangus* und *G. poutassou*.

**Shimada Kiyoshi & Tanaka Eiji** - Distribution of Inositol in Fish [*Distributio substantiae* Inositol *in Piscibus*]. (In Jap., Engl. Rés.). 2 tabl., Bull. Jap. Soc. Scient. Fish., IV, 5, 305-306. Tokyo (1936). **b - 459**

The A.A. have determined inositol in the living muscles of various kinds of fishes after Young's method. The results are summarized in two tables.

**Smith H. W.** - The Composition of Urine in the Seal [*De urinae compositione in phoca*]. Journ. Cell. & Comp. Physiol., VII, 3, 465-474. Philadelphia (1936). **b - 460**

Rate of the urine formation. Composition. From the analysis of the inorganic composition of the urine and from the residual salts it is concluded that seals do not swallow any considerable quantity of sea water but that the urine derives exclusively from preformed water of the food and water of oxidation.

**Sörensen N. A.** - Ueber die Carotinoide des Lachsfleisches [*De carotinoide in musculo Salmonis*]. Ztschr. f. phys. Chem., CCXXXV, 8-11. Strassburg (1935). **b - 461**

Das in dem Lachsfleisch enthaltene Pigment ist Astacin.

**Tadokoro Tetsutaro** - Chemical Studies on the Proteins and the Carbohydrates of *Iridaea laminarioides* [*Studia chemica circa proteinas et carbohydratos speciei «Iridaea laminarioides»*]. 11 tabl., Scient. Pap. Inst. Algol. Res., Hokkaido Imp. Univ., I, 1, 91-118. Sapporo (1935). **b - 462**

General constituent of the alga and seasonal variations. Chemical properties of proteids and chromoproteids of this alga, found to be near to phycaerythrin and to phycocyan but not the same. The dilute alcohol soluble polysaccharides and the hot water soluble polysaccharide of this alga and their strong viscosity. The alkali soluble and insoluble polysaccarides. The fermentation products of arabinose and fucose in this alga caused by *Aspergillus oryzae*.

**Takahashi Toyoo** - Distribution of Amino Acid in the Food Stuffs for Fish [*Distributio aminoacidorum in substantiis quae Pisces nutricant*]. (In Jap., Engl. Rés.). 1 tabl. Bull. Jap. Soc. Scient. Fish., IV, 5, 301-302. Tokyo (1936). **b - 463**

Analysis of several food stuffs for fish after Rosedale's method. The results obtained are shown in a table.

**Tang P. S. & Chang C. S.** - Further Observations on the Iodine Contents of Chinese Marine Algae [*Observationes ulteriores de jodio quod continetur in Algis marinis sinensibus*]. Chin. Journ. Physiol., IX, 4, 369-374. Peking (1935). **b - 464**

**Tang P. S. & Whang P. C.** - Iodine Contents of ten Species of Chinese Marine Algae [*Jodium quod continentur in 10 speciebus algarum marinarum sinensium*]. Chin. Journ. Physiol., IX, 3, 285-290. Peking (1935). **b - 465**

**Yamamura Yarokuro** - Chemical Study of Food- organisms for Fish. V. Tyrosine and Tryptophane Contents [*Studium chemicum organismorum quae pisces nutricant. V. De tyrosina et tryptophano*]. (In Jap.; Engl. Rés.). 1 tabl., Bull. Jap. Soc. Scient. Fish., IV, 5, 303-304. Tokyo (1936). **b - 466**

Results of analysis of ten kinds of food organisms for fish with the Folin-Marenzi's and Tillmans - Alt's methods of determination.

# OECOLOGIA

## Hydrobiologia - Hydrologia - Adaptatio loco ambienti - Effectus lucis, temperaturae, salinitatis et pressionis in organisma marina.

**Alexander W. B., Southgate B. A. & Bassindale R.** - Summary of Tees Estuary Investigations. Survey of the River Tees. Part II. The Estuary, Chemical and Biological [*Compendium investigationum peractarum in aestuarium fluminis* Tees. *Inspectio fluminis* Tees. *Pars II: Aestuarium. Investigationes chemicae et biologicae*]. 7 figs., Dpt. Scient. & Ind. Res. Water Pollution Research, Techn. Pap. No. 5. H. M. Stat. Office. London (1935).

(—) Journ. Mar. Biol. Ass., XX, 3, 717-724. Plymouth (1936). **b - 467**

Description of the estuary; tidal movements, flora and fauna, with special reference to the death of migratory fish due to water pollution; chemical investigations.

**Beccari N. & Baldasseroni V.** - Effetti degli aumenti di pressione sulle anguille argentine [*Effectus augmentatae pressionis in Anguillis argenteis*]. Boll. Soc. It. Biol. Sper., XI, 9, 862-864. Napoli (1936). **b - 468**

Anguille argentine sottoposte a pressione continuata (10 atm. per 30 giorni) a temperatura pressochè costante (12°-13°), non mostrarono alcun segno di sofferenza. L'esame istologico delle gonadi non lascia rilevare alcuna deviazione dal normale, neanche imputabile a disagio ambientale.

**Becquerel P.** - La vie latente de quelques algues et animaux inférieurs aux basses températures et la conservation de la vie dans l'univers [*De vita latenti aliquarum algarum et animalium inferiorum, demissis temperaturis, deque conservatione vitae universae*]. C. R. Acad. Sc., CCII, 11, 978-981. Paris (1936). **b - 469**

Des observations faites sur des terres contenant diverses algues et microorganismes et qui ont été desséchées graduellement, pendant 3 mois, l'A. conclut que les Cyanophycées, les Chlorophycées et les Diatomées, ainsi que les

animaux de ses cultures (Anguillules, Rotifères, et leurs œufs; kystes des Amibes, des Héliozaires et des Infusoires) passent graduellement de la vie active à la vie ralentie de l'anhydrobiose. Il en conclut qu'il est possible de suspendre expérimentalement tous les phénomènes physicochimiques de la vie sans provoquer la mort. Partant de ces résultats il tire quelques conclusions sur l'avenir de la vie dans l'univers.

**Borcéa J.** - Conditions de vie et faciès faunistiques dans la Mer Noire [*De vitae condicionibus et faciebus faunisticis Ponti Euxini*]. Rev. Scient., LXXIV, 1, 1-9. Paris (1936). **b - 470**

Caractéristiques particulières de la Mer Noire: forme, étendue, situation; courants; température et migration des formes; nature du fond, faciès: la zone sous-terrestre, la zone littorale proprement dite, la zone littorale plus profonde. Enumeration des faciès divers: pierreux, sablonneux, vaseux; répartition des Algues, des Spongiaires, Coelentérés, Vers, Mollusques, Crustacés et Poissons.

Description of some of the more interesting groups and species of marine animals. Sketches.

**Breder C. M. Jr. & Harris J. E.** - Effect of Light on Orientation and Stability of Young Plectognath Fish [*De lucis effectu in orientationem et stabilitatem in juvenibus Piscibus plectognathis*]. 3 figs., Pap. Tortugas Labor., XXIX, 25-36. Washington (1936). **b - 474**

Report on experiments undertaken with *Monacanthus* (*Stephanolepis*) *hispidus* and *Lactophrys triqueter*. Analysis of movements made in response to light, attempt to explanations.

**Brooker Klugh A. & Curtis Newcombe L.** - Light as a Controlling Factor in the Growth of *Balanus balanoides* [*De luce ac factore ad inspiciendam accretionem speciei « Balanus balanoides »*]. Canad. Journ. of Research, XIII, 39-44. Ottawa (1935). **b - 475**

In natural conditions, the growth of *Balanus* in spring and summer is proportional to illumination in their habitats.

**Brotzky K. & Zenkewitch L.** - Biological Productivity of Sea Waters [*Productivitas biologica aquarum marinarum*]. (In Russ., Engl. Summ.). Zool. Journ., XV, 1, 13-25. Moskva (1936). **b - 476**

Discussion of the three basic conceptions on which the study of the live organic mass has to be founded, e. g. the biological productivity, the biomass and the biological production. The main sections of the study of phenomena of biological productivity in a basin.

**Brunelli G.** - Problemi di biologia marina con particolare riguardo alla ittiologia [*Problemata biologiae marinae. Agitur particulatim de ichthyologia*]. Atti Soc. It. Progr. Sc., Riun. 24, IV, 1, 8-16. Roma (1936). **b - 477**

L'A. discute alcuni quesiti generali riguardanti le condizioni di vita nel Mediterraneo, mettendone in rilievo la povertà di nitrati e fosfati e quindi di plancton. Paragona queste condizioni con quelle dei Mari Nordici, nei riguardi particolarmente della distribuzione qualitativa e quantitativa dei pesci e in rapporto al loro ritmo riproduttivo.

**Brunelli G. & Cannicci G.** - Notizie preliminari sulle caratteristiche chimiche e biologiche del Lago di Massaciuccoli [*Notitiae priores de peculiaritatibus chemicis et biologicis Lacus Massaciuccoli*]. Atti R. Acc. Naz. Lincei, Rend. Cl. Sc. Fis. Mat. Natur., XXII, 12, 598-604. Roma (1935). **b - 478**

Il Lago-stagno costiero di Massaciuccoli può venire classificato di tipo « oligoalino », applicando con qualche riserva le classificazioni della scuola svedese e tedesca esso può rientrare nel tipo « alcalitrofico » per molti caratteri chimico-fisici e biologici. Elenco delle specie animali o vegetali caratteristiche, tali da dare un'idea della *facies* dominante del Lago di Massaciuccoli, che comunica con il mare senza però risentire notevoli sbalzi di salinità, anche per le scarse maree del Tirreno.

**Bull O. H.** - Studies on Conditioned Responses in Fishes. Part VI. - The Formation of a Conditioned Motor Response in *Blennius pholis* L. to a Change in Direction of Current Flow [*De reactionibus excitatis experimentali ratione in Piscibus. Pars VIª. Quomodo formetur reflexus motorius conditionalis in « B. pholis » pro variata currentiae directione*]. 2 figs., 2 tables, Dove Mar. Labor., Rep. Year End. July 31st, 1935, Ser. 3, 3, 37-48. Newcastle o. Tyne (1935). **b - 479**

Results of observation on seven individuals of the fish *Blennius pholis* L. conditioned to a change in direction of water flow to 90°, using food as unconditioned stimulus. In five individuals completely negative responses to current changes less than 90° were obtained after conditioning was well established. In the other two fishes some evidence of discrimination was obtained.

**Bull O. H.** - Studies on conditioned Responses in Fishes. Part VII. Temperature Perception in Teleosts [*De reactionibus excitatis experimentali ratione in Piscibus. Pars VIIª. Temperaturae perceptio in Teleosteis*]. 2 figs., 3 tabl., Journ. Mar. Biol. Ass., n. ser., XXI, 1, 1-27. Plymouth (1936). **b - 480**

By the use of a « conditioned response » technique it has been shown that teleostean Fishes respond « purposively » to an increase in temperature of the water surrounding them of between 0.03°C and 0.10°C. It is probable that the former figure is true for all the species investigated, but it has only been practicable to establish it with certainty in a few sedentary forms. The bearing of the results on fishery problems is discussed. (A.).

**Cazalet M.** - Recherches bionomiques sur l'estuaire du Frémur (Limite des Côtes-du-Nord et de l'Ille-et-Vilaine) [*Investigationes bionomicae in aestuarium fluminis* Frémur]. 1 fig., Bull. Soc. Scient. Bretagne, XII, 205-237. Rennes (1936). **b - 481**

Etude de la flore et de la faune et leur distribution en rapport à la dessalure et aux conditions chimiques-physiques des eaux.

**Clarke G. L.** - Light Penetration in the Western North Atlantic and its Application to Biological Problems [*Lucis penetratio in Nord-Atlanticum occidentalem eiusque applicatio ad problemata biologica*]. 6 figs., 3 tabl., 14 pp., Cons. Expl. Mer, Rapp. & Pr.-Verb., CI, 3ème partie, 3, 3-14. Copenhague (1936). **b - 482**

Methods. Comparative transparency of different types of Atlantic Water. Reflection and absorption at the surface. Rate at which submarine light becomes diffuse. Diurnal vertical migration of zooplankton. The metabolism of Diatoms. The depth at which Fish can see.

**Dakin W. J. & Colefax A. N.** - Observations on the seasonal Changes in Temperature, Salinity, Phosphates, and Nitrate Nitrogen and Oxygen of the Ocean Waters on the Continental Shelf off New South Wales and the Relationship to Plankton Production [*Observationes circa mutationes pro anni tempore temperaturae, salsedinis, phosphatorum, azoti nitrati atque oxygeni aquarum oceanicarum in contignatione continentali extra regionem* South Wales. *Agitur de correlatione cum productione planctonica*]. 1 pl., 11 figs., Proc. Linn. Soc. N. S. Wales, LX, 5/6, 303-314. Sidney (1935).

( — ) Sydney Univ. Reprints, ser. 13, III, 8. Sydney (1936). **b - 483**

This study concerns mainly the variations in nitrate and phosphate which, however, are not so extensive as in English seas. The nitrate N seems to be more sensitive to the consuming plankton and is at minimum during summer months, the phosphate is usually quickly regenerated in surface waters. Seasonal fluctuations during a period of 3 years are shown graphically.

**Drilhon A.** - Influence des variations de salinité sur la réserve alcaline du sang des Crustacés [*Influentia variationum salinitatis in reservam alcalinam sanguinis Crustaceorum*]. C. R. Soc. Biol., CXVIII, 770. Paris (1935). **b - 484**

La réserve alcaline du sang de *Carcinus maenas* augmente lorsque on le soumet progressivement à l'eau douce.

**Fox D. L., Marks G. W. & Austin F. O.** - The Habitat and Food Sea Mussel. The Survival Period of Adult Mussels in Sea Water of Various Concentrations [*De habitat alimentoque Ostrearum. De supraviventia in « Mytilus » in aqua marina, diversa concentratione*]. 1 fig., 3 tables, Bull. Scripps Instit. Oceanogr., Techn. Ser., IV, 1, 5-11. Berkeley, Ca. (1936). **b - 485**

Results of a series of laboratory experiments which were performed in an attempt to ascertain the survival time of *Mytilus californianus* in sea water of different salinities, from 0 to 60 ‰, 33.6 ‰ being about the average salinity of sea water at La Jolla. The various other factors which exercise an influence upon survival have also been dealt with.

**Galtsoff P. S.** - Factors Governing the Propagation of Oysters and other Marine Invertebrates [*Factores qui gubernant propagationem ostrearum aliorumque Invertebratorum marinorum*]. Proc. 5th Pacific Scient. Congress 1933, 5, 4119-4120. Univ. Toronto Press. Toronto (1934). **b - 486**

On the influence of physical and chemical factors, of which temperature and chemical stimulation by specific sexual substances are the most important ones. Temperature has a 2-fold effect on the oyster establishing a limit below which spawning is impossible and stimulating the discharge of sexual products. Simultaneous spawning of the members of the animal community is caused by chemical stimulation when the physical one is not sufficient.

**Gessner F.** - Untersuchungen über den Nährstoffgehalt und die Planktonproduktion in den Küstengewässern von Rovigno [*Investigationes in substantiam nutriticiam et productionem planctonicam aquarum litorearum Arupinensium*]. 4 Abb., Not. Ist. Biol. Rovigno, 20, 3-16. Jena (1936). **b - 487**

Untersuchungen über den Gehalt an Phosphaten, Nitraten und Kieselsäure der Küstengewässer Istriens. An zwei Stationen wurden in Vertikalabständen von 5 M. Wasserproben zur Zählung des Nannoplanktons mit Hilfe des Utermöhl-Mikroskops genommen. Die Hauptmenge des Planktons wurde von *Hillea* und Diatoméen gebildet. (Nach Vf.).

**Girault M.** - Influence des variations du milieu sur le fonctionnement du cœur des Crabes [*Influentia variationum medii ambientis in functionem cordis cancrorum*]. Ann. Physiol. et Physicochim. Biol., XI, 54-69. Paris (1935). **b - 488**

Différente tolérance du cœur de *Carcinus maenas* et de *Platycarcinus pagurus* aux variations du milieu. La concentration du liquide de perfusion du cœur suit les variations de concentration du milieu extérieur.

**Hamai I.** - On the Growth of the Shell of *Meretrix meretrix*, especially with regard to Periodicity of Growth relatively to the seasonal Variations in the Environment [*De accretione conchae speciei « Meretrix meretrix » praecipue pro accretionis periodicitate et relate ad ambientis variationes pro anni tempore*]. Sc. Rep. Tôhoku Imp. Univ., Ser. 4, IX, 4, 339-372. Sendai (1935). **b - 489**

A. has studied the relation between time and growth and the relative growth and its ratio. He has found that the natural growth can be expressed by the so called logistic curve of Robertson and that there are two growth periods, the spring-autumn period from February to August and the autumn-winter period from August to February. The influence of temperature and salinity has also been studied.

**Hamai I.** - A Study of one Case in which Different Environmental Conditions produce different Types of *Meretrix meretrix* [*Agitur de differentibus condicionibus ambientalibus quae producunt typos diversos speciei « Meretrix meretrix »*]. Sc. Rep. Tôhoku Imp. Univ., Ser. 4, X, 3, 485-498. Sendai (1935). **b - 490**

The round type has been found in a calm sea with a slightly muddy bottom and the elongated type on a sandy shore facing the open sea. Comparison of different habitats in several environmental conditions.

**Hayasaka I.** - On the Fatal Effect of Cold Weather upon certain Fishes of the Sea around the Islands of Hôko (the Pescadores Islands): A Palaeontological Point of View [*De effectu letali coeli frigidi in Pisces marinos circum insulas*

Hôko (*Insulae* Pescadores). *Ratio palaeontologica*]. Mem. Fac. Sc. a. Agricult. Taihoku Imp. Univ., XIII, 2, 5-12. Formosa (1934). **b - 491**

After a heavy fall of the temperature to about 10° C in January-February, specially after a duration of a few days, certain fishes died. A. draws the conclusion that the « fossilization of such free swimming animals as fishes could have resulted from certain physical causes accompanying the lowering of the atmospheric temperature ».

**Havinga B.** - De Veranderingen in den hydrographischen Toestand en in de Macrofauna van Zuiderzee en Ijselmeer gedurende de Jaren 1931-1935 [*Mutationes hydrographicae mutationesque macrofaunae regionis* Zuiderzee *regionisque* Ijselmeer, *A. 1931-35*]. Meded. v. de Zuiderzee-Comm., 4. Den Helder (1936). **b - 492**

**Hopkins A. E.** - Adaptation of the Feeding Mechanism of the Oyster (*Ostrea gigas*) to Changes in Salinity [*Adaptatio apparatus alimentaris speciei « Ostrea gigas » ad salsedinis variationibus*]. 11 figs., 1 table, Bull. Bur. Fish., XLVIII, 21, 345-364. Washington D. C. (1936). **b - 493**

Account of seven series of experiments with different and varying degrees of salinity in order to study the adaptation. Any significant change in salinity affects the activity of the gills and that of the adductor muscle. Rate of adaptation. Effects of different salinities.

**Isaac W. E.** - A Preliminary Study of the Water Loss of *Laminaria digitata* during intertidal Exposure [*Studium prius amissionis aquae speciei « Laminaria digitata » tempore aestuum maris*]. Ann. Bot., XLIX, 193, 109-117. London (1935). **b - 494**

Investigation undertaken on *Laminaria digitata* on the Gower coast, S. Wales. Records of losses of 19.3 30.7 %.

**Johnson S.** - On the Variation of Fishes in Relation to Environment. Preliminary Report [*De variationibus in Piscibus ex ambiente. Relatio prior*]. 5 figs., 26 pp., Berg. Mus. Årb., naturv. r., I, 4. Bergen (1936). **b - 495**

The investigations concern the variations in the number of vertebrae and fin-rays on *Spinachia* and *Gobius* with regard to temperature, salinity and oxygen content. In a special part are given the total variation found as well as localities and general distribution of the species examined. In a general discussion A. points out the complexity of the problems giving a critical analysis of other investigations, especially those of Schmidt, from which some general conclusions are drawn. A detailed account will be given later on.

**Joubin L.** - Cours d'océanographie biologique [*Lectiones de oceanographia biologica*]. Bull. Soc. Océanogr. France, XVI, 89, 1537-1546; 90, 1559-1568; 91, 1572-1582. Paris (1936). **b - 496**

Leçons du cours d'océanographie biologique professé par le Prof. Joubin, publié sous la rédaction du Prof. Germain, et qui représentent l'œuvre posthume du grand maître. Introduction. Considérations générales sur l'eau de mer et sa composition chimique. Le pH en biologie marine. Caractères physiques de l'eau de mer: Les mouvements de la mer, et les grandes courants océaniques. Le sol sous-marin: origine des sédiments. Les êtres vivants qui prennent part à sa constitution. Les dépôts littoraux d'origine organique. Les dépôts marins d'origine pélagique: les protistes, les foraminifères, la vase à Ptéropodes, les débris des Vertébrés. Les plantes et animaux à squelette silicieux et les dépôts sous-marins qu'ils produisent: les diatomées, les radiolaires, les éponges, les mollusques.

**Keys A. B. & Christensen E. H.** - Organic Substances in Solution in Sea Water [*Substantiae organicae in aqua marina solutae*]. Woods Hole Oceanogr. Instit., App., Rep. 1934, 22-23. Woods Hole, Mass. (1935). **b - 497**

Account of the studies continued during the summer 1934, on the distribution and possible place in the economy of the sea of the organic substances in solution in sea water, with special regard to the following problems: 1) What is the concentration of dissolved organic carbon and nitrogen in various sea waters from various depths ? 2) How susceptible are these substances to degradation by bacteria ? 3) What is the extent of occurrence of free ammonia in sea water and its level of concentration ?

**Keys A. B., Christensen E. H. & Krogh A.** - The Organic Metabolism of Sea-water with Special Reference to the Ultimate Food Cycle in the Sea [*De organico metabolismo aquae marinae, praecipue quoad pertinet ad cyclum alimentationis*]. 5 figs., 7 tabl., Journ. Mar. Biol. Assoc., XX, 2, 181-196. Plymouth (1935). **b - 498**

Studies are reported on the behaviour of stored sea-water with regard to oxygen, ammonia, and bacteria content in relation to the conditions of storage and to the effect of various filtration procedures. It appears that in the sea there is generally an equilibrium such that only minimal bacterial activity at the expense of dissolved organic matter may take place, but that very small changes in the system may make available for bacterial metabolism perhaps 10 or 15 per cent of the total dissolved organic matter. Bacterial activity in sea-water is very sensitive to temperature and to alcalinity and relatively independent of ammonia, nitrate or nitrite and also oxygen above half-saturation. Lack of phosphate may on occasion be a limiting factor.

**Lampe H.** - Die Temperatureinstellung des Stoffgewinns bei Meeresalgen als plasmatische Anpassung [*Adaptatio ex temperatura assimilationis Algarum marinarum ac adaptatio plasmatica*]. 14 Abb., Protoplasma, XXIII, 534-578. Berlin (1935). **b - 499**

Bericht über Versuche mit *Fucus serratus*, *Nemalion lubricum*, *Chorda filum* und *Laminaria saccharina* während des Sommers und *Fucus serratus*, *F. vesiculosus*, *Porphyra hiemalis*, *Laminaria digitata*, *Phyllophora Brodioei* und *Delesseria sanguinea* im Winter. Bestimmung der Atmungsintensität und Bestimmung des Verhältnisses: Assimilation, Respiration unter dem Einfluss verschiedener Temperaturen; Einstellung der Atmung nach Sommer- und Wintertemperaturen, eurytherme und stenotherme Typen. Kritische Betrachtung der Theorie von Kniep-Harder.

**Ljubitzky A. I.** - Zur Erforschung des Temperatureffekts in der Morphogenese. II. Einfluss der Temperatur auf die Geschwindigkeit und Wachstum des Embryos von *Salmo trutta* L. m. *fario* [*Studium circa effectum temperaturae in morphogenesim. II. Temperaturae influentia in velocitatem et accretionem embryonis speciei « Salmo trutta »*]. 1 Taf., 3 Abb., Zool. Jahrb. Abt. Allg. Zool. u. Physiol., LIV, 4, 405-422. Jena (1935). **b - 500**

Die Dauer von 12 verschiedenen embryonalen Stadien von dem ungeteilten Ei bis zu der Bildung von der Blastula wurde bei 3,4; 5,0; 7,6 und 13,2° C bestimmt. Eine erhöhte Temperatur beschleunigt die Entwicklung, der Effekt aber wechselt sehr mit den verschiedenen Stadien. Die Perioden langsamen Wachstums mit einer folgenden grösseren Differenzierung zeigen einen hohen Temperaturkoeffizienten auf, während beim schnelleren Wachstum die Temperaturkoeffizienten niedriger sind.

**Mac Ginitie G. E.** - Ecological Aspects of a California Marine Estuary [*De oecologia alicuius aestuarii marini Californiensis*]. 21 figs., Amer.

Midland Natur., XVI, 5, 629-765. Notre Dame, Ind. (1935). **b - 501**

Results of 8 years' study of Elkhorn Slough, a tributary of Monterey Bay containing extensive beds of *Zostera* and *Enteromorpha*. Hydrographical and hydrological conditions, salinity, oxygen supply, light conditions. 207 species are studied with regard to occurrence, parasites and food. Evidence of migration from ocean to land taking place mainly through the surf and not through estuaries. Preparation of fossil beds. Necessity of studying the life history of the more import members of the associations, e. g. that of *Callianassa californiensis*.

**Maxia C.** - Studi sulla idropermeabilità cellulare, I, II, III [*Studia de hydropermeabilitate cellulari*]. 8 fig., Scritti Biol., IX, 31-41; 43-55; 57-65. Cagliari (1935). **b - 502**

Differente risultato ottenuto immergendo in acqua di mare diluita uova di *Paracentrotus lividus*, di *Artemia salina* e *Cyprinodon calaritanus*. L'imbibizione è, in questi ultimi due casi, più lenta, più debole ed irregolare, in rapporto alla resistenza di queste specie alle variazioni della salinità.

**Montfort C.** - Zeitphasen der Temperatur-Einstellung und jahreszeitliche Umstellungen bei Meeresalgen [*De gradibus quoad adaptationem temperaturae deque mutationibus pro anni tempore Algarum marinarum*]. 8 Abb., Ber. Dtsch. Bot. Ges., LIII, 7, 651-674. Berlin (1935). **b - 503**

Untersuchungen über *Fucus*, *Chondrus*, *Phyllitis*, *Porphyra*, *Ectocarpus*, *Ulva* und *Pelvetia*. Einfluss der Steigerung und Erniedrigung der Temperatur. Vergleich verschiedener ökologischer Verhältnisse in Bezug auf die Produktion. Atmung und Anpassung nach veränderten Verhältnissen.

**Moorhouse F. W.** - The Cyclone of 1934 and its Effect on Low Isles, with Special Observations on Porites [*De cyclone A. 1934 eiusque effectu in* Low Isles. *Agitur particulatim observationum circa Porites*]. 4 pls., Rep. Great. Barrier Reef Comm., IV, Part 2, 37-44. Brisbane (1936). **b - 504**

The cyclone. Immediate and later results. Some observations on Porites (*Porites*, *Montipora*, *Hippopus*, *Acropora*, *Favia*, *Fungia*, *Polyphyllia*, *Herpetholitha* etc.).

**Portier P.** - Edification et évolution de la matière vivante dans la mer [*Aedificatio et evolutio substantiae viventis in mari*]. 3 fig., Rev. Scient., LXXIV, 3, 67-73. Paris (1936). **b - 505**

Analyse chimique de l'eau de mer. Végétation des algues dans les différentes couches, leur assimilation chlorophyllienne. L'importance de l'insolation pour la vie dans la mer. Le réapprovisionnement des sels nutritifs; rôle des bactéries et rôle des courants; quelques exemples.

**Ranson G.** - Le rôle de la matière organique dissoute dans l'eau et les Théories de Pütter [*Momentum substantiae organicae solutae in aquis atque theoriae ex* Pütter]. Bull. Mus. Nat. Hist. Natur., Sér. 2, VII, 6, 359-366; VIII, 2, 160-172. Paris (1935-1936). **b - 506**

Revue synthétique des travaux sur l'utilisation des substances dissoutes dans l'eau, par les Protozoaires, Crustacés, Mollusques et Poissons. Pütter a fait des expériences très complètes sur les échanges nutritifs chez *Suberites domuncula* dont il conclut que les Eponges sont réduites à se procurer une nourriture dissoute. Pour l'absorption n'est pas indispensable un organe spécial: la mer forme la lymphe dont les organismes marins vivent, les substances en solution dans l'eau sont absorbées quelque fois par l'intestin mais, en général, par la surface du corps et plus particulièrement par les branchies. Les organismes planctoniques qui passent dans l'intestin ne jouent qu'un rôle secondaire dans la nutrition. La matière organique dissoute provient, d'après Pütter, de l'activité des Algues et des Bactéries. Critique des théories de Fischer.

**Runnström S.** - Die Anpassung der Fortpflanzung und Entwicklung mariner Tiere an die Temperaturverhältnisse verschiedener Verbreitungsgebiete [*De adaptatione reproductionis deque accretione animalium marinorum, differentibus temperaturae condicionibus regionum distributionis*]. Tab., Berg. Mus. Årb., naturv. r., I, 3, 1-36. Bergen (1936). **b - 507**

Die Untersuchungen umfassen arktisch-boreale, boreale und mediterran-boreale Formen. Auf Grund seiner eigenen Untersuchungen und derjenigen anderer Forscher schliesst Vf. als allgemeine Regel, dass die meisten Arten in ihrer Fortpflanzung und Entwicklung an die Temperaturverhältnisse eines gewissen Gebietes angepasst sind. Diese propagativ stenothermen Arten können in den Nachbarregionen nur so weit hervordrängen bis ein Grenzgebiet erreicht wird, wo Fortpflanzungsbedingungen nicht mehr vorhanden sind. Durch Mutation und Neukombination von Genen entstehen neue Biotypen, welche eine Anpassung an neue Lokalitäten zeigen.

**Russell F. S.** - Submarine Illumination in Relation to Animal Life [*Lux submarina pro vita Animalium*]. Cons. Expl. Mer, Rapp. & Pr.-Verb., CI, $2^{\text{ème}}$ partie, 1, 3-8. Copenhague (1936). **b - 508**

Zooplancton: Light and vertical distribution. Physiological effects of light on plankton animals. Light in relation to zooplancton, production and distribution. Bottom fauna: Light and the zonation of sedentary and bottom animals. Physiological effects of light on bottom animals. Fishes: Light discrimination. Physiological effects of light and colour change.

**Sato Syôiti** - Ciliary Movement of the Gill of an Oyster *Ostrea gigas*, in Relation to Temperature [*Motus ciliares branchiarum speciei « Ostrea gigas » pro temperatura*]. (In Jap.; Engl. Rés.). 1 fig., Bull. Jap. Soc. Scient. Fish., IV, 6, 409-410. Tokyo (1936). **b - 509**

The mean crawling velocity of ciliary movement increases as the t° goes higher from 1,2° C. to 29,2° C.

**Schnakenbeck W.** - Die Nahrungsstoffe des Meeres und die Hauptfischereigebiete [*Substantiae alimentares maris et regiones praecipuae piscatoriae*]. Fischmarkt, IV, 7, 190-193. Cuxhaven (1936). **b - 510**

Über die Gesetze des Stoffwechsels im Meere; die Hauptfischereien mit den grössten Erträgen im allgemeinen in den gemässigten und kalten Zonen; der Planktongehalt und seine Abhängigkeit vom Phosphor- und Stickstoffgehalt.

**Seiwell H. R.** - The Annual Organic Production and Nutrient Phosphorous Requirement in the Tropical Western North Atlantic [*De phosphoro pro alimento in regione tropicali occidentali oceani Atlantici Nordici*]. 4 tabl., 1 diagr., Journ. Cons. Expl. Mer, X, 1, 20-32. Copenhague (1935). **b - 511**

Theoretical estimation of the annual production of organic matter in the Tropical Western North Atlantic. Phosphorous requirements for organic production in the Tropical Western North Atlantic: 1) Carbon and phosphorous content of marine plankton. 2) Consumption of dissolved phosphorous. 3) Sources of supply of dissolved phosphorous to the layer of photosynthesis in the region of investigation. Comparison of productiveness of the Tropical Western North Atlantic with other areas. 1) Comparison with daily production in the coastal waters of Northern Europe during diatom flowering. 2) Comparison with annual production in coastal seas of Northern Europe.

**Sharp J. G.** - Glycogenolysis in Fish-liver at low Temperatures [*De glycogenolysi in hepate Piscium, demissis temperaturis*]. Biochem. Journ., XXIX, 854-859. London (1935). **b - 512**

**Teissier G.** - Croissance comparée des formes locales d'une même espèce [*De accretione comparata formarum eiusdem speciei eodem loco*]. Mém. Mus. R. Hist. Natur. Belgique, Sér. 2, 3, 627-634. Bruxelles (1936). **b - 513**

L'A. se rapporte aux recherches exécutées par divers auteurs sur *Littorina sitchana*, *Gadus aeglefinus*, *Homarus americanus*, *Carassius auratus* et *Haliotis gigantea* pour montrer que les méthodes actuelles d'étude de la croissance relative permettent d'analyser la signification des différences qui séparent si souvent les formes locales ou les variétés d'une même espèce.

**Templeman W.** - The Influence of Temperature, Salinity, Light and Food Conditions on the Survival and Growth of the Larvae of the Lobster (*Homarus americanus*) [*De influentia temperaturae, salsedinis, lucis, condicionum nutricationis in surviventiam et accretionem larvarum speciei « Homarus americanus »*]. Tabl., 1 graph., Journ. Biol. Bd. Canada, II, 5, 485-497. Toronto (1936). **b - 514**

The influence of every factor is examined experimentally and the results are expressed in graphs and tables. The larval life is studied until the attainment of the fourth stage.

**Thompson T. G., Mc Ewen G. F. & Van Cleve R.** - Hydrographic Sections and Calculated Currents in the Gulf of Alaska 1929 [*Investigationes hydrographicae in currentias sinus Alaskiani A. 1929*]. 8 figs., 9 tabl., Rep. Int. Fish. Comm., 10, 1-32. Seattle, Wash. (1936). **b - 515**

These investigations have been undertaken principally with a view to supply information for the study of the drift of halibut eggs and larvae. Methods of collection, analysis, and calculation. Ocean cape section, Cape Cleare section, Cape Chiniak section.

**Zenkewitch L. A.** - On Growth Rate in Different Seasons of the Year [*Accretionis velocitas, differentibus anni temporibus perdurantibus*]. (In Russ., Engl. Rés.). 1 graph., Uchen. zap. Mosk. gosud. univ., Biol., IV, 1, 135-138. Moskva (1936). **b - 516**

Referring to the growth investigations undertaken by Coe on *Balanus tintinnabulum* in Californian waters, A. has calculated the average daily increase in size of this species during the first weeks of life. Of factors concerned A. considers the sun radiation as the most important one.

**Scottish Marine Biological Association** - Shore Ecology [*De oecologia orae maritimae*]. Scott. Mar. Biol. Ass., Ann. Rep., 1935-36, 10-16. Glasgow (1936). **b - 517**

Report on observations undertaken on the copepod genera *Leptopsyllus* and *Paramesochra* on the rate of growth and variation in the spat-falls of *Tellina tenuis*, and on *Ophelia cluthensis*. Some changes in the fauna; notes on 18 species. Algal ecology: 8 new records.

## Geographica distributio animalium.

**Aikawa H.** - The Planktological Properties of the Principal Sea Areas Surrounding Japan [*Peculiaritates planctonicae praecipuarum zonarum marinarum quae Japoniam circumdant*]. (In Jap., Engl. Synops.). 1 map, 8 tabls., Bull. Jap. Soc. Scient. Fish., V, 1, 33-41. Tokyo (1936). **b - 518**

Author describes the oceanic and the neritic groups of the plankton of the waters surrounding Japan, with special reference to the Kurosio group, the Oyasio group, the Tusima current group, the Liman group, the Yellow Sea group, being the main oceanic groups stable both in composition and quantity throughout the year; the neretic groups, on the contrary, fluctuate markedly in composition and in quantity, as the seasonal succession of diatoms and other organisms takes place quickly.

**Angelini G.** - Distribuzione geografica dei *Clypeasteridae* fossili e viventi [*Clypeasteridae fossiles et viventes. Quaestio de distributione geographica*]. Atti Soc. Tosc. Sc. Natur., XLV, 140-152. Pisa (1935). **b - 519**

Con lo studio della distribuzione geografica dei *Clypeasteridae* fossili e viventi si dimostra che questi hanno la loro area di distribuzione nella *Tethys*; solo poche specie migrano fuori di questa, ma sempre in regioni finitime, quindi in mari caldi o temperati, caldi. Questa distribuzione coincide in linea generale con quelle delle Rudiste, Nummuliti, Lepidocicline e Coralli costruttori (A).

**Askelsson J.** - Some Remarks on the Distribution of the Species *Zirphaea crispata* L. and *Purpura lapillus* L. on the North-Coast of Iceland [*Observationes circa distributionem specierum « Zirphaea crispata » et « Purpura lapillus » in litoribus septentrionalibus Islandiae*]. 3 figs., Vidensk. Medd., XCIX, 65-72. København (1935-36). **b - 520**

Funds of both species recorded since 1772. Two possibilities discussed as to their occurrence: that their presence may have been overlooked or, more probably, that it is to be sought in the change of temperature that has taken place in the Icelandic waters during the last ten or twenty years.

**Athanassopoulos G.** - Sur un centre de concentration et de reproduction des poissons de mer dans les eaux helléniques [*De quodam centro pro concentratione et reproductione Piscium in aquis Hellenicis*]. Bull. Inst. Océanogr., 693, 1-5. Monaco (1936). **b - 521**

L'A. illustre la configuration bizarre des côtes helléniques, et surtout des golfes de Corinthe et de Patras, centres de concentration et en même temps de reproduction très importants des Gadidés et des Pleuronectidés et d'un macroure assez précieux, le Pénée. Ces observations jettent une certaine lumière sur la connaissance de la distribution de la faune dans les détroits marins en général.

**Birula A.** - Ueber das Vorkommen der Chironomiden-Gattung *Clunio* im Kara-Busen (Südküste des Kara- Meeres) [*De genere chironomide « Clunio » in Sinu Karensi (in litoribus meridionalibus Maris Karensis)*]. 1 Abb., Int. Rev. ges. Hydrobiol. u. Hydrogr., XXXI, 1934, 436-439. Akad. Verlagsg. Leipzig (1935). **b - 522**

Beschreibung der Larve von *Clunio*, welche im Mageninhalt einiger Fische (*Coregonus lavaretus pidschian* Gmel.) aus dem in dem Kara-Busen mündenden Flusse aufgefunden worden ist.

**Broch H.** - Some Zoogeographical Problems of the Northern Pacific [*Problemata quaedam zoogeographica Oceani Pacifici septentr.*]. Science, LXXXIII, 2144, 101-103. New York (1936). **b - 523**

A. touches upon several problems of differences and relationships between faunas of different parts of the Pacific and different parts of the Atlantic as well as between the northern Pacific and the northern Atlantic quoting studies recently mady by Ekman, Gurjanova and Berg with special reference to the question of adaptation and morphologic changes of the species.

**Bruun A.** - Sur la distribution de quelques Poissons océaniques d'après les Expéditions Danoises [*De distributione aliquorum Piscium oceani-*

*corum ex Danica expeditione provenientium*]. 6 fig., Bull. Inst. Océanogr. (Dana Oceanogr. Coll. N. 9), 700, 1-16. Monaco (1936). **b - 524**

L'A. a démontré que, bien que les poissons océaniques aient une vaste distribution, leurs limites géographiques peuvent être aussi nettement définies que celles des animaux terrestres. Etudes sur la distribution de *Anguilla anguilla*, *Conger conger*, *Synaphobranchus pinnatus*, *Myctophum glaciale* et *Paralepis sphyraenoides*.

**Chauchard P.** - *Oncidiella celtica* Cuv. aux îles Chausey [*Oncidiella celtica » in insulis* Chausey *reperta*]. 2 fig., Bull. Lab. Marit. Dinard, 16, 30-32. Rennes (1936). **b - 525**

Parmi les *Fucus lutarius*, les autres Algues et les Phanérogames halophiles l'A. a constaté pour la première fois ici la présence de *Oncidiella celtica*.

**Colombini N.** - Distribuzione geografica delle *Scutellidae* Gray fossili e viventi [*Distributio geographica Scutellidarum fossilium et recentium*]. 2 fig., Atti Soc. Tosc. Sc. Natur., XLV, 254-270. Pisa (1935). **b - 526**

Dallo studio della distribuzione geografica delle *Scutellidae* Gray (secondo la classificazione di Lambert e Thiery) appare come, attraverso i varii periodi del Cenozoico fino all'attualità, alcuni gruppi siano ubiquisiti, altri mostrino una localizzazione in determinate provincie e in particolari regioni e altri infine presentino tendenza a spostarsi variando o ampliando il loro habitat.

**Davy de Virville Ad.** - Recherches écologiques sur la flore des flaques du littoral de l'Océan atlantique et de la Manche [*Investigationes oecologicae in floram puteorum praeter litora Oceani Atlantici et Freti Britannici*]. 13 fig., 19 pl., Rev. Gén. Bot., XLVI, 705-721; XLVII, 26-43, 96-114, 160-177, 230-243, 308-323. Paris (1934-1935). **b - 527**

Etude physique-chimique de l'eau de mer en surface, au large et sur le littoral. Classification des flaques marines du littoral selon leur flore et les variations quotidiennes de température et d'alcalinité. Différences entre les flaques peuplées d'Algues vertes, les flaques à Algues calcaires, et celles à Floridées. Les variations physico-chimiques n'ont pas plus d'action sur la distribution des Algues marines que sur celle des animaux, elles en sont la conséquence et non point la cause.

**Demel K.** - Studja nad fauna, denna i jej rozsiedleniem w polskich wodach Bałtyku [*De fauna benthonica eiusque distributione per aquas Polonas maris Baltici*]. (En polon.; rés. franç.) 21 tab. Arch. Hydrobiol. & Ichthyol., IX, 3/4, 239-309. (Trav. Stat. Marit. Hel). Suwalki (1935). **b - 528**

Faune benthonique des Invertébrés et sa répartition dans les eaux côtières polonaises de la Baltique avec référence spéciale au groupement éthologique des espèces en associations naturelles et aux conditions d'existence des espèces les plus typiques, par rapport à leur répartition locale. L'A. divise les associations en deux groupes principaux: associations des eaux profondes composées exclusivement d'espèces sténothermes propres aux eaux froides et associations des eaux côtières peu profondes et bien éclairées, composées de préférence d'espèces eurythermes. Limites de diffusion de ces deux types d'associations et caractères géographiques des espèces considérées.

**Desbrosses P.** - Echouage d'un *Tetrodon lagocephalus* L. près de Quiberon et remarques sur la présence de cette espèce et de *Balistes capriscus* L. au Nord du 44° L. N. [*De specie « Tetrodon lagocephalus » reperta in arena apud* Quiberon. *Observationes circa distributionem huius speciei specieique « Balistes capriscus » in regione magis nordica quam 44, L. N.*]. 1 pl., Bull. Soc. Zool. France, LX, 43-48. Paris (1935). **b - 529**

Distribution géographique de ce Plectognathe le long des côtes de l'Afrique tropicale atlantique. Les captures au nord de l'Atlantique sont en rapport aux transgressions atlantiques vers le Nord des eaux chaudes et salées.

**Dons C.** - Zoologische Notizen. XXIX. Die Verbreitung von Steinkorallen in West-Finnmark [*Notitiae zoologicae XXIX: Distributio coralliorum in regione* West-Finnmark (*Norvegia*)]. 1 Abb., Kgl. Norsk. Vidensk. Selsk. Forh., VIII, 18, 57-60. Trondheim (1936). **b - 530**

Während des Sommers 1934 hat Vf. bei Øyvik im Stjernsund ein neues lebendiges Korallenriff von *Lophohelia* entdeckt, das hier beschrieben wird. Verzeichnis anderer in West-Finnmark vorbefindlichen Korallenriffe.

**Eggert B.** - Beitrag zur Systematik, Biologie und geographischen Verbreitung der *Periophthalminae* [*Contributio in systematicam, biologiam et distributionem geographicam Periophthalminarum*]. 16 Abb., 9 Pl., Zool. Jahrb., Syst., Ökol. u. Geogr. Tiere, LXVII, 29-116. Jena (1935). **b - 531**

Erläuterung der verschiedenen Arten und Rassen. Habitat mit besonderer Berücksichtigung der *P. chrysospilos* und *P. schlosseri*. Phylogenetische Untersuchungen.

**Emerson Warren A.** - An ecological Study of the Sea Mussel (*Mytilus edulis* Linn.) [*Studium oecologicum speciei « Mytilus edulis »*]. 1 graph. fig., 1 table, Journ. Biol. Bd. Canada, II, 1, 89-94. Toronto (1936). **b - 532**

The distribution of the sea mussel beds of the Passamaquoddy bay area is almost exclusively intertidal. The experiments herein reported show that mussels grow most rapidly when constantly submerged. Their general absence below the low tide level, therefore, is attributed to the particular abundance in this region of the predatory fauna. (A.).

**Fage L. & Monod T.** - La faune marine du Jameo de Agua, lac souterrain de l'île Lanzarote (Canaries). Biospeleologica LXIII [*Fauna marina in* Jameo de Agua *lacu subterraneo insulae* Lanzarote (Canaries). *Biospeleologica XIII*]. 9 figs., Arch. Zool. Expér. et Gén., LXXXVIII, 2, 97-113. Paris (1936). **b - 533**

Exploration zoologique de ce lac souterrain en communication avec la mer. Composition de la faune et rôle de la salinité pour l'acclimatation du *Munidopsis polymorpha* et du *Parhyale fasciger*; adaptation de *Heteromysis Cotti*.

**Fischer - Piette E.** - Quelques remarques bionomiques sur la côte basque française et espagnole [*Notae quaedam bionomicae de litoribus vasconicis, francogallicis et hispanicis*]. 1 fig., Bull. Lab. Marit. Saint-Servan, XIV, 1-14. Rennes (1935). **b - 534**

**Fischer - Piette E.** - Faune et flore marines de la région malouine en 1935 [*Fauna et flora marinae in insulis* Falkland *A. 1935*]. Bull. Lab. Marit. Dinard, XV, 9-17. Rennes (1936). **b - 535**

Algues, Phanérogames, Spongiaires, Coelentérés, Crustacés, Mollusques, Lamellibranches et Céphalopodes. Tuniciers.

**Fischer - Piette E.** - Systématique et Biogéographie. Les Patelles d'Europe et d'Afrique du Nord [*Systematica et biogeographia. Patellae europaeae et ad Africam Nordicam pertinentes*]. 26 fig., 4 pl., Journ. Conchyl., LXXXIX, 1-66. Paris (1935). **b - 536**

**Fish C. J.** - The Biology of *Pseudocalanus minutus* in the Gulf of Maine and Bay of Fundy [*De biologia speciei « Pseudocalanus minutus » in Sinu* Maine *et Baja* Fundy]. 9 figs., 7 tabl., Biol. Bull., LXX, 2, 193-216. Lancaster, Pa. (1936). **b - 537**

Production and dispersal of eggs and larvae of *P. minutus*; regional abundance of the stock. Tables showing average numbers of ova, nauplius and Copepodite stages per minute of towing for the period April-July, 1932; composition of the population in August and September; occurrence of eggs and of nauplius stages. Mortality in developing larvae.

**Fish C. J.** - The Biology of *Oithona similis* in the Gulf of Maine and Bay of Fundy [*De biologia speciei « Oithona similis » in Sinu* Maine *et Baja* Fundy]. 9 figs., 4 tabl., Biol. Bull., LXXI, 1, 168-187. Lancaster, Pa (1936). **b - 538**

Regional distribution of the adult stock. Production and dispersal of eggs and larvae. Relative numerical strength of *O. similis* in the zoöplankton population.

**Gurjanova E.** - The Zoogeography of Kara Sea (Contribution to the Fauna of *Amphipoda* and *Isopoda* of the Northern Part of the Kara Sea) [*De zoogeographia maris Karensis* (*Contributio in faunam Amphipodorum et Isopodorum in regione septentrionali Maris Karensis*)]. (In Russ.; Engl. Rés.). 6 maps, Bull. Acad. Sc. U. S. S. R., 2/3, 566-598. Moscou (1936). **b - 539**

A. distinguishes four different zones: depths from 300 to 500 m. containing Rhizopoda; 150-300 m., with common arctic and high arctic species; 50- 120 m., with common circumpolar arctic forms; 40-20, m. with the Kara Sea endemics, eastern shallow- water forms and several West Greenland forms. Some conclusions are drawn as to the origin and penetration of these forms.

**Gustafson G.** - The Distribution of *Phoronis mülleri* De Selys Longchamps on the Swedish West Coast [*Distributio speciei « Phoronis mülleri » in litoribus Suetiis occidentalibus*]. 1 table, Ark. f. Zool., XXVIII B, H. 1, 1, 1-6. Stockholm (1935). **b - 540**

These investigations carried out in the Gullmar Fjord and some other fiords as well as on the coast plateau off these fjords show that *Phoronis mülleri* is very common on the Swedish west coast. Habitat and accompanying faunas.

**Hatai K.** - A Note on the Distribution of certain Species of Marine Invertebrates [*Nota de distributione aliquarum specierum ex Invertebratis marinis*]. Bull. Biogeogr. Soc. Jap., VI, 123-141. Tokyo (1936). **b - 541**

Distribution, migration and phylogeny of Tertiary and recent Invertebrates.

**Hiro F.** - On the Geographical Distribution of *Ibla*, a Littoral Cirriped [« *Ibla* », *cirripedus litoreus. Quaestio de eius distributione geographica*]. 1 map, Bull. Biogeogr. Soc. Jap., VI, 22, 215-220. (Contr. Seto Mar. Biol. Lab. No. 53). Tokyo (1936). **b - 542**

*Ibla* is a remarkable pedunculate represented by three forms, occurring in the Indopacific region. The distribution of *Ibla* is closely correlated with the direction of ocean currents. Any general statement as to the geographical range of each form cannot be given, unless the occurrence is recorded more than twice from the same locality.

**Jakubova L.** - Concerning the Division into Districts of the Black Sea on the Basis of Composition and Distribution of Its Benthos Fauna (In Russ., Engl. Rés.) [*De partitione in singulas regiones Ponti Euxini ex compositione et distributione eius faunae benthonicae*]. 1 fig., C. R. Acad. Sc. URSS, I, 261-267. Léningrad (1935). **b - 543**

The coastal zone of the Black Sea may be divided into three principal areas of distribution of benthal fauna: the eastern half of the sea forming the 1st district, its south-western portion, the 2nd district, and its north-western part, the 3rd district. A comparison of the benthal fauna of the three above districts permits to conclude from data available that the eastern half of the sea with its benthal fauna has some strongly pronounced characteristic features typical of the present Black Sea, while the fauna of the other two districts, due to the influence of special physico-geographical conditions, offers a considerable deviation.

**Jao Chin-Chih** - New *Rhodophyceae* from Woods Hole [*Novae Rhodophyceae ad regionem* Woods Hole *pertinentes*]. 4 pls., Bull. Torrey Bot. Club, LXIII, 5, 237-249. New York (1936). **b - 544**

Description of about 14 species of marine red Algae new for Nord America, from which *Erythropeltis discigera*, n. sp., *Colaconema americana* n. sp., *Acrochaetium* with a new variety and *Cruoriopsis Ensisae* n. sp.

**Kanamaru T.** - Notes on Some Cases of Artificial Propagation of Molluscs [*Notae de propagatione artificiali Molluscorum*]. (In Jap.). 4 figs., Venus, V, 2/3, 145-149. Kyoto (1935). **b - 545**

Author presumes that the mussel *Mytilus edulis* living on the littoral zone of Kôbe harbour has been introduced there by ships.

**Koepcke H. W.** - Ein zweiter Fund von *Mesoplodon bidens* (Sow.) an der deutschen Ostseeküste [*De specie « Mesoplodon bidens » in litoribus Maris Baltici iterum reperta*]. Zool. Anz., CXIII, 5/6, 157-158. Leipzig (1936). **b - 546**

Von dieser Art sind früher nur fünf Exemplare in der Ostsee gefunden. Das hier beschriebene Tier wurde am 25. Juni 1935 am Strande bei Swantuss auf der Insel Wollin aufgefunden und getötet.

**Koller G.** - *Crangon crangon* und *Leander adspersus*. Eine vergleichend- ökologische Studie [*Species « Crangon crangon » et « Leander adspersus ». Studium oecologicum comparativum*]. Abh., Tung-Chi, 11, 238. Shanghai (1936). **b - 547**

An Hand mehrerer Tatsachen und Abbildungen wird die Uebereinstimmung zwischen zwei verschiedenen Tieren mit ihren respektiven Lebensräumen gezeigt.

**Komai T.** - On Another Form of *Stephanoscyphus* found in the Waters of Japan [*De altera specie generis « Stephanoscyphus » reperta in aquis Japonicis*]. Mem. Coll. Sc., Kyoto Imp. Univ., Ser. B., XI, 3, 175-183. (Contr. Seto Mar. Biol. Lab. No. 48). Kyoto (1936). **b - 548**

These forms discovered in rather deep regions of the Japan Sea and Sagami Bay are found to be isolated thecae of *Stephanoscyphus* without a coating of sponge. As these forms are different from those occurring at Seto a new tentative classification is made with two new species.

**Kunz H.** - Zur Oekologie der Copepoden Schleswig-Holsteins und der Kieler Bucht [*De oecologia Copepodorum ad* Schleswig-Holstein *et ad bajam* Kiel *pertinentium*]. 5 Taf., 5 Abb., Schr. Naturw. Ver. Schleswig-Holstein, XXI, 1, 84-127. Kiel (1935). **b - 549**

Verzeichnis von 145 Arten von der Kieler Bucht und 46 Arten von Schleswig–Holstein. Ökologie und Verteilung.

Dans la *slikhe* des estuaires le long des côtes de la Chine du Nord, l'A. a recolté beaucoup d'exemplaires de *L. anatina*. Cette espèce peut donc vivre aussi dans les mers froides.

**Malm E. N.** - On the Discovery of *Amphioxus lanceolatus* in the North- Eastern Part of the Black Sea [*De inventa specie* «*Amphioxus lanceolatus*» *in regione nord-orientali Ponti Euxini*]. Works Arnoldi Biol. Stat., II, 1, 115-116. Novorossiysk (1936). **b - 559**

New habitats.

**Manton S. M.** - Ecological Surveys of Coral Reefs [*Inspectio oecologica scopulorum coralliferorum*]. 16 pls., Great Barrier Reef Exped. 1928-1929, Scient. Rep., III, 10, 273-312. Brit. Mus. (Natur. Hist.). London (1935). **b - 560**

The distribution of corals and influencing factors. The results of these surveys are expressed in graphs and in series of large-scale maps in picture form. *Montipora ramosa* dominant form in the moat, *Acroporas* in the seaward slopes.

**Miner R. W.** - Sea Creatures of our Atlantic Shores [*Animalia marina nostrorum litorum atlanticorum*]. 1 map, 8 figs., 8 col. pls, Nat. Geogr. Mag., LXX, 2, 209-231. Washington, D. C. (1936). **b - 561**

This article deals especially with the mollusks and other small creatures inhabiting the continental shelf which borders the Atlantic coast of N. America from Nova Scotia to New York, and includes the intensive New England fisheries. The geological structure of the Atlantic and its shores; description of the animal life of which the principal species are reproduced in colored pictures.

**Moore H. B.** - The Biology of *Balanus balanoides*. V. Distribution in the Plymouth Area [*De biologia speciei* «*Balanus balanoides*».

*V. Quaestio de distributione in area* Plymouth]. 6 figs., 6 tabl., Journ. Mar. Biol. Ass., XX, 3, 701-710. Plymouth (1936). **b - 562**

Five different localities have been examined: numbers and weights per square metre, mean individual weights at different tidal levels, growth in connection with food conditions. Differentiation between *Balanus balanoides, B. perforatus, B. crenatus, Verruca stroemia* and *Chthamalus stellatus.*

**Moore H. B.** - The Biology of *Purpura lapillus.* I. Shell Variation in Relation to Environment [*De biologia speciei « Purpura lapillus ». I. Variationes cochleae pro ambiente*]. 8 figs., 1 diagr., 2 pls. 2 tabl. o. t., Journ. Mar .Biol. Ass., n. ser., XXI, 1, 61-89. Plymouth (1936). **b - 563**

Geographical distribution. Variation and factors concerned: wave-action and diet, of which diet seems to have the greatest influence on shape as on colour. Correlation between abundance of *Mytilus* in the diet and sexual maturity, between height at the cessation of shell-growth and sexual maturity and between sexual maturity and height at which change in the spiral angle α (the angle of the logarithmic spiral of the shell) occurs.

**Mourgue R.** - Notes de Zoologie [*Notae zoologicae*]. Bull. mens. Soc. linn. Lyon, V, 25-26. Lyon (1936). **b - 564**

Dans le port de Marseille on a trouvé des Athérines, *Gasterosteus aculetus,* et des poissons abyssaux: *Stomias barbatus, Chauliodus macrurus, Echinorhinus spinosus* et *Gonostoma dentata.*

**Newcombe C. L.** - Certain Environmental Factors of a Sand Beach in the St. Andrews Region, New Brunswick, with a Preliminary Designation of the Intertidal Communities [*Factores ambientales alicuius orae maritimae in regione* St. Andrews, New Brunswick *cum designatione priore communitatum interaestuosarum*]. Journ. Animal Ecol., XXIII, 2, 334-355. Cambridge (1935). **b - 565**

Two great communities have been established: an epi-faunal *Balanus–Littorina–Fucus* biome and an infaunal *Mya–Nereis virens* biome. Succession and seasonal changes. The environmental conditions of the region: great tidal amplitude, sandy beaches of varying textures and degrees of slope, action of currents and waves, temperature changes.

**Nichol E. A. T.** - The Brackish-water Lochs of North Uist [*Lacus aquae salmacidae regionis* North Uist]. 7 figs., Proc. R. Soc. Edinburgh, Pt. 2, LVI, 169-195. Edinburgh (1936). **b - 566**

The brackish-water lochs of North Uist lie at different levels and are influenced in varying degrees by the tidal inflow. Salinity, hydrogen-ion concentration, alkali reserve, temperature and nature of the bottom. Distribution of the fauna, composed principally of marine, and also of fresh- and brackish-water species, at different salinities. Comparison of the common Molluscs found at North Uist and in Randersfjord.

**Okuda S.** - Chaetopterids from Japanese Waters [*Chaetopterida in aquis Japonicis*]. 12 fig., 1 pl., Journ. Fac. Sc. Hokkaido Imp. Univ., IV, 87-102. Sapporo (1935). **b - 567**

Revision of Japanese forms, which now amount to 5 spp. Two forms of *Ch. variopedatus* are distinguished according to habitat. *Mesochaetopterus minuta* is gregarious forming agglomerated bundles with the tubes in the sand.

**Panin K.** - Ueber das Vorkommen der pazifischen Iwashi-Sardine (*Sardinops melanosticta* Schl.) in den Gewässern von Ostkamtchatka [*De reperta specie « Sardinops melanosticta » Oceani Pacifici in aquis regionis orientalis* Kamtschatka]. Zool. Anz., CXV, 5/6, 149-152. Leipzig (1936). **b - 568**

Die Ostküste von Kamtschatka (Awatscha- Golf und Kronotzki-Meerbusen) ist jetzt als der nördlichste Fundort dieser Art angegeben, was wahrscheinlich mit dem Einfluss der warmen Kuro-Shivo-Strömung in Verbindung steht. Diese Art ist vollständig identisch mit der im Japanischen Meer lebenden.

**Peters N. & Panning A.** - Die chinesische Wollhandkrabbe in Europa. Kurzbericht zum Ende des Jahres 1935 [*« Eriocheir sinensis » in Europa. Relatio brevior anno exeunte 1935*]. 4 Abb., Fischmarkt, IV, 4, 99-107. Cuxhaven (1936). **b - 569**

I. Einleitung: Bedeutung der « gelben Gefahr » für die deutschen Gewässer und Notwendigkeit den Kreisen der Küsten- und Binnenfischer einen kurz gehaltenen Abriss über die Wollhandkrabbe zur Verfügung zu stellen. II. Die Verbreitung der Wollhandkrabbe in Europa (N. Peters). III. Der Lebenskreislauf der Wollhandkrabbe (A. Panning).

**Picken L. E. R.** - Mechanical Factors in the Distribution of a bluegreen Alga, *Rivularia haematites* [*Factores mechanici pro distributione speciei « Rivularia haematites »*]. New Phytologist, 35, 221-228. London (1936). **b - 570**

The size of the thallus is inversely proportional to the velocity of the water current and within similar regions of strong currents proportional to the stones serving as substratum.

**Prat H.** - Remarques sur la distribution des organismes dans les eaux littorales des Bermudes [*De distributione organismorum in aquis litoreis insularum* Bermudes]. 6 fig., Bull. Inst. Océanogr., 705, 1-23. Monaco (1936). **b - 571**

Les formations marines littorales s'étendent sur une surface beaucoup plus grande que les formations terrestres. Niveaux bionomiques: faciès rocheux (six zones); faciès vaseux (six zones); faciès sableux; formations coralliennes. Rôle des organismes vis-à-vis de l'érosion littorale. Distribution des organismes, évolution des récifs, comparaisons bionomiques.

**Pyatakov M. L.** - *Leander rectirostris* Czern. als neuer Gast im Kaspi-See [*Species « Leander rectirostris » hospes novus Maris Caspii*]. Zool. Anz., CXIII, 47. Leipzig (1936). **b - 572**

Diese Art ist wahrscheinlich aus dem Schwarzen Meere in den Kaspi-See in Verbindung mit vorgenommenen Akklimatisationsversuchen von Fischen eingeschleppt worden und hat sich dort vollständig eingebürgert.

**Renouf L. P. W.** - Faunistic Notes from the Coast of Co. Cark [*Notae faunisticae litorum* Co. Cark]. 1 fig., Ann. Natur. Hist., X, 16, 212-214. London (1935). **b - 573**

Seasonal changes in the fauna. Three new *Nudibranchiata.*

**Ricketts E. F. & Calvin J.** - A Natural History of Pacific Coast Invertebrates [*Historia naturalis Invertebratorum Oceani Pacifici*]. Stanford Univ. Press. Stanford Univ., Calif (1936). **b - 574**

About five hundred common marine invertebrates of the Pacific littoral from Mexico to Alaska are described and partially illustrated. The classification is ecological, by habitat, tidal zone and station. Phylogenetic index and bibl.

**Santucci R.** - Ricerche sulla fauna del Mar Rosso: la biologia delle acque territoriali eritree [*Investigationes in faunam Maris Rubri. Biologia aquarum territorialium erythraearum*]. Atti Soc. It. Progr. Sc., IV, 1, 74-77. Roma (1936). **b - 575**

Sono riportate le osservazioni eseguite sui Lamellibranchi, Gasteropodi, Oloturoidi, Selaci e Teleostei del Mar Rosso.

**Schenck H. G. & Keen A. M.** - Marine Molluscan Provinces of Western North America [*Regiones praeditae Molluscis marinis Americae Nord-Occidentalis*]. Proc. Amer. Phil. Soc., LXXVI, 6, 921-938. Philadelphia (1936). **b - 576**

Definition of a marine molluscan province. Study on the distribution of recent and fossil Molluscs from Washington to Southern California. Evidence of four distinct provinces. The results are shown graphically on a map and compared with the conclusions of other workers.

**Schmidt P. J. & Andriashev A. P.** - A Greenland Fish in the Okhotsk Sea [*Piscis groenlandicus in mari* Okhotsk]. 2 figs., Copeia, 2, 57-60. New York (1935). **b - 577**

*Eumesogrammus praecisus* (Krôyer) = (*Ernogrammus storoshi* Schmidt) has been found at depths of 40-142 m. in water of 32-33.3 pro mille salinity with a temperature of -1 to 5° C.

Ökol. Tiere, XXIX, 5, 609-666. Berlin (1935). **b - 579**

Die hydrographischen und geographischen Verhältnisse der östlichen Hälfte der Zuidersee. Angabe von 113 Spezies von der Zuidersee, ihre Verteilung in der Zuidersee und an anderen nordeuropäischen Küsten, ihre Beziehung zu Meeresströmungen und zum Salzgehalt. Beziehung zwischen Salzgehalt und Menge von Nematoden gezeigt in Tabellen. Geschlechtsverhältnisse. Vergleich zwischen den hydrologischen Verhältnissen der Zuidersee und der Ostsee. Mischung von Süss- und Salzwasserspezies.

**Shiino S. M.** - Bopyrids from Tanabe Bay. III [« *Bopyrida* » *in Baja* Tanabe]. 6 figs., 3 tabl., Mem. Coll. Sc. Kyoto Imp. Univ., Ser. B, XI, 3, 157-174. (Contr. Seto Mar. Biol. Lab. No. 47). Kyoto (1936). **b - 580**

Description of 6 forms, 5 of which are new. *Bopyrella angusta* n. sp., *Bopyrinella antilensis* var. *nipponica* n. var., *Onychocepon resupinum* n. sp., *Grapsicepon magnum* n. sp., *G. rotundum* n. sp., *Cataphryxus* n. g. *priminus*. Emendations.

**Shiino S. M.** - Bopyrids from Shimoda and other Districts [*Bopyrida regionis* Shimoda *aliquorumque districtuum*]. 5 figs., Rec. Oceanogr. Works in Japan, VIII, 1, 161-176. Tokyo (1936). **b - 581**

List and descriptions of 6 species, two of which are new: *Heterocepon marginatum* n. gen. & n. sp., *Scyracepon quadrihamatum* n. sp., and a male of an undeterminable bopyrid.

**Shiino S. M.** - Bopyrids from Misaki [*Bopyrida ad regionem* Misaki *pertinentia*]. 6 figs., Rec. Oceanogr. Works in Japan, VIII, 1, 177-190. Tokyo (1936). **b - 582**

List and descriptions of 8 species. One new variation is recorded, *Athelges takanoshimensis* var. *tenuibranchiatus* n. var.

**Spärck R.** - Review of the Danish Investigations on the Quantitative Composition of the Bottom Fauna in Iceland and East Groenland Waters [*Conspectus investigationum Danicarum in compositionem quantitativam faunae in fundo marino Islandiae, Groenlandiae Orientalis*]. 1 fig., Cons. Expl. Mer, Rapp. & Pr.-Verb., XCIX, Rapp. Atlant. 1933-35, V, 3-5. Copenhague. **b - 583**

A short review of the results obtained during quantitative investigations of the bottom fauna in Faroe and Iceland waters, specially concerned with the *Macoma*, *Venus*, und *Yoldia* communities there observed.

**Strohl J.** - La Bipolarité de la faune marine et les données actuelles de la génétique [*De faunae marinae bipolaritate. Data hodierna genetica*]. 1 tabl., Mém. Mus. R. Hist. Natur. Belgique, Sér. 2, 3, 311-318. Bruxelles (1936). **b - 584**

Il est bon de se rendre compte, à propos du problème de la bipolarité, des méthodes employées dans les constatations biogéographiques. Le procédé taxonomique présente un caractère essentiellement statistique. Considérations sur les relations de la taxonomie avec la physiologie et la génétique.

**Thamdrup H. M.** - Beiträge zur Ökologie der Wattenfauna auf experimenteller Grundlage [*Contributiones in oecologiam faunae regionis maris Nordici quae dicitur* Wattenmeer *ex basi experimentali*]. (In Dtsch., Dän. Rés.). 124 Abb., Medd. Komm. Danm. Fisk. & Havunders. ser. Fiskeri, X, 2, 1-125. København (1935). **b - 585**

Bericht über die seit 1931 vom Skalling- Laboratorium unternommenen Untersuchungen. Der Zweck der Untersuchungen, war es, in Verbindung mit den verschiedenen äusseren Faktoren die qualitative und quantitative Verteilung der Arten an der Ostküste der Halbinsel Skalling südöstlich von Blaavands Huk sowie in anderen Teilen des nordeuropäischen Wattenmeeres zu studieren.

Physikalisch- chemische Faktoren. Allgemeine biologische Verhältnisse. Physiologie. Verteilungsverhältnisse. Beziehungen zwischen Fauna und äusseren Faktoren. Umsatzverhältnisse. Künftige Untersuchungen.

**Torelli B.** - Distribuzione in profondità degli *Euphausiacea* del Golfo di Napoli [*Euphausiacea Sinus Neapolitani. Distributio in profundum*]. Boll. Zool., VII, 1, 9-11. Napoli (1936). **b - 586**

Tra le specie di *Euphausiacea* presenti nel Golfo di Napoli, solo *Meganyctiphanes norvegica* è esclusivamente di superficie; le altre sono tutte rappresentate nella zona tra gli 800 e i 1000 metri che è la più popolata. Fra i 300-600 metri, nel passaggio dalla zona di temperatura variabile a quella di temperatura costante, c'è un forte spopolamento, che diventa totale a 500 metri.

**Uda Mititaka** - Distribution of Drifting Bodies in the Ocean Current [*Distributio organismorum fluctuantium in currentiis marinis*]. 2 figs., Bull. Jap. Soc. Scient. Fish., IV, 5, 289-293. Tokyo (1936). **b - 587**

A theoretical study on the results of current- bottle experiments with the future application to the biological problems of the distribution of fish-eggs, fish-larvae or some species of planktons.

**Valovirta E. J.** - Ueber die Verbreitung einiger Bodentiere im Bottnischen Meerbusen (*Notulae Zoologicae*) [*Distributio aliquorum animalium in fundo marino sinus Botnici*]. Ann. Zool. Soc. Zool-Bot. Fennicae Vanamo, 1, 12-14 ? (1932-35). **b - 588**

Oekologie und Verbreitung von *Mytilus edulis*, *Membranipora pilosa* v. *membranacea*, *Gammarus locusta*, *Mysis oculata* mod. *relicta* u. a.

**Vladykov V. A.** - On the Occurrence of some North Pacific Fishes in Hudson Bay with Remarks on the Fish Fauna of the latter Area [*De quibusdam Piscibus Oceani Pacifici septentr. in baja* Hudson. *Observationes circa faunam Piscium huius regionis*]. Proc. 5 th Pacific Sc. Congr. 1933, 5, 3787-3789. Univ. Toronto Press. Toronto (1934). **b - 589**

This study is based on 6 collections made in Hudson Bay during 1919-1930. Composition of the fish-fauna: truly marine and arctic forms belong to *Cottidae*, *Blennidae*, *Zoarcidae*, *Cyclopteridae* and *Gadidae*. Relationships to the Atlantic and Pacific.

**Vorstmann A. G.** - Biologische Notizen betreffs der sessilen Fauna im Hafen der Stadt Amsterdam [*Notitiae biologicae de fauna sessili in portu Amstelodamiensi*]. 3 Abb., Zool. Anz., CIX, 76-80. Leipzig (1935). **b - 590**

Die Fauna vor und nach der Abschliessung der Zuidersee: wenige Veränderungen. Die verschiedenen Bewachsungen und *Balanus improvisus* im Winter: Protozoen, Ende Mai: *Cordylophora lacustris*, Ende Juni: *Embletonia pallida* Juli- Oktober: *Congeria cochleata*. Als typisch für die Fauna des Hafengebietes wird *Victoriella parida* genannt.

**Wilkansky B.** - Life in the Dead Sea [*De vita in lacu Asphaltite*]. 2 figs., Nature, CXXXVIII, 3489, 467. London (1936). **b - 591**

Short report on some organisms found in samples of Dead Sea water taken at a distance of 3-4 km. from the mouth of the Jordan at various sea depths up to 7 metres.

**Yamada Yukio** - The Species of *Eucheuma* from Ryûkyû and Formosa [«*Eucheuma*» *ex* Ryûkyû *et Formosa provenientia*]. 13 fig., 9 pl., Scient. Pap. Inst. Algol. Res, Hokkaido Imp. Univ., I, 2, 119-134. Sapporo (1936). **b - 592**

In the present paper 7 species of *Eucheuma* are enumerated, found in the Ryûkyû Archipelago and Formosa, with many figures and photographs. Some species proved to be somewhat intermediate forms between the *Axifera* and the *Anaxifera*. Analytical key to the species *Eucheuma*.

## Migrationes et marchatura - Scalae ascensionales.

**Altnöder K.** - Die Wanderung der Ostseelachse [*De migratione Salmonis Maris Baltici*]. 1 Karte, Dtsch. Fischwirt., III, 17, 259-260. Berlin (1936). **b - 593**

Versuche mit der Angelhakenmethode, Markierung. Zusammenfassende Resultate der Markierung. Notwendigkeit weiterer Studien besonders für die deutsche Ostseeküste.

**Athanassopoulos G.** - Sur la montée des civelles dans la Méditerranée orientale [*Ascensus juvenum anguillarum in Mare Nostrum quod ad orientem spectat*]. 1 tabl., Bull. Inst. Océanogr., 692, 1-3. Monaco (1936). **b - 594**

L'A. complète dans la présente Note ses études antérieures sur la répartition singulière de la montée des civelles dans la Méditerranée: «il est probable que des conclusions de la plus haute importance pourraient en être tirées, pouvant contribuer considérablement à l'éclaircissement de la fameuse question biologique de la migration de l'anguille».

**Athanassopoulos G.** - Sur un fait curieux de la montée d'Anguille [*De notando quodam casu circa ascensionem Anguillarum*]. Bull. Inst. Océanogr., 697, 1-7. Monaco (1936). **b - 595**

L'A. a suivi pendant les mois de janvier et février la montée des Anguilles dans le golfe d'Eleusis. Le nombre d'individus récoltés présente un maximum en février. Longueur en millimètres, pigmentation, poids.

**Athanassopoulos G.** - Encore sur la montée des Civelles en 1936 [*De ascensione anguillularum A. 1936*]. 7 fig., Bull. Inst. Océanogr., 710, 1-15. Monaco (1936).

(—) C. R. Acad. Sc., CCII, 13, 1204-1206 Paris (1936). **b - 596**

Longueur en millimètres, pigmentation et poids des civelles capturées dans le golfe d'Eleusis. La montée commence en janvier, son maximum paraît en Mars et puis diminue graduellement. La dimension des individus varie même sous le même poids. Chaque montée de jeunes individus est précédée par la montée d'indivus plus agés.

**Baker S. & Gilroy U. B.** - Problems of Fishway Construction in Relation to Migration of Fish [*De itineribus pro Piscibus construendis, migrationis tempore*]. Proc. 5th. Pacific Sc. Congress 1933, 5, 3609-3615. Univ. Toronto Press. Toronto (1934). **b - 597**

Designs, location and construction of various fishways. Several examples, as the construction of elevating salmon at Ariel Dam, the mechanical and electrical fish screens adopted by the U. S. Bureau of Fisheries, etc.

**Berg L. S.** - Les oscillations climatiques récentes et leur effet sur les migrations des poissons [*Recentiores oscillationes climaticae earumque effectus in Piscium migrationes*]. (En russe). Probl. Fis. Gheogr., 2, 73-84. Leningrad (1935). **b - 598**

**Bowman A.** - Lemon Soles (*Pleuronectes microcephalus*). Marking Experiments in Scottish Waters during the Period 1919-1931 [*Species «Pleuronectes microcephalus». Experientiae marchaturarum in aquis Scotis, tempore 1919-1931*]. 6 charts, 1 graph, 13 tabl., Fish. Scotl., Scient. Invest., 1935, 3-41. Edinburgh (1936). **b - 599**

Of 7,799 fish marked and liberated, 13 % were recaptured before January 1933. The paper illustrates especially the mortality due to marking, the methods of recapture and ports of landing, the marking experiments in their relation to spawning and migrations, and the mean rate of recapture.

**Bruce C.** - Fishways [*Itinera pro Piscium*]. Proc. 5th Pacific Sc. Congress 1933, 5, 3617-3621. Univ. Toronto Press. Toronto (1934). **b - 600**

General hints for the construction of fishways with special reference to the necessity of occasional pools to afford resting places for the fishes as recently constructed by the Canadian Dpt. Fisheries.

**Chatton E.** - Les migrateurs horizontalement polarisés de certains Péritriches [*Species migrantes sensu horizontali uliquorum Peritrichorum*]. 11 figs., Mém. Mus. R. Hist. Natur. Belgique, Sér. 2, 3, 913-940. Bruxelles (1936). **b - 601**

Identification du Péritriche *Epistylis horizontalis* n. sp. sur le *Balanus eburneus* à Woods-Hole et sur le *B. amphitrite* à Sète; morphologie et genèse de l'exemplaire migrateur à partir du sédentaire; la question du sens de la division chez les Péritriches. Autres Péritriches à migrateurs horizontalement polarisés. Le problème de la phylogénie des Péritriches et la signification des deux manières de migrateur comme caractère ancestral et comme forme d'adaptation.

**Clark G. H.** - A Second Report on Striped Bass Tagging [*Relatio secunda de marchatura speciei* « *Roccus lineatus* »]. 1 map, 3 tabl., Calif. Fish & Game, XXII, 4, 272-283. Sacramento (1936). **b - 602**

This report completes former records (XX, 1, 14-19, 1934) and the results concerning number of Striped Bass tagged, size when tagged, date of tagging and recovery, localities etc., are expressed in tables. No proof of definite migrations.

**Dahl K. & Sømme S.** - Experiments in Salmon Marking in Norway, 1935[ *Experientiae depromptae ex marchaturis salmonum in Norvegia, A. 1935*]. Stat. Forsøksvirks. f. Ferskvannsfiskeri. 1. Mat.-Naturv. Kl., No. 12. Oslo (1935). **b - 603**

These experiments have shown that *Salmo salar* has a wider range in its migrations than has been proved hereto in Europe. See rev. in Nature, 3468, 671-672. London (1936).

**Dorofeew S. W. & Klumow S. K.** - Ueber die wirtschaftlich bedeutenden Migrationen des Weisswals (*Delphinapterus leucas* Pall) im Gebiet der Insel Sachalin [*De migrationibus magni momenti oeconomici speciei* « *Delphinapterus leucas* » *apud insulam* Sachalin]. (In Russ., Dtsch. Rés.). 1 Karte, 7 Abb., Trans. Inst. Fish. & Oceanogr. USSR (VNIRO), III, 7-23. Moscow & Leningrad (1936). **b - 604**

Wege, Leiten der Migrationen. Anzahl der Herde. Fangstatistik.

**Foerster R. E.** - The Return from the Sea of Sockeye Salmon (*Oncorhynchus nerka*) with special Reference to Percentage Survival, Sex Proportions, and Progress of Migration [*Reditus marinus speciei* « *Oncorhynchus nerka* ». *Agitur particulatim de numero exemplarium morti resistentium, de proportionibus sexualibus deque progressibus migratoriis*]. 3 figs., tabl., Journ. Biol. Bd. Canada, III, 1, 26-42. Toronto (1936). **b - 605**

Report on investigations undertaken on sea-ward migrating sockeye at Cultus lake, B. C. in 1930. Results expressed in tables and diagrams.

**Gandolfi - Hornyold A.** - Observations sur la montée de la civelle dans l'Orio [*Observationes circa ascensionem anguillularum super* Orio *flumen*]. 2 tabl., Bull. Soc. Océanogr. France, XVI, 87, 1505-1506. Paris (1936). **b - 606**

Résultats d'observations sur la montée des civelles au cours de l'année dans l'Orio, le fleuve le plus important de la province de Guipùzcoa (Pyrénées). Influence de la température et d'autres facteurs sur la montée.

**Gewecke J.** - Treppen und Aufzüge für Fische [*De scalis et apparatibus pro ascensione Piscium*]. 4 Abb., Umschau, XL, 8, 148-152. Frankfurt a. M. (1936). **b - 607**

Beschreibung mit Abbildungen von einigen Fischtreppen und Fischaufzügen. Ergebnisse.

**Holmes H. B.** - Natural Propagation of Salmon in Alaska [*Propagatio naturalis salmonis in* Alaska]. Proc. 5th Pacific Sc. Congr., 1933, 5, 3585-3592. Univ. Toronto Press. Toronto (1934). **b - 608**

These investigations concern principally the red-salmon runs in Karluk and Chignik rivers with a view to determine the number of seaward migrants and adults produced by given numbers of spawning fish.

**Huntsman A. G.** - Return of Salmon from the Sea [*Salmonisr editus marinus*]. 6 figs., Bull., Biol. Bd Canada, LI, 1-20. Ottawa (1936). **b - 609**

Attempt to elucidate the question of the return of the Salmon from the sea with special regard to the Atlantic salmon (*Salar salar*). As the salmon shows a great variety in behaviour in different places, every river or district is considered separately with information on distribution in the sea, movements of young and adult etc.

**Ivanova - Berg M. M.** - Spring Migration and Spawning of the Neva Lamprey [*Migratio vernina et reproductio Lampetrae fluminis* Neva]. (In Russ.; Engl. Rés.). Tabl., Bull. Acad. Sc. U. S. S. R., 2, 3, 599-604. Moscou (1936). **b - 610**

Spawning occurs in the first half of June and spring migration begins in May. Two different types of coloration between spring lampreys, those coming from the sea have a golden metallic line. Possibility of the existence of two races. Average length. Comparison with *Salmonidae*.

**Kask J. L.** - The Experimental Marking of Halibut [*Marchaturarum experientiae speciei* « *Hippoglossus vulgaris* »]. Science, LXXXIII, 2158, 435-436. New York (1936). **b - 611**

Account of experiments undertaken in 1935 by the International Fisheries Commission for the Pacific halibut fishery.

**Krizanovsky S. G.** - Concerning the Dependence of the Spawning Migrations of *Vimba vimba* and *Chalcalburnus chalcoides* upon the Pecularities of their Development [*De migrationibus, reproductionis causa, specierum* « *Vimba vimba* » *et* « *Chalcalburnus chalcoides* » *earumque dependentia ab accretionis peculiaritatibus*]. (In Russ., Engl. Rés.). 6 figs., 3 tabl., Works Arnoldi Biol. Stat., II, 1, 17-26. Novorossiysk (1936). **b - 612**

The larvae of *Vimba vimba* and *Chalcalburnus chalcoides* cannot develop in still or very slowly running waters among the grass because, having no cement-organs, they would fall on the bottom into the slime, where they would perish as their organs of respiration, being situated on the surface of the body, would not be able to function. For a successful function of such organs of respiration the cement-organs being absent and the larvae immobile, the latter have to develop on stony, not slimy bottom in the running water. (From A:s summ.).

**Moskvin B. S.** - Some Data on the Spawning Migrations and the Culture of the *Acipenser stellatus* of the Don [*Data de migrationibus reproductionis causa deque cultura speciei* « *Acipenser stel-*

*latus* » *fluminis* Don]. (In Russ., Engl. Rés.). Works Arnoldi Biol. Stat., II, 1, 117-129. Novorossiysk (1936). **b - 613**

Two maximum periods of spawning migrations in Spring (April-May) and in Autumn (September-October) and factors concerned. Sex-proportion, larvae, spawning places. Some information on the fish-culture of the Don, which is in diminution.

**Panning A.** - Wollhandkrabben wurden markiert [*De marchatura speciei « Eriocheir sinensis »*]. Fischmarkt, N. F., IV, 1, 20-21. Cuxhaven (1936). **b - 614**

Bericht über die in der Elbe und Weser veranstalteten Markierungsversuche an der Wollhandkrabbe; der Arbeitsgang und die ersten Ergebnisse der Versuche, mit besonderer Berücksichtigung der Wanderungen des *E. sinensis*.

**Panning A.** - Wandern die Larven der Wollhandkrabbe? [*Num larvae speciei « Eriocheir sinensis » migrant?*]. Zool. Anz., CXV, 175-177. Leipzig (1936). **b - 615**

Bericht über einige Funde von Megalopen in der Nähe von der Elbe-Mündung, aus welchen es hervorgeht, dass die Larven ganz beträchtliche Strecken stromauf zurücklegen.

**Pearse A. S.** - The Migrations of Animals from Sea to Land [*Animalium migrationes a mari ad terram*]. x + 176 pp., Duke Univ. Press. Durham, N. Carol. (1936). **b - 616**

History of the migration of animals through ages based on A : s own ecological researches as well as on those of 500 other investigators: Origin of life in the sea, comparison of biotic conditions in salt and fresh water and ashore. Routes from sea to land; causes of migrations, changes occurred in animals from these aboceanic migrations. Bibl.

**Pritchard A. L.** - Factors Influencing the Upstream Spawning Migration of the Pink Salmon, *Oncorhynchus gorbuscha* (Walbaum) [*Factores influentes in migrationem reproductionis speciei « Oncorhynchus gorbuscha » currentiam ascendentis*]. 3 figs., Journ. Biol. Bd. Canada, II, 4, 383-389. Toronto (1936). **b - 617**

From data collected at McClinton creek, Masset inlet, British Columbia, as a result of a comprehensive programme of investigation on the pink salmon, *O. gorbuscha*, a positive significant mathematical correlation is demonstrated between numbers of fish migrating from the sea to the stream each day and both the maximum daily water height in the creek and the daily rainfall in the area. A positive significant correlation also exists between the maximum water height and rainfall. From available record no co-variation between numbers of migrants and changes in temperature can be shown. (A.).

**Pyefinch K. A.** - Habitat of *Procerodes (Gunda) ulvae* [*De habitat speciei « Procerodes (Gunda) ulvae »*]. Nature, CXXXVII, 3453, 32. London (1936). **b - 618**

Preliminary note on migrations of *Procerodes ulvae* due to tide phenomena.

**Steven G. A.** - Migrations and Growth of the Thornback Ray (*Raia clavata* L.) [*Migrationes et accretiones speciei « Raia clavata »*]. 2 figs., 4 tabl., Journ. Mar. Biol. Ass., XX, 3, 605-614. Plymouth (1936). **b - 619**

Report on marking experiments carried out in the vicinity of Plymouth. Distances travelled by recaptured fish. Mean size increments recorded.

**Sugano Susumu** - The Depth and the Distance from Shore of the Routes of Migration of Salmons [*De profunditate et distantia ab ora maritima Salmonum migrantium*]. (In Jap.; Engl. Rés.). 2 tabl., Bull. Jap. Soc. Scient. Fish., IV, 5, 318-320. Tokyo (1936). **b - 620**

Pink, dog and red salmons are groups migrating northwards and the proportion becomes higher from the earlier to the main fishing season and then decreases towards the end of the season. The fishes are abundant in the most distant part from the shore in the earlier, the intermediate and the next parts to the shore in the main, and again most apart in the later season.

**Sugano Susumu** - Immigration of Salmons to a Fishing Ground on the West Coast of Kamtchatka in Relation to the Hydrographical Conditions [*Salmonum migratio ex loco piscatorio ad litora occidentalia regionis* Kamtchatka *pro hydrographicis condicionibus*]. (In Jap.; Engl. Rés.). 1 fig., 2 tabl., Bull. Jap. Soc. Scient. Fish., IV, 6, 407-408. Tokyo (1936). **b - 621**

From the daily serial observations of the temperature, salinity and transparency of sea-water it results that Salmons immigrate most abundantly to the fishing ground of Voroskaya when the temperature is 10° to 13° C, salinity less than 29.8 ‰, and transparency is small near the shore but great in the offing.

**White H. C.** - The Homing of Salmon in Apple River, N. S. [*Reditus salmonis in flumen* Apple River *Columbiae Britannicae*]. 4 figs., Journ. Biol. Bd. Canada, II, 4, 391-400. Toronto (1936). **b - 622**

Salmon from the East branch of Apple River marked as smolts in 1934 returned as grilse in the fall of 1935, entering only the East branch up to spawning time. After spawning some females dropped down to tidal pools in early November and later reascended the stream. Male salmon tagged as adults left their « home » pools, roaming up and down and even going through tidal water to the other branch (From A.).

## Animalium societas - Biocoenosis – Symbiosis.

**Arndt W. & Pax F.** - Das Zusammenleben von Krustenanemonen und Schwämmen im Mittelmeer mit besonderer Berücksichtigung der Adria [*De symbiosi inter Zoantharia et Spongias in Mari Mediterraneo. Agitur particulatim de Mari Hadriatico*]. (Engl. Rés.). 8 Abb., Thalassia, II, 3, 1-34. Jena (1936). **b - 623**

Frühere Forschungen. Untersuchungen der Gattung *Parazoanthus*, mit besonderer Berücksichtigung der Art *P. axinellae*, Charakterisierung, Systematisches, Fremdkörperskelett, Zusammenleben mit *Axinellae*, Verbreitung dieser Kolonien, Bedeutung und Anpassungsfähigkeit. Vorkommen von Gnathiiden-Larven im Körper von *P. axinellae* als eine Folge des Zusammenlebens mit Schwämmen.

**Cuénot L.** - Commensalisme des pontes de Céphalopodes avec des Eponges et des Cnidaires [*De Cephalopodorum commensalismo cum Spongiis et Cnidariis*]. Mém. Mus. R. Hist. Natur. Belgique, Sér. 2, 3, 37-40. Bruxelles (1936). **b - 624**

Les oeufs des Seiches, et plus remarquablement de *Sepia orbignyana*, *S. elegans* et *Rossia glaucopis*, sont attachés à des animaux vivants et il existe un rapport fixe entre la ponte et l'hôte commensal, qui est une éponge.

**Hiro F.** - Occurrence of the Cirriped *Stomatolepas elegans* on a Loggerhead Turtle found at Seto [*De specie « S. elegans » in testudine marina*

*« Caretta olivacea » in* Seto *reperta*]. Ann. Zool. Jap., XV, 3, 312-320. (Contr. Seto Mar. Biol. Lab. No. 55). Tokyo (1936). **b - 625**

Costa's *Stomatolepas elegans* has been rediscovered at Seto embedded in the soft skin of *Caretta olivacea*. Descriptions of the external and internal structures are given. Pilsbry's *S. praegustatar* (1910), and possibly, Nilsson Cantell's *S. transversa* (1930) seem to be identical with Costa's *S. elegans* (1838) (From A : s rés).

**Lindroth A.** - Die Assoziationen der marinen Weichböden [*De fundis marinis lutulentis. Quaestio de associatione*]. 1 Karte, 4 graph. Fig., Zool. Bidr. Upps., XV, 331-368. Uppsala (1936). **b - 626**

Diese Untersuchungen sind während des Sommers 1932 im Gullmarsfjord an der schwedischen Westküste ausgeführt worden. Vf. berichtet über seine Methode und seine Geräte und gibt die erhaltenen faunistischen Ergebnisse in einem tabellarischen Profil wieder. Als allgemeine Schlussfolgerung führt er an, dass die Assoziationen der marinen Weichböden nicht als abgegrenzte Einheiten aufgefasst werden können und dass die angewandten Methoden oft irreführend sind.

**Lucas C. E. & Henderson G. T. D.** - On the Association of Jelly-fish and other Organisms with Catches of Herring [*De associatione Medusarum et ceterorum organismorum in capturis aringorum*]. 7 tabl., Journ. Mar. Biol. Ass., n. ser., XXI, 1, 293-304. Plymouth (1936). **b - 627**

These observations as a whole suggest an avoidance by the herring of large numbers of jelly-fish; and especially « small white » jellyfish. There is some evidence of a negative association between herring and the presence of large numbers of squid, dog-fish and whales. (From A : s summ.).

**Newcombe C. L.** - A Study of the Community Relationships of the Sea Mussel, *Mytilus edulis* L. [*De correlationibus in differentibus organismis quae communitatem constituunt speciei « Mytilus edulis »*]. Ecology, XVI, 234-243. Brooklyn N. Y. (1935). **b - 628**

Study on the variations in the vertical distribution of *Mytilus edulis* in the intertidal communities of the Bay of Fundy. Discussion on the association *Balanus-Mytilus edulis*: occurrence of true succession, relations between the different constituents of the community. Growth of *Mytilus edulis* and factors concerned with it.

**Parat M. & Devillers Ch.** - Sur les associations animales des côtes de l'île Jan Mayen [*De associationibus animalibus ad litora insulae* Jan Mayen]. C. R. Acad. Sc., CCII, 1, 90-92. Paris (1936). **b - 629**

Dragages et prises d'échantillons à différentes profondeurs sur les côtes de Jan Mayen faites par le « Pourquoi-Pas ? ». L'A. a pu distinguer deux communautés animales principales, à voire: l'association *Astarte borealis* Chemn. - *Macoma calcaria* Chemn. et l'association *Arca glacialis* Grays - *Astarte crenata* Gray. L'étude de ces deux associations a permis de combler la lacune des documents concernant les mers arctiques, étant donné que la biocoenotique de Jan-Mayen constitue une étape zoo-géographique importante entre le Groenland et le Spitzberg.

**Parker G. H.** - An Inquiline Gammarid on the Sea-Urchin, *Lytechinus* [*De Gammaride inquilino in specie « Lytechinus »*]. Ecology, XVII, 1, 185-186. Brooklyn (1936). **b - 630**

*Amphilocus neapolitanus* found among the spines of *Lytechinus variegatus atlanticus* in Bermuda.

**Prenant M.** - Sur un curieux complexe d'Astérie et de *Donax* [*De curioso complexu speciei « Astropecten irregularis » cum specie « Donax trunculus »*]. Mém. Mus. Hist. Natur. Belgique, Sér. 2, 3, 413-414. Bruxelles (1936). **b - 631**

Une Astérie (*Astropecten irregularis*) qui porte une coquille bivalve de *Donax trunculus* encastrée a son pole aboral; la seule interprétation plausible est que l'Astérie avait ingéré le *Donax*, exceptionnellement gros, et que la distension des valves a été telle que l'estomac et la paroi se sont rompus.

**Sato T.** - Vorläufige Mitteilung über *Atubaria heterolopha* gen. nov., sp. nov., einen in freiem Zustand aufgefundenen Pterobranchier aus dem Stillen Ozean [*Relatio prior de « Atubaria heterolopha » g. n. sp. n. Pterobranchio reperto libero in Oceano Pacifico*]. 5 Abb., Zool. Anz., CXV, 3/4, 97-106. Leipzig (1936). **b - 632**

Die hier beschriebene Art wurde in mehreren Exemplaren auf einer im August 1935 aus der Sagami-Bucht gedreggten Kolonie von *Dycoryne conferta* gefunden und untersucht. Eingehende Beschreibung und Diagnose. Hiermit ist zum erstenmal ein Pterobranchier aus dem östlichen Teil der japanischen Gewässer gefangen worden.

**Schijfsma K.** - Observations on *Hydractinia echinata* (Flem.) and *Eupagurus bernhardus* (L.) [*Observationes circa species « Hydractinia echinata » et « Eupagurus bernhardus »*]. Arch. Néerl. Zool., I, 3, 261-314. Harlem (1935). **b - 633**

Investigations on the association of these two species show that there is no proof of a true mutualism the hydroid being rather an epizoön sharing the food of the Crustacean. Distribution of both species.

**Souche G.** - Sur les animaux rencontrés chez les *Eschara fascialis* L. [*De animalibus repertis in specie « Eschara fascialis »*]. Bull. Stat. Biol. d'Arcachon, XXXII, 1, 45-47. Bordeaux (1935). **b - 634**

Les logettes de plusieurs exemplaires de *Eschara fascialis* trouvés dans la Manche contenaient un *Porcellana longicornis* Penn., un *Cucumaria penctata* Müller, un *Pontobdella muricata* L., de nombreux exemplaires de Serpules, *Ophiothryx fragilis echinata* Delle Chiaje et *Porcellana*, ainsi que quelques coquillages tous très petits ou transformés.

**Souche G.** - Sur la présence d'oursins chez la sole [*De Echinis in specie « Solea lascaris »*]. Bull. Stat. Biol. d'Arcachon, XXXII, 1, 51-52. Bordeaux (1935). **b - 635**

Cet exemplaire avait, attaché au corps, un long chapelet de petits bosses contenant de petits oursins un peu transformés, probablement des *Echinocyamus pusillus* Fleming.

**Tetry A.** - Présence de la Crépidule américaine sur les Moules du marché de Nancy [*De Crepidula in Ostreis fori piscatorii urbis* Nancy]. C. R. Soc. Biol., CXVIII, 1558. Paris (1935). **b - 636**

Importation en 1880 de l'Amérique de la Crépidule américaine et sa rapide dispersion en Europe. Elle se fixe sur les Moules et les Huîtres mais n'est pas un parasite.

**Vatova A.** - Ricerche preliminari sulle biocenosi del Golfo di Rovigno [*Investigationes priores in biocoenoses Sinus Arupinensis*]. 12 tab., Thalassia, II, 3, 1-30. Venezia (1935). **b - 637**

In base a 297 saggi di fondo raccolti nel 1932-34 nella zona di Rovigno, si possono distinguere le seguenti biocenosi: 1° *Schizaster chiajei* e la sua facies locale; 2° *Schizaster Turritella*; 3° *Tellina*, con la specie predominante *Tellina distorta* Poli; 4° *Lima fragilis hians* con *Lima hians* Gm. e *Ophiothrix fragilis*; 5° *Chione verrucosa* con una ricca epifauna; 6° *Loripinus fragilis*, biocenosi costiera e 7° *Am-*

*phioxus*, propria dei fondi sabbiosi lungo la costa. Determinazione del peso lordo della sostanza organica per m² (in gr.); percentuale in peso per i vari gruppi di animali. L'A. ha messo in evidenza la predominanza dell'epifauna, l'abbondanza di Echinodermi e Lamellibranchi e la scarsezza di Gasteropodi, Policheti e Crostacei.

**Vouk V.** - Les Cyanophycées et la salinité dans le thallus de *Codium Bursa* L. [*De Cyanophyceis et salsedine in thallo speciei « Codium Bursa »*]. Bull. Int. Ac. Joug. Sc. beaux-Arts, XXIX-XXX, 59-63. Zagreb (1936). **b - 638**

Résumé du Mémoir paru dans le « Rad » (CCLIV, 1-12) concernant les Cyanophycées rouges vivant à l'intérieur du thallus de l'algue *C. Bursa*. L'élément principale pour cette association est constitué par les espèces: *Phormidium Codicolum* et *Lyngbia Frémyi*; les autres espéces se montrent dans l'association d'une manière sporadique. L'eau de mer dans le thallus de *C. Bursa* a une salinité un peu élevée par rapport à l'eau de mer ambiante et cela aurait pour effet la turgescence de la forme sphérique du thallus.

**Yonge C. M.** - Mode of Life, Feeding, Digestion and Symbiosis with *Zooxanthellae* in the *Tridacnidae* [*Vitae ratio, nutricatio, digestio et symbiosis in Zooxanthellis cum Tridacnidis*]. 5 pls., Great Barr. Reef Exped., 1928-1929. Scient. Rep., I, 11, 283-321. London (1936). **b - 639**

Two different groups of *Tridacnidae*. Description of the most important forms of *Tridacnidae* and *Zooxanthellae*. The partnership, one of the most evolved symbioses ever recorded, on which depends the whole problem of feeding, structure and evolution.

## Parasiti. Patologia et Teratologia.

**Allgèn C.** - Ueber eine neue epizoisch auf einer *Desmodora* (Nematodes) lebende Art der Gattung *Thecacineta* Collin, *Th. donsi* n. sp. aus der Strand-region bei Tarva (Norwegen) [*De nova specie epizoica « Thecacineta donsi » ad genus « Thecacineta»* Collin *pertinenti in specie quodam « Desmodora »* (*Nematoda*) *viventi in litorea regione* Tarva]. Kgl. Norsk. Vidensk. Selsk. Forh., VIII, 16, 51-53. Trondheim (1936). **b - 640**

Frühere Befunde, Beschreibung der neuen Art, Vergleich mit anderen Arten.

**Ankel W. E.** - Die Pantoffel- Schnecke auf deutschen Austernbänken [*« Crepidula fornicata » praesens in vadis Ostrearum Germaniae*]. Natur u. Volk, LXVI, 1, 11-13. Frankfurt a. M. (1936). **b - 641**

Bericht über Beobachtungen von *Crepidula fornicata* auf Austernbänken bei der Ellenbogenbank, List (Sylt). Diese Art ist vermutlich mit den Saataustern aus Holland eingeschleppt worden.

**Bauch R.** - *Ophiobolus Kniepii*, ein neuer parasitischer Pyrenomycet auf Kalkalgen. [*« Ophiobolus Kniepii » novus Pyrenomycetus parasitus in Algis calcareis*]. 8 Abb., Pubbl. Staz. Zool., XV, 3, 377-391. Napoli (1936). **b - 642**

Die meisten marinen Ascomyceten sind in der Untergruppe der Sphaeriineen innerhalb der Pyrenomyceten zu finden. Sie sind meistens typische Parasiten auf lebenden Rot- und Braunalgen und Meeresphanerogamen, auf welchen sie schmarotzen und Krankheiten erregen. Eingehende Beschreibung dieses neuen Pyrenomyceten, den Vf. im Frühjahr 1928 auf den Thalli der *Corallinacee: Lithophyllum expansum* Phil. an der zoologischen Station Neapel gefunden hatte.

**Bayer Ch.** - Sur une difformité du *Cassis cornuta* (L.) causée par des Balanes [*De difformitate speciei « Cassis cornuta » Balanidarum causa*]. 2 figs., Mém. Mus. R. Hist. Natur. Belgique, Sér. 2, 3, 41-42. Bruxelles (1936). **b - 643**

Description de l'anomalie curieuse dans la croissance de la coquille de *Cassis cornuta*, occasionnée par une colonie de Balanides.

**Berry J.** - An interesting Case of Semicyclopia in a Shark [*Semicyclopia notanda in Squalo*]. 3 pls., Journ. Bombay Natur. Hist. Soc., XXXVII, 4, 912-916. Bombay (1935). **b - 644**

Teratological aberration of rostrum and orbits in an embryo *Charcharias dussumieri*. Explanation.

**Boschma M.** - Sur la *Sacculina carpiliae* et la *Sacculina leptodiae* du Guérin-Ganivet [*« Sacculina carpiliae » et « Sacculina leptodiae » a* Guérin Ganivet *descriptae*]. 1 fig., Bull. Mus. Nat. Hist. Natur., VIII, Sér. 2, 4, 342-344. Paris (1936). **b - 645**

L'A. a pu étudier un exemplaire de *S. carpiliae* sur *Carpilius convexus* de la Mer Rouge, et trois exemplaires de *S. leptodiae* sur *Xanthodius exaratus*. Les épines du manteau de ces espèces.

**Burrows R. B.** - Further Observations on Parasitism in the Starfish [*Observationes novae de parasitismo in Asteriis*]. Science, LXXXIV, 2180, 329. New York (1936). **b - 646**

Report on observations carried out during 1936 at Milford Laboratory of the Bureau of Fisheries on *Orchitophrya stellarum* Cépède, a gonad parasite of *Asterias forbesi*.

**Chabanaud P.** - Multiplication tératologique de la papille urino-génitale chez un mâle de *Brachirus muelleri* Steindachner (*Pleuronectoidea Soleidae*) [*Multiplicatio teratologica papillarum urogenitalium in masculo speciei « Brachirus muelleri »*]. 1 fig., Bull. Mus. Nat. Hist., Natur., Sér., 2, VIII, 5, 394-397. Paris (1936). **b - 647**

Description d'un mâle provenant du British Museum affecté d'une multiplicité tératologique de sa papille urinogénitale possédant la papille normale et deux papilles surnuméraires. Relations et fonctionnement de ces 3 organes.

**Chalaux J.** - A propos d'une comatule à douze bras [*Quaestio de comatula duodecim cirris praedita*]. 3 fig., Bull. Soc. Scient. Bretagne, XI, 91-94. Rennes (1934). **b - 648**

Il s'agit d'un *Antedon mediterranea* de Banyuls, qui possède un radius supplémentaire.

**Chandler A. C.** - Parasites of Fishes in Galveston Bay [*Parasiti Piscium in baja* Galveston]. 7 pls., table, Proc. U. S. Nat. Mus., LXXXIII, 2977, 123-157. Washington (1935). **b - 649**

Referring to her work in 1933 A. here describes two new genera and 20 new species of worms. Table of hosts and parasites.

**Chatton E. & Brachon S.** - Sur un Protiste parasite du Cilié *Fabrea salina* Henneguy: *Gregarella fabrearum* n. gen., n. sp., et son évolution [*De Protista « Gregarella fabrearum » parasito in Ciliato « Fabrea salina ». Agitur etiam de eius evolutione*]. C. R. Acad. Sc., CCIII, 11, 525-527. Paris (1936). **b - 650**

L'évolution de cette nouvelle espèce qui constituera le type de la famille *Gregarellidae*, dans un groupe des *Apomastigina* que les A.A. proposent d'annexer aux *Flagellata*.

**Chen C. S. & Kao T. P.** - Investigation into the Cause of the premature Death of the Razor Clam, *Sinovacula constricta* Lamarck [*Investigationes de causa mortis praematurae speciei « Sinovacula constricta »*]. (In Chin., Engl. Rés.). 10 figs., 5 tabl., Bull. Chekiang Prov. Fish. Exper. Stat. Tinghai, II, 1, 1-14. Tinghai (1936). **b - 651**

This mortality seems to be due to high specific gravity and disappearance of the diatom *Pleurosigma affine* on which the razor clam feeds. Further research work is however necessary to determine the importance of one or both factors together.

**Claussen L.** - Mikrosporidieninfektion beim gefleckten Seewolf [*Microsporidia. Quaestio de infectione in specie « Anarrhichas minor »*]. Dtsch. tierärztl. Wschr., 307-310. Berlin (1936). **b - 652**

Beschreibung einer Infektion mit *Plistophora ehrenbaumi*.

**Damas D.** - Une narcoméduse parasite d'un ver polychète [*Narcomedusa quaedam parasitica in verme polychaeto*]. 3 tab., 4 pls., Mém. Mus. R. Hist. Natur. Belgique, Sér. 2, 3, 1177-1193. Bruxelles (1936). **b - 653**

Dans le matériel pélagique de la campagne atlantique de l'« Armauer Hansen » l'A. a trouvé dans la cavité coelomique de certains *Tomopteris Nisseni* (Rosa) des Hydrozoaires bourgeonnant, qui se transforment en Narcoméduses. Etude sur le mode d'infection du ver, premiers stades connus: formation de la planula et sa transformation en polype et après en méduses. Mode de nutrition du parasite; influence du parasite sur son hôte et castration parasitaire. La méduse parasite de *Tomopteris* appartient à l'espèce *Cunina lativentris*: sa distribution.

**Datta M. N. & Poddar T. N.** - Acanthocephalan Parasites of Certain Fishes from Calcutta [*Parasiti acanthocephali aliquorum Piscium in Calcutta*]. 3 figs., 1 pl., Records Ind. Mus., XXXVII, 2, 231-236. Calcutta (1935). **b - 654**

Description of *Acanthogyrus acanthogyrus* Thapar and *Pallisentis nagpurensis* (Bhalerao) found in the intestines of *Lubeo rohita* (Ham.) and *Ophiocephalus striatus* Bloch.

**Delphy J.** - Sur quelques Anoplophryimorphes [*De quibusdam Anoplophryimorphis*]. 17 fig., Bull. Mus. Nat. Hist. Natur., Sér. 2, VIII, 5, 435-442. Paris (1936). **b - 655**

Descriptions et mises au point anatomiques de 5 genres de ces Protozoaires parasites et parmi eux *Anglasia* nov. gen. *Magdalenae* nov. sp. dans l'intestin de *Tubifex* provenant des côtes de la Hague.

**Duboscq O. & Tuzet O.** - *Topsentella fallax* n. g., n. sp., parasite du mésenchyme de *Sycon raphanus* O. S. [*« Topsentella fallax » parasitica in mesenchymate speciei « Sycon raphanus »*]. 4 fig., Arch. Zool. Exp. et Gén., LXXVIII, 3, 137-144. Paris (1936). **b - 656**

Description de cette amibe qui n'avait pas été reconnue jusqu'à présent. Elle pourrait être rapportée aux Chytridinées.

**Fowell R.** - Observations on the *Sporozoa* inhabiting the Gut of the Polychaete Worm, *Polydora flava* Claparède [*Observationes circa Sporozoa quae infestant intestinum Vermis polychaeti « Polydora flava »*]. 22 figs., Parasitol., XXVIII, 3, 414-430. London (1936). **b - 657**

This is the first record, from an annelid worm, of a parasite which resembles the *Coccidia* occurring in higher animals and the first record of an intranuclear parasite from an annelid. Description of *Selenidium axiferens* which differs from all other species, hitherto recorded, by having an axial tube which completely encloses the nucleus and extends from one end of the organism to the other.

**Harant H.** - *Nephrococcidioides* n. gen. Mycochytridinée parasite des Styélidés (*Ascidies stolidobranches*) [*« Nephrococcidioides » n. gen., parasitus in Styelidis*]. 2 fig., Bull. Inst. Océanogr., 690, 1-4. Monaco (1936). **b - 658**

Sur la base de l'examen des ampoules pyloriques de *Styela partita* St. contenant des corps parasitaires, l'A. a pu comprendre les affinités de ce parasite et le rapprocher des prétendues Chytridinées parasites du rein des Molgules. Il a créé pour cet organisme un genre nouveau *Nephrococcidioides* n. gen. dont l'espèce type est donc N. *legeri* (Harant 1931).

**Kahl W.** - Ueber den Befall des Stints mit Larven des Fadenwurms *Porrocaecum decipiens* [*De infestatione speciei « Osmerus eperlanus » per Nematodem « Porrocaecum decipiens »*]. Fischmarkt, IV, 7, 177-181. Cuxhaven (1936). **b - 659**

Verhältnis zwischen der Lebensweise des Elbstints und der Befallerscheinung.

**Kahl W.** - Ueber eine Missbildung bei einem eingelieferten Seelachs [*Deformatio quaedam in specie capta « Gadus virens »*]. 1 Abb., Fischmarkt, IV, 8, 215-216. Cuxhaven (1936). **b - 660**

Mögliche Ursachen einer am Unterkiefer eines eingelieferten Köhlers sich befindenden Geschwulst von zylindrischer Form und mit einer unteren Öffnung.

**Kofoid A. & Bush M.** - The Life Cycle of *Parachaenia Myae* gen. nov., sp. nov., a Ciliate Parasitic in *Mya arenaria* L. from San Francisco Bay, California [*Cyclus vitalis Ciliati parasitici « Parachaenia myae » in « Mya arenaria » a S.cti Francisci baja provenienti*]. 29 figs., Bull. Mus. R. Hist. Natur. Belg., XII, 22, 1-15. Bruxelles (1936). **b - 661**

Morphology. Binary fission. Conjugation. Maturation and fertilization. Growth.

**Kuroda T.** - On Bacteriological Analysis of the Japanese Bloodyclam, *Anadara inflate* (Reeve) [*Bacteriologica analysis speciei « Anadara inflate »*]. (In Jap.; Engl. Rés.). 1 table, Bull. Jap. Soc. Scient. Fish., V, 3, 187-188. Tokyo (1936). **b - 662**

This is the first bacteriological study made on *Anadara inflate*. The results showing the *B. coli* score of shell oysters are expressed in a table.

**Lavier G.** - *Protoopalina Duboscqui* n. sp., Opaline parasite d'un Poisson marin [*« Protoopalina Duboscqui » parasitica in Pisce marino*]. 2 fig., Ann. Par. hum. et Comp., XIV, 272-277. Paris (1936). **b - 663**

Description de la mitose de ce parasite, rencontré dans le rectum de *Gadus capelanus* à Banyuls.

**Lavier G.** - Sur quelques Flagellés intestinaux de Poissons marins [*De Flagellatis intestinalibus Piscium marinorum*]. 2 fig., Ann. Par. hum. et Comp., XIV, 278-289. Paris (1936). **b - 664**

Liste des Flagellés parasites de *Box salpa*, *B. boops* et de différentes espèces de *Motella*.

**Leigh - Sharpe W. H.** - New Parasitic Copepoda from Naples [*Copepoda nova parasitica Neapolitana*]. 9 figs., Parasitol., XXVIII, 1, 63-71. London (1936). **b - 665**

Five new species and one new genus are listed and described with indication of host, location and date.

**Markowski S.** - Ueber die Trematodenfauna der baltischen Molluskenfauna aus der Umgebung der Halbinsel Hel [*Trematoda. Quaestio de eorum fauna in Molluscis Balticis circum paeninsulam* Hel]. 3 pl., 3 tab., Bull. Int. Acad. Polon. Sc. & Lettr., Cl. Sc. Mathém. & Natur., 5/7, B II, 285-317. Cracovie (1936). **b - 666**

Von den hier untersuchten Mollusken gehört die eine Hälfte zu *Gastropoda* und die andere Hälfte zu *Lamellibranchiata*, wie in drei übersichtlichen Tabellen mit Angabe von Wirtstieren, Parasiten, Fangort und Anzahl von Infektionsfällen bei einzelnen Molluskenarten angegeben wird. Im systematischen Teil folgt eine systematische Anordnung der vom Vf. gefundenen Larvalstadien der Trematoden (Zerkarien und Metazerkarien), welche fast alle ihre endgültige Entwicklung in Wasservögeln finden. Die Wirkung der Parasiten auf die Mollusken.

**Marquard O.** - Kopfmissbildungen an Dorschen der Ostsee [*Capitis abnormitates in specie « Gadus morrhua » Maris Baltici observatae*]. 9 Abb., Ztschr. f. Fisch., XXXIV, 2, 249-256. Neudamm & Berlin (1936). **b - 667**

Die Deformation tritt am stärksten am Oberkiefer, an der oberen Kopfgegend auf. Sechs verschiedene Missbildungen sind hier abgebildet. Versuch zur Erklärung dieser Anomalien.

**Matubayasi H.** - *Eimeria* Parasitic in Marine Fishes [« *Eimeria* » *parasitica in Piscibus marinis*]. (In Jap., Engl. Rés.). 39 figs., Keijo Igaku, XV, 9, 1281-1300. Keijo (1935). **b - 668**

Spherical oöcysts of *Eimeria* have been found in the livers of *Trachurus trachurus*, *Cololabis saira* and *Sardinia melanosticta*. Detailed study of the sporogony of *Eimeria*.

**Mc Farlane S. H.** - A Study of the Endoparasitic Trematodes from Marine Fishes of Departure Bay, B. C. [*Trematoda endoparasitica in Piscibus marinis bajae* Departure *in Columbia Britannica*]. 3 figs., 6 tables, Journ. Biol. Bd. Canada, II, 4, 335-347. Toronto (1936). **b - 669**

Fifteen species of endoparasitic trematodes of marine fishes of Departure Bay, B. C., are described, the following eight species are new to science: *Prosorhynchus scalpellus* n. sp., *P. apertus* n. sp., *Rhipidocotyle elongatum* n. sp., *Podocotyle abitionis* n. sp., *Stephonostomum tristephanum* n. sp., *Deretrema cholaeum* n. sp., *Dinurus nanaimoensis* n. sp., *Lecithochirium exodicum* n. sp. The fish examined were the most common shallow water species that could be obtained by a seine.

**Nie D.** - Studies of the Intestinal Ciliates of Sea Urchin from Amoy [*De Ciliatis intestinalibus in Echinis ad regionem* Amoy *pertinentibus*]. 9 figs., Ann. Rep. Mar. Biol. Ass. China, III, 81-90 (?). (1934). **b - 670**

Six ciliates recorded in *Heliocidaris crassispina*, of which *Cryptochilidium polynucleatum* and *Cyclidium amoyensis* are new to the host.

**Nigrelli R. F.** - The Morphology, Cytology and Life-history of *Oodinium ocellatum* Brown, a Dinoflagellate Parasite on Marine Fishes [*De morphologia, cytologia, et cyclo vitali Dinoflagellati parasitici « Oodinium ocellatum » in Piscibus marinis*]. 5 figs., 9 pls., Zoologica, XXI, part 3. 12/18, 129-164. New York (1936). **b - 671**

*Oodinium ocellatum* is the first known dinoflagellate parasite of vertebrates recorded in 1931-1934 by Brown from the gills and skin of marine fishes of the East and West Indies. In the present paper are reported attacks also on the spiny boxfish and the common puffer. Bibl.

**Nybelin O.** - *Bunocotyle cingulata* Odhner - ein halophiler Trematode des Flussbarsches und Kaulbarsches der Ostsee [*« Bunocotyle cingulata » trematodes halophilus speciei « Perca fluviatilis » et « Acerina cernua » maris Baltici*]. 1 Karte, 1 Tab., Ark. f. Zool., XXVIII B, H. 3, 10, 1-6. Stockholm (1936). **b - 672**

Dieser Trematode war bisher nur als Magenparasit mariner Fische der Familie *Hemiuridae* bekannt. Hier werden neue Wirte und Fundorte in dem Brackwassergebiet an der schwedischen Ostküste angegeben. Versuch zur Erklärung dieser eigentümlichen Verbreitung.

**Okada Yo. K.** - An *Octopus* with branched Arms and the Mode of Branching [*De « Octopus » cirris ramificatis deque eorum constitutione*]. 2 pls., 10 figs., Annot. Zool. Jap., XV, 1, 5-27. Tokyo (1935). **b - 673**

Study on specimens of *Polypus vulgaris* in which 7 of the 8 arms branch more than once.

**Palombi A.** - *Eugymnanthea inquilina* nuova leptomedusa derivante da un atecato idroide ospite interno di *Tapes decussatus* L. [*« Eugymnanthea inquilina » nova leptomedusa ab athecato quodam hydroide derivans hospes interna speciei « Tapes decussatus »*]. 8 fig., 1 tav., Pubbl. Staz. Zool. Napoli, XV, 2, 159-168. Napoli (1936). **b - 674**

Caratteri diagnostici di *Eugymnanthea inquilina* nov. gen. nov. sp. Aspetto esterno e struttura anatomica ed istologica del polipo e della medusoide. La frequenza di *E. inquilina* in *T. decussatus* del Lago Fusaro e del Golfo di Napoli.

**Patten R.** - Notes on a new Protozoon *Piridium sociabile* n. gen., n. sp., from the Foot of *Buccinum undatum* [*Protozoon novum « Piridium sociabile » in pede speciei « Buccinum undatum »*]. 15 figs., Pasasitol., XXVIII, 4, 502-516. London (1936). **b - 675**

Microscopic examination of white patches on the ventral surface of the foot of *Buccinum undatum*, showed that these were composed of some organisms belonging to a new species *Piridium sociabile*. How infestation takes place.

**Powers B. A.** - Studies on the Ciliates of Sea-Urchins. A General Survey of the Infestations occurring in Tortugas Echinoids [*Studia de Ciliatis in Echinis. Conspectus generalis infestationum in Echinoideis insulae* Tortugas]. 2 pls., o. t., 14 figs., 3 tabl., Pap. Tortugas Labor., XXIX, 295-326. Washington (1936). **b - 676**

Description of 12 species of Ciliates (6 new spp., 1 nov. nom. and undet. sp.) infesting the alimentary tract of seven species of sea-urchins. Five of these species show a marked host specificity, the remaining seven species a definite host preference and all of these ciliates are associated with their host when the latter are found occurring near the tide line. The nature of this infestation is one of endocommensalism. Geographical distribution of the ciliates infesting sea-urchins from the localities of Beaufort, N. Carolina, Bermuda and Tortugas.

**Raabe H.** - Etude de Microorganismes parasites des poissons de Mer. I *Nosema ovoideum.* Thél. dans le foie des Rougets [*De microrganismis parasitis Piscium marinorum. I.* « *Nosema ovoideum* » *in hepate speciei* « *Mullus barbatus* »]. 7 fig., Bull. Inst. Océanogr., 696, 1-11. Monaco (1936). **b - 677**

En disséquant des *Mullus barbatus*, l'A. a remarqué que leur foie était complètement dégénéré et il a constaté la présence de nombreux stades évolutifs des Myxosporidies dans les cellules hépatiques.

**Rees W. J.** - Note on the Ubiquitous Cercaria from *Littorina rudis*, *L. obtusata* and *L. littorea* [*Notae de Cercariis praesentibus in* « *Littorina rudis* », « *L. obtusata* » *et* « *L. littorea* »]. 1 fig., Journ. Mar. Biol. Ass., XX, 3, 621-624. Plymouth (1936). **b - 678**

Measurements of the present specimens compared with those of Stunkard; general anatomy; life history.

**Renn C. E.** - The wasting Disease of *Zostera marina* [*Morbus vastator speciei* « *Zostera marina* »]. 7 figs., 2 tabls., Biol. Bull., LXX, 1, 148-158. Lancaster, Pa. (1936). **b - 679**

Account of the investigations on the pathology of the diseased plant and on the specific parasitic nature of the infecting parasite, an unidentified *Labyrinthula.*

**Renn C. E.** - Persistence of the Eel-Grass Disease and Parasite on the American Atlantic Coast [*Morbus speciei* « *Zostera marina* » *infestatae a parasitis persistit in litoribus americanis Oceani Atlantici*]. Nature, CXXXVIII, 3490, 507-508. London (1936). **b - 680**

A. describes the seasonal cycle of development of *Zostera* with the parasite *Labyrinthula.*

**Rothschild M.** - Gigantism and Variation in *Peringia ulvae* Pennant 1777, caused by Infection with Larval Trematodes [*De gigantismo et variatione in specie* « *Peringia ulvae* » *infectionis causa Trematodis larvalis*]. 2 figs., 3 tabl., Journ. Mar. Biol. Ass., XX, 3, 537-576. Plymouth (1936). **b - 681**

The observations on *Peringia ulvae* strongly support the view of Wesenberg-Lund that parasitism is responsible for an abnormal increase in the size of the host, although it seems more likely that this is brought about by the destruction of the gonads and other glands rather than in the manner suggested by him. The variation in the shell and asymmetrical development of the spire is probably due to the pressure exerted by the parasites from within. (From A: s summ.).

**Scheuring L.** - Ursachen für Massen-Fischsterben in Gegenwart und Vorzeit [*Causae mortis Piscium hodierno tempore et tempore praehistorico*]. 2 Abb., Nat. u. Volk, LXVI, 7, 357-362. Frankfurt a. M. (1936). **b - 682**

Einige Beispiele mit Erörterung der Ursachen aus fossilen Ablagerungen, aus dem Kurischen Haff, aus dem Atlantischen Meer (*Lopholotilus*) sowie aus vielen Binnengewässern.

**Schuurmans Stekhoven Jr.** - Copepoda Parasitica from the Belgian Coast II. (included some Habitats in the North Sea) [*Copepoda parasitica in litoribus Belgicis. II.* (*Includuntur habitat Maris Nordici*)]. 5 pls. o. t., Mém. Mus. R. Hist. Natur., 74, 1-20. Bruxelles (1936). **b - 683**

Description of 14 species with special reference to the oral extremities and the variation of the antlers of *Lernaeocera branchialis* which have not before been described.

**Souche G.** - Sur un poisson à oeil unique [*Piscis quidam monoculus*]. 2 fig., Bull. Stat. Biol. d'Arcachon, XXXII, 1, 39-41. Bordeaux (1935). **b - 684**

Description détaillée de l'exemplaire, *Sciaena aquila* Cuv. qui provient du marché de Bordeaux. Comparaison entre le côté normal et le côté anormal, structure de l'œil, musculature et nerfs.

**Souche G.** - Sur une anomalie constatée chez un *Gadus luscus* L. [*De anomalia perpensa in specie* « *Gadus luscus* »]. 2 fig., Bull. Stat. Biol. d'Archachon, XXXII, 1, 43-44. Bordeaux (1935). **b - 685**

Description de cet exemplaire, dont la tête était anormalement raccourcie.

**Srivastava H. D.** - New Allocreadids (*Trematoda*) from Indian marine Fishes. Part II. New Parasites of the Genus *Decemtestis* Yamaguti [*Allocreadida nova* (*Trematoda*) *in Piscibus marinis Indianis. Pars II. Parasiti novi ad genus* « *Decemtestis*» Yamaguti *pertinentes*]. 3 fig., Proc. Nat. Acad. Sc. India, VI, 187-195. (?) (1936). **b - 686**

*Decemtestis biacetabulata* very common among the fishes of the Gulf of Bengal.

**Stevens N. E.** - Environmental Conditions and the Wasting Disease of Eel-grass [*Condiciones ambientales et morbus destructor speciei* « *Zostera marina* »]. 1 graph, 1 table, Science, LXXXIV, 2169, 87-89. New York (1936). **b - 687**

Some suggestions of possible causes: apparent inadequacy of given explanations, periodicity in eel grass scarcity, declination of the moon, transgressions in the Atlantic Ocean.

**Subrahmanian K.** - Studies on the Acanthocephalan Fauna of Burma [*Studia de fauna Acanthocephalorum regionis* Burma]. 4 figs., Rec. Ind. Mus., XXXVIII, 3, 311-315. Calcutta (1936). **b - 688**

Description of female and male of *Pallisentis nagpurentis* (Bhalerao 1931) found in *Ophiocephalus striatus.* According to the A. the genus *Pallisentis* Van Cleave 1928 is a synonym of the genus *Neosentis* Van Cleave 1928.

**Wilson C. B.** - Parasitic Copepods from the Pacific Coast [*Copepoda parasitica reperta in litoribus Oceani Pacifici*]. 6 pls., Amer. Midland Natur., XVI, 5, 776-797. Notre Dame, Ind. (1935). **b - 689**

Annotated list on 8 new species with hosts.

**Wilson C. B.** - Parasitic Copepods from the Dry Tortugas [*Copepoda parasitica in* Dry Tortugas]. 6 pls. o. t., Pap. Tortugas Labor., XXIX, 329-347. Washington (1936). **b - 690**

About 40 species are listed with hosts, 7 species new to science are described and two others have been made the types of new genera. Proof of the statement that *Specilligus curticaudis* described as a new genus and species by Dana 80 years ago is the copepodid stage of the male of *Pandalus cranchii.* Most of the species come from the waters around the Dry Tortugas, the Bahamas, the Bermudas or the West Indies.

**Woolcock V.** - *Chloromyxum pristiophori*, a New Species of *Myxosporidia* parasitic in the Gall-Bladder of *Pristiophorus cirratus* (Saw-Shark) [« *Chloromyxum pristiophori* » *ex Myxosporidiis*

*parasitica species in vesica fellis speciei « Pristiophorus cirratus »*]. 2 pls., Parasitol., XXVIII, 1, 72-78. London (1936). **b - 691**

The material under examination was collected from Port Bay Victoria. Morphology and cytology: vegetative form, the spore. Metods of propagation: asexual, sexual (spore formation)

**Woolcock V.** - Monogenetic Trematodes from some Australian Fishes [*Trematoda monogenetica aliquorum Piscium australiensium*]. 1 pl., 4 figs., Parasitol., XXVIII, 1, 79-91. London (1936). **b - 692**

Description of 5 species, 4 of which are new: *Megalocotyle helicoleni*, n. sp. *Calicotyle inermis* n. sp., *Microcotyle sillaginae* n. sp., and *Microcotyle victoriae* n. sp.

**Yamaguti Satyû** - Parasitic Copepods from Mollusks of Japan. I [*Copepoda parasitica in Molluscis Japonicis. I*]. 7 pls. o. t., Jap. Journ. Zool., Trans. & Abstr., VII, 1, 113-127. Tokyo (1936). **b - 693**

Seven species are described, of which only one is already known from New Guinea and all the others are new belonging to two known families. *Clausiidae* and *Lichomolgidae* and to one new family, *Myicolidae*.

**Zariquiey Cenarro R.** - *Balssia gasti* (Balss) en la costa catalana (Crust. Dec.) [« *Balssia gasti* » *in litoribus Catalanis*]. 14 fig., Eos, XI, 101-107. Madrid (1935). **b - 694**

*Balssia gasti* ♂ ha sido encontrado en la costa catalana, captura mas interessante porque no eran conocidos los caracteres de este sexo. Este ejemplar ha sido recogido sobra un coral rojo.

**Zlateff I.** - Ueber einige Krankheiten unserer Fische [*De morbis nostrorum Piscium*]. (In Bulg. u. Dtsch.). Arb. Biol. Meeresstat. Schwarz. Meer Varna, Bulg. 5, 67-80. Sofia (1936). **b - 695**

Unter den hier behandelten Arten sind auch zu bemerken: *Trigla hirundo* mit Zysten von *Glugea Hertwigi* im Unterhautgewebe, *Pleuronectes flesus* mit *Glugea stephani* in der Darmwand, *Temnodon saltator* mit *Philometra marie* unter der Schleimhaut des Eierstocks, *Scomber scomber* mit *Cystoopsis scomber* an der Kiemendeckel, *Alosa nordmani* und *Alosa pontica* mit resp. *Ancherola emarginata* und *Ergasilus siboldi* auf den Kiemen.

**An.** - Government Making Study of Oyster Industry in New England in Order to Prevent Heavy Losses Caused by the Starfish Scourge [*Status studia promovet de industria ostrearum Novae Angliae ut flagellum stellarum marinarum intercludatur*]. Fish & Oyst. Rep., XVII, 4, 7. Tampa, Fla. (1936). **b - 696**

Practical method involving the use of carbon monoxyde in order to exterminate the starfish, which attack infant oysters and cause severe losses to oyster beds in New England.

**An.** - Parasites Infest Oysters in South Carolina [*Parasiti qui ostreas infestant in* South Carolina]. Fish & Oyst. Rep., XVII, 5, 16. Tampa, Fla. (1936). **b - 697**

Brief account of a survey conducted for the U. S. Bureau of Fisheries showing that more than 40 per cent of the oysters below low water mark in South Carolina are infested by boring sponges.

# PLANCTON ET BENTHOS

## Zooplancton et Phytoplancton - Distributio et valor.

**Allen W. E.** - Boat Catches of marine Phytoplankton in Southern California in 1928 [*De capturis peractis a scaphis idoneis ad plancton marinum colligendum in California merid. A. 1928*]. Amer. Journ. Bot., XXI, 66-68. Lancaster, Pa. (1934). **b - 698**

**Allen W. E.** - Occurrence of Marine Plankton Diatoms in a ten-year Series of daily Catches in Southern California [*Diatomeae planctonicae marinae repertae ex investigationibus cotidianis per decem annos in California merid.*]. Amer. Journ. Bot., XXIII, 1, 60-63. Lancaster, Pa. (1936). **b - 699**

Maximum production in spring, parallel changes in abundance between inshore and offshore, differences in productions and factors related. Leading species.

**Allen W. E.** - Surface Plankton Diatoms in the North Pacific Ocean in 1934 [*Diatomeae planctonicae ad superficiem Oceani Pacifici Septentr. A. 1934*]. Madroño, III, 6, 1-3. S. Francisco (1936). **b - 700**

Preliminary report on investigations undertaken in the summer of 1934 around the Gulf of Alaska and southward from the Aleutian Islands to the Hawaiian Islands. New records of occurrence of interest for further research.

**Allen W. E., Cupp E. E. & Easter E. C.** - Plankton Diatoms of the Java Sea [*Diatomeae planctonicae maris Javae*]. 127 figs., Ann. Jard. Bot. Buitenzorg, XLIV, 2, 101-224. Buitenzorg (1935). **b - 701**

Descriptions and figures of 127 spp. and varieties belonging to 40 genera of *Centricae* and *Pennatae*. Comparisons with the plankton diatoms of the Eastern Pacific, especially in California waters.

**Bernard F. & Fage L.** - Recherches quantitatives sur le plancton méditerranéen [*Investigationes quantitativae in plancton mediterraneum*]. 2 tabl., Bull. Inst. Océanogr., 701, 1-20. Monaco (1936). **b -702**

Recherches entreprises dans le but de déterminer la valeur du stock biologique de la Méditerranée en relation avec les quantités de nitrates et de phosphates dissous. Aperçu historique sur les premières recherches et sur les résultats; méthodes employées pour le dosage du nannoplancton, choix des stations. On constate une grande pauvreté en Diatomées et Péridiniens et une richesse relative en Flagellés.

**Ercegović A.** - Etudes qualitatives et quantitatives du phytoplancton dans les eaux cotières de l'Adriatique Oriental moyen au cours de l'année 1934 [*Studia qualitativa et quantitativa de phytoplancton in aquis litoreis maris Hadriatici orientalis medii A. 1934*]. 19 figs., 18 tab., 126 pp. Acta Adriatica, 9. Split (1936). **b - 703**

L'A. a étudié les variations de la population phytoplanctonique au cours de l'année 1934 en relation avec les facteurs physicochimiques. Liste des espèces recoltées: Bacillariacées, Coccolithinés, Silicoflagellées, et Dinoflagellées qui présentent les caractères écologiques des végétations d'eaux tempérées-chaudes. Notes sur la production qualitative et quantitative des eaux étudiées, sur la répartition de la masse planctonique et sur les facteurs de la production planctonique. Bibl.

**Gaarder T.** - Planteplankton– produktionen i havet [*De productione phytoplanctonica marina*]. (In Norv.). Naturen, LX, 5, 150-157. Bergen (1936). **b - 704**

Variations in the quantitative plancton production and factors concerned according to theories of Brandt, Nathanson, Gran, Nansen; methods of Atkins and Harvey.

**Gourbounov G. P.** - Les collections benthoniques [*Collectio substantiae benthonicae*]. (En russe). Troudy Tajmyrsk. Ghidrogr. Exped. (Trav. Expéd. Hydrogr. Tajmyr), II, 203-210. Leningrad (1935). **b - 705**

Erklärende Bemerkungen. Verzeichnis der Arten.

**Hardy A. C.** - The Ecological Relations between the Herring and the Plankton investigated with the Plankton Indicator. Part I. The Object, Plan and Methods of the Investigation [*Correlationes oecologicae inter Aringos et substantiam planctonicam, perpensae instrumenti auxilio quod dicitur « Indicator planctonicus ». Pars I : Ratio, proposita, methodus investigationum*]. 10 figs., 4 tabl., Journ. Mar. Biol. Ass., n. ser., XXI, 1, 147-177. Plymouth (1936). **b - 707**

Description of the improved plankton indicator. Sampling methods and their validity. The commercial application of the indicator.

**Hardy A. C., Farran G. P., Garstang W. & Georgeson E.** - The Arctic Plankton collected by the Nautilus-Expedition, 1931. Part I. General Account. Part II. Report on the Copepoda. Part III. Report on the Appendicularians [*De arctica substantia planctonica collecta ab expeditione navis* « Nautilus », *A. 1931. Pars I. Relatio generalis. Pars II: Relatio de Copepodis. Pars III: Relatio de Appendiculariis*]. Journ. Linn. Soc. Zool., 39, 391-412. London (1936). **b - 708**

The catches of the phytoplankton have been made from the margin of the pack-ice at a depth of 250 m. north of Spitzbergen: 14 typical arctic Diatoms, 8 Dinoflagellates and 1 *Chrysomonadinae. Metazoa*: 1 Medusa, 1 *Siphonophora*, 1 *Ctenophora*, 2 *Chaetognata*, 16 *Copepoda*, 1 *Amphipoda*, 1 *Pteropoda*, and 1 Appendicularian.

**Henderson G. T. D.** - The Ecological Relations between the Herring and the Plankton investigated with the Plankton Indicator. Part III. The Zooplankton - Herring Correlations in the Scottish Fisheries [*Correlationes oecologicae inter Aringos et substantiam planctonicam, perpensae instrumenti auxilio quod dicitur « Indicator planctonicus ». Pars III: Correlationes inter substantiam zooplanctonicam et aringos pro piscatione Scota*]. 7 figs., 18 tabl., Journ. Mar. Biol. Ass., n. ser., XXI, 1, 243-276. Plymouth (1936). **b - 709**

Account of investigations undertaken in Scottish waters north of latitude 56° N. divided in two areas, Eastern and Western Fisheries during 1930-1933 as well as in Irish waters in 1931. The results obtained show more positive than negative Herring-*Calanus* correlations of which however further studies will be necessary to get a clear idea of the seasonal variations in this degree. Discussion on the abundance and distribution of *Calanus*, *Limacina* and some other plankton-forms. The value of the plankton-indicator.

**Henderson G. T. D., Lucas C. E. & Fraser J. H.** - The Ecological Relations between the Herring and the Plankton investigated with the Plankton Indicator. Part IV. The Relation between Catches of Herring and Phytoplankton Collected by the Plankton Indicator [*Correlationes oecologicae inter Aringos et substantiam planctonicam, perpensae instrumenti auxilio quod dicitur « Indicator planctonicus ». Pars IV. Correlatio inter Aringorum capturas et phytoplanctonicam substantiam collectam per instrumentum cui nomen est « Indicator planctonicus »*]. 4 figs., 7 tabl., Journ. Mar. Biol. Ass., n. ser., XXI, 1, 277-291. Plymouth (1936). **b - 710**

Analysis of catches made and comparison between those. The results obtained show a negative correlation between the herring and dense patches of phytoplankton and between phytoplankton and the associated numbers of *Calanus* and *Limacina*, the significance of which is discussed. The value of the miniature indicator for fishermen.

**Hentschel E.** - Ueber das Winterplankton im Süden von Island [*De substantia planctonica hiemali in Islandiae regione meridionali*]. (In Dtsch., Engl. Rés.). 15 Abb., 6 Tab., Cons. Expl. Mer., Rapp. & Pr.-Verb., XCIX, Rapp. Atlant. 1933-35, I, 1-33. Copenhague (1936). **b - 711**

I. Das Plankton der südisländischen Gewässer. II. Das Plankton im Bereich der Vestmanna-Fischerei. III. Das Plankton der Fahrtlinie Vestmannainseln-Färöer-Schetlandinseln. IV. Allgemeines über das Winterplankton. Schriftenverzeichnis. Die Reise des Vermessungschiffes « Meteor », deren Ergebnisse der vorliegenden Untersuchung zu Grunde liegen, dauerte vom 19. Februar bis zum 30. März 1935.

**Höglund H. & Landberg S.** - Further Investigations upon the Photosynthesis of Phyto-Plankton by Constant Illumination [*Investigationes ulteriores in photosynthesim phytoplanctonicam, luce constanti*]. 3 tabl., Cons. Expl. Mer., Rapp. & Pr.-Verb., XCV, 32-33. Copenhague (1936). **b - 712**

These investigations continue those carried out during the spring 1934. (See H. Pettersson, H. Höglund and S. Landberg; « Submarine daylight and the photosynthesis of Phytoplankton », in Medd. Göteborgs Högskolas Oceanogr. Inst. n. 10, Göteborg, 1934).

**Johnstone J., Scott A. & Chadwick H. C.** - The Marine Plankton with Special Reference to Investigations made at Port Erin, Isle of Man, during 1907-1914. 3 rd. reprint [*De substantia planctonica marina. Agitur particulatim de investigationibus peractis in* Port Erin, *Insula* Man *ab A. 1907 ad A. 1914*]. 194 pp., The Univ. Press of Liverpool, Ltd. London (1934). **b - 713**

Description of various plankton types, their distribution and relation between organic production and plancton. In an appendix the various types of plankton nets and methods of collection as well as methods of the estimation of the catch are dealt with. This book is of great value for students and researchers in marine plankton.

**Khmyznikova V. L.** - Quelques données sur le zooplancton des détroits orientaux et de la partie Nord de la Mer de Kara [*Data de substantia zooplanctonica in fretis orientalibus et regione nordica Maris Karensis*]. (En russe). Fig., tabl.,

**b - 722**

Study of the plankton animals as members of a community for the part they play by their habits and abundance in the balance of life in the sea, with special regard to *Metazoa*. 1. The plankton expedition in the « National » under the leadership of Hensen in 1889, 2. The scheme for the collection of plankton followed by the International Council during the years 1902 to 1908, 3. The completion by Lohmann in 1906 of a year's detailed survey of the total plankton production at Laboe in Kiel bay, and the post-war period.

**Russell F. S.** - The Importance of certain Plankton Animals as Indicators of Water Movements in the Western End of the English Channel [*Momentum aliquorum animalium planctonicorum ac indicatorum aquae motuum in parte occid. Freti Britannici*] 3 figs., Cons. Expl. Mer., Rapp. & Pr.-Verb., C, 3ème partie, 7-10. Copenhague (1936).
**b - 723**

It has been shown that the periodic changes in the occurrence of several plancton species are due to the movements of different water masses.

**Russell F. S.** - Observations on the Distribution of Plankton Animal Indicators made on Col. E. T. Peel's Yacht « St. George » in the Mouth of the English Channel, July, 1935 [*Observationes distributionis planctonicae ac indices aquae motuum peractae in pamphilo* « St. George », *ad* E. T. Peal *pertinenti, ad accessum Freti Britannici, mense Julio 1935*]. 6 figs., 5 tabl., Journ. Mar. Biol. Ass., XX, 3, 507-522. Plymouth (1936).
**b - 724**

Three bodies of water were clearly shown by their plankton content (described here). It has also been shown that the study of certain plankton animals should prove of help in understanding the hydrography of the Channel Mouth region (From A.: s summ).

**Savage R. E. & Wimpenny R. S.** - Phytoplankton and the Herring. Part II. 1933 and 1934 [*De substantia phytoplanctonica deque Aringis. Pars II. A. 1933 et 1934*]. 45 figs., 48 tabl., Min. Agric. Fish., Fish. Invest., Ser. 2, XV, 1, 3-88. H. M. Stat. Off. London (1936).
**b - 725**

The distribution of diatom patches in 1933 and 1934: I. *Rhizosolenia styliformis*, II. *Biddulphia sinensis*. The relation between the salinity distribution and the movements of the diatom patches in 1933 and in 1934. The general frequency of *R. styliformis* and *B. sinensis* in 1933-34 and earlier, related to hydrological conditions, and their conditions of cell division. The concentration of the herring fishery and its relation to phytoplankton patches. The relation between phytoplankton and certain animal communities. The 1933 diatom maximum and its possible effect on salinity. Vertical distribution. Discussion. Bibl.

**Schirschov P.** - The Plankton as Indicator of the Ice-Regime of the Sea (from the Hydro-Biological Work of the Expedition on the Ice-Breaker « Krassin » in 1935) [*De substantia planctonica ac indice regiminis glacierum marinarum (ex operibus biologicis peractis perdurante expeditione navis glacieiruptricis* « Krassin » *A. 1935*]. (In Russ. & Engl.). Bull. Arct. Inst., V, 11, 376-377, 411. Leningrad (1935). **b - 726**

Preliminary results of the work performed on board the ice-breaker « Krassin » in 1935 in order to solve the problem of the possibility of using the plankton as an indicator of the ice-régime of the sea, on hand of the phenomenon of the development (florescence) of the planktonic algae amidst the arctic ice. The results seem to confirm the possibility of using plankton for the forecasting of ice-condition in the arctic seas.

**Shell I. I.** - Use of Plankton in the Prognostication of Ice [*De utenda substantia planctonica in glacierum condicionibus providendis*]. Geogr. Rev., XXVI, 2, 332. New York (1936). **b - 727**

On hand of observations made aboard the « Lütke » on its Arctic voyage 1934 (See: « The Northeastern Passage of the Icebreaker « Lütke », Geogr. Rev., XXV, 339-340, 1935) and an interesting phenomenon observed in the Chukchee Sea by the hydrologist of the « Lütke » (See: « Meteor. Vestn. », XLV, 57, 1935) a well established relationship is shown between the amount of plankton and the distribution of ice, ocean currents, and other hydrological elements.

**Steeman Nielsen E.** - The Production of Phytoplankton at the Faroe Isles, Iceland, East Greenland and in the Waters around [*De productione phytoplanctonica in insulis* Faroe, *Islandia, Groenlandia orientali et in aquis propinquis*]. (In Engl.; Dan. Rés.). 5 charts, 2 figs., Tabl. Medd. Komm. Danm. Fisk- & Havunders. Serie Plankton, III, 1, 1–93. København (1935). **b - 728**

Previous investigations. Methods. The general hydrographic conditions. The distribution of Plankton in the various cruises (1932-34). The limiting factors for plankton production.

The annual plankton production in the various areas. Problems: Phytoplankton production and fish populations. Appendix: A description of *Fragilaria nana* n. sp.

D.** - The Plankton and the Properties of the Surface Waters of the Puget Sound Region [*De substantia planctonica deque peculiaritatibus aquarum superficialium regionis* Puget Sound]. 5 figs., 4 tabl. Univ. Washington Publ. Oceanogr., I, 5, 111-134. Washington Seattle (1936). **b - 731**

Results of a study made of the variations of the physical and chemical properties and the plankton of the inland surface waters of the San Juan Archipelago, Puget Sound, and Hood Canal. Temperature, chlorinity, the contents in phosphates, silicates, nitrites, dissolved oxygen and the pH values. Three groups of microplankton were observed und investigated: *Diatomaceae, Dinoflagellata,* and *Tintinnoinea.*

**Vatova A.** - Ricerche quantitative sulla fauna bentonica dell'Alto Adriatico e loro importanza per la biologia marina [*Investigationes quantitativae in faunam benthonicam maris Hadriatici earumque momentum pro biologia marina*]. 2 tav., Not. Ist., Biol. Rovigno, 19, 3-15. Venezia (1936).

(—)Atti Soc. It. Progr. Sc., Riun. 24, IV, 1, 70-73. Roma (1936). **b - 732**

Si descrivono le associazioni biologiche ritrovate ed il loro peso in sostanza organica. Nello studio della distribuzione orizzontale della sostanza organica sono state trovate alcune zone più ricche che dovrebbero essere di utilità anche per la pesca pratica; nella distribuzione verticale, si può osservare una diminuzione secondo la profondità (da 229 grammi tra 0,15 metri fino a 38 grammi tra 50–80 metri). La fauna bentonica dell'Adriatico è inoltre ricchissima di specie ma povera di individui), donde il basso valore medio di sostanza organica, il quale probabilmente dipende dalla povertà di nitrati e fosfati della zona mediterranea.

## Bacteria.

**Bendinelli L. & Alfieri G.** - Contribuzioni alla microbiologia dei terreni sabbiosi (Tomboli) della costa tirrenica [*Contributiones in microbiologiam terrenorum sabulosorum (italice* « Tomboli ») *litoris Tyrrhenici*]. Boll. R. Ist. Sup. Agr., XI, 227-230. Pisa (1935). **b - 734**

Gli AA., eseguite indagini microbiologiche sui terreni sabbiosi della costa compresa tra Viareggio e Livorno, hanno messo in evidenza la notevole povertà in germi di detti terreni. [A].

**Bertel L.** - Sur quelques avantages remarquables dans la culture des bactéries marines [*De notandis beneficiis in bacteriis marinis colendis*]. 2 fig., 1 table. Bull. Inst. Océanogr., 688, 1-5. Monaco (1936). **b - 735**

L'A. décrit des nouvelles méthodes de culture des bactéries marines qui permettent de saisir plus facilement et plus complètement que jusqu'à présent les espèces de microbes caractéristiques pour une couche d'eau ou de vase.

**Bertel R.** - Les bactéries marines et leur influence sur la circulation de la matière dans la mer (2e mémoire) [*Bacteria marina eorumque influentia in circulationem marinam materiae;*

(*Memoria IIª*)]. 2 graph., 2 tabl., Bull. Inst. Océanogr., 687, 1-7. Monaco (1936). **b - 736**

Résultats des études de l'A. (v. 1er mém. Bull. Inst. Océanogr., 672, 1935) sur les bactéries marines et leur influence sur la circulation de la matière dans la mer, dont il conclut « qu'il est indispensable de rédiger, pour ainsi dire, une monographie de chaque organisme isolé pour pouvoir en indiquer exactement la place systématique et l'importance oecologique dans la circulation de la matière dans la mer ».

**Racchiusa S.** - Flora batterica intestinale dei pesci [*Flora bacterica intestinalis Piscium*]. Tab., Mem. R. Comit. Talassogr. Ital., N°. CCXII, 3-43. Venezia (1934). **b - 737**

Contributo allo studio della flora batterica intestinale aerobica ed anaerobica di *Muraenoidea, Scopelidae, Mugilidae, Mullidae, Labridae, Percidae, Sparidae*, etc.

I germi isolati si possono distinguere in 18 varietà di bacilli, 4 di cocchi e 4 di cocco-bacilli, tutti aerobi, e 3 varietà che sono facoltative. Fra i germi descritti, nessun tipo è riferibile a quelli appartenenti alla flora batterica intestinale dell'uomo e dei comuni animali terrestri ad eccezione di una varietà che appartiene al *Proteum vulgare comune*.

**Waksman S. A. & Renn C. E.** - Decomposition of organic Matter in Sea Water by Bacteria. III. Factors influencing the Rate of Decomposition [*Decompositio materiarum orgànicarum in aqua marina perBacteria. III. Factores qui influunt in velocitatem decompositionis*]. 2 figs., 9 tabl., Biol. Bull., LXX, 3, 472-483. Lancaster, Pa. (1936). **b - 738**

Influence of temperature and of organic compounds. Relationship of photosynthesis and phytoplankton development to bacterial activities in sea water. Decomposition at different seasons and at different latitudes. Influence of oxygen tension. Continued decomposition in stored water.

**Zobell C. E.** - Bactericidal Action of Sea-Water [*Actio letalis pro Bacteriis aquae marinae*]. 2 tabl. Proc. Soc. Exper. Biol. & Med., 34, 113-116. New York (1936). **b - 739**

The experiments described here show that, besides its salts, raw sea water possesses some constituent exerting a high bactericidal effect, which is reduced by the addition of organic matter.

**Zobell C. E. & Andersson D. Q.** - Vertical Distribution of Bacteria in Marine Sediments [*Distributio verticalis Bacteriorum in sedimentis marinis*]. Bull. Amer. Ass. Petrol. Geol., XX, 3, Chicago (1936). **b - 740**

## Protozoa.

**Biecheler B.** - Sur une Chloromonadine nouvelle d'eau saumâtre *Chattonella, subsalsa* n. gen., n. sp., *Protistologica* LVIII [*De Chloromonadina nova in aqua salmacida viventi: « Chattonella subsalsa »*]. 1 fig., Arch. Zool. Expér. et Gén., LXXVIII, 2, 79-83. Paris (1936). **b - 741**

La forme ici décrite doit se placer à côté du genre *Gonyostomum* Diesing, mais ses caractères ont obligé l'A. à en faire un genre spécial: *Chattonella*, avec l'espèce *subsalsa*. Description.

**Böhm A.** - Zum Variationsproblem der Peridinieen [*Peridineae. Quaestio de variationibus*]. 4 Abb., Österr. Bot. Ztschr. LXXXIV, 4, 271-281. Wien (1935). **b - 742**

Von *Dinophysis miles* Cleve und *D. caudata* Kent aus dem Indischen Ozean sind resp. zwei und drei Variationstypen determiniert worden. *D. miles* var. *schröteri* und var. *indica* mit einer intermediären Form und *D. caudata* var. *abbreviata*, var. *pedunculata* und var. *allieri*. Verteilung und Herkunft von *D. caudata, D. tripos* und *D. miles*.

**Böhm A.** - Dinoflagellates of the Coastal Waters of the Western Pacific [*Dinoflagellata in aquis litoreis Oceani Pacifici Occidentalis*]. 23 figs., Bernice P. Bishop Mus. Bull., 137, 54 pp. Honolulu (1936). **b - 743**

The samples under consideration have been collected in different areas from Singapore to Shanghai. List, however not complete, of species observed (about 46 new ones), description of the more important forms, comparison between the same forms from other localities, especially the Adriatic.

**Chatton E. & Biecheler B.** - Documents nouveaux relatifs aux Coccidinides (Dinoflagellés parasites). La sexualité du *Coccidinium Mesnili* n. sp. [*Documenta nova de Coccidinidis (Dinoflagellatis parasitis). Des exualitate speciei « Coccidinium Mesnili »*]. 1 fig., C. R. Acad. Sc., CCIII, 13, 573-576. Paris (1936). **b - 744**

*Coccidinium Mesnili* n. sp. chez *Cryptoperidinium foliaceum* Stein, *C. punctatum* n. sp. chez *Coolia monotis* Meunier, *C. Duboscqui* chez *Peridinium balticum* Levander et *C. Legeri* chez *Peridinium (Glenodinium) sociale* Henneguy. Leur évolution, comparaison entre les différentes espèces; conclusions sur la complexité de l'évolution.

**Deflandre G.** - Tintinnoïdiens et Calpionelles [*Tintinnoinea atque Calpionellidae*]. 42 fig., Bull. Soc. Franc. Microsc., V, 3, 112-122. Paris (1936). **b - 745**

Comparaison entre les Tintinnoïdiens, Infusoires loriqués pélagiques des mers actuelles et les Calpionelles, microfossiles de l'époque secondaire. Leur identité.

**Earland A.** - *Foraminifera*. – Discovery Rep., Disc. Comm. Colon. Off., X, Pt. 3, 1-208. Cambridge Univ. Press. Cambridge (1935). **b - 746**

This part concerns a large area extending over nearly 90° of west long. or practically a quarter of the south polar circumference. Study on the distribution and migration. Most species belong to the *Arenacea*.

**Earland A., Bannister F. A. & Hey M. H.** - *Foraminifera*. Additional Records from the Weddel Sea Sector from Material obtained by the S. Y. « Scotia ». Report on Some Crystalline Components of the Weddel Sea Deposits. Chemical Analyses [*Foraminifera. Registrationes additiciae a sectore Maris* Weddel *ex materiis collectis a pamphilio* « Scotia ». *Relatio de componentibus depositorum Maris* Weddel. *Analyses chemicae*]. 76 pp., 3 pls., Discovery Rep. Colon. Off. London, XIII, part 4. Univ. Press. Cambridge (1936). **b - 747**

**Fauré-Fremiet E.** - The *Folliculinidae* (*Infusoria Heterotricha*) of the Breton Coast [*Folliculinidae (Infusoria Heterotricha) ad litora Britannica pertinentes*]. 15 figs., Biol. Bull., LXX, 3, 353-360. Lancaster, Pa (1936). **b - 748**

Description of 15 species with special regard to the shape of the macronucleus. Division of the genus *Folliculina sensu stricto* and creation of a new genus, *Folliculinopsis*, for the species endowed with a beaded macronucleus. *Folliculinopsis annulata* sp. nov. and *F. lignicola* sp. nov.

**Fauré-Fremiet E.** - La famille des *Folliculinidae* (*Infusoria Heterotricha*) [*Familia Folliculinidarum (Infusoria Heterotricha)*]. 15 figs., Mém. Mus. R. Hist. Natur. Belgique, Sér. 2, 3, 1129-1175. Bruxelles (1936). **b - 749**

Caractères qui distinguent les Folliculines et justifient la création d'une famille spéciale qui comprend environ vingt-cinq espèces appartenant aux genres *Folliculinopsis* n. gen., *Folliculina, Parafolliculina, Metafolliculina* et *Pseudo-*

*folliculina*. Description de chaque espèce, les caractères morphologiques typiques, la forme et la dimension de la coque. Dimorphisme et reorganisation chez les Folliculines. Le cycle de *Folliculina simplex* et de *F. producta*; l'individu sédentaire et la vie libre de l'individu migrateur. L'aire de répartition de certaines Folliculines est presque universelle: toutes les espèces décrites sont marines et généralement côtières.

**Føyn B.** - Foraminiferstudien. I. Der Lebenszyklus von *Discorbina vilardeboana* d'Orbigny [*Foraminiferorum studia. I. Cyclus vitalis speciei* « *Discorbina vilardeboana* »]. 5 Abb., 2 Taf. a. T., 22 S., Berg. Mus. Årb., Naturv. r. I, 2. Bergen (1936). **b - 750**

Diese Untersuchungen geben vorhanden, dass bei *Discorbina vilardeboana* ein Generationswechsel zwischen einer mikrosphärischen, mehrkernigen, asexuellen und einer makrosphärischen, einkernigen, schwärmerbildenden Generation vorliegt. In bezug auf die Natur der Schwärmer hat man noch nicht feststellen können, ob sie Gameten sind oder nicht, es scheint aber wahrscheinlich, dass sie zum Entwicklungszyklus gehören.

**Gauthier-Liévre L.** - Sur une des singularités de l'Oued Rhir: des foraminifères thalassoïdes vivant dans des eaux sahariennes [*De peculiaritatibus fluminis* Rhir: *Foraminifera thalassoidea viventia in aquis saharianis*]. 1 pl., 1 fig., Bull. Soc. Hist. Natur. (Afrique du Nord) XXVI, 5, 142-147. Alger (1935). **b - 751**

Des foraminifères vivants de la famille *Miliolidae* ont été trouvés dans les eaux douces, saumâtres et salées du désert. Discussion sur leur origine.

**Keijzer C. J.** - On Variability in East Indian *Foraminifera* [*De variabilitate Foraminiferorum Indiarum Orientalium*]. 3 pls., 29 figs., Temminckia, 1, 75-152. (?) (1936). **b - 752**

Examination of 22 forms, one of which is recorded as new, from the coasts of Java, Madura and Bali. Criticism of Hofker's theory of trimorphism.

**Kiesselbach A.** - Einige morphologische und biologische Beobachtungen an *Epiclintes ambiguus* (*Ciliata hypotricha*) [*Morphologicae et biologicae observationes de specie* « *E. ambiguus* »]. 5 Abb., Not. Ist. Biolog. Rovigno, 18, 1-9. Rovigno (1935). **b - 753**

Von den hypotrichen Ciliaten *Epiclintes* (*Trichoda*) *ambiguus* (O. F. Müller 1786) Bütschli 1889 wurden zwei verschiedene Rassen gefunden, die sich durch die Länge des Körpers und die Breite des Schwanzes unterschieden. Die hier beschriebenen Formen unterscheiden sich von den von früheren Autoren gefundenen durch ihre Schlankheit und eine geringe Verbreiterung des äussersten Schwanzendes, die Tiere der grösseren Rasse auch noch durch ihre Grösse. Nahrung, Zahl der Kernteile. (Vom Vf.s Zus.).

**Kiesselbach A.** - Zur Ciliatenfauna der nördlichen Adria [*Ciliata maris Hadriatici septentr.*]. (Rés. franç.). 70 Abb., Thalassia, II, 5, 1-53. Jena (1936). **b - 754**

Die Ciliaten der Adria: A. Die in der Umgebung von Rovigno und in der Lagune Venedigs gefundenen Formen: Morphologische und ökologische Beobachtungen nebst Angaben über die geographische Verbreitung. Uebersicht über die ökologische Verbreitung. B. Die bisher aus der Adria bekannt gewordenen Formen. Alphabetisches Verzeichnis aller aus der Adria bekannten Arten mit kurzer Charakterisierung der geographischen Verbreitung innerhalb der Adria.

**Kitching J. A.** - The Physiology of contractile Vacuoles. II The Control of Body Volume in marine *Peritricha* [*De physiologia vacuolorum contractilium. II. Inspectio magnitudinis corporeae in marinis Peritrichis*]. 8 fig., Journ. Exp. Biol. XIII, 11-27. Cambridge (1936). **b - 755**

**Le Calvez J.** - Modifications du test des Foraminifères pélagiques en rapport avec la reproduction: *Orbulina universa* d'Orb. et *Tretomphalus bulloides* d'Orb. [*Texti foraminiferorum pelagicorum modificationes pro reproductione specierum* « *Orbulina universa* » *et* « *Tretomphalus bulloides* ». 8 figs., Ann. Protistol., V, 125-133. Paris (1936). **b - 756**

Observations sur ces deux espèces récoltées à Villefranche-sur-mer. Les loges bulleuses sont en rapport avec la reproduction et elles doivent être considérées comme une espèce de protection des stades précédant les gamètes.

**Le Calvez J.** - Observations sur le genre *Iridia. Protistologica.* LX [*Observationes de genere Iridia*]. 7 figs., 1 pl., Arch. Zool. Expér. et Gén. LXXXVIII, 3, 115-131. Paris (1936). **b - 757**

Description de *Iridia lucida* nov. sp., mode de vie, sporulation et position systématique; production d'embryons dans les espèces de ce genre, fixation des embryons pélagiques, croissance. Evolution nucléaire et protoplasmique. On peut probablement conclure à l'existence de deux générations A et B, les gamètes et les embryons, mais il faut que leur alternance ou leur succession soit encore contrôlée.

**Myers E. H.** - Culture des Foraminifères marins de la zone littorale [*Culturae Foraminiferorum marinorum ad zonam litoream pertinentium*]. Trans. Amer. Microsc. Soc., LIV, 3, 264-267. Lancaster, Pa (1935). **b - 758**

On peut appliquer cette méthode à *Patellina, Spirillina, Bulimina, Pyrgo*, etc.

**Neviani A.** - Appunti per una storia intorno ai foraminiferi dall'antichità al secolo XVIII [*Notae ad historiam redigendam de Foraminiferis ab antiquis temporibus usque ad sec. XVIII*]. 3 fig., Mem. Pont. Ac. Sc. Novi Lyncaei, serie 3, II, 131-210. Roma (1935). **b - 759**

**Nie D.** - Notes on *Tintinnoinea* from the Bay of Amoy [*Notae de Tintinnoineis in baja* Amoy]. 17 figs., Ann. Rep. Mar. Biol. Ass. China, III, 71-80. (?) (1934). **b - 760**

Among the recorded 17 species, 4 are new: *Tintinnopsis inflata, T. amoyensis, Wangrella dicollaria* and *Amphorellopsis pentagona*.

**Orsi A.** - Tintinnidi del Golfo di Genova [*Tintinnoinea Sinus Genuensis*]. 1 fig., 3, tav., Boll. Mus. Lab. Zool. Anat. Comp. XVI, 90, 1-18. Genova (1936). **b - 761**

L'A. nel presente lavoro dopo aver registrato un primo elenco di 60 specie di Tintinnidi del Golgo di Genova, ne studia la costanza fenologica, prende in esame il ciclo annuale di talune specie e termina con considerazioni ecologiche relativamente al materiale studiato (A.).

**Rhumbler L.** - Rhizopoden der Kieler Bucht, gesammelt durch A. Remane. I. Teil [*Rhizopoda in Baja* Kiel *collecta ab A.* Remane. *Pars I*]. Karte, 9 Taf., Schr. Naturwiss. Ver. Schleswig-Holstein XXI, 2, 143-194. Kiel (1935). **b - 762**

Beschreibung von etwa 50, meistens neuen, Formen.

**Schenck H. G. & Frizzell L.** - Subgeneric Nomenclature in Foraminifera [*Nomenclatura subgenerica Foraminiferorum*]. Amer. Jour. Sc., XXXI, 186, 464-466. New Haven, Conn (1936). **b - 763**

On hand of data contained in the important paper by W. A. E. van de Geyn and I. M. van der Vlerk some considerations are formulated on account of the terminology of subgenera, which is often confused by the use of a distinct name for the typical subgenus. Two principles are advocated, whose application may help to bring clarity in the problem.

**Stschedrin Z.** - Zur Kenntnis der Foraminiferenfauna der Arktischen Meere der USSR [*Contributio in cognoscenda foraminifera marium arcticorum ad URSS pertinentium*]. (In Russ. Dtsch. Rés.). 2 Taf., Trans. Arct. Inst., XXXIII, 51-64. Leningrad (1936). **b - 764**

Vorläufige Ergebnisse der Erforschung des Foraminiferenmaterials aus dem Karischen und Tschuchotskij Meere aus den Sammlungen der Expedition der Eisbrecher « Sibirjakov » und « Russanow ». Vf. gibt eine systematische Liste der beobachteten Formen und bespricht ihre Verteilung nach den Fundorten mit einigen Daten betreffend ihre geographische Verbreitung.

**Thompson M. L.** - The Genotype of *Fusulina* SS. [*De genotypo ad Fusulina SS. pertinenti*]. Amer. Journ. Sc., XXXII, 190, 287-291. New Haven, Conn. (1936). **b - 765**

A. criticizes the work of A. Silvestri on the validity of *Fusulina* Fischer claiming that the specimens studied are instead referable to the genus *Triticites* e. g. topotypes of *T. simplex* (Schellwien).

**Wang Chia Chi** - Notes on the Marine Infusoria of Amoy [*Notae de Infusoriis marinis ad* Amoy *pertinentibus*]. 14 figs., Ann. Rep. Mar. Biol. Ass. China, III, 50-70. (?) (1934). **b - 766**

Of the 14 spp. recorded 5 are new to science: *Amphileptus multinucleata*, *Dysteria amoyensis*, *Strombidium pseudocinctum*, *Carchesium paraepistylidis* and *Cothurnia amoyensis*.

**Whedon W. F. & Kofoid C. A.** - Dinoflagellata of the San Francisco Region 1. On the skeletal Morphology of two New Species, *Gonyaulax catenella* and *G. acatenella* [*Dinoflagellata a regione Sancti Francisci provenientia. I. De scheletri morphologia duarum novarum specierum « Gonyaulax catenella » et « G. acatenella »*]. 16 figs., Univ. Calif. Publ. Zoöl., XLI, 4, 25-34. Berkeley (1936). **b - 767**

Diagnosis, descriptions, remarks, variation, distribution, comparisons.

## Porifera.

**Alander H.** - Additions to the Swedish Sponge-fauna. Preliminary Note [*Addenda ad faunam Suetiam spongiarum. Nota prior.*). 1 fig., Ark. f. Zool., XXVIII B, H., 2, 5, 1-6. Stockholm (1935). **b - 768**

The sponges dealt with here are all collected in the Kosterfjord, Säcken and the Singlefjord of the Swedish west coast. 22 species are described, one of which is new, *Hymedesmia minuta* n. sp.

**Arndt W.** - Uebersicht über die Handelssorten der Badeschwämme [*Conspectus specierum commercialium Spongiarum*]. Sitz. ber. Ges. Naturforsch. Freunde, II, 4/7, 192-213. Berlin (1935). **b - 769**

Die als Badeschwämme benutzten Arten sind nicht mehr als 6 Arten und ein Dutzend Varietäten, die entweder einer einzigen Gattung, *Spongia* Linné oder zwei Gattungen, *Spongia* L. und *Hippospongia* F. E. Schulze, gehören. Verzeichnis von 400 Handelssorten.

**Burton M.** - The Fishery Grounds near Alexandria. Sponges [*Fundi piscosi Alexandriae. Spongia*]. 16 figs., Fish. Res. Directorate, Min. Comm. & Ind. IX, Not. & Mém. 17, 1-28. Cairo (1936). **b - 770**

Description of 45 species, one of which is new, *Haliclona Steueri*.

**Laubenfels (De) M. W.** - A Comparison of the Shallow-Water Sponges near the Pacific End of the Panama Canal with those at the Caribbean End [*Comparatio inter Spongias in aquis parum profundis viventes in regione canalis Panamensis quae oceanum Pacificum spectat et Spongias in regione Mare Caraibicum spectanti*]. 45 figs. Proc. U. S. Nat. Mus., LXXXIII, 2993, 441-466. Washington (1936). **b - 771**

General remarks on the distribution of shallow water sponges; the different ecological conditions of the Pacific and the Caribbean end especially with regard to tides. Comparison with other sponge faunas. Description of and remarks on 16 Pacific species (5 new ones), and 21 Atlantic species (9 new ones).

**Topsent E.** - Eponges observées dans les parages de Monaco (II-ème partie) [*Spongiae observatae apud Arcem Monoeci*]. 12 fig. Bull. Inst., Océanogr., 686, 1-70. Monaco (1936). **b - 772**

Malgré la publication récente de Vosmaer sur les « Eponges du Golfe de Naples », l'A. n'a pas cru inutile – pour les imperfections de l'ouvrage qu'il a remarquées – de donner le relevé annoté d'une seconde série d'Eponges observées par lui dans les parages de Monaco. A l'exception de ce que Vosmaer a réuni sous le nom de *Porifera incalcaria* et que l'A. laisse de côté pour le moment, il passe en révue, en deux séries, de la faune de Monaco à peu pres l'équivalent de celle de Naples compris dans le texte de Vosmaer.

**Topsent E.** - Etude sur des *Leucosolenia* [*Leucosolenia. Studia*]. 20 fig., Bull. Inst. Océanogr., 711, 1-47. Monaco (1936). **b - 773**

L'A. passe en révue la plupart des espèces de *Leucosolenia* provenant de la Méditerranée (Monaco, Porquerolles, Sète, Banyuls, Villefranche). La liste se compose de 20 noms au lieu de 31 noms donnés par Breitfuss. Synonymies et variétés. Structure de ces Eponges et variabilité dans leur spiculation.

**Vosmaer G. C. J.** - The Sponges of the Bay of Naples (Porifera Incalcaria) [*Spongiae Sinus Neapolitani*]. 69 pls., Capita Zool., V, 5, 777-875. 's-Gravenhage (1933-1935). **b - 774**

Full descriptions of all species. (See also preced. vols from 1932). This part has been published by Mr. M. Burton after the A:s death.

**Webb D. A.** - The Histology, Cytology and Embryology of Sponges [*Spongiae. Quaestio de histologia, cytologia et embryologia*]. Quart. Journ. Microsc. Sc., LXXVIII, 1, 51-70. London (1935). **b - 775**

Summary of literature published since 1914.

## Coelenterata - Insulae et scopuli coralliferi.

**Benisch J.** - Die Telestaceen-Gattung *Coelogorgia* Milne-Edwards [*Genus « Telestacea Coelogorgia »*]. 6 Abb., Zool. Anz., CXVI, 3/4, 91-98. Leipzig (1936). **b - 776**

Geschichte, Diagnose, Verbreitung, Beschreibung der Gattung und der beiden Spezies: *Coelogorgia palmosa* (Vat.) und *C. roxasi* n. sp.

**Billard A.** - Les Fonds de Pêche près d'Alexandrie. Hydroidea [*Fundi piscosi Alexandriae. Hydroidea*]. 3 fig., 4 cart., Fish. Res. Directorate, Min. Comm. & Ind., VI, Nat. & Mém., 13, 1-12. Le Caire (1936). **b - 777**

Etude de la collection récoltée par Prof. A. Steuer sur la côte d'Alexandrie pendant l'automne de 1933. Une espèce d'eau saumâtre et douze espèces marines.

**Boschma H.** - Sur la croissance de quelques coraux de récifs de l'île d'Edam (Baie de Batavia) [*De accretione aliquorum coralliorum in scopulis insulae* d'Edam]. 8 tabl., Bull. Mus. R. Hist. Nat. Belgique, Sér. 2, 3, 101-114. Bruxelles (1936). **b - 778**

Observations sur 74 échantillons dont la plupart appartiennent à l'éspèce *Psammocora contigua*, concernant la rapidité de la croissance de certains coraux de récifs. Méthode employée. Les coraux à squelette massif croissent plus lentement que ceux à squelette lacte et les formes peu ramifiés augmentent beaucoup plus vite de poids que les autres. La croissance est très irrégulière et diffère d'un endroit à l'autre par suite des facteurs du milieu.

**Carlgren O.** - Ueber einige ostasiatische Zoantharien [*Zoantharia quaedam Asiae orientalis*]. 6 figs., Ark. f. Zool., XXVIII A, H. 1, 5, 1-11. Stockholm (1935). **b - 779**

Beschreibung von *Epizoanthus ramosus* n. sp., *E. mortenseni* n. sp., *E. indicus* Lwowsky und *Parazoanthus gracilis* (Lwowsky) von japanischen und philippinischen Gewässern.

**Carlgren O.** - Ueber eine neue südafrikanische Lucernariide, *Depastromorpha africana* n. gen. n. sp. nebst Bemerkungen über den Bau und die Systematik dieser Tiergruppe [*Lucernariida nova sudafricana. « Depastromorpha africana » n. g., n. sp. cum notis de structura et systematica*]. 12 Abb., 1 Tab., Kungl. Sv. Vetensk. Akad. Handl., 3 ser., XV, 1, 1-24. Stockholm (1935). **b - 780**

Einleitende Bemerkungen über das Vorkommen der Lucernariiden, früher gefundene Arten usw. Beschreibung der neuen Spezies. Liste der untersuchten Arten.

**Crossland C.** - Coral Faunas of the Red Sea and Tahiti [*Fauna coralliorum Maris Rubri et* Tahiti]. Proc. Zool. Soc., 499-504. London (1935). **b - 781**

Comparison between the two faunas which are very different owing to temperature and salinity as well as the isolated position of Tahiti.

**Deichmann E.** - Notes on *Pennatulacea* and *Holothurioidea* Collected by the first and second Bingham Oceanographic Expedition 1925-1926 [*Pennatulacea et Holothurioidea collecta priore et altera expeditione oceanographica* τοῦ Bingham *perduranti ab A. 1925 ad A. 1926*]. 1 fig., Bull. Bingham Oceanogr. Coll., Peabody Mus. Natur. Hist., V, 3, 1-11. New Haven (1936). **b - 782**

Although the collection of *Pennatulacea* and *Holothurioidea* only comprise a few species, these are nevertheless of great interest; a new seapen *Verctillum binghami* n. sp. is described and other species are reported definitely from regions which are still rather incompletely explored. Key to the species of *Stylatula* and of *Ptilosarcus*.

**Deichmann E.** - The *Alcyonaria* of the Western Part of the Atlantic Ocean [*Alcyonaria regionis occidentalis Oceani Atlantici*]. Mem. Mus. Comp. Zool., LIII. Cambridge (1936). **b - 783**

**Fraser C. Mc Lean** - Hydroids from the west Coast of Vancouver Island [*Hydroidea a litoribus occidentalibus insulae* Vancouver *provenientia*]. Canad. Field Natur., XLIX, 143-145. Ottawa (1935). **b - 784**

**Hickson S. J.** - Darwin's *Cavernularia* [*Cavernularia Darwiniana*]. Nature, CXXXVII, 3474, 909. London (1936). **b - 785**

In a short note A. points out that a species from the Gulf of lower California newly described by Miss E. Deichmann as *Veretillum binghami* is identical with the *Cavernularia darwinii* of the Galapagos Isl.

**Kramp P. L.** - On the *Leptomedusae* of the Genera *Eirene* Eschscholtz and *Helgicirrha* Hartlaub [*De Leptomedusis ad genera Eirene et Helgicirrha pertinentibus*]. Vidensk. Medd., XCIX, 239-262. København (1935-36). **b - 786**

On account of the prevailing confusion as to the genera *Helgicirrha* and *Eirene* especially with regard to the 'cirri', Author here gives a revision of species in which cirri are not observed (12 species of *Eirene* described with a summary of general common features), and of species with cirri observed (6 species described with a general diagnosis of the genus *Helgicirrha*). Bibl.

**Leloup E.** - Siphonophores récoltés dans la région de Monaco [*Siphonophora collecta apud Arcem Monoeci*]. 4 tab., Bull. Inst. Océanogr., 703, 1-15. Monaco (1936). **b - 787**

Liste, par station, des espèces recueillies à bord du vapeur « Eider » au du canot « Steno », avec indications de la localité, profondeur en mètres, procédé de récolte.

**Leloup E.** - Hydropolypes calyptoblastiques et Siphonophores récoltés au cours de la croisière (1934-1935) du navire-école belge « Mercator » [*Hydropolypi calyptoblastici et Siphonophora collecta inter navigationem (1934-1935) navis praeceptoriae belgicae* « Mercator »]. 3 fig., Bull. Mus. R. Hist. Natur. Belgique, XI, 34, 1-6. Bruxelles (1936). **b - 788**

Liste et description des espèces recueillies dans l'Océan Pacifique: baie de Guayaquil (Equateur), île de Pâques; dans l'Océan Atlantique Nord; mer des Sargasses et mer des Antilles.

**Leloup E.** - Siphonophores Calycophorides (suite) et Physophorides provenant des Campagnes du Prince Albert I^er^ de Monaco [*Siphonophora Calycophoroidea et Physophoroidea e navigationibus Principis Alberti I* de Monaco *provenientia*]. 2 pls., Rés. Campagnes Scient., XCIII, 1-37. Monaco (1936). **b - 789**

Description et distribution géographique de neuf familles de Physophorides et de *Stephanomia (?) Richardi*, nouvelle espèce. Tableaux des espèces recueillies aux différentes stations des Campagnes de 1886 à 1913.

**Macfadyen L. M. S.** - *Alcyonaria* (*Stolonifera, Alcyonacea, Telestacea* and *Gorgonacea*) 5 pls., Brit. Mus. (Natur. Hist.) Great Barr. Reef Exped., 1928-29, Scient. Rep., V, 2, 19-71. London (1935). **b - 790**

**Panikkar N. K.** - On *Apiactis bengalensis*, species nova, a New Pelagical Larval Ceriantharian from the Madras Plankton [« *Apiactis bengalensis* » *Ceriantharium novum pelagicum larvale e plancton insulae* Madras *proveniens*]. 10 figs., Zool. Anz., CXV, 250-260. Leipzig (1936). **b - 791**

Diagnosis. External characters. Anatomy. The tentacles. The pharynx. The mesenteries. Mesenterial filaments. Systematic relationships.

**Papenfuss- Johnstone E.** - The Utility of the Nematocysts in the Classification of certain Scyphomedusae. 1. *Cyanea capillata*, *C. Palmstruchii*, *Dactylometra quinquecirrha*, *D. q.* var. *chesapeakei*, and *Chrysaora hysoscella* [*De utilitate nematocystorum pro classificatione aliquarum Scyphomedusarum*]. Lunds Univ. Årsskr. N. F. Avd., 2, XXXI, 11, 25 pp. (Kgl. Fysiogr. Sällsk. Handl. N. F., XLVI, 11). Lund (1936). **b - 792**

From the results of this study, it may be concluded that the undischarged nematocysts can be used as a taxonomic character in the *Semaestomeae*. This conclusion is based on the fact that the nematocysts of each species have a constant size, shape, and structure while the nematocysts of different species differ in size, shape and structure. On the basis of the differences in the nematocysts, it has been possible to show that *Cyanea capillata* and *C. palmstruchii* are distinct species. A previously undetermined medusa, *Dactylometra quinquecirrha* var. *chesapeakei*, is closely related to *D. quinquecirrha* and not allied to *Chrysaora* with which it has been confused. The undischarged nematocysts vere studied only in *Cyanaea camillata* (A.).

**Paspalew G. W.** - *Thaumantias maeotica* Ostr.- *Pontia Ostroumowi* gen. et sp. nov. (In Dtsch; Bulg. Rés). 29 Abb., 1 Taf., Arb. Meeresstat. Schwarz. Meer Varna, Bulg., 5, 1-35. Sofia (1936). **b - 793**

Nach einer eingehenden Untersuchung der Ammen- und Medusengeneration der in 1896 von Ostroumov bestimmten *Thaumantias maeotica* ist Vf. zum Resultat gekommen, dass diese Form keine Leptomedusa sondern eine neue Form der Anthomedusen darstellt und schlägt dafür den Namen *Pontia Ostroumowi* gen. et sp. nov. vor.

**Pax F.** - *Anthozoa* (Teil 2: *Actiniaria*, *Octocorallia*). – Die Tierwelt d. Nord- w. Ostsee gegr. v. Grimpe & Wagler., Lief. 30, Teil 3 c, 81-318. Akad. Verlagsg. Leipzig (1936). **b - 794**

**Pax F. & Lochter H.** - *Epizoanthus Vatovai* eine neue Carcinoecienbildende Krustenanemone der Adria [« *Epizoanthus Vatovai* » *zoanthidis novus maris Hadriatici qui Carcinoeces format*]. 7 Abb., Not. Ist. Biolog. Rovigno, 17, 1-16. Rovigno (1935). **b - 795**

Anatomische und morphologische Beschreibung. Diese Spezies wurde in der Nähe von Rovigno auf *Chenopus pes pelecani* (L.), von *Paguristes oculatus* Fabr. bewohnt, aufgefunden.

**Philbert M.** - Liste préliminaire des Hydraires récoltés dans la région de Saint Servan [*Hydraria collecta in regione* Saint Servan. *Index prior*]. Bull. Lab. Marit. Saint-Servan, XIV, 19-28. Rennes (1935). **b - 796**

Liste des Hydraires récoltés aux différents lieux visités (17 Stations). Liste par familles des Hydraires de la région Malouine appartenant aux Gymnoblastiques et aux Calyptoblastiques.

**Philbert M.** - Etudes sur *Cladocoryne floccosa* Rotch [*Studia de specie* « *Cladocoryne floccosa* »]. 8 fig., Bull. Inst. Océanogr., 708, 1-15. Monaco (1936). **b - 797**

Répartition géographique, habitat· position et considérations systématiques: parmi les espèces créées par les auteurs *C. pelagica* et *C. Haddoni* doivent être considérés appartenant à *C. floccosa*. Description du Penidome, du gonosome et du trophosome.

**Ranson G.** - Observations morphologiques, systématiques et biogéographiques sur une Scyphoméduse rare, *Paraphyllina intermedia* O. Maas 1903, trouvée sur la plage de Biarritz [*Observationes morphologicae, systematicae et biogeographicae circa Scyphomedusam quamdam raram* « *Paraphyllina intermedia* » *in ora maritima* Biarritz *repertam*]. Bull. Mus. Nat. Hist. Natur., Sér. 2, VIII, 269-276. Paris (1936). **b - 798**

Description détaillée, distribution géographique de cette espèce dont un exemplaire a été trouvé le 28 janvier 1935 au lendemain d'une violente tempête.

**Ranson G.** - Méduses provenant des Campagnes du Prince Albert I$^{er}$ de Monaco [*Medusae provenientes a navigationibus Principis Alberti I* de Monaco]. 2 pl., Rés. Campagnes Scient., XCII, 1-244. Monaco (1936). **b - 799**

Description de 45 espèces appartenant à 14 familles parmi lesquelles *Leuckartiara Grimaldii* n. sp. et *Aglantha Krampi* Ranson. L'A. n'a pas voulu donner simplement une liste documentaire mais il a accompli la recherche des affinités entre les espèces et les groupes en fonction des réactions protoplasmiques de l'organisme avec le milieu. Importance des pigments des Méduses étudiées et action de la température sur la période de reproduction. Tableaux des espèces recueillies aux différentes stations. Bibl.

**Rawlinson R.** - The Occurrence of *Diadumene cincta* T. A. Stephenson, in the River Roach, Essex [*Species* « *Diadumene cincta* » *in flumine* Roach, Essex]. 1 tabl., Journ. Mar. Biol. Ass., n. ser., XXI, 1, 91-93. Plymouth (1936). **b - 800**

These anemones were found attached to living and dead shells of *Ostrea*, *Mytilus*, *Alcyonidium* and *Halichondria*. Anatomical difference from *D. cincta* first recorded from Plymouth and described by T. M. Stephenson.

**Rees J.** - On a new Species of Hydroid, *Staurocoryne filiformis*, with a Revision of the Genus *Staurocoryne* Rotch, 1872 [*De quodam hydroide speciei novae* « *Staurocoryne filiformis* », *cum reinspectione generis* « *Staurocoryne* »]. 11 figs., 1 tabl., Journ. Mar. Biol. Ass., n. ser., XXI, 1, 135-142. Plymouth (1936). **b - 801**

Account of the development of this new species, reared in the laboratory. Comparison with allied species. Instead of introducing a new genus for the species, A. redefines the genus *Staurocoryne* with some modifications discussed here.

**Russell F. S.** - On the Hydroid of *Laodicea undulata* (Forbes and Goodsir) [*De hydroide* « *Laodicea undulata* »]. 7 figs., Journ. Mar. Biol. Ass., XX, 3, 581-587. Plymouth (1936). **b - 802**

The rearing experiments described here confirm previous observations that the hydroid of this species is a *Cuspidella*.

**Russell F. S.** - On a New Species of Medusa, *Eucheilota hartlaubi* n. sp. [*Species nova ex Medusis* « *Eucheilota hartlaubi* »]. 6 figs., Journ. Mar. Biol. Ass., XX, 3, 589-594. Plymouth (1936). **b - 803**

Diagnosis; comparison with *Eucheilota duodecimalis* A. Agassiz.

**Russell F. S. & Rees W. J.** - On Rearing the Hydroid *Zanclea implexa* (Alder) and its Medusa *Zanclea gemmosa* Mc Crady, with a Review of the Genus *Zanclea* [*De cultura hydroidis* « *Zanclea implexa* » *eiusque medusae* « *Zanclea gem-*

*mosa* ». *Conspectus generis* « *Zanclea* »]. 12 figs., Journ. Mar. Biol. Ass., n. ser., XXI, 1 107-130. Plymouth (1936). b - 804

Account of the development of the two *Zanclea*-colonies growing in association with polyzoa. Conclusional emendations: *Zanclea implexa* of the European coasts is to be united with *Gemmaria gemmosa* of the American coasts. The name for the hydroid must be *Zanclea implexa* (Alder) and that for the medusa *Zanclea gemmosa* Mc. Crady. Bibl. Addendum: Remarks on a new genus and species of hydroid, *Zancloidea philippina*.

**Scharrer E.** - Der Blaasop [« *Tetrodon lagocephalus* »]. 2 Abb., Natur u. Volk, LXVI, 3, 135-136. Frankfurt a. M. (1936). b - 805

Beschreibung der in der Bucht von Laurenço Marques in der Portug. Ostafrika vorkommenden Spezies, *Tedrodon lagocephalus*, von den Südafrikanern genannt Blaasop. Ihre Weise, sich von den Rippenquallen zu retten.

**Seymor Sewell R. B.** - Coral Reefs of the Western Indian Ocean [*Scopuli coralliferi Oceani Indiani occid.*]. Nature, CXXXVII, 3470, 730-731. London (1936). b - 806

Review of three papers recently published by the Linnean Society on the studies carried out by the Percy Sladen Trust Expedition to the Indian Ocean in 1905.

**Smith H. G.** - Contribution to the Anatomy and Physiology of *Cassiopea frondosa* [*Contributio in anatomiam et physiologiam speciei* « *Cassiopea frondosa* »]. Carnegie Inst. Washington, Publ. 475, 17-52. Washington (1936). b - 807

**Tayama R.** - Table Reefs a Particular Type of Coral Reefs [*Tabularum scopuli* (*anglice* table reefs) *typi peculiares inter scopulos coralliferos*]. Proc. Imp. Acad., 11, 268-270. Tokyo (1935). b - 808

Typical examples are the Tobi and Sonsoral Islands in the South Sea. Description.

**Tayama R.** - Distribution of Coral Reefs in the South Sea [*Distributio scopulorum coralliferorum in maribus meridionalibus*]. 1 map, Proc. Imp. Acad., 11, 326-328. Tokyo (1935). b - 809

The region studied comprises the islands the North and South Marianas, Palau, the Carolines, Marchals and the Central Islands under Japanese mandate. Claim for Darwin's subsidence theory rather than Daly's glacial control theory as to the formation.

**Ting Ying H. M.** - On the Growth Rate of Coral Reefs and the Sea Water Temperature in the Japanese Islands during the Latest Geological Times [*De velocitate accretionis vadorum coralliferorum deque temperatura aquae marinae insularum Japonicarum, ultimis aetatibus geologicis*]. 4 pl., 25 pp. Maruzen Co. Tokyo (1935). b - 810

**Tortonese E.** - I Gorgonarii del Golfo di Genova [*Gorgonaria Sinus Genuensis*]. 8 fig., Boll. Zool., VII, 2/3, 113-125. Napoli (1936). b - 811

L'ordine dei Gorgonarii nel Golfo di Genova è rappresentato dalle sei specie seguenti: *Corallium rubrum* L., *Eunicella verrucosa* Pall., *Paramuricea chamaeleon* G. Koch, *Caligorgia verticillata* Pall., *Leptogorgia sarmentosa* Esp., *Isidella elongata* Esp. Si dà di ciascuno la descrizione e l'habitat.

**Totton A. K.** - Plankton of the Bermuda Oceanographic Expeditions. VII. *Siphonophora* taken during the Year 1931. Introductory Notes by William Beebe [*De substantia planctonica collecta ab expeditionibus oceanographicis ad* Bermuda. *VII: Siphonophora capta A. 1931*]. Zoologica, XXI, Part 4, 19/23, 231-240. New York (1936). b - 812

List of 32 species with indications of color and distribution. For further particulars concerning the nets position, etc., see Zoologica, XIII, 1, 2, 3.

**Vallaux C.** - Note sur la croissance des récifs coralliens [*Notae de accretione scopulorum coralliferorum*]. Rev. Hydrogr., XIII, 1, 91-93. Monaco (1936). b - 813

Extr. des Ann. Hydrogr. Paris (1935). Voir aussi: Bull. Hydrogr. Int. Monaco, XI, 258 (1932); I, 9, IV, 81, VI, 110 (1933).

**Yabe H. & Eguchi M.** - *Oxyphyllia*, a New Genus of Hexacorals [*Oxyphyllia genus novum ex Hexacoralliis*]. 10 figs. o. pl., Proc. Imp. Acad., XI, 9, 376-378. Tokyo (1935). b - 814

Diagnosis, comparison with *Oxypora*, *Mycedium Echinopora* and *Physophyllia*. Description of two new varieties of *Oxyphyllia*.

**Yabe H. & Eguchi M.** - Revision of Reef Coral Genera *Echinopora*, *Oxyphyllia*, *Mycedium*, *Oxypora* and *Physophyllia* [*Reinspectio generum Coralliorum scopulos constituentium*]. Proc. Imp. Acad., XI, 10, 429-431. Tokyo (1935). b - 815

Different parts of these genera are compared with one another in a table. Genotypes. Remarks on distribution and taxonomy.

**Yabe H. & Ehara E.** - Two new Corals from Taiwan (Formosa) [*Corallia duo nova a* Taiwan (*Formosa*) *provenientia*]. 6 figs. o. pl., Proc. Imp. Acad., XII, 1, 25-27. Tokyo (1936). b - 816

*Pavona garanbiensis* sp. n., *Cladorbicella* gen. n. with *C. taiwanensis* sp. n. Diagnosis, remarks and localities.

**Yabe H. & Sugiyama T.** - A new Living Coral, *Pseudosiderastrea tayamai*, from Dobo in Wamar, Aru Islands [*Corallium novum vivens* « *Pseudosiderastrea tayamai* » *a* Dobo *in* Wamar (*Insulis* Aru) *proveniens*]. 7 figs., Proc. Imp. Acad., XI, 9, 373-375. Tokyo (1935). b - 817

This new form, of which a description is given, is very similar to *Siderastrea* from the Atlantic. Comparison with *Anomastraea irregularis*.

**Yonge C. M.** - Studies on the Biology of Tortugas Corals. I. Observations on *Maeandra areolata* Linn. II. Variation in the Genus *Siderastrea* [*Studia de biologia coralliorum ad insulas* Tortugas *pertinentium. I. Observationes de* « *Maeandra areolata* ». *II. Variatio generis* « *Siderastrea* »]. 4 pls., 1 fig., Pap. Tortugas Labor., XXIX, 187-198; 201-208. Washington (1936). b - 818

I. Habitat, feeding reactions, cleansing mechanisms, reproduction and growth. II. Occurrence on the Tortugas Reefs and in the moat at Fort Jefferson. Significant differences in the environment.

**Weill R.** - Contribution à l'étude des Cnidaires et de leurs nématocystes. I. Recherches sur les nématocystes (morphologie, physiologie,

développement). II. Valeur taxonomique du cnidome [*Contributio in studenda Cnidaria eorumque nematocysta. I. Investigationes in nematocysta (morphologiam, physiologiam, accretionem). II. Valor taxonomicus cnidomatis*]. 224 fig., Trav. Stat. Zool. Wimereux X, 1-347; XI, 1-353. Paris (1934). **b - 819**

Résultats des recherches conduites pendant 11 années dans des stations de zoologie marine du monde entier. Vol. I (X). Caractère général technique et matériel: Morphologie, Physiologie, développement, spirocystes. Vol. II (XI). Introduction. Définition du cnidome. Gymnoblastes, calyptoblastes. *Milleporida, Stylasterida, Trachymedusae, Narcomedusae. Siphonophora*, classification. *Hydrozoa*: classification. *Scyphomedusae. Actinaria. Hexacorallia. Zoantharia. Ceriantharia* et *Antipatharia. Anthozoa. Asclerocorallia* et *Ceriantharia. Cnidaria*: classification. Corrections, conclusions générales, revue critique de la littérature. Bibl.

**Weill R.** - Le cnidome des Cladonémides *Eleutheria dichotoma* et *Cladonema radiatum*, son cycle et son interprétation [*De cnidomate in Cladonemidis « Eleutheria dichotoma » et « Cladonema radiatum » deque eius cyclo et interpretatione*]. C. R. Acad. Sc., CCIII, 17, 816-818. Paris (1936). **b - 820**

Élevage des polypes de *E. dichotoma* et *C. radiatum* dont il résulte que les polypes possèdent uniquement des sténotèles, les méduses des desmonèmes et des sténotèles. Chez les formes étudiées la phase polypoide représente le stade larvaire, la phase médusaire le stade adulte.

**Wells J. W.** - The Nomenclature and Type Species of Some Genera of Recent and Fossil Corals [*Nomenclatura et species typicae aliquorum generum coralliorum fossilium et recentium*]. Amer. Journ. Sc., XXXI, 182, 97-134. New Haven, Conn. (1936). **b - 821**

A systematic revision of the classification of the madreporarian hexacorals has shown that in the cases of 91 genera either the genotype has not been definitively designated or selected or else the wrong name has been applied by authors. Each of the cases is dealt with, giving the place and date of first usage, genosyntypes if there are such, the correct genotype, type locality and present whereabouts of the type material, and discussion. Genotypes (genolectotypes) are selected wherever necessary. No new generic names are proposed and but one new name given to an old species (A.).

**Zirpolo G.** - Su di una nuova Leptomedusa *Eugymnanthea inquilina* Palombi [*De Leptomedusa quadam nova « Eugymnanthea inquilina »*]. 2 fig., Riv. Fis. Mat. e Sc. Natur., X, 3, 107-109. Napoli (1935). **b - 822**

In base all'esame dei caratteri anatomici l'A. ritiene che il polipo idroide *Eugymnanthea inquilina* Pal., rinvenuto recentemente dal Palombi, aderente al mantello, al piede ed alle branchie di *Tapes decussatus* nel Golfo di Napoli e nel Lago Fusaro, sia il rappresentante di una nuova sottofamiglia.

Soc., LV, 199-207; 369-387, 488-496. Lancaster, Pa. (1936). **b - 838**

**Hartman O.** - New Species of Polychaetous Annelids of the Family *Nereidae* from California [*Species novae ex Annelidis Polychaetis ad familiam Nereidarum Californiensium pertinentibus*]. 7 figs., Proc. U. S. Nat. Mus., LXXXIII, 2994, 467-480. Washington (1936). **b - 839**

*Nereis (Nereis) eucapitis* n. sp., *N. (N.) pseudoneanthes* n. sp., *N. (N.) neonigripes* n. sp., *N. (N.) eakini* n. sp., *N. (N.) natans* n. sp., *N. (Ceratonereis) tunicatae* n. sp., *N. (Neanthes) saltoni* n. sp., *Nereis (Eunereis) longipes* n. sp. Descriptions, localities, distribution.

**Hartman O.** - New Species of *Spionidae* (*Annelida Polychaeta*) from the Coast of California [*Spionidarum species novae a litoribus Californiensibus provenientes*]. 22 figs. o. pl., Univ. Calif. Publ. Zoöl., XLI, 6, 45-52. Berkeley (1936). **b - 840**

Distribution and biology, systematic discussion and description of. *Streblospio lutincola* n. sp., *Polydora brachycephala* n. sp., *P. amarincola* n. sp., *P. truncata* n. sp., *Pygospio californica* n. sp., and *Rhynchospio arenincola* n. sp.

**Hartman O.** - A Review of the *Phyllodocidae* (*Annelida Polychaeta*) of the Coast of California, with Descriptions of Nine New Species [*Phyllodocidae (Annelida Polychaeta). Conspectus specierum a litoribus Californiensibus provenientium cum descriptione novem novarum specierum*]. 51 figs., Univ. Calif. Publ. Zoöl., XLI, 10, 117-132. Berkeley, Calif. (1936). **b - 841**

List of 15 species previously known from California with new synonyms, 5 species previously described but not reported from California and 9 new species. Key. Description of the new spp.

**Herter K.** - *Hirudinea.* – Die Tierwelt d. Nord– u. Ostsee, gegr. v. Grimpe u. Wagler, VI, Teil 6, c 2, Lief. 29. Akad. Verlagsg. Leipzig (1936). **b - 842**

Bericht über Meeresformen (*Piscicolidae*) und Brackwasserformen (*Glossiphoniidae, Hirudiniidae* und *Herpobdellidae*). Beschreibung, Schlüssel, allg. Anatomie, Verbreitung, Nahrung, Physiologie und Fortpflanzung.

**Jurgens O.** - Die Wechselbeziehungen von Blutkreislauf, Atmung und Osmoregulation bei Polychäten [*Mutuae correlationes inter sanguinis circulationem, respirationem et regulationem pressionis osmoticae in Polychaetis*]. 22 Abb., Zool. Jahrb. Abt. Allg. Zool. u. Physiol., LV, 1, 1-46. Jena (1935). **b - 843**

Beschreibung des Blutkreislaufes von *Nereis diversicolor*. Atmung geschieht durch die Haut und die Eingeweide. Mit einer Verminderung des $O_2$ - Gehaltes im umgebenden Medium folgt eine Erhöhung der Kontraktionsgeschwindigkeit der Gefässe bis der $O_2$-Gehalt unter 2.5 mg pro Liter fällt. Bei einem übermässigen $O_2$-Gehalt (10-14 mg. pro Liter) wird die Kontraktion sehr schwach oder hört auf. Das Blut und der Kreislauf haben keine direkte Bedeutung für die Osmoregulation. Die Anneliden sind die einzigen Invertebraten mit einem geschlossenen Blutkreislauf wie die Vertebraten, und dies System zeigt in den beiden Gruppen viele Ähnlichkeiten auf.

**Kato K.** - A new Turbellarian, *Cryptocelis amakusaensis*, from Southern Japan [*Species nova ex Turbellariis « Cryptocelis amakusaensis »*

*a Japonia merid. proveniens*]. 3 figs., 1 pl., Jap. Journ. Zool., Trans. & Abstr., VII, 1, 17-20. Tokyo (1936). **b - 844**

This species is found on the sandy beach in the neighbourhood of the Amakusa Marine Biological Laboratory. Measurements the different parts of the body with special reference to the genital organs.

**Kato K.** - Notes on *Paraplanocera* [« *Paraplanocera*». *Notae*]. 5 figs., Jap. Journ. Zool. Trans. & Abstr., VII, 1, 21-29. Tokyo (1936). **b - 845**

Revision of the genus *Paraplanocera*. Detailed description of *Paraplanocera misakiensis*.

**Knöllner F. H.** - Die Oligochaeten des Küstengrundwassers [*Oligochaeta aquarum litoranearum Germaniae*]. Schr. Naturw. Ver. Schleswig-Holstein, XXI, 1, 135-139. Kiel (1935). **b - 846**

Verzeichnis von 8 Arten, von denen *Enchytraeoides immotus* n. sp., *Michaelsena subterranea* n. sp., *Rhyacodrilus prostatus* n. sp., *Spiridion insigne* n. sp., und *Aktedrilus monospermathecus* n. sp. neu sind.

**Knöllner F. H.** - Ökologische und systematische Untersuchungen über litorale und marine Oligochäten der Kieler Bucht [*Investigationes oecologicae et systematicae de Oligochaetis litoreis et marinis bajae* Kiel]. London (1936). **b - 850**

**Monro C. C. A.** - Polychaete Worms [*Vermes Polychaeta*]. Discovery Rep. Discov. Comm., Colon. Off., XII, 2, 59-198. Cambridge Univ. Press. London (1936). **b - 851**

**Okuda S.** - *Poecilochaetus tropicus* n. sp., a Remarkable Sedentary Polychaete from the South Sea [« *Poecilochaetus tropicus* » *species notanda sessilis ex Polychaetis marium meridionalium*]. 2 figs., Proc. Imp. Acad., XI, 7, 289-291. Tokyo (1935). **b - 852**

**Palombi A.** Policladi liberi e commensali raccolti sulle coste del Sud Africa, della Florida e del golfo di Napoli [*Polyclada libera et commensalia collecta in litoribus Sud Africanis, in* Florida *et in sinu Neapolitano*]. 27 fig., 1 tav., Arch. Zool. It., XXIII, 1-45. Napoli (1936). **b - 853**

L'A. riporta e descrive nove specie di Turbellari Policladi sia liberi che viventi associati a molluschi ed a crostacei paguridi dei mari del Sud Africa, del Nord America e del Mediterraneo. Delle specie studiate, quattro sono nuove, le altre sono da tempo conosciute; risultano tuttavia ugualmente interessanti per le modificazioni morfologiche intervenute in rapporto al nuovo ambiente biologico. Particolare rilievo va fatto infine per *Stylochus tenax* n. sp. commensale delle ostriche (*Ostrea virginica* Gmelin), alle quali apporta distruzioni non lievi.

**Prashad B.** - On the *Sipunculoidea* from Indian Waters in the Indian Museum, Calcutta [*De Sipunculoideis Marium Indianorum in Museo Urbis* Calcutta]. 1 pl., Rec. Ind. Mus., XXXVIII, 2, 231-238. Calcutta (1936). **b - 854**

General remarks on the collection. Description of the genera *Sipunculus* Linn. and *Siphonosoma* Spengel with the species *Sipunculus nudus* H., *Sipunculus robustus* Keferstein, *Sipunculus porrectus* Selenka, *Sipunculus aequabilis* Sluiter, and *Siphonosoma australe* (Keferstein).

**Reisinger E.** - Zur Exkretionsphysiologie von *Ophryotrocha puerilis* Claparède & Metschnikoff [*De physiologia excretionis speciei « Ophryotrocha puerilis »*]. 23 Abb., Thalassia, II, 4, 3-24. Jena (1936). **b - 855**

Die Ausbildung des Hautdrüsensystems und die Beibehaltung der larvalen Wimperkränze steht in funktioneller Beziehung zum Mangel an Nephridien. Unter mehreren Erklärungsmöglichkeiten hierfür wird die Annahme spontanen Nephridienverlustes bevorzugt. Die Neotenie von *Ophryotrocha puerilis* ist unvollständig, da sie sich nur auf die Gestalt, nicht jedoch auf die Funktion des larvalen Organs (Wimperkränze) erstreckt. (Von Vf. Rés.).

**Sato H.** - *Parabonellia misakiensis* (Ikeda) found in the Vicinity of the Shimoda Marine Biological Station [« *Parabonellia misakiensis reperta ad stationem biologicam marinam in* Shimoda]. 2 figs., Annot. Zool. Jap., XV, 1, 142-144. Tokyo (1935). **b - 856**

Anatomical description.

**Schulz E.** - Marine Nematoden von Sizilien und Gran Canaria [*Nematodes marini Siculi et ab Insulis Fortunatis (Canariae) provenientes*]. 1 Abb., Zool. Anz., CIX, 11/12, 299-304. Leipzig (1935). **b - 857**

Bericht über 11 Arten von Sizilien und 2 von Gran Canaria. *Chromadorita magna* und *Monoposthia costata mediterranea* sind neu.

**Schuurmans Stekhoven H. J. Jr.** - Nématodes libres capturés entre les Hydraires dans le Port de Plymouth [*Nematodes liberi inter Hydraria capti in portu* Plymouth]. Bull. Hist. Natur. Belgique, XI, 33,1-2. Bruxelles (1936). **b - 858**

Description de 7 espèces.

**Stunkard H. W. & Schoenborn H. W.** - Notes on the Structure, Distribution and Synonymy of *Diphyllobothrium lanceolatum* [*Notae de structura, distributione et synonymia speciei « Diphyllobothrium lanceolatum »*]. Amer. Mus. Novit., 880, 1-9. New York (1936). **b - 859**

Additions are made to Zschokke's account of the structure of *Diphyllobothrium lanceolatum* (Krabbe 1865) and some of the variations which have been observed in this species are recorded. *D. schistochilos* (Germanos 1895) und *D. coniceps* (Linstow 1905), are considered synonyms of *D. lanceolatum*. A check list of the diphyllobothrid species occurring in seals is given. (A.).

**Treadwell A. L.** - Polychaetous Annelids from Amoy, China [*Annelida polychaeta ad* Amoy *pertinentia in Sinensi regione*]. 20 figs., Proc. U. S. Nat. Mus., LXXXIII, 2984, 261-279. Washington (1936). **b - 860**

Diagnosis of 21 spp., 8 of which are new, belonging to families *Leodicidae, Nereidae, Sabellidae, Cirratulidae*, etc.

**Tseng Shen** - Anatomy of a New Appendiculate Trematode from the Sea Eel [*Trematodes novus appendiculatus anguillae marinae. Quaestio de anatomia*]. 3 pls., Peking Nat. Hist. Bull., IX, 3, 171-180. Peking (1935). **b - 861**

*Lecithocludium longicaudum*. Description of the musculature, digestive, excretory and nervous system as well as the sexual organs.

**Wheeler J F. G.** - *Nemertea*. – Brit. Mus. (Natur. Hist.) The John Murray Exped. 1933-34. Scient. Rep., IV, 3, 79-86. London (1936). **b - 862**

**Wilson D. P.** - The Development of *Audouinia tentaculata* (Montagu) [*Quaestio de accretione speciei « Audouinia tentaculata »*]. 12 figs., Journ. Mar. Biol. Ass., XX, 3, 567-579. Plymouth (1936). **b - 863**

A special interest is dedicated to the position of the tentacular filaments and the first pair of branchial filaments in the young worm as compared with the adult one as well as the segmentation of the anterior achoetigerous region.

**Wilson D. P.** - Notes on the Early Stages of two Polychaetes, *Nephthys hombergi* Lamarck and *Pectinaria koreni* Malmgren [*Notae de primis stadiis duorum Polychaetorum « Nephthys hombergis » et « Pectinaria koreni »*]. 3 figs., Journ. Mar. Biol. Ass., n. ser., XXI, 1, 305-310. Plymouth (1936). **b - 864**

The eggs and trochospheres of *Nephthys hombergi*, of which no satisfactory account has been previously given. Description of the very early larvae of *Pectinaria koreni* never before described.

**Winternitz J. K.** - New Species of Polychaetous Annelids collected at Appalachicola Florida by Dr. A. S. Pearse in 1935 [*Annelida Polychaeta. Species novae collectae in* Appalachicola (*Florida*) *a doct.* A. S. Pearse, *A. 1935*]. 12 figs. o. pl., Amer. Mus. Novit., 888, 1-3. New York (1936). **b - 865**

*Autolytus brevicirrata* n. sp. (*Syllidae*), *Phyllodoce unicirrata* n. sp. (*Phyllodocidae*) and *Eupholoe globosa* n.sp. (*Polynoidae*).

## Echinodermata.

**Aretz C.** - Les différentes formes de pédoncules chez les oursins [*De differentibus formis pedunculorum in echinis*]. Mikrokosmos, XXVII, 12, 191-192. Stuttgart (1934). **b - 866**

Cinq différentes formes de pédoncules ont été observées sur une préparation d'*Echinus esculentus*.

**Bassler R. S.** - New Species of American *Edrioasteroidea* [*Species novae in Edrioasteroideis Americanis*]. 7 pls. o. t., Smithson. Misc. Coll. XCV, 6, 1-33. Washington (1936). **b - 867**

This paper completes a former study on the classification of the *Edrioasteroidea* (XCIII, 8, 1-11; 1935) giving descriptions of species not previously described, comments on and illustrations of those already described.

**Chang Feng– Ying** - Additions to the Holothurians of the Chinese Coast [*Addenda ad Holothuria litorum Sinensium*]. 10 figs., Contr. Inst. Zool., Nat. Acad. Peiping, II, 3, 1-18. Peiping (1935). **b - 868**

Description, localities of: *Pentacta inornatus*, *Phyllophorus ordinatus* n. sp., *Ph. spiculatus* n. sp. and *Aphelodactyla hyaloeides*.

**Clark A. H.** - *Crinoidea*. - 1 pl., Brit. Mus. (Natur. Hist.), The John Murray Exped. 1933-34. Scient. Rep., IV, 4, 87-108. London (1936). **b - 869**

**Clark A. H.** - Five New Genera and Two New Species of Unstalked Crinoids [*Genera quinque nova duaeque species novae Antedonidarum*]. Proc. U. S. Nat. Mus. Smithson. Instit., LXXXIII, 2982, 245-250. U. S. Gov. Pr. Off., Washington D. C. (1936). **b - 870**

Description and diagnosis of *Compsometra nuttingi* n. sp., *Annametra* n. g., *Caryometra* n. g., *Eometra* n. g., *Boleometra* n. g., *Retiometra* n. g., *R. alascana* n. sp.

**Clark A. H.** - Four New Brittlestars from Puerto Rico [*Species quattuor novae Ophiuridorum ex* Puerto Rico]. 3 pls., Rep. Coll. Obt. Ist. Johnson-Smithsonian Deep-Sea Exped. Porto Rican Deep, Smithson Miscell. Coll., XCI, 24, 1-8. Smithson. Instit. Washington D. C. (1936). **b - 871**

Description of four new species found among the numerous brittlestars obtained by the First Johnson-Smithsonian Deep-Sea Expedition, 1933, of which the following three, i . e. *Ophiomusium regulare* n. sp., *C. rosaceum* n. sp., and *O. alecto* n. sp. belong to the genus *Ophiomusium* and two are interesting in having the upper of the two arm spines transformed into a hook curving outward from the arm. The fourth species *Ophiocirce antillarum* n. sp. belongs to the genus *Ophiocirce*, a genus of the family *Ophioleucidae* known heretofore only from the Philippine and Lesser Sunda Islands.

**Clark A. H.** - Biological Results of the Snellius Expedition. I. The unstalked Crinoids of the Snellius Expedition [*Resultatus biologici ex expeditione a* Snellius *peracta. I. Crinoidea sine cirris*]. 3 pls., Temminckia, I, 295-320 (?) (1936). **b - 872**

*Basilometra* n. gen., allied to *Epimetra* and *Pontiometra*, with *B. boschmai* n. sp., *Oligometra serripinna* v. *macrobrachius* n. var., *Stenometra snelliusi* n. sp. and *Dorometra andromacha* n. sp. 12 other forms not reported since their original description are also recorded among the more common forms. Bibl. of publications on the E. Indian Crinoid fauna appeared since the « Siboga » Report, March 1918.

**Diebschlag E.** - Ganzheitliches Verhalten bei einigen See - und Schlangensternen [*Modus agendi in Asteroideis et Ophiuroideis*]. Zool. Anz., 9. Suppl. 150-157. Leipzig (1936). **b - 873**

Zwei entgegengesetzte Ansichten sind vorläufig vorgetreten; eine wodurch das Tier als Ganzes in seinem Verhalten gegenüber Umweltreizen aufgefasst und auf die Plastizität seiner Reaktionen hingewiesen wird (Preyer, Jennings, Mangold, v. Buddenbrock, Alverdes); und eine, die die Tiere als Reflexmechanismen, die nur tropotaktisch ihre Orientierungsbewegungen durchführen, auffasst (v. Uexküll, Just u. Köhler). Die hier im Raum und zum Licht ausgeführten Orientierungsversuche sprechen zugunsten der ersteren Ansicht. (Nach Vf.).

**Döderlein L.** - Die Asteriden der Siboga-Expedition. 3. *Oreasteridae* [*Asteroidea ad expeditionem « Siboga » pertinentia*]. 8 Taf., Max Weber's Siboga- Exped., 125 (Monogr. 46). Res. Zool. Bot. Oceanogr., Geol. Expl. Dutch East - Indies 1899-1900, 71-110. E. J. Brill. Leiden (1935). **b - 874**

Key to 17 genera. About 14 new forms.

**Dons C.** - Zoologische Notizen XXVI. *Pseudoporania Stormi* n. gen., n. sp. [*Notitiae zoologicae. XXVI*]. 4 Abb., Kgl. Norsk. Vidensk. Selsk. Forh., VIII, 5, 17-20. Trondheim (1936). **b - 875**

Von dieser neuen, eigentümlichen Asteriden-Gattung sind bis jetzt nur 3 Exemplare vorgefunden worden. Vergleich mit der pazifischen Gattung *Dermasterias*. Diagnose.

**Dons C.** - Norges Strandfauna IX. Ophiurider. X. Echinider. XI. Holothurier [*De fauna litorea Norvegiae. IX. Ophiuroidea X. Echinoidea. XI. Holothurioidea*]. 11 Abb., 1 Tab., Kgl. Norsk. Vidensk. Selsk. Forh., VIII, 12, 37-40; 20, 65-67; 21, 68-70. Trondheim (1936). **b - 876**

IX. *Ophiothrix fragilis* Abildg., *Ophiocomina nigra* (Abildg), *Ophiopholis aculeata* (O. F. Müller), *Amphipholis squamata* (Della Chiaje), *Ophiura robusta* Ayres und *O. albida* Forbes. Fundortsangaben, Austreibung.

X. Bericht über die auf der Strecke Florø-Kirkenes gefundenen 6 Echiniden. Ortsangaben.

XI. Verzeichnis mit Fundortsangaben von 6 Arten: *Cucumaria frondosa* (Gunnerus), *Phyllophorus pellucidus* (Fleming), *Psolus phantapus* (Strussenfelt), *P. squamatus* (Koren), *Leptosynapta inhaerens* (O. F. Müller), *Chirodota laevis* (Fabricius).

Synonymies. On doit employer le nom de *Dorippe lanatus* L.

**Balss H.** - Ueber *Sesarma (Chiromantes) kamermani* de Man (*Crustacea Decapoda*) [*De Sesarma (Chiromantes) kamermani*]. 1 Taf. a. T., Bull. Mus. R. Hist. Natur. Belgique, XII, 30, 1-3. Bruxelles (1936). **b - 958**

Von dieser Art ist früher nur ein Exemplar von Mussera (Angola) bekannt geworden, das De Man in « Notes from Leyden Mus. » V, 165, 1883 beschrieben hat, Beschreibung und Verwardtschaft.

**Balss H.** - The Fishery Grounds near Alexandria. *Decapoda* [*Fundi piscatorii Alexandriae. Decapoda*]. 40 figs. Fish. Res. Directorate, Min. Comm. & Ind., VII, Not. & Mém. 15, 1-67. Cairo (1936). **b - 959**

Systematic list of 63 species, 51 of which belong to the Mediterranean fauna. Habitat and geographical distribution. List of the Stations and of the *Decapoda* found at them. Comparison of *Decapoda* near Alexandria with those of the Adriatic.

**Barnard K. H.** - Isopods collected by the R. I. M. S. « Investigator » [*Isopoda collecta a navi ad explorationes idonea, nomine* « Investigator »] 12 figs., Rec. Indian Mus., XXXVIII, 2, 147-191. Calcutta (1936). **b - 960**

A collection of 34 species, littoral, shallow-water and deep-water species. Seven spp. are described as new. For every species are given: bibliographical records, localities, remarks, distribution and of the new forms descriptions.

**Brehm V. & Chappuis P. A.** - Mitteilungen von der Wallacea - Expedition. 11. *Diaptomus* s. l. (*Heliodiaptomus ?*) *kieferi* n. sp. und *Schizopera tobae* subsp. nov. *Woltereck*i [*Informationes de expeditione nomine* Wallacea 11]. 4 Abb., Zool. Anz., CXI, 9/10, 237-240. Leipzig (1935). **b - 961**

Beschreibung und Ortsangabe.

**Burkenroad M. D.** - The *Aristaeinae, Solenocerinae* and Pelagic *Penaeinae* of the Bingham Oceanographic Collection [« *Aristaeinae* » « *Solenocerinae* » et « *Penaeinae* » *pelagicae ad collectionem oceanographicam* Bingham *pertinentes*]. 71 fig., Bull. Bingham Oceanogr. Coll., Peabody Mus. Nat. Hist., V, 2, 2-151. New Haven, Conn (1936). **b - 962**

The material was principally obtained during the Atlantic, Pacific, Bermudan and Bahaman operations of the S. S. « Pawnee ». List of stations, systematic description and discussion of genera and species of Decapod Crustaceans collected. The *Aristaeinae* and *Solenocerinae* are chiefly Oceanic, the *Penaeinae* and *Eusicyoninae* chiefly littoral in habitats. The litoral peneid faunas of the Atlantic and Pacific American coast are more nearly related to one another than to the faunas of other regions of the world; the deep-water forms common to Atlantic, Indo-pacific and Pacific-America are found to have maintained their identity by circumferential continuity.

**Chopra B.** - Further Notes on *Crustacea Decapoda* in the Indian Museum. VIII [*Notae ulteriores de Crustaceis decapodis ad Museum Indianum pertinentibus. VIII*]. 18 figs., Tables, 1 pl., Rec. Indian Mus., XXXVIII, 4, 463-514. Calcutta (1936). **b - 963**

Notes on the Decapod Crustaceans collected bythe Bengal Pilot Service off the mouth of the Hooghly River; account of the remaining crabs, comprising *Brachygnatha* (*Oxyrhyncha and Brachyrhyncha*), of which the *Corystida, Gomeza distincta* (de Hann) var. *indica* is new to science.

**Clarke G. L.** - Factor affecting the vertical Distribution of Copepods [*Factores qui influunt in distributionem verticalem Copepodorum*]. Ecol. Monogr., IV, 530-540. Durham, N. C. (1934). **b - 964**

Influence of light, gravity, weight, temperature on the vertical distribution of Copepods, which can adjust their position with the necessary speed through their own swimming activity.

**Clarke G. L.** - The Rôle of Copepods in the Economy of the Sea [*Functio Copepodorum pro maris oeconomia*]. Proc. Fifth Pacific Sc. Congress Victoria & Vancouver, 2017-2022. Toronto (1934). **b - 965**

Importance of the Copepods as food for Fishes and Cetaceans. Studies on the food of the Copepods for the determination of the economy of the sea.

**Coifmann I.** - Alcuni *Mysidacea* nuovi raccolti dal Prof. L. Sanzo nella crociera della Regia nave « Ammiraglio Magnaghi » al Mar Rosso. 1923-24. [*Mysidacea quaedam nova collecta a prof.* L. Sanzo *inter navigationem Regiae navis* « Ammiraglio Magnaghi » *Mari Rubro. 1923/24*]. 5 fig., Boll. Zool. VII, 2/3, 83-88. Napoli (1936). **b - 966**

L'A. illustra alcuni nuovi Misidacei del Mar Rosso; *Pseuderythrops gracilis* n. gen. n. sp., *Meterithrops affinis* n. sp., *Gymnerthrops microps* n. sp., *Echinomysis distinguenda* n. sp.

**Crawford G. I.** - Additions to the Plymouth Marine Fauna (1931) in the Crustacean Orders *Tanaidacea, Isopoda* and *Amphipoda* [*Addenda Crustaceorum ad faunam marinam* Plymouth (*1931*)]. Journ. Mar. Biol. Ass., n. ser., XXI, 1, 95-106. Plymouth (1936). **b - 967**

Systematic list containing 2 species of *Tanaidacea*, 6 of *Isopoda* and 3 of *Amphipoda* collected by A. in 1934-1935.

**Darby H. H.** - The Mechanism of Chela Differentiation in the *Crustacea* [*De differentiatione chelarum in Crustaceis*]. 13 tabl., Pap. Tortugas Labor., XXIX, 153-170. Washington (1936). **b - 968**

This paper presents further evidence on A:s theory of a discontinuous elaboration of a definite chemical entity for the chela differentiation which is comparable with the male sex hormone of other animals. By means of experiments on *Crangon armillatus* it has been possible to determine the time for differentiation of snapclaw, influencing factors as temperature and irradiation.

**David R.** - Recherches sur la biologie et l'intersexualité de *Talitrus saltator* Mont [*Investigationes in biologiam et intersexualitatem speciei* « *Talitrus saltator* »]. 17 fig., Bull. Biol. France et Belgique, LXX, 332-357. Paris (1936). **b - 969**

Epoque de reproduction de cet Amphipode, développement de l'œuf, mue et accouplement. Examen des appareils reproducteurs et présence d'ovocytes qui n'arrivent pas à développement complet dans les testicules de certains exemplaires. Aussi d'autres amphipodes, tels *Talorchestia Deshayesi* et *Orchestia mediterranea, O. gammarella* et *O. Montagui*, présentent d'individus intersexués.

**Gordon I.** - On two New Species of *Crustacea* from Christmas Island [*Species duae novae e Crustaceis in insula* Christmas]. 3 figs., Ann. & Mag. Natur. Hist., XVI, 96, 629-637. London (1935). b - 983

*Orthopagurus harmsi* n. sp. and *Gonodactylus quinquelobatus* n. sp., Besides, 11 *Macrura*, 8 *Anomura*, 1 *Brachyura* and 4 *Stomatopoda* are recorded from Christmas and Lingula Isl. and Belawan, Sumatra.

**Gravier Ch.** - Sur un Crustacé (Stomatopode) rare de l'Ile de Pâques [*De Crustaceo quodam raro ad* Ile de Pâques *pertinenti*]. 1 fig., Bull. Mus. Nat. Hist. Natur., Sér. 2, VIII, 3, 254-256. Paris (1936). b - 984

Description de *Pseudosquilla oxyrhyncha* Borradaile, dont un seul autre exemplaire a été trouvé en 1898.

**Gurjanova E.** - Contribution to the Fauna of *Crustacea malacostraca* of the Arctic Region [*Crustacea malacostraca. Contributio in eorum faunam in regione Arctica*]. (In Russ.; Engl. Summ.). 4 figs., Trans. Arct. Inst., XXXIII, 31-44. Leningrad (1936). b - 985

Author gives a list of the species of *Amphipoda* and *Isopoda* collected by the expeditions to the Arctic Institute in 1932, containing information as to the locality where they were gathered. In the studied material of *Amphipoda* from the Kara Sea, the Sea of Brothers Laptev and the Tschukhotsk Sea one genus *Melitoides* Gurjan. and the following three species: *Melitoides makarovi* Gurjan., *Pardaliscella lavrovi* Gurjan., and *Apherusa retovskii* Gurjan., are new to science. Description and diagnosis.

**Gurjanova E.** - Beiträge zur Amphipodenfauna des Karischen Meeres [*Contributio in Amphipodorum faunam in Mari* Karensi]. 3 Abb., Zool. Anz., CXVI, 5/6, 145-152. Leipzig (1936). b - 986

Die hier behandelten, während der « Sedow » Expedition im Sommer 1934 gesammelten, Arten geben sehr wichtige Aufschlüsse über den Faunenwechsel zwischen den Tiefen des Grönländischen und Norwegischen Meeres einerseits und dem Karischen Meere anderseits sowie auch über einige andere zoogeographische Erscheinungen. Drei neue Arten: *Stegocephalopsis wagini* n. sp., *Cressa bereskini* n. sp., *Pardaliscella malygini* n. sp.; 29 Arten sind neu für das Karische Meer.

**Gurney R.** - Notes on some Decapod *Crustacea* of Bermuda. I. The Larvae of *Leptochela* and *Latreutes* [*Notae de Crustaceis Decapodis ex insulis* Bermuda. *I.* « *Leptochela* » *et* « *Latreutes* ». *Larvae*]. 6 pls., Proc. Zool. Soc. London, 4, 785-793. (Contr. Bermuda Biol. Stat. N. 32, St. George's West, Bermuda). London (1935-1936). b - 987

Correspondence in development between *Leptochela*-species from the Barrier Reef and the Bermuda. Five larval stages are distinguished. The mandible of the larva is of perfectly normal Caridean type. The reduction of legs 4 and 5 and the complete absence of their exopods and of pleopod 1 in the larva are facts unknown in any other Caridean. Stage I of *Latreutes*.

**Gurney R.** - Notes on some Decapod *Crustacea* of Bermuda. II. The Species of *Hippolyte* and their Larvae [*Notae de quibusdam Crustaceis*

*Decapodis ex insulis* Bermuda. *II. Larvae generis « Hippolyte »*]. 5 pls., Proc. Zool. Soc. London, 1, 1-32. (Contr. Bermuda Biol. Stat. Nº 39, St. George's West, Bermuda). London (1936). **b - 988**

Until now only one species, *Hyppolyte acuminata* Dana, was recorded from Bermuda. Another species found by A. was compared to American forms and identified as a new subsp., *Hippolyte pleuracantha Bermudensis*. Full description of those forms. Table showing numbers of spines on outer face of merus of 8 forms. Six larval stages, one post-larval stage.

**Gurney R.** - Notes on some Decapod *Crustacea* of Bermuda III–V [*Notae de quibusdam Decapodis* (*Crustaceis*) *ex insulis* Bermuda *provenientibus*]. 70 figs. on 7 pl., Proc. Zool. Soc. London, 3, 619-630. (Contr. Bermuda Biol. Stat. Nº 46, St. George's West, Bermuda). London (1936). **b - 989**

Description of the larvae of several species of *Palaemonidae*, and in particular: *Anchistioides antiguensis*, *Periclimenes americanus*, *Mesocaris recurva*, *and Processa bermudensis*. The first Zoea of *Heteractaea ceratopus*.

**Gustafson G.** - On the *Thalassinidea* of the Swedish West Coast [*Thalassinidea ad litora occid. Suetiae pertinentes*]. 4 figs., Ark. f. Zool., XXVIII A., H, I, 1, 1-19. Stockholm (1935). **b - 990**

*Upogebia deltura*, *U. stellata* and *Callianassa subterranea* which have been formerly considered as rare on the Swedish West coast are here recorded in rather large quantities. Information on the habitats of these species.

**Hiro F.** - Description of Three New Species of *Cirripedia* from Japan [*Descriptio trium novarum specierum ex Cirripediis Japonicis*]. 3 figs., Bull. Biogeogr. Soc. Jap., VI, 23, 221-230. (Contr. Seto Mar. Biol. Labor. Nº 51). Tokyo (1936). **b - 991**

*Heteralepas* (*Paralepas*) *globosa* sp. n., *Octolasmis clavula* sp. n., *Chthamalus Pilsbryi* sp. n.

**Hiro F.** - Report on the *Cirripedia* Collected in the Malayan Waters by the Ship « Zuihô-Maru » [*De Cirripediis collectis in aquis regionis Malesiae a navi* « Zuihô –Maru »]. 9 figs., 2 tables, Jap. Journ. Zool., VI, 4, 621-636. Tokyo (1936). **b - 992**

Description of a small collection of eleven species of cirripeds brought to the author by the « Zuihô-Maru » the surveying ship of the South Islands Bureau, from the Malayan waters (mainly from the Banda Sea). Of the described species the following two are new to science: *Balanus cuneiformis* n. sp., and *Acasta zuiho* n. sp.

**Hugh F. R.** - A Contribution toward the Life Histories of Two California Shrimps, *Crango franciscorum* (Stimpson) and *Crango nigricauda* (Stimpson) [*Contributio in studendum cyclum vitae specierum Californiensium « Crango franciscorum » et « C. nigricauda »*]. 9 figs., 12 tabl., 28 pp., Div. Fish and Game California, Bur. Comm., Fish., Fish. Bull., 46. Sacramento (1936). **b - 993**

History of the Fishery from 1869 until now: types of fishing gear used, chiefly the Chinese shrimps net, localities fished and the species of shrimps caught: *C. franciscorum*, *C. nigricauda* and *C. nigromaculata*. General features of the life histories and data of these shrimps: breeding season, young shrimp and various percentages of length frequencies, number of young samples etc. Composition of the commercial catch.

**Huzinaga M.** - Studies on the Development of *Penaeus japonicus* Bate. I. Report [*Studia de accretione speciei « P. Japonicus ». Relatio prior*]. (In Jap.; Engl. Summ.). 16 pls., Rep. Hayatomo Fish. Inst., I, 1, 1-51. Hayatomo (?) (1935). **b - 994**

Results of a study on fertilized eggs of *P. Japonicus* Bate spawned by copulated female during the period immediately following the spawning until the mysis stage. In spite of the abundance of the eggs, only a small number of mysis was obtained. The description of all the stages is very minute and well illustrated by 147 figures.

**Ii Naoyosi** - Studies on Japanese *Mysidacea*. I. Descriptions of New and Some Already Known Species Belonging to the Genera, *Neomysis*, *Acanthomysis* and *Proneomysis* [*Studia de Mysidaceis Japonicis. I. Descriptio specierum novarum specierumque notarum ad genera « Neomysis », « Acanthomysis » et « Proneomysis » pertinentium*]. Jap. Journ. Zool., VI, 4, 577-619. Tokyo (1936). **b - 995**

This description contains many new facts with respect to taxonomy, distribution, and habits of *Mysidacea*. This I part deals with ten species, of which two belong to the genus *Neomysis*, four to *Acanthomysis*, and four to *Proneomysis*. Of these species the following seven are new to science: *Neomysis nakazawai* n. sp., *Acanthomysis longirostris* n. sp., *A. dimorpha* n. sp., *Proneomysis fusca* n. sp., *P. eriopedes* n. sp., *P. misakiensis* n. sp., and *P. perminuta* n. sp.

**Ii Naoyosi** - Studies on Japanese *Mysidacea*. II. Descriptions of three new Species belonging to two new Genera, *Parastilomysis* and *Paracanthomysis* [*Studia de Mysidaceis Japonicis. II. Descriptio trium novarum specierum ad genera duo nova « Parastilomysis » et « Paracanthomysis » pertinentium*]. 41 figs., Jap. Journ. Zool., VII, I, 5-15. Tokyo (1936). **b - 996**

*Parastilomysis paradoxa* n. sp., *Paracanthomysis hispida* n. sp. and *P. kurilensis* n. sp. Remarks and localities.

**Jakubisiak S.** - Matériaux à la faune des Harpacticoïdes de Roscoff (côtes bretonnes, France) [*Res collectae ad studendam faunam ad* Roscoff *pertinentem. « Harpacticoidea »*]. (En franç., rés. polon.). Fragm. faun. Mus. zool. Polon., II, 28, 315-321. Warszawa (1936). **b - 997**

Liste de 62 espèces, réparties en 29 genres, dont plusieurs n'ont pas été signalées dans l'étude de Monard.

Nach einigen einleitenden Bemerkungen über das Eindringen dieser Art in Europa gibt Vf. einen Bericht über ihr Vorkommen in dänischen Gewässern seit 1927.

**John D. D.** - The Southern Species of the Genus *Euphausia* [*Species meridionales ad genus « Euphausia » pertinentes*]. Discovery Report, XI, 193-324. Univ. Press. Cambridge (1936). **b - 999**

**Johnson M. W.** - *Pachyptilus pacificus* and *Centraugaptilus porcellus*, two new Copepods from the North Pacific [« *Pachyptilus pacificus* » *et*

*« Centraugaptilus porcellus ». Copepodi duo novi ab Oceano Pacifico septentr. provenientes*]. 3 figs., Bull. Scripps Inst. Oceanogr., Univ. California, IV, 2, 65–70. Berkeley (1936). **b - 1000**

Description and remarks.

**Karlovac O.** - *Parapenaeus longirostris* (H. Lucas) an der Ostküste der Adria [*Parapenaeus longirostris » in litoribus orientalibus Maris Hadriatici*]. 1 Abb., Zool. Anz., CXV, 1/2, 60-62. Leipzig (1936). **b - 1001**

Durch den Fund von *Parapenaeus longirostris* am 10. Juni 1935 im Bracki – Kanal ist das Vorkommen dieser Art an der Ostküste der Adria festgestellt worden.

**Kobjakova Z.** - Uebersicht der Dekapoden-Gattung *Pandalopsis* Bate [*Genus « Pandalopsis » Conspectus*]. 4 Abb., Zool. Anz., CXVI, 7/8, 185-194. Leipzig (1936). **b - 1002**

Der z. Z. 7 Arten enthaltenden *Pandalopsis*– Gattung werden hier 4 neue Arten hinzugefügt: *P. multidentatus, P. ochotensis, P. punctatus* und *P. aleutica glabra* subsp. n. Bestimmungstabelle der *Pandalopsis*– Arten.

**Kossiackina E. G.** - On the *Copepoda Harpacticoida* of the Novorossiysk Bay [*Copepoda Harpacticoida in Baja* Novorossiysk]. (In Russ., Engl. Rés.). Works Arnoldi Biol. Stat., II, I, 113-114. Novorossiysk (1936). **b - 1003**

List of 27 species found during the years 1932-1936.

**Kubo I.** - A New Decapod Crustacean from Japan, *Paramaja Kominatoensis* gen. et sp. nov. [*« Paramaja Kominatoensis » crustaceus decapodus novus Japonicus*]. 2 figs., Bull. Jap. Soc. Scient. Fish., IV, 6, 361-364. (Contr. Zool. Lab., Imp. Fish. N. 43). Tokyo (1936). **b - 1004**

Description based on a male specimen obtained from Kominato at a depth of about 200 fathoms. Dimensions of carapace, merus, carpus, propodus, dactylus and branchial formula.

**Kubo I.** - A Description of a new Alpheoid Shrimp from Japan [*Descriptio novi Alpheidei Japonici*]. 1 pl., Journ. Imp. Fish. Inst., XXXI, 2, 43–54. Tokyo (1936). **b - 1005**

*Athanas japonicus* sp. nov.

**Kubo I.** - On Japanese Penaeid Crustaceans belonging to the Genus *Parapenaeopsis*, with a Description of one New Species [*De Crustaceis Penaeideis Japonicis ad genus « Parapenaeopsis » pertinentibus. Descriptio novae speciei*]. 1 fig., 2 tabl., Journ. Imp. Fish. Inst., XXXI, 2, 55-61. Tokyo (1936). **b - 1006**

Description of *Parapenaeopsis brevirostris* sp. n. and statistical observations on *P. tenella*, both from the Inland Sea of Japan. Key to Japanese species of this genus.

**Lang K.** - Harpacticiden aus dem Mittelmeer [*Harpacticidae maris Mediterranei*]. Fysiogr. Sällsk. Lund Förh. 1935, V, 87-98. Lund (1936). **b - 1007**

Beschreibung von neun Arten, von denen eine, *Dactylopusia mediterranea*, neu ist.

**Lang K.** - Die während der schwedischen Expedition nach Spitzbergen 1898 und nach Grönland 1899 eingesammelten Harpacticiden [*Harpacticidae collectae inter expeditionem Suetiam ad* Spitzberg *A. 1898 et ad Groenlandiam A. 1899*]. 117 Abb., Kungl. Sv. Vetensk. Handl., XV, Ser. 3, 4, 1-55. Stockholm (1936). **b - 1008**

Beschreibung mit Angabe von Fundort und Verbreitung von etwa 50 Arten, in denen zwei neue Genera, 15 neue Spezies und zwei neue Variationen enthalten sind. Die meisten der neuen Arten stammen aus grösseren Tiefen wie 1750 und 2700 m.

**Lang K.** - Beiträge zur Kenntnis der Harpacticiden. 3. Die Gattung *Pseudomesochra* T. Scott nebst Beschreibung einer neuen Art dieser Gattung [*Investigationes circa Harpacticidae. 3. Genus « Pseudomesochra » cum descriptione novae speciei ad hoc genus pertinentis*]. 8 Abb., Zool. Anz., CXIII, 7/8, 174-177. Leipzig (1936). **b - 1009**

*Pseudomesochra* gehört weder den *Canthocamptide*, noch den *Cletodidae* oder *Tachidiidae* an, sondern sie ist eine *Diosaccidae* und steht der Gattung *Stenhelia* Boeck am nächsten. Bestimmungstabelle der *Pseudomesochra*. Weibchen. *P. similis* n. sp.

**Lang K.** - Beiträge zur Kenntnis der Harpacticiden. 7. Die Familie *Anchorabolidae* Sars, nebst Beschreibung einer neuen *Laophontodes*–Art [*Contributiones in Harpacticidas cognoscendas. 7. Familia « Anchorabolidae », cum descriptione novae speciei « Laophontodes »*]. 5 Abb., Zool. Anz., CXV, 5/6, 152-156. Leipzig (1936). **b - 1010**

Diagnose der Familie *Anchorabolidae*, Bestimmungstabelle der Gattungen, Bemerkungen über die Gattung *Laophontodes* T. Scott mit Bestimmungstabelle. *Laophontodes gracilipes* n. sp. Fundort.

**Lebour M. V.** - Notes on the Plymouth Species of *Spirontocaris* (*Crustacea*) [*Notae de specie « Spirontocaris » (Crustacea) ad* Plymouth *pertinenti*]. 7 pls., Proc. Zool. Soc., 1, 89-104. London (1936). **b - 1011**

Two forms of *Spirontocaris* have been distinguished of the genus occurring at Plymouth: *S. cranchii*, and *S. occulta*, which though seen before was considered as a new form. Description of larvae and adults, comparison with the larval forms of *Hippolyte*.

**Lochhead J. H.** - Body Orientation of the Lower *Crustacea* (*Branchiopoda*) [*Corporis orientatio in Crustaceis inferioribus*]. Nature, CXXXVIII, 3484, 232-233. London (1936). **b - 1012**

Referring to works of Lowndes, Wertheim, Müller, Seifert, Wagler and Mathias A. discusses four principal controlling factors for orientation among the *Anostraca* and *Notóstraca*, namely the aeration of the water, gravity, the surface resistance of the animal, and light.

**Lowe E.** - On the Anatomy of a Marine Copepod, *Calanus finmarchicus* (Gunnerus) [*De anatomia alicuius Copepodi marini « Calanus finmarchicus »*]. Trans. R. Soc. Edinburgh, LVIII, 3, 561-603. Edinburgh (1936). **b - 1013**

External form. Endoskeleton. Main longitudinal muscles of the thorax. Alimentary canal. Hydrostatic organ. Excretory system. Circulatory system. Nervous system. Genital system. Bibl.

**Lunz G. R. Jr.** - The Stomatopods (mantis shrimps) of the Carolinas [*Stomatopoda ad regionem* Carolinas *pertinentia*]. 6 figs., Journ. Elisha Mitchell Sc. Soc., LI, 151-159. Chapel Hill N. C. (1935) **b - 1014**

List with keys and descriptions of the Stomatopod *Crustacea* of North and South Carolina: *Lysiosquilla excavatrix, L. scabricauda* and other spp.

**Makarov W. W.** - Beschreibung neuer Dekapoden- Formen aus den Meeren des Fernen Ostens [*Decapoda. Descriptio novarum formarum a maribus orientalibus provenientium*] 4 Abb., Zool. Anz., CIX, 11/12, 319-324. Leipzig (1935). **b - 1015**

*Hetairus zebra* n. sp., Berings Meer und Awatscha Bucht; *Pandalus borealis*, v. *eous* n. var. Berings Meer; *Callianassa gigas* v. *japonica* n. var., Japanisches Meer.

**Meyer P. F.** - Die Nordseekrabbe (Granat, Garnele) *Crangon vulgaris* Fabr. im Jadebusen [« *Crangon vulgaris* » *in Sinu* Jade]. 14 Abb., 14 Tab., Ztschr. f. Fisch., XXXIV, 3, 319-358. Neudamm & Berlin (1936). **b - 1016**

Geographische und hydrographische Verhältnisse, die Granatfischerei im Jadebusen. Untersuchungsmaterial. Ergebnisse: Bestandsuntersuchungen, Wachstum und Alter, der Einfluss hydrographischer Faktoren auf den Granatbestand. Vorschläge zum Ausbau der Granatfischerei im Jadebusen.

**Monard A.** - Les Harpacticoïdes marins de la Région de Salammbô [*Harpacticidae marinae regionis* Salammbô]. 145 fig., Bull. Stat. Océanogr. Salammbô, 34, 3-95. Tunis (1935). **b - 1017**

Les recherches de l'A. sont les premières qui ont été faites systématiquement sur la côte africaine de la Méditerranée. Abondance caractéristique de *Enhydrosoma propinquum* dans la boue du fond de El Bahira.

Complément ou rectification de certains points de systématique et description d'un nouveau genre et de treize nouvelles espèces. Liste des principales Stations méditerranéennes où les Harpacticoïdes ont été étudiés; leur distribution et habitat.

**Orton J. H.** - Experiments in the Sea on Rate of Growth of some Crustacea Decapoda [*Experientiae de velocitate accretionis in mari aliquorum Crustaceorum Decapodorum*]. 2 figs., Journ. Mar. Biol. Ass., XV, 3, 673-689. Plymouth (1936). **b - 1018**

Experiments with *Carcinus maenas*, *C. pagurus*, *Portunus puber*, *P. arcuatus*, and some others. Results expressed in table concerning maximum time required for growth.

**Ottestad P.** - On Antarctic Copepods from the « Norvegia » Expedition [*De Copepodis antarcticis inter expeditionem navis* « Norvegia » *collectis*]. Scient. Res. Norw. Antarctic Exped., 15, Oslo (1936). **b - 1019**

Biology: spawning periods, places, and distribution of *Calanus acutus*, *C. propinquus*, *Rhincalanus gigas*, and *Metridia gerlachei*. New information on the spawning of *Rhincalanus gigas*.

**Paulian R.** - L'existence d'un stade critique dans la croissance relative de l'*Eupagurus Prideauxii* (Crustacé Anomure) [*De exsistentia stadii cuiusdam critici in accretione relativa speciei* « *Eupagurus Prideauxii* » (*Crustacea Anomura*)]. C. R. Soc. Biol., CXXI, 435-437. Paris (1936). **b - 1020**

Jusqu'à une longueur d'aire gastrique de 11,5 mm. la croissance relative des pinces de l'*Eupagurus Prideauxi* suit la loi de dysharmonie simple; aux tailles supérieures les choses se compliquent selon l'appendice droite ou gauche considéré. La mue critique se place à une longueur de 12-13 millimètres.

**Pesta O.** - Marine Harpacticiden aus dem Hawaiischen Inselgebiet II. Beitrag [*Harpacticidae marinae ad archipelagus hawaiianum pertinentes. Contributio secunda*]. 8 Abb., Zool. Jahrb. Abt. Syst. Ökol, u. Geogr. Tiere, LXVI, 5, 363-379. Jena (1935). **b - 1021**

Vergleichende Untersuchung von 22 Arten von *Peltidium*. – *P. hawaiiense*, *P. Monardi*, *P. scotti* und *P. clavigerum* sind neu.

**Pesta O.** - Krebstiere oder *Crustacea*. Ruderfüsser oder *Copepoda* (*Monstrilloida*; *Notodelphyoida*; *Caligoida*; *Lernaeoida*) [*Crustacea–Copepoda*]. Die Tierwelt Deutschl. u. d. angrenz. Meeresteile nach ihren Merkmalen u. nach ihrer Lebensweise. Teil 29, Nr. 1; 4; 5; 6; 7. Gustav Fischer. Jena (1936). **b - 1022**

Dieser Teil bezieht sich auf die parasitischen und halb-parasitischen Formen von *Copepoda*.

**Poulsen E. M.** - De danske Farvandes Rurer (*Balanomorpha* og *Verrucomorpha* [« *Balanomorpha* » *et* « *Verrucomorpha* » *in aquis Danicis*]. (Dtsch. Rés). 10Abb., 3Taf., Vidensk. Medd., XCIX, 5-27. København (1935-36). **b - 1023**

Beschreibung von *Verruca stroemia* und fünf *Balanus*-Arten. Ihre Verbreitung im Verhältnis zur Tiefe und zum Salzgehalt.

**Rammner W.** - *Artemia salina* auf Bonaire, Curaçao und St-Martin [« *Artemia salina* » *in* Bonaire, Curaçao *et* St. Martin]. 5 Abb., Zool. Jahrb. Abt Syst. Ökol. u. Geogr. Tiere, LXVII, 353–362. Jena (1936). **b - 1024**

Die hier auf diesen drei Inseln gefundene Art war früher nur von S. Domingo und Hawaii-Inseln bekannt. Drei verschiedene Formen, ohne Beziehung mit dem Salzgehalt, sind unterschieden worden. Vorherrschung männlicher Individuen.

**Retowski L.** - Zur Kenntnis der Decapodenfauna der Asiatischen Arktis [*Studia ad faunam cognoscendam Decapodorum ad Arctidem Asiaticam pertinentium*]. Trans. Arct. Inst., XXXIII, 7-29. Leningrad (1936). **b - 1025**

An Hand eines umfangreichen Materials aus den Sammlungen von drei arktischen Expeditionen, bzw. der « Lomonosow–Expedition » im nördlichen Teil der Kara-See (1931), der « Sibirjakow-Expedition » längs der asiatischen Küste von Severnaja Zemlja und von Nowaja Zemlja bis zur Beringsstrasse (1932) und der « Russanow–Expedition » in das Gebiet von Severnaja Zemlja (1932) ist die Beschreibung von neuen verschiedenen Decapodenarten gegeben, nebst Data über Bodenbeschaffenheit, hydrologische Verhältnisse, Altersbestand und Geschlecht der Formen, sowie einzelne Charakteristika derselben.

**Schäfer H. W.** - Cyclopiniden (*Crustacea Copepoda*) aus der deutschen Nordsee [« *Cyclopinida* » *maris Nordici Germanici*]. 20 Abb., Zool. Anz., CXIV, 225-234. Leipzig (1936). **b - 1026**

*Cyclopina latipes* n. sp., *C. Kieferi* n. sp., *C. brachystylis* G. O., Sars, *C. gracilis* Claus, *C. elegans* Scott, *C. littoralis* (Brady). Schlüssel. Klassifikation.

**Schellenberg A.** - Zwei neue Amphipoden des Stillen Ozeans und zwei Berichtigungen [*Amphipoda duo nova Oceani Pacifici. Duae correctiones*]. 1 Abb., Zool. Anz., CXVI, 5/6, 153-159. Leipzig (1936). **b - 1027**

*Aristias pacificus* sp. n. und *Elasmopus ecuadorensis* n. sp. Fundort, Beschreibung und Vergleich mit verwandten Arten. *Grandidierella africana* sp. n., früher unter *G. gravipes* eingeordnet, muss als besondere Art gelten, so auch *Orchestia malayensis* var. *thienemanni* Schellbg.

**Schubert K.** - In 25 Jahren der dritte Krebs nach Deutschland eingewandert [*Tertia cancrorum species in Germania reperitur abhinc 25 annos*]. Fischmarkt, IV, 11, 304-305. Cuxhaven (1936). **b - 1028**

Kurzer Bericht über ein massenhaftes Vorkommen von kleinen Krabben in der Nähe von Kiel, *Pilumnopeus tridentatus* Maitland. Die Verbreitung dieser Art.

**Sexton E. W. & Clark A. R.** - A Summary of the Work on the Amphipod *Gammarus chevreuxi* Sexton carried out at the Plymouth Laboratory (1912–1936) [*Compendium de operibus peractis circa amphipodum « Gammarus chevreuxi » in laboratorio* Plymouth]. Journ. Mar. Biol. Ass., n. ser XXI, 1, 357-414. Plymouth (1936). **b - 1029**

Conditions of *Gammarus chevreuxi* in the wild. Description: moulting and development, the question of telegony. Mutant characters as they appeared in the laboratory cultures. The experiments are described and partially expressed in tables.

**Shen Chia-Jui** - Notes on the Family *Hapalocarcinidae* (Coral-Infesting Crabs) with Descriptions of two New Species [*Hapalocarcinidae (cancri corallia infestantes). Descriptio duarum novarum specierum*]. Kong Kong Natural. (Suppl.) 5, Part 5. Hong Kong (1936). **b - 1030**

Only two valid genera are recognized in the *Hapalocarcinidae* Stimpson, namely *Hapalocarcinus* and *Cryptochirus*. The two new spp are: *Chriptochirus hongkongensis* and *C. granulatus*.

**Smirnov S.** - Zur Systematik der Copepoden-Familie *Cyclopinidae* G. O. Sars [*Copepodorum familia « Cyclopinidae ». Quaestio de systematica*]. 11 Abb., Zool. Anz., CIX, 7/8, 203-210. Leipzig (1935). **b - 1031**

*Paracyclopina; P. nana* n. sp. Beschreibung von *Cyclopina barentsiana, C. brachystylis* und *C. pacifica* ♀ n. sp.

**Smirnov S.** - Ueber die angebliche *Oothrix bidentata* Farran aus dem Weissen Meer [*De opinata specie « Oothrix bidentata » Maris Albi*]. 4 Abb., Zool. Anz., CIX, 9/10, 259-263. Leipzig (1935). **b - 1032**

*Copepoda Neoscolecithrix farrani* n. sp. U. S. S. R.

**Stead D. G.** - Edible Crustaceans of Sydney Harbour [*Crustacea edulia in portu* Sydney]. 4 fig., Austral. Natur., 9, 103-110. Sydney (1935). **b - 1033**

The most common species are: *Jasus verreauxi, J. lalandii*, three species of *Penaeus, Scylla serrata, Neptunus pelagicus, N. sanguinolentus* and *Charybdis cruciata*.

**Stephensen K.** - *Copepoda* found on *Limnoria lignorum* [*Copepoda in specie « Limnoria lignorum » inventa*]. 4 figs., 10 pp., Kgl. Norsk. Vidensk. Selsk. Skr. 1935, II, 39. Trondheim (1936). **b - 1034**

Determination of 8 species of *Copepoda Harpacticoida* collected by Dr Dons near Trondheim in 1930 and 1931. One new genus and species: *Donsiella limnoriae*.

**Steuer A.** - *Cumacea* und *Stomatopoda* von Alexandrien in Ägypten [« *Cumacea* » *et* « *Stomatopoda* » *Alexandriae, in Aegypto*]. 16 Abb., Not. Ist. Biol. Rovigno, 21, 3-19. Jena (1936). **b - 1035**

Von den drei erbeuteten Cumaceenarten wurden *Iphinoe tenella, Eochuma Sarsii* und *Bodotria scorpioides* forma *mediterranea* nur in der Anfouchi-Bay gefunden, während für die Nordadria die Variation f. *septentrionalis* festgestellt werden konnte.

Von Stomatopoden wurden *Squilla mantis* (L.) und ein jugendliches Männchen von *Squilla africana* Calman gefischt, bisher nur von der westafrikanischen Küste bekannt (Nach Vf.).

**Takasiba A.** - Biological Study of the Crab, *Neptunus trituberculatus* Miers, with Some Notes on the Relation of the Meat Amount and Lunar Phase [*Studium biologicum cancri « Neptunus trituberculatus », cum notis de correlatione inter carnis accretionem et lunae phases*]. (In Jap.). Journ. Imp. Fish. Exp. Stat., VI, 2, 86-96. Tokyo (1934). **b - 1036**

Results of observation on mating, spawning and moulting. Statistic study of the amount of meat in relation to the lunar phase made on 816 individuals obtained in full and new moon periods from April to December proving that there is no intimate and definite relation between the lunar phase and meat amount as supposed.

**Tanaka O.** - Copepods of Sagami Bay. I. Fam. *Eucalanidae* [*De Copepodis in Baja* Sagami. *I. Familia « Eucalanidae »*]. (In Jap.). 2 figs., 1 pl., Journ. Imp. Fish. Exp. Stat., VI, 4, 142-165. Tokyo (1935). **b - 1037**

Revision and description of copepods of the family *Eucalanidae* living in the Sagami Bay. The 12 species described are all known to science. On hand of observations of the immature forms, author shows that several species, which have been considered independent, are certain development stages of species previously known.

**Tanaka O.** - Copepods of Sagami Bay. II. Fam. *Candacidae* [*De Copepodis in Baja* Sagami. *II. Familia « Candacidae »*]. (In Jap.). 6 pls., Journ. Imp. Fish. Exp. Stat., VI, 4, 210-227. Tokyo (1935). **b - 1038**

Description and revision of 8 species of the family *Candacidae* containing the genus *Candacia* found in the Sagami Bay.

**Tanaka O.** - On some New Species of *Copepoda* from Sagami Bay [*Copepoda nova in Baja* Sagami]. 5 pls. o. t., Jap. Journ. Zool., Trans. & Abstr., VII, 1, 31-36. Tokyo (1936). **b - 1039**

*Labidocera bipinnata* n. sp., *Pontella barbata* n. sp., *P. forcipata* n. sp., *P. bifurcata* n. sp.

**Tarasov N. I.** - Ueber eine wenig bekannte und seltene Form der Gattung *Lepas* (*Cirripedia thoracica*) [*De forma rara et parum cognita generis « Lepas »*]. 5 Abb., « Zool. Anz., CX, 11/12, 326-330. Leipzig (1935). **b - 1040**

*Lepas nonfurcata* (*L. anatifera* var. n. Nilss.-Cant., *L. darwinii* Dkr. ms.) aus dem Atlantischen und Stillen Ozean.

**Tarasov N. I.** - On the Arctic Fauna of *Cirripedia thoracica*. II. [*De fauna arctica speciei « Cirripedia thoracica» II*]. (In Russ. Engl. Summ.) Trans. Arct. Inst., XXXIII, 45-49. Leningrad (1936). **b - 1041**

Diagnosis: description and ecology of the five following species of *Cirripedia* gathered by the expeditions of the ice-breakers « Russanov » and « Sibirjakov », in 1932 and the schooner « Lomonosov » in 1931 in various parts of the Arctic Sea: *Scalpellum nymphocola* Hoek, *Sc. cornutum* G. O. Sars, *Sc. striolatum* G. O. Sars, *Balanus balanus* (L.), and *B. crenatus* Bruguière. From these species only one, *Sc. striolatum*, is new for the Arctic section of the U. S. S. R.

**Templeman W.** - Local Differences in the Life History of the Lobster (*Homarus americanus*) [*Differentiae a loco ad locum quoad cyclum vitae speciei « Homarus americanus »*]. 13 tabl., 12 figs., Journ. Biol. Board Canada, II, 1, 41-88. Toronto (1936). **b - 1042**

This study is based on examination of the commercial catches of fishermen in more than one hundred and seventy localities on the coast of the maritime provinces of Canada during the summers of 1930, 1931 and 1932. Information is given here as to the great differences between local populations and their relation to environmental conditions.

**Ward M.** - *Crustacea Brachyura* from the Coasts of Queensland [*Crustacea Brachyura ad litora regionis* Queensland *pertinentia*]. 3 pls., Mem. Queensl. Mus., XI, 1, 1-13. Brisbane (1936). **b - 1043**

Description of several genera and species, of which the following forms are new to science: *Cryptolutea lindemanensis* sp. n., *Pronotonyx* nom. n., *P. laevis* Miers, *Pseudocryptocoeloma* g. n., *P. parvus* sp. n., *Chlorodopsis miersi* nom n., *Etisodes australis* sp. n., *Leptodius australis* sp. n., *Banareiopsis* g. n., *B. australis* sp. n., *Sargassocarcinus* g. n., *S. foliatus* sp. n., *Harrovia plana* sp. n., *Calappa terrae-reginae* sp. n.

**Wilson C. B.** - Copepods from the Far North collected by Captain R. A. Bartlett [*Copepoda ad regiones arcticas pertinentia collecta a* R. A. Bartlett]. Journ. Washington Acad. Sc., XXVI, 9, 365-376. Menasha, Wis. (1936). **b - 1044**

**Wiman C.** - Gibt es Riffe von Seepocken (Balanen)? [*Sunt scopuli a specie « Balanus » formati?*]. 2 Abb., Natur u. Volk., LXVI, 1, 26-28. Frankfurt a. M. (1936). **b - 1045**

Beschreibung eines im Jahre 1891 aus Sumatra in das geologische Institut von Upsala gebrachten Stückes, das wahrscheinlich aus *Balanus laevis* var. *coquimbensis* Sowerby besteht, die an einem Felsufer ein waagrechtes Brett ins Wasser hinaus gebaut haben. Diese Bildung ist aus besonderem Interesse, weil sie eine nicht gewöhnliche Wuchsform der Balanen darstellt.

**Yokoya Y.** - On the Prawns Belonging to the Genus *Pandalus* [*De cancris ad genus « Pandalus » pertinentibus*]. (In Jap.). Journ. Imp. Fish. Exp. Stat., VI, 1, 13-17. Tokyo (1934). **b - 1046**

Brief description of prawns belonging to the genus *Pandalus* living in Japanese waters. They are: *P. borealis* Kröyer, *P. hispinotus* Brandt, *P. latirostris* Rathbun, and *P. nipponensis* Yokoya. Author illustrates their distribution and economic importance for the fisheries.

**Yokoya Y.** - On the Immature Forms of Crustacean Decapods Found in the Vicinity of Misaki Marine Biological Station in the Winter Season [*De immaturis formis Crustaceorum Decapodorum quae repertae sunt apud Stationem pro biologia marina in* Misaki, *hiemali tempore*]. (In Jap.). 1 pl., Journ. Imp. Fish. Exp. Stat,, VI, 4, 228-239. Tokyo (1935). **b - 1047**

Description of zoea and mysis of some *Penaeidea*, of immature forms of certain *Palaemonidae*, *Pandalidae*, and *Amphion*, and some larval and immature stages of *Thalassinidea*, *Galatheidea*, und *Dromiacea*.

**Yokoya Y.** - Some Rare and New Species of Decapod Crustaceans found in the Vicinity of the Misaki Marine Biological Station [*Crustacea Decapoda. Species rarae et novae repertae apud Stationem pro biologia marina in* Misaki]. 10 figs., Jap. Journ. Zool., Trans. & Abstr., VII, 1, 129-146. Tokyo (1936). **b - 1048**

Description of nine species, seven of which are new, belonging to the families *Alpheidae*, *Palaemonidae*, *Galatheidae*, *Leucosiidae*, *Parthenopidae* and *Goneplacidae*.

**Zariquiey y Cenarro R.** - Adiciones al Ensayo de un catálogo de los Crustáceos Decapodos marinos de España y Marruecos Español de D. Alvaro de Miranda y Rivera, publicado en 20 de Septiembre de 1933 [*Crustacea Decapoda marina ad Hispaniam et Mauretaniam Hispanicam pertinentia. Addenda ad catalogum editum ab* Alvaro de Miranda y Rivera *die 20 mensis Septembris A. 1933*]. Bull. Inst. Catal. Hist. Natur., 35, 1-7. Barcelona (1935). **b - 1049**

**Zimmer C.** - The Fishery Grounds near Alexandria. *Schizopoda* [*Fundi piscatorii Alexandriae. Schizopoda*]. Fish. Res. Directorate, Min. Comm. & Ind., VII, Not. & Mem. 15, 46. Cairo (1936). **b - 1050**

*Mesopodopsis slabberi* and *Diamysis bahirensis*, euryhalin forms, met with in the Mediterranean and the Black Sea.

**Zimmer C.** - California *Crustacea* of the Order *Cumacea* [*Crustacea Californiensia ad ordinem « Cumacea » pertinentia*]. 39 figs., Proc. U. S. Nat. Mus., LXXXIII, 2992, 423-439. Washington (1936). **b - 1051**

Until now only three species have been known from the coast of California. Seven new species are reported here, all collected in the vicinity of Newport about lat. 33°38' N

## Tunicata.

**Ärnbäck Christie-Linde A.** - A notable Case of Relation in *Perophora* [*De affinitate notanda in Perophoris*]. 3 figs., Ark. f. Zool., XXVIII B, H. 3, 9, 1-6. Stockholm (1936). **b - 1052**

A. has examined a collection of numerous colonies of a species of *Perophora* labelled *Perophora japonica* from the Misaki Biological Station, and come to the conclusion that the species are not identical with *P. japonica* but represent a new species, *Perophora orientalis*, of which a description is given. Revision of *Perophora* species.

**Berrill N. J.** - VIII. Studies in Tunicate Development. Part III. Differential Retardation and Acceleration [*VIII. Tunicata. Studia de accretione. Pars III. Retardatio differentialis et acceleratio*]. 7 tabl., 31 figs., Phil. Trans. R. Soc., CCXXV, B 525, 255-326 (Contr. Bermuda Biol. Stat. No. 29. St. George's West, Bermuda). London (1935). **b - 1053**

These studies are based on investigations into the development of forty-six species representing thirty-five genera. List of species investigated. Origin af viviparity and yolk accumulation. Cell-size, body-size and egg-size. Ascidian development. Egg-size and rate of development. Gastrulation. Analysis of embryonic development. Development of larval and permanent structures. Differentiation of the trunk. Post-larval development. Development of the stigmata. Increase in relative amount and density of yolk. Reduction in egg-size.

**Das S. M.** - *Herdmania*: A Monascidian of the Indian Seas [*Herdmania. Monascidia in maribus Indianis*]. Ind. Zool. Mem. on Ind. Animal Types, 5. Lucknow Publ. House. Lucknow (1936). **b - 1054**

Distribution and description of *Herdmania pallida* and *H. ceylonica*.

**Florkin M.** - Sur un caractère, souvent mal interprété, du milieu intérieur des Ascidies [*De quodam charactere quoad medium internum Ascidiarum qui saepe male interpretatur*]. C. R. Soc. Biol., CXVII, 1226. Paris (1934). **b - 1055**

L'A. met en évidence les causes d'erreur dans l'interprétation que les Ascidies, au lieu d'excréter, absorbent du $CO_2$.

**Garstang W. & Georgeson E.** - Report on the *Tunicata*. 2. *Copelata* [*Relatio de Tunicatis*]. 5 figs., Brit. Mus. (Natur. Hist.), Brit. Antarctic (Terra Nova) Exped. 1910, Natur. Hist. Rep., IV, 8, 263-282. London (1935). **b - 1056**

These species are all Oikopleurids, most of them *O. longicauda* from the warm waters of the Atlantic and South Pacific, and *O. valdiviae* from the Antarctic waters. *Folia gigas* n. sp. Antarctic Ocean; *Stegosoma conogaster* n. sp. Pacific Ocean.

**Grave C.** - Metamorphosis of Ascidian Larvæ [*Metamorphosis larvarum Ascidiarum*]. 2 pls. o. t., 1 fig., 26 tabl., Pap. Tortugas Labor., XXIX, 211-291. Washington (1936). **b - 1057**

Activity and behaviour. The Ascidian Larva a dual organism. The disruptive phase of Metamorphosis. Variability of Larvae. Acceleration by light and by mechanical stimuli. Susceptibility, activity and the mechanism of metamorphosis. Acceleration by chemical substances.

Differentiation and swimming-water. Experiments with different chemical substances and with extracts.

**Huus J.** - Ascidiologische Notizen. II. Ueber den Fund von *Styela atlantica* (Van Name) an der norwegischen Westküste, mit Bemerkungen über die amphiatlantische Verbreitung einiger Ascidien [*Notitiae de Ascidiis. II. « Styela atlantica » in litoribus occid. Norvegiae reperitur. Observationes de distributione amphi-atlantica aliquarum Ascidiarum*]. 8 Abb., Berg. Mus. Årb., naturv. r., I, 5, 1-18. Bergen (1936). **b - 1058**

Material und Funddaten. Beschreibung und Vergleich mit anderen Formen. Verzeichnis der amphiatlantischen Verbreitung, Versuch dieser Ausbreitung zu erklären. (Vier Möglichkeiten sind angeführt).

**Ihle J. E. W. & Ihle-Landenberg M. E.** - *Cyclosalpa virgula* (Vogt) und *Cyclosalpa Komaii* n. sp. - 3 Abb., Pubbl. Staz. Zool. Napoli, XV, 2, 274-283. Napoli (1936). **b - 1059**

Unter Berücksichtigung der von Taku Komai in 1932 veröffentlichten Arbeit über japanische Salpen, in welcher eine Art als *Cyclosalpa virgula* beschrieben wird, haben die Vf. Vf. hier einen Vergleich zwischen der japanischen und neapolitanischen Form von *C. v.* gemacht und sind zu dem Ergebnis gekommen, dass die japanische Form zu einer neuen Art gerechnet werden dürfte, der der Name *Cyclosalpa Komaii* gegeben worden ist.

**Neumann G.** - Tunikaten (*Doliolidae*) [*Tunicata*]. 67 S., H. G. Bronn Klass. u. Ordn. Tierr. Suppl. III, Abt. 2, Buch 2, Lief. 2. Akad. Verlagsg. Leipzig (1935). **b - 1060**

**Oka A.** - Ueberblick über die japanische Ascidienfauna [*Conspectus faunae Japonicae Ascidiarum*]. Proc. Imp. Acad., XI, 5, 198-200. Tokyo (1935). **b - 1061**

Vf. gibt eine Tabelle der von Japan bekannten Ascidiengattungen mit ihrer Artenzahl, welche die von R. Hartmeyer in 1906 zusammengestellte Liste zahlenmässig weit übertrifft. Zum Schluss schildert er eingehender die artktischen und die eigentlich japanischen Ascidienformen.

**Oka A.** - Report of the Biological Survey of Mutsu Bay. 28. *Ascidiae simplices* [*Relatio de biologicis inquisitionibus in* Mutsu *Baja. 28. Ascidiae simplices*]. 35 figs., Sc. Rep. Tôhoku Imp. Univ., Ser. 4, Biol., X, 3, 427-466. Sendai (1935). **b - 1062**

This collection comprises 21 species among which ten species and one genus are new to science. List, descriptions and distribution.

**Vernière P.** - Les Appendiculaires de la mer de Villefranche: *Pegalopleura Haranti* n. sp. [*De Appendiculariis ad mare regionis* Villefranche *pertinentibus. « Pegalopleura Haranti » n. sp.*]. 2 fig., Bull. Soc. Zool. France, LIX, 160-163. Paris (1934). **b - 1063**

Les genres signalés pour la première fois sur les côtes de Villefranche sont: *Kowalevskaia, Fritillaria, Tectillaria, Stegosoma, Oikopleura* et *Pegalopleura*, en outre *Doliolum, Thalia* et *Salpa fusiformis*.

## Pisces et Cyclostomata.

**Aiyar R. G.** - Observations on the Development of *Acentrogobius neilli* (*Gobius neilli* Day) [*Observationes de progressu speciei « Acentrogobius neilli »*]. 22 figs., Zool. Anz., CXI, 3/4, 83-92. Leipzig (1935). **b - 1064**

Eggs, fertilization, embryo, young stages. This species lives in 25° C water in India.

**Allan P. B. M.** - Trout Heresy [*De erroribus in tructis cognoscendis*]. 206 pp., Philip Allan & Co. Ltd. London (1936). **b - 1065**

Art of catching fish; science of their lives; psychology of the fish and the fisherman.

**Andriashev A. P.** - Nouvelles données sur les poissons abyssaux de la Mer de Barents [*Data nova de Piscibus abyssalibus Maris* Barents]. (En russe). 1 fig., Dokl. Akad. Naouk (Rapp. Acad. Sc. URSS), IV, 1/2, 105-108. Moskva (1935). **b - 1066**

**Andriashev A. P.** - Uebersicht der Gattung *Stelgistrum* Jordan und Gilbert (*Pisces, Cottidae*) nebst Beschreibung einer neuen Art aus dem Beringmeer [*Conspectus generis « Stelgistrum », (Pisces Cottidae) et descriptio novae speciei a Mari* Bering *provenientis*]. 1 Abb., Zool. Anz., CXI, 11/12, 289-297. Leipzig (1935). **b - 1067**

*Stelgistrum* Jordan & Gilbert. (*Stelgistrops* Hubbs), Schlüssel zu drei Arten, Beschreibung. *Stelgistrum concinnum* n. sp.

**Athanassopoulos G.** - La *Muraena unicolor* dans la Méditerranée [*« M. unicolor » in Mari Mediterraneo*]. Bull. Inst. Océanogr., 691, 1-2. Monaco (1936). **b - 1068**

Brève description du Murénide qui représente une des plus rares espèces de poissons vivant dans la Méditerranée; l'A. met en garde contre la confusion de *M. unicolor* avec la seule autre espèce habitant la Méditerranée: *M. Helena*.

**Averintzev S.** - Au sujet de quelques données sur la biologie de *Gadus morrhua* [*De biologia speciei « Gadus morrhua »*]. (En russe). 2 fig., Za Rybn. Ind. Sev., 1, 5-8. Leningrad (1936). **b - 1069**

**Barnhart Spencer P.** - Marine Fishes of Southern California [*Pisces marini Californiae merid.*]. 292 figs., diagr., Univ. Calif. Press. Berkeley, Calif. (1936). **b - 1070**

Systematic descriptions of 372 fishes from southern California waters (Point Conception to the American-Mexican boundary). Keys, glossary, indexes, bibl.

**Battle H. I., Huntsman A. G., Jeffers A. M., Jeffers J. W., Johnson W. H., & McNairn N. A.** - Fatness, Digestion and Food of Passamaquoddy Young Herring [*Crassitudo, digestio, nutricatio juvenis aringi in baja* Passamaquoddy]. 6 figs., 12 tables, Journ. Biol. Bd. Canada, II, 4, 401-429. Toronto (1936). **b - 1071**

Using condition factor as criterion of fatness, investigation confirms the report of those handling them that herring are characteristically fat in each locality of the Passamaquoddy region of southern New Brunswick. In the present paper some facts procured during the season of 1933 in order to test this matter are communicated and the relationship between fatness of herring and richness of the relative planktonic food established (from A:s Abstr.).

**Beebe W.** - Deep-Sea Fishes of the Bermuda Oceanographic Expeditions. I. Family *Derichthyidae*. II. Family *Nessorhamphidae* [*Pisces in maris profunditatibus viventes ab expeditionibus oceanographicis ad* Bermuda *provenientes*]. 22 fig., Zoologica, XX, 1/2, 1-51. New York (1935). **b - 1072**

Systematic characters, ecological relations.

**Beebe W. & Crane J.** - Deep-Sea Fishes of the Bermuda Oceanographic Expeditions. III. Family *Serrivomeridae* [*Pisces in maris profunditatibus viventes ab expeditionibus oceanographicis ad* Bermuda *provenientes*]. 19 fig., Zoologica, XX, 3, 53-102. New York (1936). **b - 1073**

Genus *Serrivomer* with a taxonomic revision of the species. Description of *S. beanii*, adult stages, development and ecology. Differences from *S. sector* and *S. brevidentatus*. Table showing the relative dental characteristics of the species of *Serrivomer*. Geographical distribution.

**Beebe W. & Hollister G.** - The Fishes of Union Island, Grenadines, British West Indies, with the Description of a New Species of Star-Gazer [*Pisces qui pertinent ad regiones* Union Island, Grenadines *et Indias occidentales Britannicas. Descriptio novae speciei « Uranoscopus »*]. Zoologica, XIX, 6. New York (1935). **b - 1074**

This paper contains the only published list of fishes from the Union Island, one of the Grenadines.

**Beebe W. & Tee-Van J.** - Systematic Notes on Bermudian and West Indian Tunas of the Genera *Parathunnus* and *Neothunnus* [*Notae systematicae de speciebus a* Bermuda *et Indiis occidentalibus provenientibus ad genera « Parathunnus » et « Neothunnus » pertinentibus*]. 7 pls. o. t., Zoologica, XXI, 3, 12/18, 177-194. (Contr. Bermuda Biol. Stat., No. 44, St. George's West, Bermuda). New York (1936). **b - 1075**

*Parathunnus atlanticus* and *Neothunnus argentivittatus*: Synonymies; taxonomic notes, comparison of recent specimens and original descriptions, description of Bermuda and West Indian specimens; range.

**Bigelow H. B. & Schroeder W. C.** - Supplemental Notes on Fishes of the Gulf of Maine [*Notae additiciae de Piscibus in Sinu* Maine]. U. S. Dpt. Comm., Bur. Fish., XLVIII, 20, 319-343. (Contr. No. 119 Woods Hole Oceanogr. Inst.). Washington (1936). **b - 1076**

List with remarks of 108 species. Key to Skates and Rays.

**Blanckenburg K.** - Segelfisch-Fang im Golfstrom [*« Histiophorus volador » species capta in* Golfstrom]. 1 Abb., Natur u. Volk, LXVI, 8, 428-430. Frankfurt a. M. (1936). **b - 1077**

Diese Art ist sehr häufig in ihrer Heimat, den Westindischen Gewässern, wurde aber erst im Jahre 1925 in der Wissenschaft unter dem Namen *Histiophorus volador* Jordan & Evermann bekannt.

**Bolin R. L.** - Two new Cottid Fishes from the Western Pacific, with a Revision of the Genus *Stlengis* Jordan and Starks [*Pisces duo novi ex Cottidis ab Oceano Pacifico Occid. provenientibus. Reinspectio generis «Stlengis»*]. 1 pl., 2 figs., 2 tabl., Proc. U. S. Nat. Mus., LXXXIII, 2987, 325-334. Washington (1936). **b - 1078**

*Stlengis distoechus* n. sp. and *Astrocottus leprops* n. gen., n. sp.; diagnosis. Genus *Stlengis*: diagnosis and key.

**Bolin R. L.** - New Cottoid Fishes from Japan and Bering Sea [*Piscis novus inter Cottoidea e Japonia et mari* Bering]. 8 figs., Proc. U. S. Nat. Mus., Smithson. Inst., LXXXIV, 3000, 25-38. Washington (1936). **b - 1079**

Description of three new forms: *Ricuzenius nudithorax*, *Atopocottus tribranchius* and *Phasmatocottus ctenopterygius* collected by the « Albatross ».

**Bourkov A.** - Sur la pêche de la morue près de la rive occidentale de la Novaja Zemlja [*De merluccii piscatione ad ripam occidentalem Novajae Zemliae*]. (En russe). 3 fig., Za Rybn. Ind. Sev. 2, 31-36. Leningrad (1936). **b - 1080**

**Breder C. M. Jr.** - *Heterosomata* to *Pediculati* from Panama to lower California [*Ab Heterosomatis ad Pediculatos. A regione Panamensi ad regionem Californiensem inferiorem*]. 19 fig., 56 pp., Bull. Bingham Oceanogr. Coll., Peabody Mus. Natur. Hist., II, 3. New Haven, Conn. (1936). **b - 1081**

Annotated systematic list of species of the order *Heterosomata* collected in the second Oceanographic Expedition of the « Pawnee » in 1926. In the present contribution are described one new genus, 7 new species and one new sub-species.

**Brimley H. H.** - Notes on the Occurrence of a Whale Shark (*Rhineodon typus*) in the Cape Fear River, near Southport, North Carolina [*Notae de praesentia speciei « Rhineodon typus » in* Cape Fear River *apud* Southport *in* North Carolina]. 1 pl., Journ. Elisha Mitchell Scient. Soc., LI, 1, 160-162. Chapel Hill, N. C.(1935). **b - 1082**

This species has been found much farther north than previously reported probably influenced by the Gulf Stream.

**Brimley H. H.** - Basking Shark in North Carolina Waters [*Species « Cetorhinus maximus » in* North Carolina]. Journ. Elisha Mitchell Scient. Soc., LI, 2, 311. Chapel Hill, N. C. (1935). **b - 1083**

Extension of the southern range of *C. maximus* 430 miles from Sea Girt, New Jersey, to southern N. Carolina coast.

**Cadenat J.** - Les Serranidés de la côte occidentale d'Afrique (du Cap Spartel au Cap Vert). [*Serranidae ad litora occidentalia Africana pertinentes*]. 30 fig., tabl., Off. Pêches Marit., Rev. Trav., VIII, 4, 377-422. Paris (1935). **b - 1084**

Après une introduction d'ordre général sur les Serranidés, sur leur place parmi les poissons et les caractères de la famille, l'A. indique les noms latins, français et étrangers, la formule radiaire, la diagnose spécifique, la description de l'appareil digestif et circulatoire, la coloration, la distribution géographique, l'éthologie et la pêche, et s'arrête plus particulièrement sur les trois espèces typiques des côtes occidentales d'Afrique, à voire: *Epinephelus aenus, E. caninus* et *E. gigas*. (Bibl.).

**Castelnuovo G.** - Contributo biometrico alla conoscenza sistematica delle triglie [*Contributio biometrica in Mullidas e systematica cognoscendas*]. 26 fig., Boll. Pesca, Piscicult. e Idrobiol., XII, 4, 289-301. Roma (1936). **b - 1085**

Caratteri esterni differenziali fra il *Mullus barbatus* L. e il *M. surmuletus* L. provenienti dai banchi di Lampedusa. I risultati numerici ottenuti non presentano differenze tali da poter costituire caratteri diagnostici specifici di un gruppo, dato poi che è difficile stabilire se le differenze constatate non siano invece dovute a variabilità casuali. Il metodo biometrico non è sufficiente per risolvere il problema sistematico dei Mullidi.

**Chabanaud P.** - Les Poissons de mer exotiques aux Halles centrales de Paris. Remarques sur diverses espèces, notamment *Solea senegalensis* Kaup et *Hilsa reevesi* H. B. [*Pisces marini exotici in foris piscatoriis centralibus Parisiis. Observationes circa varias species. Particulatim agitur de « Solea senegalensis » et « Hilsa reevesi »*]. Bull. Mus. Nat. Hist. Natur., VIII, Sér. 2, 1, 61-64. Paris (1936). **b - 1086**

Par la présence d'installations frigorifiques à bord des chalutiers aux Halles de Paris parviennent des poissons exotiques. Description des deux espèces surmentionnées.

**Chabanaud P.** - La fenêtre interbranchiale des Téléostéens dyssymétriques [*Apertio interbranchialis in Teleosteis dissymmetricis*]. 2 fig., C. R. Acad. Sc., CCII, 24, 2014-2016. Paris (1936). **b - 1087**

L'A. a pu constater au cours de ses observations l'hétérogénéité de la fenêtre interbranchiale des *Pleuronectoidea*; cette particularité constitue un nouveau caractère distinctif qui vient s'ajouter à tous ceux que l'A. a mentionnés entre *Pleuronectiformes* et *Soleiformes* (v.: Ann. Inst. Océanogr., XV, 223-298, 1936).

**Chevey P.** - Présence sur les côtes d'Indochine d'un requin japonais très rare *Calliscyllium venustum* Tanaka [*Species « Calliscyllium venustum » rarissima reperta in litoribus Indosinensibus*]. Bull. Soc. Zool. France, LX, 383. Paris (1935). **b - 1088**

**Chevey P.** - Sur la présence du genre *Anguilla* en Indochine Française [*De genere « Anguilla » in Francogallica regione Indosinensi*]. 1 fig., Bull. Mus. Nat. Hist. Natur., VIII, Sér. 2, 1, 65-68. Paris (1936). **b - 1089**

La découverte de l'*A. japonica* en Indochine est très intèressante pour l'étude de la répartition de cette espèce, pour les lois de circulation des eaux dans la mer de Chine et aussi au sujet des larves léptocéphales déterminées par Tirant.

**Chevey P.** - Sur la présence d'une seconde espèce d'Anguille en Indochine française et sur les lois de la circulation des eaux dans la mer de Chine méridionale [*De altera specie Anguillarum in Indosinica regione Francogallica deque legibus circulationis aquarum in maribus sinensibus Meridionalibus*]. Bull. Mus. Nat. Hist. Natur., VIII, Sér. 2, 2, 130-131. Paris (1936). **b - 1090**

L'A. signale la présence dans les eaux douces du Centre Annam de l'*Anguilla mauritiana* Bennet: les larves auraient été entraînées par les courants marins existant dans le Nord de la Mer de Chine méridionale.

**Chevey P.** - Capture d'un Requin-Baleine, *Rhineodon typus* A. Smith, en Cochinchine [*Species « Rhineodon typus » in* Cochinchine *reperta*]. 9 pl., Inst. Océanogr. Indochine, 28, 3-23. Saigon (1936). **b - 1091**

Résumé des connaissances sur ce Poisson; systématique, morphologie, biologie, distribution géographique. Bibl.

**Clemens W. A. & Clemens L. S.** - Contributions to the Life-History of the Sockeye Salmon [*Contributiones in studendum cyclum vitae speciei « Oncorhynchus nerka »*]. 29 tabl., Rep. Commiss. Fish. for 1935, 21-44. Victoria B. C. (1936). **b - 1092**

Some unusual features stated in the 1935 runs of sockeye salmon to the four main river systems of B. C. Designation of age-groups. Runs of the four rivers: general characteristics, age-groups, lengths and weights, distribution of the sexes. Statistical tables.

**Corradini P.** - Sulla consistenza di alcune differenze biometriche della specie *Mullus barbatus* e *Mullus surmuletus* [*De aliquis differentiis biometricis specierum « Mullus barbatus » et « Mullus surmuletus »*]. 2 fig., Boll. Zool., VI, 5/6, 333-344. Napoli (1935). **b - 1093**

Secondo le osservazioni dell'A. tutti i caratteri distintivi tra le due specie di Mullus, sono inconsistenti. La specie *M. barbatus* presenta un habitat di fango e un habitat di scoglio, e la diversa nutrizione determina forse un diverso gusto delle carni. Notevole è la vasta oscillazione del tipo di curva craniale e i fattori che determinano questa oscillazione fanno intravedere la presenza di due diverse « costituzioni » nel *M. barbatus*: una ipotiroidea, l'altra ipertiroidea, corrispondenti a due diversi profili.

**Crane J.** - Notes on the Biology and Ecology of Giant Tuna, *Thunnus thynnus* Linnaeus, observed at Portland, Maine [*Notae de biologia et oecologia speciei « Thunnus thynnus » in* Portland, Maine *observatae*]. 1 pl., 1 fig., Zoologica, XXI, 3, 12/18, 207-212. New York (1936). **b - 1094**

Description of *Thunnus thynnus*: colors, measurements and counts, growth characters. Size and weight, sex, occurrence, schooling, parasites, food.

**D'Ancona U.** - Attuali conoscenze su alcune questioni relative alla biologia dell'anguilla [*De hodiernis cognitionibus de quibusdam quaestionibus*

*circa anguillae biologiam*]. Atti Soc. It. Progr. Sc., Riun. 24, IV, 1, 17-34. Roma (1936). **b - 1095**

L'A. espone le attuali conoscenze sull'origine marina dell'anguilla, e tratta della discussa questione della riproduzione dell'anguilla nel Mediterraneo e del suo differenziamento sessuale. Le ricerche dello Schmidt e quelle di Grassi; gli studi riguardanti il sesso delle anguille della Laguna Veneta.

**Davis F. M.** - A Contribution to the « Race Question » [*Contributio in questionem studendam de stirpe Aringorum*]. Cons. Expl. Mer, Rapp. & Pr.-Verb., C, 2ème partie, 12-13. Copenhague (1936). **b - 1096**

On the question of hereditary characters or environmental factors in distinguishing different herring populations. A. claims the environmental influences of the area where the herrings were born to be the predominating factor.

**De Lacy A. C. & Chapman W. M.** - Notes on some Elasmobranchs of Puget Sound [*De Elasmobranchiatis ad* Puget Sound *pertinentibus*]. Copeia, 2, 63-67. New York (1935). **b - 1097**

*Apristurus brunneus* (Gilbert), *Tetranarce californica* (Ayres), *Squalus suckleyi*, *Raja rhina*, *R. binoculata* and *Hydrolagus colliei*. Description, eggs.

**Delpino I.** - La *Trutta genivittata* (Heckel-Kner, 1858) e la sua diffusione in Italia [*De specie « Trutta genivittata » eiusque diffusione in Italia*]. Atti Soc. It. Progr. Sc., IV, 1, 85-88. Roma (1936). **b - 1098**

Descrizione della *Trutta genivittata* e sua diffusione. La *T. genivittata* e la *T. adriatica*.

**Desbrosses P.** - Contribution à la connaissance de la biologie du Rouget-Barbet en Atlantique Nord. III. *Mullus barbatus* (Rond.) *surmuletus* (Fage) [*Contributio in cognoscendam biologiam speciei « Mullus barbatus surmuletus » in Atlantico septemtrionali. III.*]. 14 fig., 7 tabl., Rev. Trav. Off. Pêches Marit., VIII, 4, 351-376. Paris (1935). **b - 1099**

Croissance du rouget-barbet en Atlantique-Nord; dates de l'arrêt de croissance et de l'apparition de l'anneau d'hiver sur l'écaille; tailles extrêmes; longévité; croissance calculée d'après l'écaille. Composition du stock d'hiver: répartition suivant la profondeur. Maturité sexuelle, époque et lieux de ponte. Formule vertébrale. (Voir Partie I & II ibidem, VI, 3, 1933; VIII, 3, 1935).

**Desbrosses P.** - Contribution à la connaissance de la biologie du Rouget-Barbet en Atlantique Nord. IV. [*Contributio quoad biologiam speciei « Mullus barbatus surmuletus » in Atlantico septemtrionali repertae*]. 19 fig., 11 tabl., Rev. Trav. Off. Pêches Marit., IX, 4, 36, 339-401. Paris (1936). **b - 1100**

Examen des caractères morphologiques. Caractères numériques: rayons des nageoires, écailles, vertèbres: caractères métriques: croissance relative, intensité de croissance des différents parties du corps, gradients de croissance, variabilité individuelle, croissance relative des mâles et des femelles, fluctuations probables des proportions moyennes dans les deux sexes. Correlations entre la taille et le poids suivant les sexes: poids moyen des Rougets suivant la saison. Correlations entre le poids et l'âge. Appendice: résultats des mensurations des rougets-barbets d'Atlantique Nord, groupés par classes et par sexes.

**Dons C.** - Den zoologiske Avdeling: Fiskesamlingen [*Sectio zoologica: Pisces*]. Kgl. Norsk. Vidensk. Selsk. Mus. Årsber. 1934, 48-50. Trondheim (1935). **b - 1101**

Report on new accessions of about 15 species, all captured in Norwegian waters.

**Duncker G.** - Die Fische der Nordmark I, II [*Pisces in regione* Nordmark]. 48 S. + 44 S. Taf., Hrsg. Naturw. Ver. Schleswig-Holstein. Kiel (1935 & 1936). **b - 1102**

Namen, Diagnose, Lebensweise, Verbreitung von 28 Arten (in Lief. I) und 20 Arten (in Lief. II) der *Cyclostomi*, *Plagiostomi*, *Acipenseridae*, *Clupeidae* und *Cyprinidae*.

**Duncker G. & Mohr E.** - Die nordeuropäischen *Ammodytes* - Arten des Hamburger Zoologischen Museums [« *Ammodytes* ». *Species nordeuropaeae in Museo Zoologico Hamburgensi*]. Zool. Anz., CX, 7/8, 216-220. Leipzig (1935). **b - 1103**

Systematische Uebersicht von drei *Ammodytes-Arten*.

**Ehrenbaum E.** - Naturgeschichtliche und wirtschaftliche Bedeutung der Seefische Nordeuropas [*De momento Piscium marinorum Europae Sept. pro historia naturali et oeconomia*]. 276 Abb., 26 Taf., 2 Tabellenbeil. viii-337 S., Handb. der Seefisch. Nordeuropas, II, E. Schweizerbart. Stuttgart (1936). **b - 1104**

Das vorliegende Werk erscheint als II. Band des « Handbuches der Seefischerei Nordeuropas » und ist als Sonderausgabe erhältlich. Es ist hauptsächlich für Fischerei-Interessenten aus der Praxis, sowie für Fischereibiologen bestimmt und besteht aus 10 Bänden: Im vorliegenden II. Bande bespricht Vf. die nordeuropäische Fischfauna unter Hervorhebung der wirtschaftlich wichtigen Formen in Einzeldarstellungen, wobei Angaben über die Systematik der einzelnen Arten sowie Beschreibungen gehalten sind. Alle Probleme, welche die moderne Fischereiforschung beschäftigen, sind ausführlich behandelt. Besondere Berücksichtigung findet die Fangstatistik.

**Enger M.** - Beitrag zur Kenntnis der Meerforelle [*Contributiones quoad cognitiones de tructa marina*]. Tab., Ztschr. f. Fisch., XXXIV, 4, 727-734. Neudamm & Berlin (1936). **b - 1105**

Ergebnisse der Untersuchungen von 50 Meerforellen der 0- und 1- Gruppe. Körperproportionen. Kopfmasse. Höhenmasse. Entfernung der Ansatzstellen der Flossen von der Schnauzenspitze. Flossenstrahlen. Anzahl der Schuppen und Wirbel. Zähne: Zahl, Dichte und Länge.

**Foerster R. E.** - An Investigation of the Life History and Propagation of the Sockeye Salmon at Cultus Lake, British Columbia. No. 5. The Life History Cycle of the 1926 Year Class with Artificial Propagation Involving the Liberation of Free-Swimming Fry [*Investigationes in cyclum evolutionis et in propagationem speciei « Oncorhynchus nerka » in lacu* Cultus (*in Columbia Britannica*). *N. 5. Cyclum evolutionis quoad turmam anni 1926 eiusque propagatio artificialis per juvenes pisces libere natantes*]. 2 figs., 8 tables. Journ. Biol. Bd. Canada, II, 3, 311-333. Toronto (1936). **b - 1106**

Results of investigations of the life history and propagation of O. *nerka* at Cultus Lake, B. C., undertaken primarily to determine the relative efficiencies of both natural and artificial methods of propagation. The first test of artificial propagation involving distribution of free-swimming fry was made in 1926-27 season and the results are reported upon in the present paper together with the data relating to the complete life cycle.

**Fowler H. W.** - The marine Fishes of West Africa based on the Collection of the American Museum Congo Expedition 1909-1915. Part I

[*Pisces marini Africae Occid. e collectione provenientes confecta perdurante expeditione in* Congo *A. 1909-15 ab* American Museum *suscepta*]. 1 pl., 275 figs., Bull. Amer. Mus. Natur. Hist., LXX, 1, 3-605. New York (1936). **b - 1107**

Descriptive account of the fishlike Vertebrates known from the coast of western tropical Africa between Morocco and Angola. The marine fishes number about 250 specimens and have been little noticed by ichthyologists. Detailed description of each species and genera with technical name and synonyms; the classification used is taken from the definitions of Günther and Jordan. In this collection the influx of various faunal elements is very evident: such as the great preponderance of Mediterranean species which may extend to the Cape of Good Hope.

Description of: *Leptocardii*, *Marsipobranchii* and Pisces with subclass *Selachii*, *Holocephali* and *Teleostei*.

**Fowler H. W.** - The Marine Fishes of West Africa [*Pisces marini Africae occid.*]. 291 figs., Bull. Amer. Mus. Natur. Hist., LXX, 2, 607-1493. New York (1936). **b - 1108**

Study of the group *Scomberoidei* and subgroups *Scombriformes*, *Xiphiformes*, *Coryphaeniformes*, *Bramiformes*, *Stromateiformes* and *Carangiformes*, with key to the families and to the species. Synonymies and bibliography, description of the body form for each specimen, anatomical characters, teeth and ray of the fins, pigmentation, food, geographical distribution, localities. Appendix and addenda in relation to some works and references which have appeared since the revision of the manuscript, especially « Discovery » and « Dana » reports. Index of the species described.

**Fowler H. W.** - Description of a New Scorpaenoid Fish (*Neomerinthe Hemingwayi*) from off New Jersey [*Descriptio novi cuiusdam piscis Scorpaenoideis* « *Neomerinthe Hemingwayi* » *e litore regionis* New Jersey *provenientis*]. 1 fig., Proc. Acad. Natur. Sc. Philadelphia, 1935, LXXXVII, 41-43. Philadelphia (1936). **b - 1109**

This fish represents a new genus and species very similar to the Pacific or Hawaiian genus *Merinthe* Snyder.

**Fowler H. W.** - Zoological Results of the third de Schauensce Siameee Expedition, Part VI. Fishes obtained in 1934 [*Resultatus zoologici tertiae expeditionis Siamensis nomine* de Schauensee. *Pars VI. Pisces collecti A.* 1934]. Proc. Acad. Natur. Sc. Philadelphia 1935, LXXXVII, 89-163. Philadelphia (1936). **b - 1110**

2394 specimens are obtained represented by 298 species of which 25 are new and one new subfamily. The marine or tidal species were obtained at Bangkok, Paknam and Sriracha during May, July and September 1934.

**Fowler H. W.** - South African Fishes received from Mr. H. W. Bell-Marley in 1935 [*Pisces Africae merid. collecti ab* H. W. Bell-Marley *A. 1935*] 39 figs., Proc. Acad. Natur. Sc. Philadelphia 1935, LXXXVII, 361-408. Philadelphia (1936). **b - 1111**

This collection including 291 specimens representing 167 species, is chiefly of interest as it represents rare and little-known species as well as rediscoveries of Indian Ocean species very imperfectly known. There are nine new species and three new genera.

**Fraser-Brunner A.** - Notes on the Plectognath Fishes. II. A Synopsis of the Genera of the Family *Ostraciontidae* [*Notae de Piscibus plectognatis. II. Synopsis generum ad familiam* « *Ostraciontidae* » *pertinentium*]. 1 fig., Ann. & Mag. Natur. Hist., XVI, 92, 313-320. London (1935). **b - 1112**

Diagnosis of the family, key and synopsis of 12 genera. *Rhynchostracion rhinorhynchus* n. sp.

**Fraser - Brunner A.** - The Validity of *Phycodurus* Gill, a Genus of Syngnathid Fishes [*Genus* « *Phycodurus* » *ad Pisces Syngnathidos pertinens, eiusque validitas*]. 2 figs., Copeia, 1, 21-22. New York (1935). **b - 1113**

Comparison with *Phyllopteryx*. Claim for the validity of *Phycodurus*.

**Fry D. H. Jr.** - A Preliminary Summary of the Life History of the Pacific Mackerel [*Compendium prius de cyclo vitali speciei* « *Pneumatophorus diego* »]. 4 graphs, 1 map, Calif. Fish & Game, XXII, 1, 30-39. Sacramento (1936). **b - 1114**

Distribution; abundance; spawning, nursery grounds; growth rate, weight and length, commercial sizes; food; migration.

**Furnestin J.** - Quelques observations sur les harengs du Fladen Ground [*Observationes de aringis regionis* Fladen Ground]. 3 diagr., Cons. Expl. Mer, Rapp. & Pr.-Verb., C, 2ème partie, 13-15. Copenhague (1936). **b - 1115**

Rapport sur le matériel recueilli par le Laboratoire de l'Office Scientifique et Technique des Pêches à Boulogne sur Mer pendant 1929-1934 pour étudier l'état de maturité sexuelle des Harengs.

**Gandolfi Hornyold A.** - La civelle d'Arcachon et d'Aguinaga [*De anguillulis ad regiones* Arcachon *et* Aguinaga *pertinentibus*]. Tabl., Bull. Stat. Biol. d'Arcachon, XXXII, 2, 173-181. Bordeaux (1935). **b - 1116**

Longueur et poids moyen et maximum, variations; comparaison entre les civelles d'Arcachon et les civelles d'Aguinaga. Pêche, repeuplement, vente.

La taille maximum trouvée par l'A. est 80 cm. après fixation au formol.

**Gilson G.** - Further Observations on Spent Herring with Remarks on Fluctuations and Oscillation [*Observationes ulteriores de aringis qui peperierunt. Notae de fluctuatione et oscillatione*]. 2 fig., Cons. Expl. Mer, Rapp. & Pr.-Verb., C, 3ème partie, 22-25. Copenhague (1936). **b - 1118**

The results of the observations undertaken on 6 yearclasses (1930-1936) concerning number examined, mean and total weight, total value and number of individuals destroyed are plotted as well as the fluctuation and evolution of successive yeargroups. Forecast for the season 1936-37.

**Giltay L.** - Note sur quelques poissons marins du Congo Belge [*Notae de Piscibus quibusdam marinis in* Congo Belge]. 3 fig., Bull. Mus. r. Hist. Natur. Belgique, XI, 36, 1-15. Bruxelles (1935). **b - 1119**

20 espèces ont été enregistrées avec synonymes et principaux caractères. *Paratyntlastes* n. g. avec l'espèce *P. Africanus* n. sp.

**Ginsburg I.** - Description of a New Flatfish, with Notes on Related Species [*Hippoglossus novus. Descriptio et notae circa species affines*]. 1 fig., Journ. Washington Acad. Sc., XXVI, 3, 128-133. Washington (1936). **b - 1120**

*Hippoglossina mystacium* n. sp. Discussion on spp. of *Pseudorhombus* and *Paralichthys*. Key.

**Gladkov N. A.** - Die Materialien zur Biologie und Fang der Aralischen Plötze [*Res collectae ad studendam biologiam et modum captandi speciem « Rutilus rutilus aralensis »*]. (In Russ.). 8 Abb., Rep. Aral-sea Div. Inst. Mar. Fish. IV, 77-112. Aralsk (1935). **b - 1121**

Verbreitung im Meer. Laichen. Fortpflanzung. Junge Fische. Wachstum. Nahrung. Industrie. Schlussfolgerungen.

**Godsil H. C.** - The Frigate Mackerel [« *Auxis thazard* »]. 1 fig., Calif. Fish & Game, XXII, 1, 52-53. Sacramento (1936). **b - 1122**

Short note with figure on this specimen found on November 6, 1935, near Catalina Island.

**Graham M.** - Investigations of the Herring of Passamaquoddy and Adjacent Regions [*Investigationes in aringos regionis* Passamaquoddy *regionumque adiacentium*]. 16 figs., 10 tables. Journ. Biol. Bd. Canada, II, 2, 95-140. (Contr. No. 96 Woods Hole Oceanogr. Instit.). Toronto (1936). **b - 1123**

Results of observations made from September 1931 to November 1932 in the area of the sardine fishery and the sea between Boston and Liverpool, Nova Scotia. The fishery for sardine herring seems to be partly dependent on extremely local conditions and affected by factors of which we are ignorant. Length measurements, study of the productivity of single restricted localities and the physical factors affecting the herring fishery.

**Gudger E. W.** - The Earliest Published Figures (1613-1758) of the Oblong or Truncate-tailed Ocean Sunfish, *Ranzania truncata* [*De prioribus notitiis editis de Pisce oblongato cauda truncata praedito ad familiam « Molidae » pertinenti: « Ranzania truncata »*]. 1 fig., Nature, CXXXVII, 3475, 947-948. London (1936). **b - 1124**

This species was first figured by Ulisse Aldrovandi in his book « De Piscibus Libri V » in 1613 under the name of *Mola peregrina*. The name *Ranzania truncata* was given 226 years later in honour of Ranzani, another Italian writer on the *Molidæ*.

**Gudger E. W.** - A Whale Shark off Bimini, Bahamas [*Genus « Rhineodon » apud* Bimini (Bahamas) *repertum*]. Science, LXXXIV, 2175, 227. New York (1936). **b - 1125**

Referring to his earlier work on the distribution of the Whale Shark (Proc. Zool. Soc. London p. 882, 1934) A. here presents some other records in the waters of Bahamas and Florida.

**Gudger E. W.** - The Whale Shark off Havana [*Genus « Rhineodon » in litoribus insulae* Havana]. 1 fig., Scient. Monthly, XLII, January, 84-85. Lancaster, Pa. (1936). **b - 1126**

Some records of whale sharks captured off Havana. Description of the last specimen caught on April 12, 1934.

**Gustafson G.** - On the Biology of *Myxine glutinosa*. [*De biologia speciei « Myxine glutinosa »*]. Ark. f. Zool., XXVIII A, H. 1, 2, 1-8. Stockholm (1935). **b - 1127**

On the difficulty of studying *Myxine glutinosa*. Capture experiments with surface waters, habits in the aquaria. Respiration; feeding.

**Hardenberg J. D. F.** - On a Collection of Fishes from the Estuary and the lower and middle Course of the River Kapuas (W. Borneo) [*De collectione quadam Piscium ab aestuario provenienti et cursibus inferiore et medio fluminis* Kapuas (*in* Borneo *occid.*)]. Treubia, XV, 3, 225-254. Buitenzorg (1936). **b - 1128**

List of 222 species from salt brackish and fresh water. 3 new species: *Corica bleekeri* n. sp. (*Clupeidae*), *Callichrous weberi* n. sp. (*Siluridae*) and *Johnius weberi* (*Sciaenidae*).

Redescription of several rare species and taxonomical notes on many others. Life-history notes. Several species were hitherto not recorded from Borneo. Types in the Laboratory for Investigation of the Sea, Batavia.

**Hart J. L.** - The Application of Statistical Methods to the Investigations of the Pilchard, *Sardinops caerulea* (Girard) [*Applicatio rationum statisticarum ad investigationes perficiendas de specie « Sardinops caerulea »*]. Proc. 5th Pacific Sc. Congr. 1933, 5, 3725-3732. Univ. Toronto Press, Toronto (1934). **b - 1129**

Necessity of systematic collection of complete fishery statistics elucidated by biological examinations.

Particular difficulties of biological analysis as to the pilchard fishery. Failed researches in B. C. and California. No proof of decline in the abundance of pilchards in B. C.

**Herre A. W.** - Two new Species of *Ctenogobius* from South China (*Gobiidae*) [« *Ctenogobius* » *species duae novae a Sinensi regione merid. provenientes*]. Lingn. Sc. Journ., XIV, 3, 395-397. Canton (1935). **b - 1130**

*Ctenogobius myxodermus* n. sp. and *C. leavelli* n. sp.

**Herre A. W.** - A New Sciaenid from southeastern China [*Piscis novus Sciaenoideus a Sinensi regione sudoccid. proveniens*]. Lingn. Sc. Journ., XIV, 4, 603-604. Canton (1935). **b - 1131**

*Otolithes*, subgen. *Bahaba*, type *O.* (*B.*) *lini* n. sp. caught below the delta region not far from Hong Kong.

**Herre A. W.** - Fishes in the Zoölogical Museum of Stanford University. III. New Genera and Species of Gobies and Blennies and a new *Myxus*, from the Pelew Islands and Celebes [*Pisces in Museo Zoologico Universitatis* Stanford. *III. Gobidarum et Blennidarum genera speciesque nova ad insulas* Pelew *et* Celebes *pertinentia « Myxus » novus*]. 1 pl. o. t., Philipp. Journ. Sc., LIX, 2, 275-287. Manila (1936). **b - 1132**

This paper is a continuation of the series on noteworthy fishes in the Stanford University collection.

Three new genera and nine new species are described. These Philippine fishes are of importance as a contribution to the study of the distribution of fishes in the western Pacific.

**Herre A. W.** - Notes on Fishes in the Zoölogical Museum of Stanford University, V. New or rare Philippine Fishes from the Herre 1933 Philippine Expedition [*Notae de Piscibus in Museo Zoologico Universitatis* Stanford. *V. Pisces novi et rari ab expeditione* Herre, *A. 1933 ad Insulas Philippinas collecti*]. 2 pls., Philipp. Journ. Sc., LIX, 3, 357-373. Manila (1936). **b - 1133**

One new genus and seven new species are recorded and described. Besides, there are distributional notes on a great number of rare species, most of them unknown from the Philippines until now. Evidence is presented that many shore fishes as yet known only from the Philippines are also to be found in the China Sea.

**Hessle C.** - Gotlands Havslaxöring [« *Trutta marina* » *ad Gotlandiam pertinens*]. Mitteil. Anst. Binnenfisch. Drottningholm, 7. Stockholm (1935). **b - 1134**

Vorkommen, Wanderungen, Länge, Laichzeit und Geschlechtsreife.

**Hodgson W. C.** - The Present State of Knowledge concerning the Origin and Distribution of Herring Populations in Western European Waters. The Southern Bight [*De hodiernis cognitionibus quoad originem et distributionem populationum aringorum in maribus europaeis occid. Area* Southern Bight.]. Cons. Expl. Mer., Rapp. & Pr.-Verb., C, 2ème partie, 19-20. Copenhague (1936). **b - 1135**

A. claims his views on the interrelationship between the East Anglian autumn herring shoals and certain well-known spawning grounds. Groups of adult and young fish.

**Holly M.** - *Pisces: Ganoidei.* – xvi + 65 S. Das Tierreich gegr. v. Dtsch. Zool. Ges., Lief. 67, 4. Walter de Gruyter & Co. Berlin & Leipzig (1936). **b - 1136**

**Holly M.** - Die *Ammodytes* Arten der Küste des Königreiches Belgien [*Species « Ammodytes » in litoribus Belgicis*]. 1 Abb., Tab., Bull. Mus. R. Hist. Natur. Belg., XII, 5, 1-19. Bruxelles (1936). **b - 1137**

Tabellarische Zusammenstellung der gefundenen Exemplare von *Ammodytes lanceolatus*, *A. tobianus* und *A. marinus*. Ortsangaben. Neuer Fundort für *A. marinus*. Vergleich zwischen den Arten.

**Holly M.** - Die Syngnathiden der Belgischen Küstengewässer [*Syngnathidae ad aquas litoreas Belgicas pertinentes*]. Bull. Mus. R. Hist. Natur. Belg., XII, 7, 1-3. Bruxelles (1936). **b - 1138**

Unter Berücksichtigung seiner früheren in 1935 angefangenen Arbeit über die Fische der Nordsee gesammelt in den belgischen Küstengewässern gibt Vf. hier Auskünfte über Fundort, Länge usw., für *Entelurus aequoreus* L., *Nerophis lumbriciformis* Penn., *Syngnathus acus* L., *S. typhle* L., *S. rostellatus* und *Hippocampus guttulatus* Cuv.

**Hora S. L.** - Siluroid Fishes of India, Burma and Ceylon II. III. IV. V [*Pisces Siluroidei ad Indiam*, Burma *et* Ceylon *pertinentes*]. 4 fig., Rec. Ind. Mus., XXXVIII, 2, 199-209. Calcutta (1936). **b - 1139**

II. Fishes of the genus *Akysis*; list of separate characters from *Amblycepidae*; *A. prashadi* sp. nov. - III. The genus *Olyra*; differences from *O. longicaudata* and *O. laticeps*. - IV. On the use of the generic name *Wallago* Bleeker. - V. Fishes of the genus *Heteropneustes* Müller.

**Hora S. L.** - Air-breathing Fishes of India [*Pisces qui aërem respirant*]. Trans. Nat. Inst. Sc. India I, 1. (?) (1936). **b - 1140**

Different habitats and ecological associations, factors influencing the air-breathing in the various environments. Detailed study of the respiratory function.

**Hora S. L. & Mukerji D. D.** - European Species of Fish from the Tavoy Coast, Burma [*Species europeae Piscium in litoribus* Tavoy, Burma]. Nature, CXXXVII, 3456, 152. London (1936). **b - 1141**

Preliminary note on the occurrence of certain Atlantic species in Indian waters (five forms recorded). See further Rec. Indian Mus. XXXVIII.

**Hora S. L. & Mukerji D. D.** - Notes on Fishes in the Indian Museum. XXVII. - On Two Collections from Maungmagan, Tavoy District, Lower Burma [*Notae de Piscibus Musei Indiani. XXVIII. De duabus collectionibus in* Maungmagan (*Districtu* Tavoy, Burma *inferiore*)]. 6 figs., 2 pls., Rec. Ind. Mus., XXXVIII, 1, 16-39. Calcutta (1936). **b - 1142**

Description of the collections containing besides fairly common species, two new species belonging to the families *Syngnathidae* and *Gobiidae*, i. e. *Nannocampichthys gigas* gen. et sp. n., and *Ctenogobius meggitti* sp. n. and specimens of six species, viz. *Ammodytes lanceolatus* Le Sauvage, *Blennius pholis*, Linn., *Psenopsis anomala* (T. & S.), *Trachinus draco* Linn., *Cottus bubalis* Euphrasen, and *Lophius piscatorius* Linn., which have not been previously recorded from Indian waters.

**Howell Rivero L.** - Nuevo genero de peces para Cuba [*Piscium genus novum a Cuba provenientium*]. 1 tav., Mem. Soc. Cubana Hist. Natur., VIII, 2, 69-72. Habana (1934). **b - 1143**

Agitur particulatim de eorum positionibus in systematica*]. 8 figs., Journ. Imp. Fish. Inst., XXXI, 2, 97-114. Tokyo (1936). **b - 1165**

Detailed descriptions of and comparison between *Ereunias grallator* and *Marukawichthys ambulator*. Discussion on their systematic positions.

**Matsubara K.** - Biometry of two Species of Japanese Cardinalfishes with special Reference to their Taxonomy [*De biometria Piscium duarum specierum generis Amiidarum. Agitur particulatim de eorum taxonomia*]. 6 figs., Journ. Imp. Fish. Inst., XXXI, 2, 119-130. Tokyo (1936). **b - 1166**

Necessity of a revision of this group, especially the deep-sea fishes, on the basis of biometry. Biometric data expressed in graphs. Emendations of the genera *Epigonus*, *Hynnodus*, *Scepterias* and *Parahynnodus* suggested to form only one genus *Epigonus*.

**Mazzarelli G.** - Programmi vecchi e nuovi per lo studio del Tonno. (*Thunnus thynnus* [L.]) [*Praescriptiones antiquae et recentes pro studiis speciei « Thunnus thynnus »*]. Mem. Biol. Mar. e Oceanogr., III, Append., 1-19. Messina (1935). **b - 1167**

Esame critico delle ricerche eseguite in seguito al programma del 1912 sulla biologia del Tonno, con il fine di « rendere possibile un aumento del prodotto della sua pesca », ricerche che l'A. ritiene fondate su basi non rigorosamente scientifiche e su materiale raccolto senza controllo e perciò non rispondenti allo scopo prefisso. Anche il nuovo programma appare all'A. insufficiente e con non lievi manchevolezze.

**Mazzarelli G.** - Gli studi sulla biologia dei pesci d'importanza economica, eseguiti nell'Istituto di Zoologia della R. Università di Messina e nell'annesso R. Osservatorio di Pesca Marittima [*Studia de biologia Piscium magni momenti oeconomici in Instituto pro zoologia Regiae Universitatis Messanae et in conjuncto Observatorio pro piscatione maritima*]. Atti Soc. It. Progr. Sc., Riun., 24, IV, 1, 35-45. Roma (1936). **b - 1168**

La relazione tratta: le correnti dello Stretto di Messina e gli animali abissali, le razze locali delle acciughe, le razze locali e la biologia della Costardella, la biologia del Tonno, le migrazioni gamiche dei Cefali e delle Anguille, la biologia del pesce spada, la biologia delle anguille del lago di Ganzirri e dello Stretto di Messina.

**McC. Mottley C.** - The Introduction of Brown Trout (*Salmo trutta* L.) into British Columbia [*Introductio speciei « Salmo trutta » in Columbiam Britannicam*]. Proc. 5th. Pacific Congr., 1933, 5, 3801-3803. Univ. Toronto Press. Toronto (1934). **b - 1169**

On the results of planting of Brown Trouts from the east coast of Vancouver in the Cowichan and little Qualicum rivers. Tendency of Rainbow Trouts to supplant the browns and explanations for this. The brown trout a danger for other young fishes. Comparison with *S. clarki* and *S. gairdneri*.

**McC. Mottley C.** - A Biometrical Study of the Kamloops Trout of Kootenay Lake, *Salmo kamloops* Jordan [*Studium biometricum speciei « Salmo Kamloops » in lacu* Kootenay]. 6 figs., 8 tables, Journ. Biol. Bd. Canada, II, 4, 359-377. Toronto (1936). **b - 1170**

A study made on 216 specimens of Kamloops trout ranging from 10 cm. to 75 cm. in length. Twenty-four characters commonly used in the description and differentiation of the taxonomic groups of salmonoid fishes were investigated and a biometrical analysis of the differences due to size and sex is presented. The results indicate that the characters investigated must be used with caution in the taxonomic study of fishes. In comparing specimens of trout for taxonomic purposes individuals of the same size, age, sex, and degree of maturity should be used if possible. The general conclusions can be applied with a reasonable degree of assurance to closely related races and species of trouts (from A.).

**Menzies J. M.** - Sea Trout and Trout [*Tructa marina et Tructae*]. 16 pls., 2 maps, 230 pp. Arnold E. & C. London (1936). **b - 1171**

The A., who has a wide knowledge of all the Scottish Waters, illustrates the life-history of two races, the spawning, the determination of age from the scales, the food, the marking experiments, the diseases, the seasonal migrations.

**Raitt D. S.** - The Haddock Stocks of the North-East Atlantic, 1916-1935 [*Turmae a specie* « *Gadus aeglefinus* » *formatae in regione orientali Oceani Atlantici ab A. 1916 ad A. 1935*]. 7 figs., 17 tabl., Fish. Scott. Scient. Invest. 1936, I, 1-32. Edinburgh (1936). **b - 1197**

Evidence of geographically separate populations. Assessments of the relative numerical strengths of different age-classes. Possibility of forecasting the chief sources of Haddock supplies.

**Reid E. D.** - Two New Fishes of the Families *Dactyloscopidae* and *Clinidae* from Ecuador and the Galapagos [*Pisces duo novi ad familias Dactyloscopidas et Clinidas pertinentes ab* Ecuador *et insulis* Galapagos *provenientes*]. 2 fig., Copeia, 4, 163-166. New York (1935). **b - 1198**

*Cokeridia fimbriata* n. sp. off Cape Elena, Ecuador and *Odontoclinus dendriticus* n. sp. Galapagos. Related genera are discussed.

**Reid E. D.** - Revision of the Fishes of the Family *Microdesmidae*, with Description of a new Species [*Recognitio Piscium ad familiam Microdesmidarum pertinentium et descriptio cuiusdam novae speciei*]. 12 figs., 1 pl., Proc. U. S. Nat. Mus., Smithson. Inst., CXXXIV, 3002, 55-72. Washington (1936). **b - 1199**

Characters of the genus *Microdesmus* Günther, key to the species of this genus and their description. Systematic position of a specimen of *Microdesmus* collected on the Pacific coast of the Isthmus of Panama: *M. dipus*, most closely related to *M. hildebrandi*, n. sp.

A. shows that *Cerdale* Jordan and Gilbert and *Leptocerdale* Weymouth are without generic value merely representing extreme specific variations within the genus *Microdesmus*.

**Rollefsen G.** - Torskens alder, kønnsmodning, dødelighet og vekst [*Aetas, maturitas sexualis, mortalitas, accretio speciei* « *Gadus callarias* »]. (In Norw.) 2 graph. figs., Naturen, LX, 3, 74-83. Bergen (1936). **b - 1200**

Two different races of *Gadus callarias* are distinguished along the Norwegian coast with morphological differences, especially with regard to the structure of the otoliths. Possibility to conclude age and times of reproduction from the otoliths. Reproduction: diminution of the producing classes and diminution of the stock; relation between growth and reproduction.

**Roxas H. A.** - Rediscovery of *Biat luzonicus* Seale (*Gobiidae*) [*De reinventa specie* « *Biat luzonicus* »]. Copeia, I, 19-20. New York (1935). **b - 1201**

Description of a specimen from Mindoro.

**Runnström S.** - Investigations on Icelandic Herrings in 1929-35 [*Investigationes in Aringos ad Islandiam pertinentes A. 1929-35*]. 2 figs., 5 tables, Cons. Expl. Mer, Rapp. Pr.-Verb., XCIX, Rapp. Atlant., 1933-35, IV, 3-11. Copenhague (1936). **b - 1202**

Summary of our present knowledge concerning the Icelandic herrings, the localities and age of capture, the spawning periods, the age composition of spring spawning herrings, the number of vertebrae, the measurements of the scales, and comparison between the Icelandic and the Norwegian herrings.

**Runnström S.** - The Distribution of the Atlanto-Scandian Spring Herring [*Distributio aringorum verninorum regionis Atlanto-Scandiae*]. 1 map, 2 tabl., Cons. Expl. Mer, Rapp. & Pr.-Verb., C, 2ème partie, 24-28. Copenhague (1936). **b - 1203**

On the designation of « the Atlanto-Scandian Spring Herring ». Distribution of spawning places (shown on a map); mean number of vertebrae; age distribution.

**Russell F. S.** - The Seasonal Abundance of the Pelagic Young of Teleostean Fishes in the Plymouth Area. Part III. The Year 1935, with a Note on the Conditions as shown by the Occurrence of Plankton Indicators [*De abundantia pro anni tempore juvenum pelagicorum ad Pisces Teleosteos pertinentium in area* Plymouth. *Pars IIIª: A. 1935 cum nota de condicionibus depromptis ab apparatibus indicatoribus substantiae planctonicae*]. 2 tabl., 4 figs., Journ. Mar. Biol. Ass., XX, 3. 595-604. Plymouth (1936). **b - 1204**

The year 1935 has been the poorest yet recorded and there is a possibility that this scarcity of young fish may be correlated with the predominance of *Sagitta setosa* or Channel water. The changes in abundance may also be regarded as nearing the dimensions of the major fluctuations known for certain food fish.

**Scharrer E.** - Der Zitterwels « *Malopterurus electricus* ». 2 Abb., Natur u. Volk, LXVI, 4, 166-168. Frankfurt a. M. (1936). **b - 1205**

Beschreibung der auf der afrikanischen Westküste vorkommenden Art, *Malopterurus electricus* Lacépède, mit besonderer Berücksichtigung ihres elektrischen Organes.

**Schmit W.** - Ueber das Auftreten und die Verbreitung einiger Stockfischgattungen im Nördlichen Teil des Stillen Ozeans [*De praesentia et distributione aliquorum generum familiae Gadidarum*

*in parte septentr. Oceani Pacifici*]. (In russ. Dtsch. Rés.). 1 Karte, Zool. Journ., XV, 1, 175-183. Moskva (1936). **b - 1206**

Auf Grund eines Vergleiches der Entwicklungshöhe der Stockfischfauna des Stillen und des Atlantischen Ozeans und der Daten über das Vorkommen tertiärer Stockfische im Atlantischen Ozean, nimmt Vf. an, dass die Stockfischgattungen, die sich durch drei Dorsal- und zwei Analflossen auszeichnen, sich während des Tertiärs im nördlichen Polarbecken entwickelt haben und erst später in den Stillen Ozean hervorgedrungen sind. Er berichtet auch über das Verhältnis zwischen Vereisung und Vordringen der Stockfischgattungen.

**Schnakenbeck W.** - The Present State of Knowledge concerning the Origin and Distribution of Herring Populations in Western European Waters [*Quae adhuc novimus de origine et distributione populationum aringorum in aquis europaeis occid.*]. (German Text.). Cons. Expl. Mer, Rapp. & Pr.-Verb., C, 2ème partie, 28-31. Copenhague (1936). **b - 1207**

Klarlegung der Begriffe « Rasse » und « Population » und die damit zusammenhängenden Untersuchungen. Bedeutung der morphologischen Verschiedenheiten gegenüber den biologisch-physiologischen Erscheinungen beim Feststellen einer Rasse. Bedeutung der Erblichkeit der Unterschiede in den Merkmalen. Notwendigkeit das Studium auf einen anderen Grund zu legen: Erforschung der natürlichen Fortpflanzungsgemeinschaften und Erforschung des Reifezyklus des Herings.

**Schultz L. P.** - Species of Salmon and Trout in the Northwestern United States [*Salmones et Tructae in Americae nordoccidentalis Statibus Foederatis*]. Proc. 5th. Pacific Sc. Congress 1933, 5, 3777-3782, Univ. Toronto Press. Toronto (1934). **b - 1208**

Five different series are recorded subdivided in species and varieties and a key is given concerning except the usual characters also the number of scales above and below the lateral line and the number of vertebrae. Thus, A. distinguishes 5 spp. of *Oncorhynchus*, 2 *Salvelinus*, *Cristivomer*, the brown trout, and 5 forms of *Salmo*. New name suggested for the steelhead: *Salmo gairdnerii gairdnerii*.

**Scordia C.** - Intorno alla accertata presenza dello *Scomberesox saurus* (Walb.) nel Mediterraneo [*De certiore praesentia speciei « Scomberesox saurus » in Mediterraneo*]. Boll. di Zool., VII, 5/6, 217-220. Napoli (1936). **b - 1209**

L'A. dimostra la presenza nel Mediterraneo dello *Scomberesox saurus* (Walb.), in base all'esame differenziale di questa specie atlantica con lo *Scomberesox rondeleti* Cuv. e Val. ritenuta unica specie mediterranea.

**Scott E. O. G.** - On a New Genus of Fishes of the Family *Galaxiidae* [*Piscium genus novum ad familiam Galaxiidarum pertinentium*]. 1 pl., 2 figs., Pap. & Proc. R. Soc. Tasmania 1934, 41-46. Hobart (1935). **b - 1210**

*Paragalaxias* n. gen., *P. shannonensis* n. sp.

**Sømme S.** - Vekst og nœring hos harr og ørret (*Thymallus thymallus* L. og *Salmo trutta* L.) En sammenlignende studie [*De accretione et nutricatione specierum « Thymallus thymallus » et « Salmo trutta ». Studium comparatum*]. (In Norw., Engl. Rés.). 8 figs., 11 tabl., Nyt. mag. f. naturvid., LXXV, 187-218. Oslo (1936). **b - 1211**

Variation in length and age composition. Comparison between the growth of trout and grayling, calculated lengths in cm. Differences in growth between male and female. Sexual maturity. Comparison between composition of stomach contents of trout and grayling.

**Souché G.** - Note sur l'habitat de *Pleuronectes unimaculatus* Bonap. [*Habitat speciei « Pleuronectes unimaculatus »*]. Bull. Soc. Biol. Arcachon, XXXIII, 1, 107-108. Bordeaux (1936). **b - 1212**

La rareté du *Pleuronectes unimaculatus* est due surtout au fait que ce poisson, de très petite taille, n'est pas recherché pour la consommation. Il est fréquent dans la région de la Marche presque au voisinage de Start-Point.

**Suvorov E. K.** - New Species of Ray from the Okhotsk Sea: *Raja violacea* sp. n. [*Rajae species nova in Mari Okhotsk: « Raja violacea »*]. (In Russ. & Engl.). 1 fig., Bull. Acad. Sc. URSS, Cl. Sc. Math. & Natur., VII, 3, 431-433. Moscou Léningrad (1935). **b - 1213**

Diagnosis of a new species of Ray captured along the western shore of the Okhotsk Sea in July, 1933.

**Suvorov E. K.** - A New Genus and Two New Species of Fishes of the Family *Zoarcidae* from the Okhotsk Sea [*Genus novum et duae species novae Piscium ad familiam « Zoarcidae » maris Okhotsk pertinentium*]. (In Russ. & Engl.). 3 figs., Bull. Acad. Sc. URSS, Cl. Sc. Math. & Natur., VII, 3, 435-440. Moscou-Léningrad (1935). **b - 1214**

Description and diagnosis of *Bothrocarina* g. n., *P. nigrocaudata* sp. n. and *Lycodes brunneofasciatus* sp. n.

**Svetovidov A. N.** - *Lepidion schmidti*, eine neue Fischart [*« Lepidion schmidti » species nova Piscium*]. 1 Abb., Zool. Anz., CXIII, 11/12, 266-269. Leipzig (1936). **b - 1215**

Beschreibung, verwandte Arten (Vergleich auf 2 Tabellen dargestellt). Alle zur Gattung *Lepidion* gehörenden Arten zeichnen sich durch ein sehr seltenes Vorkommen aus, was ohne Zweifel mit dem Tiefseeleben dieser Fische zusammenhängt.

**Tåning V. Å.** - The Herring Stocks of the Faroes, Iceland and Greenland [*Turmae aringorum in insulis Faroe, Islandia et Groenlandia*]. Cons. Expl. Mer, Rapp. & Pr.-Verb., C, 2ème partie, 32-33. Copenhague (1936). **b - 1216**

Review of work carried out by several researchers concerning racial investigations, spawning and occurrence of postlarvae.

**Tåning V. Å.** - Young Herring and Sprat in Faroese Waters [*Aringi juvenes et species « Clupea sprattus » in aquis insularum Faroe*]. (In Engl., Dan. Rés.). 11 figs., tabl., Medd. Komm. Danm. Fisk.- & Havunders., ser. Fiskeri, X, 3, 1-28. København (1936). **b - 1217**

Separation of the two species. Spawning-places and periods; influencing factors. Number and distribution of the fry.

**Tester A. L.** - Some Results of the British Columbia Herring Investigation and their economic Bearing [*Resultatus ex investigationibus de Aringis in Columbia Britannica eorumque momentum oeconomicum*]. 3 graph. figs., Rep. Commiss. Fish. for 1935, 74-80. Victoria, B. C. (1936). **b - 1221**

Review of and discussion on two papers of A. presented for publication in the Journal Biol. Bd Canada in June 1936 and dealing with local populations of herring and with the length and age composition of the runs based on the results of six years of investigation.

**Thompson W. F. & Van Cleve R.** - Life History of the Pacific Halibut. 2. Distribution and early Life History [*Cyclus vitalis quoad Hippoglossum Oceani Pacifici. II. Distributio et priora vitae stadia*]. 72 figs., 28 tabl., Rep. Int. Fish. Comm., 9, 1-184. Seattle, Wash. (1936). **b - 1222**

The distribution and drift of the eggs and larvae confirm the results of tagging, racial and growth investigation of the adults in indicating the separation of two main stocks of halibut. The study of the conditions determining the distribution of the adults has made it possible to estimate the probable presence or absence of halibut in commercial quantity in regions not yet exploited and to predict the limits of expansion of the North Pacific halibut fishery. Knowing this distribution and the ocean currents which carry the young, it is possible to determine approximately the interdependence of the banks and to say that the supply of eggs and larvae for the present fishery must come from banks at present known and exploited. (A.) - 2 Appendices on net hauls and drift bottle experiments.

**Tibby R. B.** - Notes on the Ocean Sunfish, *Mola mola* [*Notae de specie « Mola mola » oceanica*]. 1 fig., Calif. Fish. & Game, XXII, 1, 49-50. Sacramento (1936). **b - 1223**

Short note including some remarks on anatomical features.

**Tomiyama Itirô** - *Gobiidae* of Japan [*Gobiidae ad Japoniam pertinentes*]. 44 figs., Jap. Journ. Zool., Trans. & Abstr., VII, 1, 37-112. Tokyo (1936). **b - 1224**

Revision of 100 species of *Gobiidae*, most of which are marine. Indication of synonymies and localities. Bibl.

**Toschi A.** - Nuova cattura di un grande esemplare di *Orthagoriscus mola* L. sul littorale dell'Alto Adriatico [*Captura nova magni cuiusdam exemplaris speciei « Orthagoriscus mola » in litoribus alti Hadriatici*]. 2 fig., Boll. Pesca, Piscicult. & Idrobiol., XII, 4, 325-327. Roma (1936). **b - 1225**

Descrizione del plettognato arenato sulla spiaggia di Venezia. Cause che possono aver influito sulla cattura di questo esemplare, specialmente particolari condizioni meteorologiche. Singolari aspetti della biologia di questa specie.

**Uno M.** - *Germo germo* (Lacépède) in the Waters East of Nozima Promontory, Tiba Prefecture. (Prel. Rep. II) [*Species « Germo germo » in aquis orientalibus apud promunturium* Nozima, *in Praefectura* Tiba]. (In Jap., Engl. Rés.). 2 tabl., 2 figs., Bull. Jap. Soc. Scient. Fish, V, 4, 235. Tokyo (.1639) **b - 1226**

Age determinations, length and weight of 200 individuals of *Germo germo*.

**Uno M.** - *Germo germo* (Lacépède) in the Waters East of Nozima Promontory Tiba Prefecture (Rep. I) [*« Germo germo » in aquis orientalibus apud promunturium* Nozima, *in Praefectura* Tiba]. (In Jap.; Engl. Rés.). 3 tabl., Bull. Jap. Soc. Scient. Fish., V, 307-309. Tokyo (1936). **b - 1227**

Body lengths and weights were measured on 1500 samples of *Germo germo* and the age was determined by counting the winter rings on vertebra. Composition of shoals, age, body lengths and weights for each age group.

**Vladykov V. D.** - Some Unreported and Rare Fishes from the Coast of Nova Scotia [*Pisces rari a litoribus Novae Scotiae provenientes*]. Proc. Nova Scotian Inst. Sc., XIX, 1, 1-8. Halifax, N. S. (1934 & 1935). **b - 1228**

Record of 22 marine fishes rarely found, and list of 10 forms not previously reported. The number of marine and anadromous fishes reported from the coast of this province now amounts to about 150 spp.

**Vladykov & Mc Kenzie** - The Marine Fishes of Nova Scotia [*Pisces marini Novae Scotiae*]. Figs., Proc. Nova Scotian Inst. Sc., XIX, 1. Halifax, N. S. (1935). **b - 1229**

Review of all the marine and anadromous fishes (151 species) found in the area between lat. 42° 15′ N. and 47° N. and between long 57° W. and 66° 45′ W. Key to the species.

**Weber M. & De Beaufort L. F.** - The Fishes of the Indo-Australian Archipelago. VII *Perciformes* [*Pisces archipelagi Indoaustraliénsis. VII Perciformes*]. 106 figs., XVI + 607 pp., Brill. Leiden (1936). **b - 1230**

This volume refers to the following families belonging to *Perciformes: Chaetodontidae, Toxotidae, Monodactylidae, Pempheridae, Kyphosidae, Lutjanidae, Lobotidae, Sparidae, Nandidae, Scienidae, Malacanthidae* and *Cepolidae*, and contains an artificial key to the Indo-Australian families of *Perciformes*.

Detailed description of every species, measure of length, eye, height, etc., count of the scales, fins, formulae, gillmembranes etc. Relation to distribution, habitat, nomina indigena and notes on varieties and synonyms.

**White E. G.** - Some Transitional Elasmobranchs connecting the *Catuloidea* with the *Carcharinoidea* [*De quibusdam Elasmobranchiatis quae Catuloidea cum Carcharinoideis colligant*]. 10 figs., 3 tabl., Amer. Mus. Nov., 879, 1-22. New York (1936). **b - 1231**

The object of this paper is to settle some disputed points as to the classification of some Catuloid species (*C. retifer, C. torazame, Halaelurus burgeri, Calliscyllium venustum, Atelomycterus marmoratus*) and 2 Carcharinoids (*Triakus scyllium* and *Carcharinus milbertij aponicus*) which, being very stable in phylogenetic characters, vary extremely in secondary structures. Comparisons between these species with regard to general form, nictitating fold, denticles, rostrum, pectoral fin skeleton, vertebral centra, spiral valves and heart valves. List of different characters. New classification.

**Whitehouse R. H. & Grove A. J.** - The Dissection of the Dogfish [*De dissectione speciei « Mustelus canis »*]. viii + 179 pp., Univ. Tutorial Press Ltd. London (1936). **b - 1232**

**Whitley G. P.** - More Ichthyological Miscellanea [*Notarum ichthyologicarum miscellanea*]. 6 figs., 1 pl., Mem. Queensl. Mus., XI, 1, 23-51. Brisbane (1936). **b - 1233**

The present paper may be regarded as a continuaton of the « Ichthyological Miscellanea » which appeared in the « Mem. », X, 1, 8, 1930 and contains a revised list of Queensland fishes, of which the following are new to science: *Hyalosprattus* subg. n., *Lomanetia* g. n., *Fodifoa* g. n., *F. fistulosa* sp. n., *Paradente Marshalli* sp. n., *Thunnus Nicolsoni* sp. n., *Ichthyscopus sannio* sp. n., *Sirembo everriculi* sp. n., *Australaphia* g. n., *A. annona* sp. n., *Cyprichthys* g. n.

**Wood H.** - Scottish Herring Race Investigations [*Investigationes in stirpes Aringorum in aquis Scotis*]. Diagr., Cons. Expl. Mer, Rapp. & Pr.-Verb., C, 2ème partie, 34-35. Copenhague (1936). **b - 1234**

The work begun in 1931 has now been completed proving that spring spawners and autumn spawners are identifiable from each other by significant differences in the number of vertebrae and keeled scales.

**Wood H.** - Race Investigations of the Herring Population of Scottish Waters [*Investigationes in stirpes Aringorum in aquis Scotis*]. 5 figs., 1 chart, Fish. Bd. Scott., Scient. Invest., III, 1-52. Edinburgh (1936). **b - 1235**

From these investigations it has been established that there are two main, quite distinct, spawning stocks or races which spawn at different seasons under different temperatures on different grounds: the spring spawners and the Scottish autumn spawners appear mixed together in the different areas described here. The importance of race work especially with regard to the keeled scales as a race character in the analysis of a mixed herring population.

**An.** - Der Kabeljau der Murmanküste [« *Gadus morrhua* » *ad litora regionis* Murman *pertinens*]. 3 Tab., Fischmarkt, IV, 12, 332-333. Cuxhaven (1936). **b - 1236**

Angaben von Länge, Mittelgewicht, Mittelgewicht der Leber und Fettprozent. Vergleich zwischen dem Kabeljau an Lofoten, Finmarken und an der Murmanküste.

**An.** - Ein Fisch mit Beinen [*Piscis cruribus praeditus*]. 3 Abb., Umschau, XL, 48, 947. Frankfurt a. M. (1936). **b - 1237**

Beschreibung des in den Küstengewässern Ostindiens, nordwärts bis Florida, vorkommenden Fledermausfisches von der Familie *Malthidae*. Die Flossen sind so umgestaltet, dass der Fisch damit auf dem Meeresboden laufen kann.

**Sch.** - Ein neues Buch über Seefische [*Liber novus de Piscibus marinis*]. Fischmarkt, IV, 4, 107-109. Cuxhaven (1936). **b - 1238**

Besprechung des neuerschienenen Werkes von E. Ehrenbaum « Naturgeschichte und wirtschaftliche Bedeutung der Seefische Nordeuropas ».

**Sch.** - Beobachtungen an Riesenhaien [*Observationes circa speciem « Selache maxima »*]. 1 Abb., Fischmarkt, IV, 7, 185-189. Cuxhaven (1936). **b - 1239**

Bericht über die im Mai 1936 auf 47° 40′ N. und 26° 40′ W. gemachten Beobachtungen über *S. maxima*, die ganz besondere von den anderen Haifischen abweichende Lebensgewohnheiten haben.

**Sch.** - Fang eines eigenartigen Fisches [*Piscis notandus captus*]. 1 Abb., Fischmarkt, IV, 7, 189-190. Cuxhaven (1936). **b - 1240**

Bericht über den Fang von *Ceratias holboelli* am 26. Juni 1936 in den isländischen Gewässern von Ingolfshöfdi. Kurze beschreibung der eigenartigen Aussengestalt des Fisches, der in vereinzelten Exemplaren in der Nordatlantik vorkommt.

## Mammalia.

**Barabasch - Nikiforow I. I.** - Die Seerobben der Komandorskischen Inseln [*De Pinnipediis ad insulas* Commandorski *pertinentibus*]. (In Russ., Dtsch. Rés.). 7 Abb., 3 Tab., Trans. Inst. Fish. & Oceanogr., USSR (UNIRO), III, 223-237. Moscow & Leningrad (1936). **b - 1241**

Die wichtigsten hier vorgetretenen Arten sind: *Callorhinus ursinus* L., *Eumetopias jubatus* Schr., *Phoca vitulina largha* Pall., Altersklassen, Reproduktion, Nahrung, Wanderungen.

**Chapsky K. K.** - The Walrus of the Kara Sea [« *Trichechus rosmarus* » *ad mare Karense pertinens*]. (In Russ., Engl. Rés.). 34 figs., tabl., Trans. Arct. Inst., LXVII, 1-124. Leningrad (1936). **b - 1242**

Morphological characters. The morphology of the tusks and study on the growth and the sex characteristics. Division into age and sex groups. Geographical distribution. The character of the colonies, age and sex composition. Reproduction. Some notes on the hair. Food. Principal characters of the stock. Industry.

**Dorofeew S. W.** - Beiträge zur angewandten Biologie der Flossentiere der Tatarischen Wasserstrasse während der Frühlings-Eisperiode [*Contributiones in biologiam applicatam quoad Pinnipedia in Strictu Scythico, glacierum periodo*]. (In Russ., Dtsch. Rés.). Trans. Inst. Fish. & Oceanogr. USSR (UNIRO), III, 217-220. Moscow & Leningrad (1936). **b - 1243**

*Phoca vitulina largha* (Pall.), *Phoca hispida* (Schr.), *Erignathus barbatus nauticus* (Pall.) und *Histriophoca fasciata* (Zimm.) Ihre Lagerstätten auf dem Eis, Analyse der Altersgruppen, Reproduktion.

**Dorofeew S. W.** - Materials on the Study of the Early Life of the White Sea Harp Seal [*Res pro investigationibus vitae embryonalis speciei « Histriophoca groenlandica oceanica »*]. (In Russ., Engl. Rés.). Trud. poljarn. Komm., Akad. Nauk. USSR, 31, 1-39. Moskva-Leningrad (1936). **b - 1244**

Results of observations made in the White Sea 1934-1935 on the time of breeding, length of the lactation period, stages of development in the obesity of the puppy seal and the changing of hair.

**Fraser F. C.** - Recent Strandings of the False Killer Whale, *Pseudorca crassidens* with special Reference to those found at Donna Nook, Lincolnshire [*Inventiones recentiores speciei « Pseudorca crassidens ». Agitur particulatim de inventionibus in* Donna Nook (Lincolnshire)]. Scott. Natur., 220, 105-114. Edinburgh (1936). **b - 1245**

**Freyman C.** - La distribuzione dei *Pinnipedia* nei mari dell'Estremo Oriente [*Pinnipedia. Quaestio de distributione in maribus regionum orientalium*]. (In Russ.). 1 carta f. t., 2 fig., Trans.

Inst. Fish. & Oceanogr. USSR (UNIRO), III, 157-160. Moscow & Leningrad (1936). **b - 1246**

Informazioni su *Phoca hispida, Ph. vitulina largha, Erignathus barbatus.*

**Freyman S.** - Über die Biologie der Robben im Fernen Osten [*Phocae. Materies ad easdem studendas in orientalibus regionibus extremis*]. (In Russ., Dtsch. Rés.). Trans. Inst. Fish. & Oceanogr. USSR (UNIRO), III, 184-203. Moscow & Leningrad (1936). **b - 1247**

Lebenszyklus und Beschreibung von *Phoca hispida*, subsp. *Aciba, Ph. vitulina largha, Histriophoca fasciata, Erignathus barbatus, Eumetopias jubatus.*

**Junge G. C. A.** - Bones of a Whale from the Wieringermeer, Zuider Zee [*Balaenae ossa reperta in regione* Wieringermeer τοῦ Zuider Zee]. Nature, CXXXVIII, 3480, 78. London (1936). **b - 1248**

Short preliminary note. (A detailed paper will be published in the journal Temminckia in the beginning of 1937). The bones found have probably belonged to a specimen of *Rhachianectes glaucus = Eschrichtius gibbosus* (Erxl.).

**Kitching G. C.** - The Manatee of St. Helena [*De Manatidis ad* St. Helena *pertinentibus*]. Nature, CXXXVIII, 3479, 33-34. London (1936). **b - 1249**

A. quotes some records of the occurrence of sea-cows at St. Helena dating from 1679.

**Klumov S. K.** - Verteilung des Weisswals im Europäisch-Asiatischen Norden [*Distributio speciei « Delphinapterus leucas » in regionibus septentrionalibus europaeis-asiaticis*]. (In Russ., Dtsch. Rés.). Tab., 10 Fig., 1 Karte, Trud. Polj. Komm., Akad. Nauk. U.S.S.R., 27, 1-67. Moskva & Leningrad (1936). **b - 1250**

Die Verbreitung dieser Art steht ohne Zweifel mit der Ernährung in Verbindung. Vf. gibt deshalb eine Zusammenstellung der im Karsschen, Weissen und Barentschen Meere lebenden Fische und Krebstiere. Etwas über die Wanderungen des Weisswals. Schema für ein weiteres Studium.

**Laurie A. H.** - The Stock of Antarctic Blue Whales [*Turma antarctica speciei « Balaenoptera musculus »*]. 1 tabl., Nature, CXXXVIII, 3479, 33. London (1936). **b - 1251**

Short information on the calculated average length of female Blue Whales from 1930-1935. Conclusions as to the depletion of the stock.

**Lun S. S.** - I *Pinnipedia* del Kamtschatka occidentale (Regione di Tigil) [*Pinnipedia ad* Kamtschatka *occidentalem pertinentia*]. (In Russ.). Trans. Inst. Fish. & Oceanogr. USSR (UNIRO), III, 212-216. Moscow & Leningrad (1936). **b - 1252**

Osservazioni sulla biologia di *Phoca vitulina largha, Phoca hispida* e *Erignathus barbatus nauticus*: migrazioni, riposo sul ghiaccio, riproduzione.

**Malm E. N. & Tatarinov N. P.** - The Dynamics of Fatness of the Dolphin (*Delphinus delphis* L.) of the Black Sea [*Crassitudinis dynamica in specie « Delphinus delphis » Ponti Euxini*]. (In Russ.; Engl. Rés.). Works Arnoldi Biol. Stat., II, 1, 87-103. Novorossiysk (1936). **b - 1253**

The minimal fatness of dolphins of small and average sizes and ages (120-160 cm) is observed in August, of large dolphins (above 160 cm) in September; the greatest fatness in March and April. Necessity of transferring the catch in the period of greater fatness.

**Matsuura Y.** - The Distribution and the Habits of Hump-Back Whales in the Adjacent Waters of Japan [*Distributio et consuetudines speciei « Megaptera nodosa » in aquis Japoniae proximis*]. (In Jap., Engl. Summ.). Bull. Jap. Soc. Scient. Fish., IV, 3, 159-170. Tokyo (1935). **b - 1254**

Results of observations on the migrations, reproduction, size, growth and sexual development of *M. nodosa* (Bonnaterre) caught almost exclusively in the southern waters of Japan, around the Bonin Islands and near the southern part of Formosa in winter.

**Matsuura Y.** - On the Lesser Rorqual found in the Adjacent Waters of Japan [*De « Balaenoptera acuto-rostrata » reperta in maribus Japonicis*]. (In Jap.; Engl. Rés.). 5 tabl., Bull. Jap. Soc. Scient. Fish., IV, 5, 325-330. Tokyo (1936). **b - 1255**

The distribution of *Balaenoptera acuto-rostrata* Lacépède coincides with that of fin whales: in summer at the Kurile Islands, in Winter in the Yellow Sea and at « Syanzen », Korea. Copulation of *B. acuto-rostrata* may be presumed to take place from December to March and the gestation period covers about ten months. Body lengths of the whales caught, and migrations.

**Naimov S. P. & Smirnov N. A.** - Sulla sistematica e sulla distribuzione geografica dei *Phocidae* nella parte settentr. del Pacifico [*De systematica et distributione geographica Phocidarum in regione septentrionali Oceani Pacifici*]. (In Russ.). Trans. Inst. Fish. & Oceanogr. USSR (UNIRO) III, 161-184. Moscow & Leningrad (1936). **b - 1256**

Diagnosi, note sistematiche, distribuzione di: *Erignathus barbatus nauticus* Pallas, *Histriophoca fasciata* Zimm., *Phoca vitulina largha* Pall., *Ph. vitulina largha pallasii* natio nova, *Ph. vitulina largha largha* Pall., *Ph. hispida* Schreb, *Ph. hispida ochotensis* Pallas, *Ph. hispida krascheninikovi* subsp. nov.

**Ostroumov N. A.** - Sur la systématique et la distribution de *Delphinapteras leucas* Pall., du Nord de l'Europe et de la Mer de Kara [*De systematica et distributione speciei « Delphinapterus leucas » in Europae regionibus septentrionalibus et in Mari Karensi*]. (En russe). 6 fig., Za Rybn. Ind. Sev., 11, 28-35. Leningrad (1935). **b - 1257**

**Ostroumov N. A.** - Le produit de la pêche de *Delphinapteras leucas* Pall. [*Fructus piscationis speciei « Delphinapteras leucas »*]. Khoz. Sev., 2, 50-56. Arkhangheljsk (1936). **b - 1258**

**Peacock A. D., Comrie L. & Greenshields F.** - The False Killer Whales stranded in the Tay Estuary [*« Pseudorca crassidens » species reperta in aestuario fluminis* Tay]. Scott. Natur., 220, 93-104. Edinburgh (1936). **b - 1259**

**Portier P.** - Pression osmotique des liquides des Oiseaux et des Mammifères marins [*De pressione osmotica in liquoribus avium et mammaliorum marinorum*]. Rés. Campagnes Scient., XCIV, 18-24. Monaco (1936). **b - 1260**

Les observations sur les points de congélation du sang, de la bile, de l'urine de la vessie et des milieux liquides de l'œil dans *Balaenoptera Sibbaldii, Phoca barbata* et *P. foetida* conduisent à la constatation que la pression osmotique des vertébrés marins est plus élevée que celle des animaux terrestres de la même classe et qu'elle peut varier dans des limites très étendues. Résultats sur la pression des oiseaux marins.

**Portier P.** - Observations faites au Spitzberg sur un jeune Phoque conservé en captivité [*Observationes in regione* Spitzberg *peractae de juveni quadam phoca in captivitate serbata*]. Rés. Campagnes Scient., XCIV, 25-26. Monaco (1936). **b - 1261**

On a pu capturer au moyen du filet et placer dans une baignoire sur le pont de la « Princesse Alice » un jeune Phoque, qui mourut au bout d'une quinzaine de jours par inanition; la graisse qui entoure les reins avait disparu tandis que la graisse de couverture avait conservé la même épaisseur.

**Portier P.** - Observations et expériences sur les Mammifères marins [*Observationes et experientiae de Mammaliis marinis*]. Rés. Campagnes Scient., XCIV, 30. Monaco (1936). **b - 1262**

Le mécanisme du souffle dans les Cétacés. Le sommeil des mammifères marins, la graisse de couverture et la graisse de réserve.

**Pouchet G.** - Communication à propos de l'anatomie du Cachalot [*Communicatio de balaenae anatomia*]. Rés. Campagnes Scient., XCIV, 4. Monaco (1936). **b - 1263**

Rectification d'une erreur d'interprétation à propos de l'origine du blanc de baleine.

**Richard J.** - Documents sur les Cétacés et Pinnipèdes provenant des Campagnes du Prince Albert I^er^ de Monaco [*Cetacea et Pinnipedia provenientia a navigationibus peractis a Principe* Albert I^er^ de Monaco. *Documenta*]. 8 pls., Rés. Campagnes Scient., XCIV, 1-72. Monaco (1936). **b - 1264**

L'A. a réuni plusieurs publications déjà parues, élaborées par P. Portier, G. Pouchet, Ed. Retterer et H. Neuville, J. Richard, J. Richard et H. Neuville, sur l'anatomie et la physiologie de vertébrés marins.

**Richard J.** - Notes sur les Cétacés et les Pinnipèdes [*Notae de Cetaceis et Pinnipediis*]. Rés. Campagnes Scient., XCIV, 34-61. Monaco (1936). **b - 1265**

Mensurations sur *Grampus*, *Pseudorca crassidens*, *Delphinus delphis* et *Tursiops tursio*, provenant des campagnes de 1885 au 1929.

**Richard J. & Neuville H.** - Sur quelques Cétacés observés pendant les campagnes du yacht «Princesse Alice» [*Nonnulla Cetacea observata navigationibus perdurantibus pamphilii* « Princesse Alice »]. Rés. Campagnes Scient., XCIV, 9-17. Monaco (1936). **b - 1266**

Mensurations de deux *Grampus griseus* et de deux exemplaires de *Orca gladiatoria* capturés au large de Monaco, dont on a pu étudier les squelettes et les viscères, ainsi que les particularités d'un *Delphinus delphis*.

**Richter R.** - Neue Bilder von unseren Riesen-Walen in der Halle und im Freien [*Descriptiones novae Balaenarum*]. 6 Abb., Natur u. Volk, LXVI, 2, 63-68. Frankfurt a. M. (1936). **b - 1267**

Reproduktion einiger Aufnahmen der Finwalsskelette mit begleitendem Text; Gewicht, Fettinhalt der Wale.

Information concerning the species of seals present on the North Cornwall Coast, the density of the population and the position of the rookeries. All the caves in which the seals live were explored. Total number of seals on the North and South Coast. Breeding, log.

**Tetly H.** - Greenland Seal in British Waters [« *Phoca groenlandica* » *in aquis Britannicis*]. Nature, CXXXVII, 3457, 192. London (1936). **b - 1271**

Short note confirming the first record of *Phoca groenlandica* in British waters to be in 1836.

**Tomilin A. G.** - Der Pottwal des Kamtschatka -Meeres [*Species* «*Physeter macrocephalus*» *ad mare regionis* Kamtschatka *pertinens*]. (Russ., Dtsch. Rés.). 3 Abb., 1 Karte, Taf., Zool. Journ., XV, 3, 483-519. Moskva (1936). **b - 1272**

Beschreibung, die Jagd des Pottwals (statistische Angaben für 1933-1935); Fortpflanzung, Nahrungs- und Lebensverhältnisse, Wanderungen, geographische Verbreitung.

**An.** - Selbstmord von Walherden ? [*Num balaenarum turmae mortem sibi consciscunt ?*]. 2 Abb., Umschau, XL, 9, 169. Frankfurt a. M. (1936). **b - 1273**

Einige Beispiele von an Küsten vorgefundenen toten Walherden. Versuch zur Erklärung dieser Erscheinung.

## Animalia incertae sedis.

**Borg F.** - Einige Bemerkungen über Brackwasserbryozoen [*Bryozoa in aquis salmacidis viventia. Observationes*]. 3 Abb., Zool. Anz., CXIII, 188-193. Leipzig (1936). **b - 1274**

Ueber die Beziehungen zwischen Nematoden und Bryozoen mit besonderer Berücksichtigung der im niederländischen Brackwasserkanal und in verschiedenen Brackwassergebieten der Ostsee befindlichen Arten: *Membranipora membranacea* = *Membranipora* (*Electra*) *crustulenta*, *M.* (*Callopora*) *aurita*. Verzeichnis von 25 Spezies. Besonderes Anpassungsvermögen an das Leben im Brackwasser.

**Bossler R. S.** - Nomenclatorial Notes on Fossil and Recent *Bryozoa* [*Bryozoa fossilia et recentiora. Nomenclatura*]. 12 figs., Journ. Washington Acad. Sc., XXVI, 4, 156-162. Washington (1936). **b - 1275**

This material contains 3 new genera and spp. Description of a genus formerly named but not described properly. Several changes and emendations.

**Hatai K.** - The Geographic Distribution of *Brachiopoda*. Part I. Recent *Brachiopoda* of Japan. Part 2 and 3, Recent *Brachiopoda* of Foreign Countries [*Brachiopoda. Distributio geographica. Pars Iª. Brachiopoda recentiora Japonica. Partes II et III. Brachiopoda recentiora ad externas regiones pertinentia*]. Bull. Biogeogr. Soc. Japan, VI, 63-70; 75-95. Tokyo (1936). **b - 1276**

According to the Author « the Brachiopods of Japan show very interesting geographical distribution, some species and even genera are confined to the waters bordering Japan, some species and most of the genera are very widely distributed in the northern hemisphere, a smaller number are distributed southwards instead of northwards as is the case of the most common ones. List of distribution and localities. Description of some important species.

**Hatai K.** - A List of the *Brachiopoda* dredged by the Surveying Ship Sitito-maru of the Tokyo Fisheries Experimental Station in August 1935 [*Elenchus Brachiopodorum collectorum navi exploratoria* « Sitito-maru » *ad Stationem experimentalem piscatoriam in* Tokyo *pertinenti, mense Augusto 1935*]. Bull. Biogeogr. Soc. Japan, VI, 143-146. Tokyo (1936). **b - 1277**

Seven species of *Brachiopoda* are contained in this collection taken from the shore of the inlets south of the Idu Peninsula.

**Hatai K.** - Neogene *Brachiopoda* from Japan [*Brachiopoda Japonica aetate neogenica*]. 2 pls. o. t., Jap. Journ. Geol. & Geogr., Trans. & Abstr. XIII, 3/4, 283-324. Tokyo (1936). **b - 1278**

List of localities and species found. The geographic and geologic distribution of the genera dealt with and the specific affinities of their forms. Description of 26 species, 10 of which are new.

**Hatai K.** - A List of the Recent *Brachiopoda* dredged from the Littoral Sea of the Pacific Side of Bôsô Peninsula, Central Japan [*Elenchus Brachiopodorum recentiorum dracis auxilio collectorum, ad litora Oceani Pacifici apud paeninsulam* Bôsô *in Japonia centrali*]. 1 fig., Rec. Oceanogr. Works Japan, VIII, 1, 191-207. Tokyo (1936). **b - 1279**

Fifteen species are listed and described, one of which is new, *Laqueus pacificus* sp. nov. and one indeterminable.

**Reed Cowper F. R.** - Some new Brachiopods from Girvan [*Brachiopoda quaedam nova ad* Girvan *pertinentia*]. 1 pl., Ann. & Mag. Natur. Hist., XV, 91, 1-12. London (1935). **b - 1280**

About 10 forms, most of them new, are added to those described in Author's Memoir of 1917.

**Remane A.** - *Monobryozoon ambulans* n. g., n. sp., ein eigenartiges Bryozoon des Meeressandes [« *Monobryozoon ambulans* » *peculiaris in arena marina*]. 3 Abb., Zool. Anz., CXIII, 161-167. Leipzig (1936). **b - 1281**

Bericht über eine im Meeressand auf Helgoland in September 1934 aufgefundene Art. Beschreibung. Klassifikation.

**Sakakura K.** - *Bryozoa* from Toyama Bay, Sea of Japan [*Bryozoa ad Bajam* Toyama *pertinentia in mari Japonico*]. 1 pl., 2 figs., Annot. Zool. Jap., XV, 1, 106-119. Tokyo (1935). **b - 1282**

Of the 40 spp. reported here, two are new: *Arachnopusia* (?) *Kikuchii* and *Lyrula multipora*.

**Silén L.** - *Bryozoa* from the Skager Rack, with Notes on the Genus *Triticella* Dalyell [*Bryozoa collecta in* Skagerack. *Notae de genere* « *Triticella* »]. Ark. f. Zool., XXVIII A., H. 3, 16, 1-10. Stockholm (1936). **b - 1283**

List of 34 species of *Entoprocta* and *Bryozoa*, most of them found close to the Norwegian coast. Discussion on the determination and characteristic differences of *Triticella korenii* G. O. Sars, *J. boeckii* G. O. Sars and *T. flava* Dalyell. Emendations.

**Stach L. W.** - Notes on *Cryptosula pallasiana* Moll 1803 (*Bryozoa*) [*Notae de specie* « *Cryptosula pallasiana* »]. Victor. Natural., 52, 83-84. Melbourne (1935). **b - 1284**

Living colonies found in Port Phillip Bay.

**Yabe H. & Hatai K.** - The Recent Brachiopod Fauna of Japan. 3. Notes on the Subfamily *Laqueinae* [*Brachiopoda. De fauna recenti in Japonia*]. 1 fig., Proc. Imp. Acad., XII, 2, 44-46. Tokyo (1936). **b - 1285**

Three new species and one new subspecies, all but one from the Japan Sea. Short descriptions.

## Varia.

**Bouxin J. & Legendre R.** - La faune pélagique de l'Atlantique recueillie dans des estomacs de Germons au large du Golfe de Gascogne (IIe Partie: Céphalopodes) [*De fauna pelagica Oceani Atlantici collecta a stomacis speciei* « *Germo alalonga* » *longe a litoribus Sinus Vasconici. Pars. IIª: Cephalopoda*]. 21 fig., 99 pp., Ann. Inst. Océanogr. (Nouv. série), XVI, 1. Paris (1936). **b - 1286**

Liste et étude des espèces des Céphalopodes trouvés dans des estomacs de Germons: systématique, rencontres antérieures, taille et développement, habitat et distribution géographique.

L'étude de la brotologie du Germon présente d'autant plus d'intérêt que les thonniers vont le plus souvent en haute mer, au dessus de grands fonds et les individus qu'ils peuvent ainsi fournir sont d'espèces très rares, connues seulement par quelques exemplaires, et des formes pélagiques du développement d'espèces plus littorales.

**Calman W. T.** - Marine Boring Animals injurious to Submerged Structures [*Animalia marina obnoxia structuris submersis*]. Ill., Brit. Mus. (Natur. Hist.), 10, 1-38. London (1936). **b - 1287**

Second edition revised by G. J. Crawford. The pamphlet sums up our present-day knowledge of the natural history of the animals concerned.

**Cipria G.** - Secondo elenco di animali in vendita presso l'Istituto Centrale di Biologia marina di Messina [*Elenchus alter animalium quae venum eunt in Instituto Centrali pro Biologia marina, Messanae*]. Mem. R. Comit. Talassogr. It., CCXXIX, 3-12. Venezia (1936). **b - 1288**

L'elenco comprende numerose specie di Molluschi, Branchiostomi, Crostacei, Pantopodi, Vermi, Echinodermi, Celenterati, Poriferi e Protozoi.

**Dons C.** - Den zoologiske avdeling: Evertebratsamlingen [*Sectio Zoologica: Evertebrata*]. 4 figs., Kgl. Norsk. Vidensk. Selsk. Mus. Årsber. 1934, 50-54. Trondheim (1935). **b - 1289**

The biggest specimen ever taken in Norway of *Loligo Forbesi*; 2 specimens of *Eledone cirrosa*; *Cidaris cidaris; Nereis virens;* shells of *Rynchonella psittacea*, very seldom found; colonies of *Porella compressa* and *Lophelia prolifera; Paragorgia arborea* (2 m. high.).

**Larsen K.** - The Distribution of the Invertebrates in the Dybsø Fjord, their Biology and their Importance as Fish Food [*Distributio Invertebratorum in* Dybsø Fjord, *eorumque biologia et momentum pro Piscium alimentatione*]. 9 figs., tabls., Rep. Danish Biol. Stat., XLI, 3-35. Copenhagen (1936). **b - 1290**

General remarks, topography, depth, vegetation, nature of bottom, salinity, etc. Distribution and biology of Invertebrates: Bivalves; Gastropods; Crustaceans; Vermes; Insects. Nutrition and growth of the Fishes: *Anguilla vulgaris* Turton, *Pleuronectes flesus* L., *Gadus callarias* L., *Cottus scorpius* L., *Zoarces viviparus* L., *Gobius niger* L., *Leuciscus rutilus* L. The proportion between the percentage weight amount of the Invertebrates per 1 sq. m. of the Fjord and their percentage weight amount of fish Stomachs. Number and weight (in mgs.) per sq. m. at the bottom sampler stations and on the hand net stations.

**Monterosso B.** - Commentari faunistici sardi [*Commentaria faunistica Sarda*]. 6 fig., Rend. Sem. Facoltà Sc., VI, 1, 5-27. Cagliari (1936). **b - 1291**

I. Descrizione e principali caratteri della foca mediterranea. Cattura di tre foche a Cala di Gonone, la loro dentatura, la loro alimentazione e cenni sulla loro biologia. L'incedere delle foche sul terreno. La perdita della livrea giovanile. II. Descrizione di un esemplare maschile di *Balaenoptera physalus*, spiaggiato a Stintino.

**Schenck E. P. & McMasters J. H.** - Procedure in Taxonomy; including a Reprint of the International Rules of Zoological Nomenclature with Summaries of Opinions Rendered to the Present Date [*Methodus pro Taxonomia, reimpressione inclusa regularum internationalium pro Nomenclatura Zoologica cum adjectis summariis opinionum usque in hodiernum*]. vii + 72 pp., Univ. Press. Stanford, Ca. (1936). **b - 1292**

**Steuer A.** - *Sipunculoidea, Phoronidea, Brachiopoda, Enteropneusta* und *Acrania* von Alexandrien in Ägypten [*Animalia Alexandriae inventa, in Aegypto*]. 4 Abb., Not. Ist. Biolog. Rovigno, 23, 3-18. Jena (1936). **b - 1293**

*Phascolosoma vulgare, P. elongatum, Aspidosiphon clavatus, Physcosoma granulatum, Phoronis mülleri, Mühlfeldtia truncata, Argyrotheca cuneata, Saccoglossus gurneyi, Glandiceps talaboti* und *Branchiostoma lanceolatum*. Liste der Fundorte.

**Takahashi S.** - Notes on *Hydridae* of Kôtôsho (Botel Tobago Island) [*Notae de « Hydridae » ad* Kôtôsho *pertinentibus*]. (In Jap.). 1 fig., Trans. Nat. Hist. Soc. Formosa, XXV, 140, 142-144. Taihoku (1935). **b - 1294**

Record, with notes on habits and utilization of the following six species of sea-snakes, from Kôtôsho: *Laticauda semifasciata* (Reinwardt), *L. colubrina* (Schneider), *Emydocephalus ijimae* Stejneger, *Disteira spiralis melanocephala* (Gray), *Pelamydrus platurus* (Linnaeus).

**Wilson D. P.** - Life of the Shore and Shallow Sea [*Organisma viventia in litoribus et in mari demisso*]. 56 pls., 9 figs., Ivor Nicholson & Watson Ltd. London (1936). **b - 1295**

Being engaged on research work at the Marine Biological Station at Plymouth A. has had good opportunities of observing the life of living things on the shore and in the shallow sea of which he here reproduces descriptions with exceptionally beautiful photographs.

**Smithsonian Institution** - Opinions rendered by the International Commission on Zoological Nomenclature. Opinions 124 to 133 [*Opiniones Commissionis Internationalis de nomenclatura zoologica*]. Smithson. Miscell. Coll., LXXIII, 8, Publ. 3395, 1-44. Washington (1936). **b - 1296**

Of interest to the marine biology are opinions No. 126 127, 130, 131 and 133 concerning respectively new name for d'Orbigny's 1850 « Prodrome », suspension of rules for *Lepidocyclina* Gümbel, 1868, type *Nummulites mantelli*, *Lytoceras* Suess, 1865, placed in the official list of generic names, the type species of *Tromikosoma* Mortensen 1903 and *Urothoe* Dana and *Phoxocephalidae* Sars.

**An.** - Serpientes marinas [*Serpentes marini*]. Ibérica, 1105, 70. Barcelona (1936). **b - 1297**

Información sobre las serpientes marinas que constituyen la familia de los hidrofiidos, y viven en los mares tropicales de la región oriental y, también, en la región australiana. No hay que confundir estos interesantes ofidiios con las legendarias « serpientes de mar » de existencia tan controvertida.

**An.** - Noms Communs des Principaux Poissons et Invertébrés marins comestibles dans les pays d'Europe riverains de l'Atlantique [*Nomina vulgaria praecipuorum Piscium et Invertebratorum marinorum edulium in regionibus europaeis Oceanum Atlanticum spectantibus*]. Mém. Off. Pêches Marit., Man. Pêches Marit. franç. (sér. spéc.), 11/3, 157-169. Paris (1936). **b - 1298**

Liste comparative des noms français, latins, anglais, flamands, allemands, danois, norvégiens, espagnols, portugais des poissons comestibles et des Mollusques, Tuniciers, Crustacés, Echinodermes.

# BOTANICA

## Plantae marinae – Algologia.

**Aikawa H.** - On the Diatom Communities in the Waters surrounding Japan [*De communitatibus Diatomearum in aquis quae Japoniam circumdant*]. 60 figs., 60 tabl., Rec. Oceanogr. Works in Jap., VIII, 1, 2-159. Tokyo (1936). **b - 1299**

I. On net-collections. II. Diatom communities in the Pacific. III. The Diatom communities in the Japan Sea.

**Airoldi M.** - Sull'appartenenza della « Pelagosite » ad un nuovo genere di alga calcarea [*De quodam alga calcarea quae ad genus novum pertinet*]. 1 tav., Atti R. Acc. Naz. Lincei, Cl. Sc. Fis. Mat. Natur., XXIV, 1/2, 18-23. Roma (1936). **b - 1300**

L'A. riconosce nella « Pelagosite » della Riviera ligure un nuovo genere di alga calcarea; il nome proposto è *Sclerothamnium nitens* n. g. et n. sp. La composizione chimica, quale risulta dall'analisi di E. Onorato, è confrontata con quella conosciuta per altre Corallinacee. L'A. riconosce poi, in associazione con l'alga da lui descritta, alcune file cellulari di talli di *Melobesia melobesoides* F., finora mai segnalato vivente nel Mediterraneo.

**Bachrach E. & Simonet M.** - Les diatomées et la pigmentation bleue [*De Diatomeis et pigmentatione caerulea*]. C. R. Acad. Sc., CCII, 11, 976-977. Paris (1936). **b - 1301**

Après avoir fait observer que sur des milieux déséquilibrés ou carencés, on observe une modification dans la pigmentation des Diatomées, qui bleuit, les A.A. déduisent sur la base de nombreuses expériences faites sur un grand nombre d'espèces d'eau douce et aussi marine, que la présence du pigment bleu n'est pas spécifique de *Navicula ostrearia* et que c'est un phénomène d'ordre général dans la grande famille des Diatomées. Les A.A. croient devoir rejeter la dénomination de Diatomée bleue appliquée à *N. ostrearia*, pour ne parler dorénavant que de Diatomées bleuies.

**Chemin E.** - Observations algologiques [*Observationes algologicae*]. Bull. Lab. Marit. Saint-Servan, XIV, 16-17. Rennes (1935). **b - 1302**

Cinq espèces furent récoltées dans le Pointe de la Varde et dix dans les environs du Fort Duguesclin.

**Chen C. S. & Kao T. P.** - *Porphyra* of Pooto [« *Porphyra* » *ad* Pooto *pertinens*]. (In Chin., Engl. Rés.). Bull. Chekiang Prov. Fish. Exper. Stat., II, 6, 1-7. Tinghai, Chekiang (1936). **b - 1303**

Results of a study carried out at Pooto Island near Tinghai from October 1935 to July 1936 on the species *Porphyra suborbiculata* Kjellm. and *P. dentata* Kjellm. used as food by the Chinese. Life history, habitat, growth.

**Colla S.** - La perdita e l'assunzione di acqua da parte di *Fucus virsoides* [*De aquae amissione atque assumptione per speciem* « *F. virsoides* »]. Boll. Soc. It. Biol. Sper., IX, 881-883. Napoli (1934). **b - 1304**

L'A. ha studiato la perdita dell'acqua da parte di *Fucus virsoides*, sottoposti a vari trattamenti concludendo che essi possono perdere il 99 % dell'acqua totale senza morire, e rimessi successivamente nell'acqua riacquistano in breve il 45 % del loro peso. Tale azione è dovuta principalmente alla massa gelatinosa che si trova fra le ife del *Fucus*.

**Czurda V.** - Ueber die Begriffe « Typus » und « Variabilität » in der Systematik der Algen [*De verborum vi « Typus » et « Variabilitas » pro systematica Algarum*]. Beih. Bot. Zentralbl., Abt. A., LIII, 1, 158-191. Dresden (1935). **b - 1305**

**Dangeard P.** - La Laminaire du Cap: *Laminaria pallida* (Grev.) J. Ag. [« *Laminaria pallida* » *e Promunturio* de Bonne-Espérance]. 4 fig., Bull. Stat. Biol. Arcachon, XXXIII, 1, 89-105. Bordeaux (1936). **b - 1306**

Etude anatomique, données certaines sur le mode de vie et sur les caractères les plus essentiels de *Laminaria pallida* provenant du Cap de Bonne-Espérance espèce caractéristique de cette région. Dans la région ibérico-marocaine existe une Laminaire à lame digitée qui n'est autre que le *L. Lejolisii*.

**Davy de Virville D. A.** - Observations sur la flore marine des côtes du Cotentin [*Observationes de flora marina ad litora regionis* Cotentin]. Bull. Lab. Marit. Dinard, 16, 21-28. Rennes (1936). **b - 1307**

Comparaison de la flore marine des côtes W., basses, droites, sablonneuses, et des côtes N., élevées, rocheuses, très decoupées, qui sont très différentes en raison du relief littoral et de son exposition aux vagues et aux courants. La première est une flore pauvre, à Fucacées, la deuxième est plus riche et plus variée.

**Feldmann J. & Frémy P.** - Matériaux pour la Flore Algologique Marine de la Tunisie. II. Contribution à l'étude biologique et systématique de la « Muffa » [*Res collectae ad studendam floram algologicam marinam Tunetanam. II. Contributio in studendam* « Muffa » *e systematica et biologia*]. 2 fig., Stat. Océanogr. Salammbô, 29, 5-24. Tunis (1935). **b - 1308**

Biologie des masses gélatineuses blanchâtres ou brunâtres, qui se développent dans le Golfe de Gabès, désignées sous le nom de « Muffa », constituées par le *Phormidium mycoideum* n. sp., nombreuses Diatomées et beaucoup d'autres organismes, soit animaux, soit végétaux.

**Fortin M.** - Quelques Algues Marines du Calvados [*Nonnullae Algae marinae ad regionem* Calvados *pertinentes*]. Bull. Lab. Marit. Saint-Servan, XIV, 14-15. Rennes (1935). **b - 1309**

*Codium tormentosum, Vaucheria piloboloides, Arthrocladia villosa.*

**Frémy P.** - Marine Algæ from the Canary Islands especially from Teneriffe and Gran Canaria. IV. *Cyanophyceæ* [*Algae marinae in Insulis Fortunatis praecipue in* Teneriffa *et* Gran Canaria. *IV. Cyanophyceae*]. (French text.). Kgl. Dansk. Vidensk. Selsk. Biol. Medd., XII, 5, 1-43. København (1936). **b - 1310**

Descriptions, localities, geographical distribution and bibliographical notes of about 54 species collected by F. Børgesen.

**Gardner N. L.** - A new red Alga from New Zealand [*Alga nova rubra in Nova Zelandia*]. Proc. Nat. Acad. Sc. U. S. A., XXII, 6, 341-345. Washington (1936). **b - 1311**

Diagnosis also in latin of *Erythrotrichia Hunteriae* sp. nov. This species was found growing on the leaves of *Zostera novazelandica* on June 23, 1935.

**Hollenberg G. J.** - A Study of *Halicystis ovalis*. I. Morphology and Reproduction. II. Periodicity in the Formation of Gametes [*Studium de specie « Halicystis ovalis ». I. Morphologia et reproductio. II. Periodicitas in gametorum formatione*]. Amer. Journ. Bot., XXII, 9, 782-812; XXIII, 1, 1-3. Lancaster, Pa. (1935 & 36). **b - 1312**

Numerous records of *Halicystis* from the coast of central California showed that this species occurs there more frequently than formerly supposed. Confirmation of earlier descriptions: Unlike other members of the Siphonales the reproductive portion is not cut off by a cross wall. Description of a filamentous protonemal stage from which the endophytic rhizomes develop. II. Study of the reproductive cycles under natural and laboratory conditions.

**Hygen G.** - Ueber den Lebenszyklus und die Entwicklungsgeschichte der Phaeosporeen. Versuche an *Nemacystus divaricatus* (Ag.) Kuck. [*De cyclo vitali et historia accretionis quoad « Phaeosporeae ». Experimenta ducta speciei auxilio « Nemacystus divaricatus »*]. 16 Taf. a. T., 11 Abb., Nyt. Mag. f. Naturvidensk., LXXIV, 187-268. Oslo (1934). **b - 1313**

Uebersicht der bisherigen Untersuchungen. Fortpflanzung und Generationswechsel der Phaeosporeen: Die Fortpflanzungsorgane, die bisher gemachten experimentellen Untersuchungen über den Lebenszyklus der Phaeosporeen, Bemerkungen über den Generationswechsel, den Lebenszyklus und die Entwicklungsgeschichte. Untersuchungsmethoden. Experimentelle Untersuchungen. Die Entwicklung der haploiden und diploiden Generation. Der Lebenszyklus von *N. d.* Bemerkungen zur Systematik der Braunalgen. Bibl.

**Inagaki Kan-ichi** - Some Marine Algae Recently Discovered in Japan and New to Science [*Algae marinae recentiores in Japonia repertae, novae et rarae*]. Scient. Pap. Inst. Algol. Res., Hokkaido Imp. Univ., I, 1, 41-49. Sapporo (1935). **b - 1314**

*Erythrocladia subintegra* Ros., *Porphyrapsis coccinea* Ros., *Trailliella intricata* Batters, and three other marine algae from Osyoro Bay which seem to be new species: *Calaconema simplex*, *Branchioglossum nanum*, *Platythamnion yezoense*.

**Inoh S.** - On Tetraspore Formation and its Germination in *Dictyopteris divaricata* Okam., with special Reference to the Mode of Rhizoid Formation [*De tetrasporis formandis eorumque germinatione in specie « Dictyopteris divaricata ». Agitur particulatim de formatione radicium*]. 5 figs., Scient. Pap. Inst. Algol. Res., I, 2, 213-219. Sapporo (1936). **b - 1315**

**Kanda T.** - On the Gametophytes of Some Japanese Species of Laminariales [*De gametophytis aliquarum specierum Japonicarum Laminarialium*]. 27 figs., 3 pls., Scient. Pap. Inst. Algol. Res., Hokkaido Imp. Univ., I, 2, 221-260. Sapporo (1936). **b - 1316**

List of species of the Laminariales which have been studied by various authors, and results. In the present investigation an attempt was made to elucidate the life-cycle of the *Laminariaceae* and to make a morphological comparison of the gametophytes and of the early stages of the sporophytes of some Japanese Laminariales. Studies on *Alaria crassifolia*, *Arthrothamnus bifidus*, *Costaria costata*, *Laminaria japonica* and *Undaria pinnatifida*: zoospores and their germination, male and female gametophytes, fertilization and development of sporophytes.

**Kanno R.** - On the Zoospores of the Genus *Hormiscia* (*Urospora*) [*Zoospora ad genus « Hormiscia » pertinentia*]. (In Jap.; Engl. Rés.). 5 figs., Bull. Jap. Soc. Scient. Fish., V, 3, 177-182. Tokyo (1936). **b - 1317**

On the morphology and embryology of *Hormiscia penicilliformis* (Roth) Fries and *H. incrassata* (Kjellm.) Collins studied in experiments.

**Kawabata S.** - A List of Marine Algae from the Island of Shikotan [*Elenchus algarum marinarum ab insula* Shikotan *provenientium*]. Scient. Pap. Inst. Algol. Res, Hokkaido Imp. Univ., I, 2, 199-212. Sapporo (1936). **b - 1318**

The algal flora of the Island of Shikotan resembles those of Alaska and the Pacific coast of North America. Collection in the vicinity of Chiboi Bay of 78 species belonging to *Chlorophyceae*, *Phaeophyceae* and *Rhodophyceae*; of these 7 species are new to the Japanese flora, and *Porphyra amplissima* is described as a new form.

**Kräusel R.** - Riesenalgen und Algebäume [*Algae gigantes algaeque arboribus similes*]. 4 Abb., Natur u. Volk, LXVI, 1, 13-16. Frankfurt a. M. (1936). **b - 1319**

Besprechung einiger Algenarten: *Macrocystis pyrifera*, *Nereocystis*, *Lessonia* und prehistorischer Arten: *Prototaxiten* des Devons und Silurs.

**Lami R.** - Quelques Algues spongicoles de la Rance [*Nonnullae Algae spongiculae ad regionem* Rance *pertinentes*]. 4 fig., Bull. Lab. Marit. Dinard, 16, 7-16. Rennes (1936). **b - 1320**

Liste des algues spongicoles et examen des modifications provoquées par le « milieu éponge » sur leur structure: *Pseudovaucheria spongeliae* Lami n. gen., n. sp., *Aphanocapsa Florae* Lami n. sp., *Antithamnionella sarniensis* Lyle, *Calliblepharis ciliata* (Huds.).

**Lami R.** - Sur la valeur et les variations de salinité et d'alcalinité de l'eau contenue dans la cavité des *Codium Bursa* L. [*De valore et variationibus salinitatis et alcalinitatis aquae quae continetur in cavitatibus speciei « Codium Bursa »*]. C. R. Acad. Sc., CCIII, 21, 1093-1095. Paris (1936). **b - 1321**

La différence observée entre la salinité de la cavité et celle de l'eau extérieure est, selon l'A., due aux variations de salinité qui se produisent à l'emplacement de la cuvette, dans laquelle l'algue est tenue, pendant son immersion à marée haute et son isolement à marée basse. Quant à l'alcalinité, l'eau de la cavité a toujours un pH inférieur à celui du milieu extérieur, valeur qui ne varie que très peu.

**Levring T.** - Undersökningar över Öresund. Untersuchungen aus dem Öresund. XIX. Zur Kenntnis der Algenflora von Kullen an der schwedischen Westküste [*Investigationes in « Öresund ». XIX. De cognoscenda flora Algarum in litoribus occidentalibus Suetiis*]. 11 Abb., Lunds Univ. Årsskr. N. F. Avd. 2, XXXI, 4, 64 S. (Kgl. Fysiogr. Sällsk. Handl. N. F. LXVI, 4). Lund (1935). **b - 1322**

Verzeichnis mit Bemerkungen und Beschreibungen von 196 Arten, von denen 13 für Schweden nicht früher angegeben worden und zwei neu sind: *Chantransia stilophorae* n. sp. und *Choreocolax odonthaliae* n. sp.

**Lewis E. A.** - An Investigation of the Seaweeds within a marked Zone of the Shore at Aberystwyth, during the Year 1933-34. (With special Reference to the Use of the Spores as Food for Oyster Larvae) [*Investigationes in « Fucus » peractae in area limitata orae maritimae in* Aberystwyth, *A. 1933-34. Agitur particulatim de Sporis utendis ac alimento larvarum ostrearum*]. 1 table, Journ. Mar. Biol. Ass., XX, 3, 615–620. Plymouth (1936). **b - 1323**

Type of fruiting body and duration of fruiting given in table for about 50 species. Some conclusional remarks as to availability of species for oyster food.

**Lowe C. W.** - Observations on some Pacific Diatoms as the Food of Copepods and Fishes [*Observationes circa Diatomeas Oceani Pacifici ac alimentum Copepodorum et Piscium*]. 2 tabl., Journ. Biol. Bd. Canada, III, 1, 12–19. Toronto (1936). **b - 1324**

Investigations on the food chains between Diatoms, Copepods (*Calanus tonsus, Euchaeta japonica, Metridia lucens, Harpacticus uniremus, Diosaccus spinatus*) and Fishes (*Clupea pallasii, Oncorhynchus keta, O. tschawytscha, Squalus suckleyi, Ophiodon elongatus, Sebastodes caurinus, Platichthys stellatus, Parophrys vetulus, Damalichthys vacca, Taeniotoca lateralis, Cymatogaster aggregatus*).

Almost all the common diatoms were found to be used as food by the copepods. The copepods and herring were found to be important links in the food chains between diatoms and the larger fishes. (From A:s abstr.).

**Lucas A. H. S.** - The Marine Algae of Lord Howe Island [*Algae marinae ad insulam* Lord Howe *pertinentes*]. 5 pls., 7 figs., Proc. Linn. Soc. N. S. Wales, LX, 3/4, 194–232. Sidney (1935). **b - 1325**

Taxonomic account of *Chlorophyceae* with 6 new species, *Phaeophyceae* with 3 new species, *Rhodophyceae* with 11 new species. The Algae are of tropical facies, probably streaming down from New Caledonia in Pleistocene times.

**Lund S.** - Nogle interessante Rödalgefund fra Københavns havn [*Algae quaedam rubrae notandae in portu Hauniensi repertae*]. Bot. Tidsskr., XLIII, 1, 57-58. København (1934). **b - 1326**

**Lund S.** - On the Production and the Growth in some Benthic Plants [*De productione et progressione in quibusdam plantis benthonicis*]. 8 figs., tabls., Rep. Danish Biol. Stat., XLI, 37-52. Copenhagen (1936). **b - 1327**

Earlier investigations on the production of matter in *Zostera marina* and in marine algae. Investigations carried out by the A. on the production of matter on a given area within a given time. The production of matter in *Fucus vesiculosus* at the Saltholm, where it seems to grow much older for the rather large fluctuations of the salinity of the surface water.

**Naylor G. L.** - The Fucoid of St. John's Lake, Plymouth, including a hitherto undescribed Form of *Fucus spiralis* [*Fucoidea in Lacu Sancti Johannis*, Plymouth, *et species quaedam nondum descripta*: « *Fucus spiralis* »]. 7 fig., Rev. Algol., VII, 3/4, 425-439. Paris (1936). **b - 1328**

*Zostera nana, Salicornia nana, Glyceria maritima* and green algae such as *Rhizoclonium, Cladophora* and *Vaucheria* are present in the numerous salt marshes of the Plymouth district. Occurrence in St. John's Lake of *Fucus spiralis, F. vesiculosus* and *F. ceranoides*; their distribution in relation to the salinity of the water.

**Ranson G.** - Nouvelles observations concernant la biologie de *Navicula fusiformis* Grün (*N. ostrearia* Bory) [*Observationes novae quoad biologiam speciei « Navicula fusiformis »*]. Bull. Mus. Nat. Hist. Natur., VIII, Sér. 2, 4, 355-361. Paris (1936). **b - 1329**

Phénomènes qui s'accomplissent lorsque cette Diatomée devient benthique. L'acquisition du pigment bleu n'est pas un caractère de dégénération, mais au contraire, indique un excès d'activité. La fixation des Navicules bleues sur les argiles des lais de mer est due à la présence d'Huîtres ou du mucus d'Huîtres, qui peut déterminer la réduction de la salinité de l'eau.

**Ranson G.** - Sur la soi-disant dégénérescence de la Navicule bleue (*Navicula fusiformis* Grün. = *N. ostrearia* Bory) [*De opinata degeneratione speciei « Navicula fusiformis »*]. C. R. Acad. Sc., CCII, 20, 1702-1704. Paris (1936). **b - 1330**

Après certaines observations critiques concernant le phénomène dit de dégénérescence granulo-graisseuse de certaines algues, l'A. communique les résultats de ses récherches sur le pigment bleu existant dans certaines conditions de nutrition chez *N. fusiformis* Grün. et démontre que la Navicule bleu est tout l'opposé d'une algue qui se meurt, malgré l'hypothèse qui considére le bleuissement comme un signe de dégénérescence.

**Sauvageau C.** - Les Algues Phéosporées de Villefranche-sur-Mer [*Algae Phaeosporeae ex* Villefranche-sur-Mer]. Bull. Stat. Biol. Arcachon, XXXIII, 2, 117-204. Bordeaux (1936). **b - 1331**

Démonstration de l'alternance des générations de l'*Arthrocladia* et le *Sporochnus*; culture des zoospores de *Spermatochnus paradoxus* et de *Protasperococcus*; description de *Elachista intermedia*, de *Myriactis, Gonodia* et *Myriactula* et des suivantes nouvelles espèces: *Myriactis elongata, M. rigida, M. oxalifera, Myrionema siliquosum, M. haemisphaericum, Gontrania lubrica* et *Streblonema Thuretii*.

**Schmidt O. C.** - Neue oder bemerkenswerte Meeresalgen aus Helgoland [*Novae ac notandae algae marinae in* Helgoland]. 3 Abb., Hedwigia, LXXV, 3, 150-158. Dresden (1935). **b - 1332**

**Ueda S.** - Studies on the Propagation of *Gelidium* [*Gelidium. Studia de propagatione*]. (In Jap., Engl. Rés.). 3 figs., Bull. Jap.Soc. Scient. Fish., V, 3, 183-186. Tokyo (1936). **b - 1339**

Season of the spore-formation. Development of the new plants. Vicissitude of the plants.

**Vouk V.** - Studien über adriatische Codiaceen [*De Codiaceis maris Hadriatici*]. 15 Textfig., 8 Tab., 9 Taf. a. T., Acta Adriat., Inst. Biol.–Oceanogr., 8, 47 S., Split (1936). **b - 1340**

Grössenverhältnisse und Dimorphismus der Rindenschläuche bei Codiaceen. Der Formenkreis *Codium dichotomum* (Huds.) Setchell und die adriatischen Formen. Eine neue Form von *Codium* aus der Sect. *Tomentosa* in der Adria (*C. Cattaniae* n. sp.) und *Codium*-Formen aus der Sect. *Elongata* in der Adria. *C. difforme* Kütz. und nicht *C. adhaerens* (Cabr.) Ag. in der Adria. Die Codiaceen als Wohnort von roten Cyanophyceen. Bibl.

**Vouk V.** - Les Cyanophycées et la salinité dans le thallus de *Codium Bursa* L. [*De Cyanophyceis deque salsedine in thallo speciei « Codium Bursa »*]. Bull. Int. Acad. Yougosl. Sc. et Beaux-Arts, Cl. Sc. Math. et natur., XXIX-XXX, 59–63. (Rés. français. Mém. paru en Yougoslave dans le « Rad » CCLIV, 1-12). Zagreb (1936). **b - 1341**

Etude d'une centaine d'échantillons récoltés aux environs de l'Institut Océanographique à Split. Parmi les Cyanophycées vivant à l'intérieur du thallus de l'algue *Codium Bursa* l'élément principal est constitué par les espèces *Phormidium Codicolum* et *Lyngbya Frémyi*. La salinité élevé de l'eau de mer contenue dans le thallus de *Codium* aurait pour effet la turgescence de la forme sphérique du Thallus.

**Vouk V.** - Etudes sur les Codiacées de l'Adriatique [*De Codiaceis Maris Hadriatici*]. Bull. Int. Acad. Yougosl. Sc. et Beaux-Arts, Cl. Sc. Math. et natur., XXIX-XXX, 163-168. (Rés. Mém. Prirodosl. istraž., XX, 147-178). Zagreb (1936). **b - 1342**

Dimorphisme des éléments épidermiques (utricules). Systématique et clef morphologique des différentes formes de *Codium dichotomum* (Hids.) Setchell. Aperçu des formes adriatiques de *C. dichotomum*. Description d'une nouvelle espèce: *Codium Cattaniae* Vouk n. sp. Aperçu des espèces de *Codium* de la section d'*Elongata*. Correction d'une forme prétendue, *C. adhaerens*. Remarques sur l'épiphytisme et l'endophytisme du genre *Codium*.

**Whitaker D. M.** - The Effect of white Light upon the Rate of Development of the rhizoid Protuberance and the first Cell Division in *Fucus furcatus* [*De lucis albae effectu in velocitatem accretionis quoad protuberantiam rhizoidem et primam divisionem cellularem speciei « Fucus furcatus »*]. 2 figs., 1 table, Biol. Bull., LXX, 1, 100-108. Lancaster, Pa. (1936). **b - 1343**

It has previously been confirmed that the site of germination and the plane of the first cell division in the egg of the brown alga, *Fucus*, are determined by the direction of a beam of light. The experiments undertaken here have furnished data as to the time lapse from fertilization to the development of the two structures mentioned above. Comparison with the development in the dark.

**Wimpenny R. S.** - The Size of Diatoms. I. The Diameter Variation of *Rhizosolenia styliformis* Brightw. and *R. alata* Brightw. in particular and of pelagic marine Diatoms in general [*De magnitudine Diatomearum. I. Diametri variatio speciei « Rhizosolenia styliformis » et « R. alata » et Diatomearum marinarum pelagicarum generaliter*]. 1 pl., 12 figs., 4 tabl.. Journ. Mar. Biol. Ass., n. ser., XXI, 1, 29-60. Plymouth (1936). **b - 1344**

Of the two factors, temperature and salinity, temperature seems to have the greatest influence on the size of Diatoms. Contrariety to general rules, Diatoms with the largest diameters are found in warm areas and the smallest in cold ones. The correlation coefficient with temperature was found to be + 0.59 and with salinity — 0.59 at 20 m. The inverse correlation with salinity is thought to be due to the topography of the area. It has thus been possible to trace the origin of the *Rizosolenia styliformis* patch. The auxospore formation of *R. alata*.

**Yamada Y.** - Marine Algae from Urup, the Middle Kuriles, Especially from the Vicinity of Iema Bay [*Algae marinae ab* Urup *provenientes in centralibus insulis* Kuriles, *praecipue a propinquitatibus Sinus* Iema]. 10 figs., 10 pls., Scient. Pap. Inst. Algol. Res. Hokkaido Imp. Univ., I, 1, 1-26. Sapporo (1935). **b - 1345**

Enumeration of about 60 species collected near the shore of Iema Bay and belonging to the *Clorophyceae*, *Phaeophyceae* and *Rhodophyceae*. Of these 7 species are described as new as well as several species newly found in Japanese waters. Topography and a short sketch of the general aspect of marine flora at the western end of Urup Island.

**Yamada Y.** - Notes on some Japanese Algae. VI. VII [*Notae de Algis quibusdam Japonicis*]. (In Jap.). 6 figs., 8 pls. o. t., Scient. Pap. Inst. Algol. Res., Hokkaido Imp. Univ., I, 1, 27-35; 2, 135-140. Sapporo (1935-36). **b - 1346**

VI. Ten species, nearly all new, diagnosis in Latin and English.

VII. *Caulerpa filicoides*, *Nereia intricata*, *Hypoglossum minimum*, *Asperococcus bullosus*, *Dictyota alternifida*, *Stilophora rhizoides*, *Gloiderma minutula*, *Haloplegma duperreyi*, *Martensia flabelliformis*, *Murrayella squarrosa* and some other species.

**Yamada Y.** - The Species of *Eucheuma* from Ryûkyû and Formosa [*Species « Eucheuma » a* Ryûkyû *et* Formosa *provenientes*]. 12 figs., 8 pls. o. t., Scient Pap. Inst. Algol. Res., Hokkaido Imp. Univ., I, 2, 119-134. Sapporo (1936). **b - 1347**

Analytical key to the species. Remarks on synonymies and distribution of seven species, descriptions of the more important ones. *E. Okamurai* sp. nov. and *E. cupressoideum* var. *verticillata*.

**Yamada Y. & Inagaki K.** - On *Acrothamnion pulchellum* Yamada (non J. Agardh) from Japan [*De specie « Acrothamnion pulchellum » e Japonia*]. 3 figs., Scient. Pap. Inst. Algol. Res., Hokkaido Imp. Univ., I, 1, 37-40. Sapporo (1935). **b - 1348**

In the shell of *Mytilus* from Mutsu Bay Yamada has found a small red Alga which he has reported as *A. p.* J. Ag. but a comparison with species of Harvey's Herbarium at Dublin reveals great differences.

AA. describe the Japanese specimen as a new spécies: *Antithamnion nipponicum* sp. nov.

# PALAEOBIOLOGIA

**Arambourg C.** - Contribution à l'étude des poissons du Lias supérieur [*Contributio in studendos pisces aetatis Liassicae superioris*]. 6 pl., 10 fig., Ann. Paléontol., XXIV, 1, 1-48. Paris (1935). **b - 1349**

Description et distribution de la faune ichthyologique toarcienne de France. *Eugnathus brousso-lavali* n. sp.

**Arambourg C.** - Un gisement de Poissons toarciens aux environs d'Alès (Gard) [*Depositum Piscium aetatis toarcianae apud* Alès]. C. R. somm. Soc. Géol. Fr., 17-18. Paris (1935). **b - 1350**

**Arambourg C. & Schneegans D.** - Les Poissons fossiles du bassin sédimentaire du Gabon [*Pisces fossiles ad bacinum sedimentarium* Gabon *pertinentes*]. C. R. somm. Soc. Géol. Fr., 170-171. Paris (1935). **b - 1351**

**Asano K.** - New Foraminifera from the Kakegawa District, Tôtômi, Japan [*Foraminifera nova in districtu* Kakegawa, Tôtômi, *in Japonia*]. 2 pls. o. t., Jap. Journ. Geol. & Geogr., Trans. & Abstr., XIII, 3/4, 325-331. Tokyo (1936). **b - 1352**

Description of 16 new species and one new genus.

**Bartenstein H.** - Kalk–Körper von Holothurien in norddeutschen Lias-Schichten [*Calcii corpuscoli Holothuriarum in stratis aetatis Liassicae in Germania sept.*]. 12 Abb., Senckenbergiana, XVIII, 1/2, 1-10. Frankfurt a. M. (1936). **b - 1353**

Die hier vorgefundenen Kalk-körper sind angelhakenartige Bögen, Anker-Platten, Räder, kreuzförmige Kalkplättchen, Stäbchen und durchlochte Kalk-Scheiben. Eine neue Form von Kalk-Rädchen, *Chiridota heptalampra*, ist festgestellt worden.

**Blanc A. C.** - Una spiaggia pleistocenica a « *Strombus bubonius* » presso Palidoro (Roma), [*Ora maritima pleistocenica, specie « Strombus bubonius » formata, apud* Palidoro]. Atti R. Acc. Naz. Lincei, Rend. Cl. Sc. Fis., Mat. Natur. Ser. 6, XXIII, 3, 200-204. Roma (1936). **b - 1354**

È segnalata l'esistenza di un deposito marino pleistocenico contenente la fauna tirreniana a *Strombus bubonius* a quote di circa 20 metri nei pressi di Palidoro che testimonia di un movimento regressivo pretirreniano, analogo a quello già indicato dall'A. nella costa Pontina.

**Blanc A. C.** - Giacimento sottomarino a *Cyprina islandica*. L., nel golfo di Terranova Pausania (Sardegna). [*Depositum submarinum specie « Cyprina islandica » formatum in Sinu* Terranova Pausania *in Sardinia*]. Atti R. Acc. Naz. Lincei, Rend. Cl. Sc. Fis. Mat. Natur., Ser. 6, XXIII, 9, 695-698. Roma (1936). **b - 1355**

Presenza di un lembo fossilifero di argille a *Cyprina islandica* e *Modiola modiolus* L. nel golfo di Terranova Pausania a circa 3–4 metri sotto il livello del mare.

**Bogdanovitsch A.** - Ueber *Meandroloculina bogatschovi* n. gen., n. sp., eine neue Foraminifere aus den Miocänschichten Transkaukasiens [« *Meandroloculina bogatschovi* » *foraminiferum novum ad formationes miocenicas Transcaucasiae pertinens*]. (In Dtsch., Russ. Rés.). 5 Abb., Bull. Acad. Sc. URSS, Cl. Sc. Mathém. & Natur., 5, 691-696. Léningrad (1935). **b - 1356**

Kurzer Bericht über eine neue Foraminifere, welche Vf. während einer Untersuchung über miocänische Foraminiferen 1931 in Grusien (Transkaukasien) entdeckt hat. Die neue Gattung besitzt interessante und eigenartige morphologische Besonderheiten und erweitert unsere Kenntnisse über eine der interessantesten Familien der Ordnung der Foraminiferen; Kurze Diagnose der beschriebenen Gattung und Art.

**Brotzen F.** - Foraminiferen aus der schwedischen Kreide und ihre Beziehungen zum Sediment und zur Facies [*Foraminifera aetatis cretaceae Suetiae. Quaestio de correlationibus cum sedimentis et faciebus*]. Geol. Fören. Förh., 366-375. Stockholm (1935). **b - 1357**

**Brough J.** - On the Evolution of Bony Fishes during the Triassic Period [*Progressus Teleosteorum aetate Triassica*]. 12 figs., Biol. Rev., XI, 3, 385-405. London (1936). **b - 1358**

The pre-Triassic *Palaeoniscidae* and the Holosteans. The break-up of the *Palaeoniscidae*. The sub-holostean families. The origin of the *Holostei*. The evolution of the *Catopteridae*.

**Bulman O. M. B.** - On the Graptolites prepared by Holm. Part VII. The Graptolite Fauna of the Lower Orthoceras Limestone of Hälludden, Oland, and its Bearing on the Evolution of the Lower Ordovician Graptolites [*De Graptolitis ab* Holm *paratis. Pars. VII*ª. *Fauna graptolitica in stratis calcareis aetatis orthocerassicae inferioris in* Hälludden, *insula* Oeland. *Momentum huius faunae pro accretione Graptolitorum aetatis ordovi-*

*cianae inferioris*]. 4 pls. o. t., 30 figs., 4 tabl., Ark. f. Zool., XXVIII A, H. 3, 17, 1-107. Stockholm (1936). **b - 1359**

Progressive changes in the proximal end of the graptolite Rhabdosome; revised terminology. Description of the fauna. Evolution of the lower Ordovician and Tremadocian Graptolites.

**Chaubet M.** - Sur la présence certaine de Llandovery dans le Gothlandien de la Montagne Noire [*De* Llandovery *eiusque certa praesentia in Gothlandiano regionis* Montagne Noire]. C. R. Acad. Sc., CCII, 4 339-341. Paris (1936). **b - 1360**

L'A. décrit la faune graptolitique découverte dans la tranchée de Gabian et du mas de Sainte-Cécile qui démontre enfin l'existence, jusqu'à ce jour bien hypothétique, du Llandovery (Valentian) dans la Montagne Noire.

**Checchia Rispoli G.** - Illustrazione dei molluschi maestrichtiani della Tripolitania raccolti da I. Sanfilippo. II. Generi *Venericardia, Crassatella, Corbis*. III. Generi *Lucina, Corbula, Cardium*. [*Descriptio molluscorum aetatis maestrichtianae Tripolitaniae collectorum ab* I. Sanfilippo. *II-III*]. Boll. Soc. Geol. It., LIII, 2, 183-194; LIV, 1, 41-50. Roma (1934–35). **b - 1361**

L'A. descrive oltre alle specie già conosciute, alcune nuove, cioè *V. Broilli, C. Clericii, L. Desioi* e *Cardium Martellii*; la *Corbula harpa* viene ora indicata per la prima volta nei terreni del Cretaceo superiore dell'Africa settentrionale.

**Checchia Rispoli G.** - Su di una Echinofauna pliocenica dei dintorni di Lentini [*De quadam Echinofauna aetatis pliocenicae* Lentini (*Siracusis*)]. Atti R. Acc. Naz. Lincei, Rend. Cl. Sc. Fis. Mat. e Natur., Ser. 6, XXIII, 6, 383-386. Roma (1936). **b - 1362**

Si dà conto di una fauna di Echinidi del tutto sconosciuta per la Sicilia orientale ed in base allo studio di essa si conferma il riferimento dei tufi calcarei al pliocene – [A].

**Clerici E.** - Carta dei giacimenti diatomeiferi dei dintorni di Roma [*Tabula depositorum diatomeiferorum apud Romam*]. 1 Cart., f. t. Boll. Soc. Geol. It., LIV, 2, 223-228. Roma (1935). **b - 1363**

L'A. presenta una carta topografica dei dintorni di Roma recante l'indicazione di giacimenti diatomeiferi, ossia di rocce contenenti diatomee, e fornisce notizie bibliografiche sullo studio delle diatomee fossili locali.

**Cushman J.** - Upper Eocene Foraminifera of the Southeastern United States [*Foraminifera aetatis eocenicae superioris in parte sudorientali Americae Statuum Foederatorum*]. 88 pp., 23 pl., U. S. Geol. Surv. Prof. Pap., 181 Washington (1935). **b - 1364**

Description and mostly illustrations of all *Foraminifera* of the general Eastern and Gulf Coastal Plain areas comprising shallow water formations and deep-water phases. 9 new forms are recorded.

**Dalinkevičius J. A.** - On the Fossil Fishes of the Lithuanian Chalk. 1. *Selachii* [*Pisces fossiles ad sedimenta calcaria Lithuaniae pertinentes*. I. *Selachii*]. 5 pls., 7 figs., Vyt. Didž. Univ. Matem.-Gamt. Fak. Darb. (Mém. Fac. Sc. Univ. Vytautas le Grand Univ.), IX, 3, 243-305. (?) (1935). **b - 1365**

Description of about 30 spp. from lowest Cenomanian and Turonian beds of Lithuania. About 9 new species.

**Dechaseaux C.** - - Les Lamellibranches dysodontes du Jurassique de Belgique [*Lamellibranchiata dysodonta aetatis Giurassicae Belgicae*]. 1 fig., 1 pl., Bull. Soc. Géol. Fr., IV, ser. 5, 759-765. Paris (1935). **b - 1366**

**Doncieux L., Dubertret L.. & Vautrin H.** - L'Oligocène et le Burdigalien du désert de Syrie [*De aetate oligocenica deque Burdigaliana aetate deserti Syriaci*]. 1 fig., C. R. Acad. Sc., CCII, 26, 2165-2167. Paris (1936). **b - 1367**

Brève description des affleurements dans le désert de Syrie. L'Oligocène est caractérisé par des Nummulites; le Burdigalien par une faune d'Echinides.

**Dubar G. & Le Maître D.** - Sur des gisements nouveaux de Spongiomorphides et d'Algues dans le Lias et le Bajocien du Maroc [*Deposita nova Spongiomorphidarum et Algarum formata in stratis aetatis Liassicae et Bajocenicae Mauretaniae*]. C. R. Acad. Sc., CCIII, 4, 339-340. Paris (1936). **b - 1368**

Les espèces nouvelles appartiennent aux genres *Heptastylopsis* et *Cylicopsis* (*Spongiomorphida*) et à la famille *Solenoporacéae*.

**Eguchi M.** - Three New Genera of Corals from the Lower Cretaceous of Japan [*Tria genera nova Coralliorum aetatis Cretaceae inferioris Japoniae*]. 4 figs., Proc. Imp. Acad., XIII, 3, 70–72. Tokyo (1936). **b - 1369**

*Miyakosmilia* gen. nov., *Diplogyra* gen. nov. and *Miyakopora* gen. nov.

**Eller E. R.** - Upper Devonian Sponges [*Spongiae aetatis devonianae superioris*]. Science, LXXXIV, 2167, 41. New York (1936). **b - 1370**

Short information on a collection of sponges of the family *Dictyospongidae* found in New York and Pennsylvania and given to the Carnegie Museum.

**Emelyanzev T. & Nalivkin D.** - The Paleozoic of the Yrung-Tumus Peninsula, Mouth of the Khatanga River, Arctic Ocean [*Aetas palaeozoica paeninsulae* Yrung-Tumus *ad accessus fluminis* Khatanga *in Oceano arctico*]. (In Russ., Engl. Summ.). 1 pl., Trans. Arct. Inst., XLI, 63-72. Leningrad (1936). **b - 1371**

Description of the geology and fauna of the Yrung-Tumus Peninsula located between lat. 74° N., long. 111-112° E. Description of the two types of facies of the Paleozoic limestone with the usual Arctic Frasnian fauna. From the described fossil species one: *Liorhynchus taimyricus* is new to science.

**Feruglio E.** - Sedimenti marini nel sottosuolo della bassa pianura Friulana [*Sedimenta marina sub terris vallis Friulanae*]. Boll. Soc. Geolog. It., LV, 129-138. Roma (1936). **b - 1372**

I campioni estratti dai pozzi descritti provano che nel sottosuolo della bassa pianura friulana esiste una potente serie marina (a 168-175 m. nel pozzo di Piancada), con resti di Molluschi di specie viventi, ricoperta da una coltre di alluvioni in parte post-glaciali e in gran parte probabilmente vermiane.

**Fiore M.** - Di un'alga fossile nuova per la « pesciara » di Bolca [*De Alga quadam fossili nova in* pesciara di Bolca]. Rend. Acc. Sc. Fis. e Mat., Ser. 6, V, 137-138. Napoli (1936). **b - 1373**

L'A. comunica di aver riscontrata un'alga nuova per la pesciara di Bolca (*Udotea palmetta*), e fa rilevare le probabili affinità con le alghe che vivono attualmente negli oceani Pacifico e Indiano.

**Floridia G. B.** - Sul rinvenimento di orbitoidi non rimaneggiate nel «flysch» lombardo [*De reinventis orbitoidibus non retractatis in* flysch *longobardiae*]. Boll. Soc. Geol. It., LIV, 2, 253-262. Roma (1935). **b - 1374**

L'A. illustra i terreni cretacico-eocenici delle colline bergamasche, e in particolare il Monte Giglio, sul quale ha rinvenuto Orbitoidi non rimaneggiate. Tra queste ha riconosciuto e descritto: *Orbitoides media* (d'Arch.). *O.* cfr. *geusacica* Leym, e *Lepidorbitoides socialis* Schlum concludendo trattarsi di Maestrichtiano, livello ancora non identificato in Lombardia.

**Geyn W. A. E. van de & Vlerk I. M. van der.** - A Monograph on the *Orbitoididae*, Occurring in the Tertiary of America Compiled in Connection with an Examination of a Collection of Larger Foraminifera from Trinidad [*Monographia de Orbitoididis aetatis tertiariae Americae redacta in dependentia cuiusdam collectionis Foraminiferorum majorum insularum* Trinidad]. 9 pls., 1 fig., Leidsche Geol. Med., VII, 2, 221-272. Leyden (1935). **b - 1375**

Results of morphologic observations and consequent synonymizing of many species of *Foraminifera*, containing the description of larger American *Foraminifera* and the summary of the views of some contemporary European taxonomists on the nomenclature of subgenera.

**Glebovskaya E. M.** - Silurian Ostracodes from the Northwestern Shores of Novaya Zemlya [*Ostracoda siluriana ad litora nordoccidentalia Novae Zemliae pertinentia*]. (Russ., Engl. Rés.). 1 pl., Trans. Arct. Inst., LVIII, 33-43, Leningrad (1936). **b - 1376**

Description of nine forms, two of which are described for the first time: *Leperditia grandis* var. *elongata* and *L. jermolaewi*.

**Glibert M.** - Faune malacologique des sables de Wemmel. 1. Pélécypodes [*Fauna malacologica in formationibus sabulosis* Wemmel. *Pelecypoda*]. 75 figs., 7 pl. h. t., Mém. Mus. R. Hist. Natur. Belgique, 78, 1-241. Bruxelles (1936). **b - 1377**

Ouvrages précédents. Essai de retracer l'histoire de la création de l'étage wemmelien. Partie spéciale: Description et liste de 132 espèces dont 17 nouvelles et répartition par localités. Appendice: Pélécypodes des sables et argiles glauconifères d'Assche. Liste de 50 espèces dont 4 nouvelles. Tableau de la répartition des espèces des sables de Wemmel communes à d'autres horizons. Bibl.

**Gugenberger O.** - Zur Kenntnis einiger unbekannten Arten aus dem Unterlias (Bucklandi-Zone) der Provinz Palermo [*De cognoscendis quibusdam speciebus adhuc ignotis aetatis Liassicae inferioris (in Zona* Bucklandi) *provinciae Panormitanae*]. 1 Taf. a T., Sitz. ber. Akad. Wiss. Wien, Abt. 1, CXLV, 1/2, 47-58. Wien (1936). **b - 1378**

Beschreibung von 15 Arten mit Variationen, von denen die meisten neu sind. (Vgl. auch Anz. Akad. Wiss. 13 und Paleontol. ital. «I Cefalopodi del Lias inferiore della Montagna del Casale»).

**Hanna G. D.** - Notes on Localities of Fossil Diatoms in California [*Notae de Diatomeis fossilibus in California*]. Bull. Soc. Franc. Micr., V, 3, 109–112. Paris (1936). **b - 1379**

Full use of much of the early literature cannot be made because the age and locality of the material discussed cannot yet be determined with any approach to exactness.

**Hatae N.** - The Foraminiferal Fauna in the Limestones of the Heian System in the Vicinity of Neietsu, Kogen-do [*Fauna Foraminiferorum in systemate albaresi nomine* Heian *apud* Neietsu, Kogen-do]. (In Jap.). Journ. Geol. Soc. Jap., 42, 362-363. Tokyo (1935). **b - 1380**

*Fusulina – Fusulinella* and *Palaeofusulina – Schwagerina* zones.

**Hatai K.** - Fossil *Brachiopoda* from the Ninohe District, Mutu Province [*Brachiopoda fossilia in districtu* Ninohe, *Provinciae* Mutu]. 1 pl. o. t., Jap. Journ. Geol. & Geogr., Trans. & Abstr., XIII, 1/2, 71-83. Tokyo (1936). **b - 1381**

The most interesting feature of this fauna is the occurrence of the genus *Macandrevia*, hitherto unknown from the recent seas of Japan. It is the first record in Japan or eastern Asia of this fossil, which is also found in the Pliocene of Italy. Description of seven species, three of which are new.

**Hatai K.** - Neogene *Brachiopoda* from Japan [*Brachiopoda neogenica Japoniae*]. 2 pls. o. t., Jap. Journ. Geol. & Geogr., Trans. & Abstr., XIII, 3/4, 283-324. Tokyo (1936). **b - 1382**

The *Brachiopoda* dealt with here are from geographically isolated localities which are enumerated here. 26 species are described, 9 of which are new.

**Hatai K.** - A Preliminary Note on the Tertiary Brachiopod Fauna of Japan [*Nota prior de fauna tertiaria Brachiopodorum*]. 3 figs., Proc. Imp. Acad., XII, 4, 100-102. Tokyo (1936). **b - 1383**

The Japanese Brachiopod fauna is very rich in the surrounding seas as well as in the Neogene rocks of Japan. The faunal sequence of the fossil forms is briefly stated here.

**Häusel W. & Richter E.** - Fundstellen im Unterkoblenz (Unter-Devon) des östlichen Taunus (Blatt Usingen- Fauerbach) [*Locus in quo reperiuntur fossilia in* Unterkoblenz (*Periodus devoniana inferior*) Taunus *orientali*]. 7 Abb., Senckenbergiana, X VIII, 5/6, 296-307. Frankfurt a. M. (1936). **b - 1384**

Verzeichnis mit Bemerkungen einer reichhaltiger Fauna von Trilobiten, Styliolinen, Orthoceren und anderen Schaltieren.

**Hayasaka I.** - A *Discocyclina*- Limestone Exposed Near the Peak of Minami-Daibu in Takao Prefecture, Taiwan [*Calcar, specie «Discocyclina» formatum, in cacumine inventum* Minami-Daibu *in Praefectura* Takao, Taiwan]. 2 figs., Proc. Imp. Acad., XI, 8, 329-330. Tokyo (1935). **b - 1385**

Description of a new locality where *Discocyclina* and *Camerina*, together with fragments of some other organisms like crinoids have been found.

**Heintz A.** - *Holonema*-Reste aus dem Devon Spitzbergens [«*Holonema*» *residua a strato devoniano regionis* Spitzbergen]. 1 Taf. a. T., Norsk Geol. Tidsskr., XV, 115-121. Oslo (1935). **b - 1386**

Das hier beschriebene Material ist teilweise von norwegischen (1925 und 1928) und teilweise von schwedischen Expeditionen (1910) in einer Schlucht «Fiskekløft» im inneren Teile des Isfjords eingesammelt. Beschreibung und Versuch zur Bestimmung von 5 *Holonema*- Reste. Die Familie *Holonemidae*.

**Heritsch F.** - A New Species of *Waagenophyllum* from the Permian of the Glass Mountains, Texas [« *Waagenophyllum* » *species nova ab aetate Permianica proveniens, regionis* Glass Mountains, *in* Texas]. 1 fig., Amer. Journ. Sc., XXXI, 182, 144-148. Hew Haven, Conn. (1936). **b - 1387**

The specific description is followed by a review of the distribution of all known species of the coral genus *Waagenophyllum*. This shows the genus to be highly characteristic of the Middle and Upper Permian. The Rugose corals are then used as the basis of a general scheme of onation and correlation of the Permian of the world. [A.].

**Heritsch F.** - A New Rugose Coral from the Lower Permian of Texas, with Remarks on the Stratigraphic Significance of certain Permian Coral Genera [*Corallium novum rugosum a strato permianico inferiore, regionis* Texas *proveniens, cum observationibus de momento stratigrafico quoad genera quaedam permianica Coralliorum*]. 2 pls., Amer. Journ. Sc., XXXII, 188, 134-144. New Haven, Conn. (1936). **b - 1388**

*Palaeosmilia schucherti* n. sp. Diagnosis, general description, stratigraphic remarks .A. proves that a zoning zof the Permian may be made by means of the rugose corals.

**Jacquet F.** - Sur l'âge éocène inférieur des couches phosphatées du Sénégal [*De aetate eocenica inferiore in stratis phosphatatis Senegalensibus*]. C. R. Acad. Sc., CCII, 4, 335-337. Paris (1936). **b - 1389**

L'A. donne la description d'une série continue qui s'étend à travers la presqu'île du Cap Vert et où toutes les couches à phosphates sont représentées, depuis le Crétacé supérieur à *Physaster inflatus* de Dakar d'une part et depuis l'Eocène inférieur à *Linthia Delanouei* de Popenguine d'autre part, jusqu'aux calcaires à *Nummulites gizehensis* du Cayor.

**Jacquet F.** - Sur l'Eocène moyen à Nummulites du Sénégal [*De eocene medio Senegalensi Nummulitibus formato*]. C. R. Acad. Sc., CCIII, 5, 377-379. Paris (1936). **b - 1390**

L'A. enumère les nombreuses espèces trouvées dans ces couches en donnant aussi, au moins provisoirement, l'ordre chronologique des principaux fossils.

**Jones A. O.** - On the Silurian Corals: *Cyathophyllum shearsbyi* and *Heliophyllum yassense* [*De corallis aetatis Silurianae: « Cyathophyllum shearsbyi » et « Heliophyllum yassense »*]. 3 pls. Mem. Queensl. Mus., XI, 1, 53-58. Queensland (1936). **b - 1391**

Revision of the Australian Silurian corals based on the examination of the types of European genera *Cyathophyllum* conducted to recognize a separate genus for the Australian form, *Hercophyllum* g. n., whose genotype is *Cyathophyllum shearsbyi*. Description of *H. shearsbyi*, as well as of *Heliophyllum yassense* Eth. fil. which must be referred to the genus *Xylodes* whose place lies in the series between those two species.

**Kanehara K.** - Neogene Shells from South Chôsen (Korea) [*Mollusca neogenica regionis* Chôsen *merid. in* Korea]. 1 pl. o. t., Jap. Journ. Geol. & Geogr., Trans. & Abstr., XIII, 1/2, 31-37. Tokyo (1936). **b - 1392**

The tertiary rocks along the Gulf of Geijitsu, Keishô-Kokudo, S. Chôsen, are divided into two series, the lower of which contains poorly preserved fossils of marine shells. 7 species are described, 3 of which are new.

**Kilian C. & Monod Th.** - De la découverte, dans le Sahara occidental de microorganismes fossiles qui constitueraient un repère d'âge et de nature marine pour la série du Koundeloungen (Congo) [*De inventis in* Sahara *occidentali microrganismis fossilibus de quibus est consilium si constituere possint inventionem quamdam aetatis et naturae marinae pro serie nomine* Koundeloungon *in regione Congolensi*]. C. R. Acad. Sc., CCIII, 5, 381–383. Paris (1936). **b - 1393**

L'Analyse des échantillons de calcaires à corpuscules globuleux, reportée ici, fait présumer qu'il s'agit des organismes du type des Siciliacées constituant une formation marine probablement d'âge carbonifère inférieur ou dévonien. Remarques de M. Lucien Cayeux au sujet ce cette note.

**Kiparisova L.** - Upper Triassic Pelecypods from the Kolyma-Indighirka Land. [*Pelecypoda aetatis Triassicae Superioris a regione provenientia* Kolyma-Indighirka]. 1 map., 5 tables o. t., Trans. Arct. Inst., XXX, 71-136. Leningrad (1936). **b - 1394**

Results of the study of three paleontological collections of pelecypodes, gathered in 1929-1930 during the Kolyma Geological Expedition by S. Obrutschev, and by the same scientist in 1926, as well as of a collection made in 1891 by J. Chersky in Tas-Kystabyt Range. The following forms are new to science: *Pseudomonotis* sp. n. ind., *P. scutiformis* var. *typica* var. n., *P. scutiformis* var. *kolymica* v. n., *Oxytoma omolonense* sp. n., *Halobia obruchevi* sp. n., *Gryphea arcuataeformis* sp. n., *Entolium* (*Syncyclonema*) sp. n. ind. *Pleurophorus* sp. n. ind.

**Kobayashi T.** - The Cambro- Ordovician Formations and Faunas of South Chôsen. Palaeontology. Part I: Middle Ordovician Faunas. Part II. Lower Ordovician Faunas [*De formationibus cambro–ordovicianis deque variis faunis regionis* Chôsen *meridionalis. Palaeontologia. Pars Iª. Faunae medio-ordovicianae. Pars IIª. Faunae inferiores ordovicianae*]. 52 pls., Jour. Fac. Sc. Imp. Univ., Sect. 2, III, Pt. 8, 329-335; Pt. 9, 521-585. Tokyo(1934). **b - 1395**

Lists and descriptions of the species, comparison with other faunas. About 18 new genera with genotypes are recorded.

**Kobayashi T.** - The Cambro-Ordovician Formations and Faunas of South Chôsen, Palaeontology. Part III. Cambrian Faunas of South Chôsen with a Special Study on the Cambrian Trilobite Genera and Families [*De formationibus Cambro–ordovicianis deque faunis diversis regionis* Chôsen *meridionalis. Palaeontologia. Pars IIIª. Faunae cambrianae regionis* Chôsen *meridionalis cum studio quodam speciali de generibus et familiis cambrianis quoad Trilobita*]. 33 figs., 24 pls., Journ. Fac. Sc. Imp. Univ., Sect. 2, IV, Part 2, 49-344. Tokyo (1935). **b - 1396**

*Cystoidea, Brachiopoda, Gastropoda, Conularida, Cephalopoda, Trilobita, Incerta sedis* together 131 species from 13 fossil zones. About 75 new species and varieties, and 34 new genera are recorded.

**Kobayashi T.** - Suggestions for the natural Classification and benthonic Adaptation of early uncoiled Nautiloids [*Dictamina pro naturali distributione in classes et adaptatione benthonica Nautiloideorum veterum*]. Proc. Imp. Acad., XI, 10, 435-437. Tokyo (1935). **b - 1397**

Critical remarks on Hyatt's classification. Importance of the general organisation for the classifications of early uncoiled Nautiloids; five groups are suggested: Ellesmereoceroids, Endoceroids, Piloceroids, Orthoceroids and Actinoceroids.

**Kobayashi T.** - *Coreanoceras*, one of the most specialized Piloceroids and its benthonic Adaptation [*Agitur de « Coreanoceras », quae species est in Piloceroidis particularissima relate ad eius adaptationem benthonicam*]. 2 pls. o. t., Jap. Journ. Geol. & Geogr., Trans. & Abstr., XIII, 1/2, 185-195. Tokyo (1936). **b - 1398**

Referring to his previous description of this peculiar cephalopod found in the Wolungian (or late Lower Ordovician) Shorin bed, North Chôsen (Bull. Geol. Surv. Chôsen, XI, 1, 45, 1931) A. here corrects some previous observations giving also further details of its shell-structure. Some conclusions as to the life habits of these fossil nautiloids are drawn.

**Lambert J.** - Echinides crétacés d'Espagne [*Echinoidea aetatis cretaceae Hispaniae*]. 2 lam. Bol. Soc. Españ. Hist. Nat., XXXV, 10, 513-526. Madrid (1935). **b - 1399**

Echinides des provinces de Burgos, Palencia et Leon: *Dorocidaris ciryi* n. sp., *Micraster burgiensis* n. sp., *Hemiaster tubillensis* n. sp., *Periaster ciryi* n. sp., *Tetragramma giganteum* n. sp., *Orthopsis royoi* n. sp., *Botriopygus royoi* n. sp.

**Lami R.** - Sur la présence de cupules subfossiles d'oursins sur le littoral du Miñho (Portugal) [*De fossulis fossilibus a specie « Paracentrotus » formatis ad litora regionis* Miñho (*in Lusitania*)]. 3 fig., Bull. Lab. Marit. Dinard, 16, 2-6. Rennes (1936). **b - 1400**

La côte de Miñho est presque entièrement constituée en granite. Présence de nombreuses petites cupules fossiles situées au dessus du niveau actuel des hautes mers. Elles sont identiques aux cupules creusées, à un niveau plus bas, par les oursins actuels du genre *Paracentrotus*.

**Laporte L. J.** - Au sujet de la localisation géographique du dépôt diatomifère de Santa Monica et de quelques autres dépôts californiens [*De localisatione geographica quoad depositum diatomiferum in* Santa Monica *aliaque deposita Californiensia*]. 1 fig., Bull. Soc. Franc. Micr., V, 3, 106-109. Paris (1936). **b - 1401**

Importance pour apprendre l'évolution géologique et paléontologique du Continent Américain des dépôts fossiles diatomifères de cette région. Leur description doit être effectuée avec une grande précision géographique pour ne pas donner lieu à des remarquables erreurs.

**Lecompte M.** - Revision des Tabulés Dévoniens décrits par Goldfuss [*Reinspectio sediminorum aetatis Devonianae a* Goldfuss *descriptorum*]. 14 pl., Mém. Mus. R. Hist. Natur. Belgique, LXXV, 3-111. Bruxelles (1936). **b - 1402**

Description de 16 espèces du genre *Pachypora*, leur structure interne et caractères externes, examen au microscope des structures des sécrétions calcaires qui constituent le polypier.

**Lefébure P.** - Diatomées contenues dans le dépôt fossile Marin de Saint-Laurent-la Vernède (Gard) [*De Diatomeis in deposito fossili marino in* Saint-Laurent, la Vernède].3 figs., 2 pl., Bull. Soc. franç. Micr. IV, 2, 44-57. Paris (1935). **b - 1403**

Le gisement est situé près du pont sur la Tave et sa composition est celle d'une argile fine dont la partie siliceuse contient des spicules d'éponge, des Radiolaires, des Silicoflagellés et des Diatomées. Ce dépôt présente un mélange de formes de Diatomées d'eaux douces et marines dont la majorité ne se retrouvent plus dans les mers actuelles; il a donc dû se former dans des lagunes où l'eau de mer et l'eau douce venaient s'établir alternativement. Liste et description des Diatomées rencontrées.

**Leriche M.** - Sur l'importance des Squales fossiles dans l'établissement des synchronismes de formations à grandes distances [*De squalis fossilibus eorumque momento pro synchronismo formationum maximis spatiis*]. 10 cartes., Mém. Mus. R. Hist. Natur. Belgique, Sér. 2, 3, 739-773. Bruxelles (1936). **b - 1404**

Répartition fort vaste aux époques géologiques des squales qui ont pour la géologie une importance capitale, car ils permettent d'établir des synchronismes entre les formations fort éloignées les unes des autres. La denture des squales et les erreurs commises dans l'établissement des espèces fossiles. Les types de Louis Agassiz. L'aire de dispersion de quelques espèces tertiaires et la valeur stratigraphique des squales fossiles. Dix cartes de la distribution stratigraphique et géographique d'*Odontaspis macrota*, *O. cuspidata*, *O. acutissima*, *Lamna cattica*, *Oxyrhina hastalis*, *O. retroflexa*, *Carcharodon megalodon*, *C. Rondeleti*, *Galeocerdo aduncus* et *Hemipristis serra*.

**Levereault Ph.** - The segmental Condition in the Trunk of Trilobites [*Trilobita. Quaestio de trunci segmentis*]. 5 figs., Amer. Journ. Sc., XXXI, Ser. 5, 185, 386-393. New Haven. Conn. (1936). **b - 1405**

Secondary segmentation is one of the most ancient and fundamental characteristics of arthropods. Trilobites had an advanced condition of secondary segmentation as longitudinal sections revealed. Consideration of the limitation imposed upon them by sclerotization places emphasis upon the fundamental rôle secondary segmentation has had in the evolution of the arthropods. (A. abstr.).

**Lipparini T.** - Molluschi delle panchine pleistoceniche di Zuara, Ras-el-Msid e Sidi Mesri in Tripolitania [*Mollusca in contignationibus pleistocenicis in Tripolitania*]. Boll. Soc. Geol. It., LIV, 1, 93-106. Roma (1935). **b - 1406**

La costa della Tripolitania offre delle spiaggie sollevate intorno a quota 11, contenenti una fauna a tipo « caldo » del piano Tirreniano. L'A. descrive le forme riscontrate di cui la maggior parte è ancora vivente nel Mediterraneo.

**Lipparini T.** - Nummuliti dell'Oligocene scandianese (Reggio Emilia) [*Nummulites aetatis oligocenicae Scandianensis*]. 1 tav., R. Acc. Sc. Torino, LXXI, 2, 236-240. Torino (1936). **b - 1407**

Confronto stratigrafico tra la formazione oligocenica dell'Appennino di Reggio Emilia e quelle della Liguria e del Piemonte. Descrizione di *Nummulites Bouillei* e *N. intermedius*.

**Maillieux E.** - La faune et l'âge des Quartzophyllades Siegeniens de Longlier [*De fauna et aetate quoad Quartzophyllada siegeniana* τοῦ Longlier]. 32 figs. en 3 pls., tabls., Mém. Mus. R. Hist. Natur. Belgique, LXXIII, 1-140. Bruxelles (1936). **b - 1408**

Description de la faune fossile: *Anthozoa*, *Crinoidea*, *Annelida*, *Bryozoa*, *Brachiopoda*, *Gasteropoda*, *Pelecypoda*, *Cephalopoda*, *Trilobita*. Comparaison de la faune des couches du facies de Longlier à celle des divers horizons du Siegenien de la Belgique, rapport entre la faune de Longlier et celle des couches d'Augustental.

**Maillieux E.** - La faune des schistes de Matagne (Frasnien supérieur) [*De fauna in schistis regionis* Matagne (*Aetas Frasniana superior*)]. 1 pl. h. t., Mém. Mus. R. Hist. Natur. Belgique, LXXVII, 1-70. Bruxelles (1936). **b - 1409**

Caractéristique général des schistes de Matagne considérés comme le sommet de l'étage frasnien. Deux hypothèses sur la formation: mer profonde ou « Flachsee » (mer peu profonde). Extension verticale des éléments principaux de la faune de Matagne. Extension géographique du niveau de l'assise de Matagne. L'Assise de Matagne dans l'Ardenne et ses gisements fossilifères. La faune de l'assise de Matagne. *Coelenterata, Echinodermata, Vermes, Brachiopoda, Mollusca, Ctenobranchia, Opisthobranchia, Arthropoda (Crustacea).*

**Marie P.** - Sur la microfaune du Crétacé moyen et supérieur à facies bathyal du Nord Marocain [*De microfauna aetatis Cretaceae superioris et mediae, facie bathyalica, in Mauretania sept.*]. 1 tabl., C. R. Acad. Sc., CCII, 2, 145-148. Paris (1936). **b - 1410**

L'A. résume dans un tableau la répartition stratigraphique des principaux genres des foraminifères microscopiques du Crétacé moyen et supérieur, et démontre, l'existence d'affinités étroites entre les faunes crétacées de l'Afrique du Nord et celles de l'Amérique Centrale.

**Marie P.** - Sur la microfaune crétacée du sud-est du Bassin de Paris [*De microfauna aetatis Cretaceae regionis sudorientalis bacini Parisiensis*]. 1 tabl., C. R. Acad. Sc., CCIII, 1, 97-100. Paris (1936). **b - 1411**

L'A. résume dans un tableau les recherches qu'il a entreprises sur les Foraminifères du centre et du sud-est du Bassin de Paris et qui lui ont permis d'établir une échelle stratigraphique assez précise des genres plus importants. Le tableau donne des informations suffisantes pour faciliter l'étude des formations crétacées et permet de constater que chaque étage est caractérisé par une association faunistique spéciale.

**Mathieu G.** - Sur l'âge givétien des marbres de la Ville–Dé-d'Ardin (Deux Sèvres) [*De aetate Givetiana marmorum in* Villa-Dé-d'Ardin]. C. R. Acad. Sc., CCII, 18, 1523-1525. Paris (1936). **b - 1412**

L'A. communique ses recherches faites en vue de fixer exactement la position stratigraphique et l'âge des marbres de la Ville-Dé-d'Ardin, sur la base de l'examen des brachiopodes qui y sont contenus. Constatation inattendue de la présence de Givétien; explications.

**Miller A. K.** - Illustrated Card Catalog of North American Devonian Fossil: Unit 7 B. *Ammonoidea* [*Elenchus pictus fossilium americanorum septemtrionalium. Ammonoidea*]. Wagner Free Inst. of Science. Philadelphia (1936). **b - 1413**

This first unit consists of 50 cards of all the described species of American Devonian Ammonites except four that belong to unnamed genera which are being established in a monograph to appear.

**Miloradovitsch B. V.** - Some *Spiriferidae* from Middle and Upper Carboniferous of Timan [*Spiriferidae quaedam aetatis carboniferae mediae et superioris regionis* Timan]. (In Russ., Engl. Summ.). 5 figs., tables, 6 pls. o. t., Trans. Arct. Inst., XXX, 5–70. Leningrad (1936). **b - 1414**

Description of a collection from the Middle and Upper Carboniferous of the Timan, containing the following two genera: *Spirifer* Sow. and *Choristites* Fisch. The first is represented by the two species: *Spirifer cameratus* Mort. and *Sp. licharevi* sp. nov. The genus *Choristites* Fisch is represented by a larger number of species, i. e. *Ch. mosquensis myatschkowensis* Frdks., *Ch. uralicus* Leb., *Ch. priscus* Eichw. *Ch. laticostateformis* sp. nov., *Ch. ventricosus* sp. n., *Ch. ussensis amplus* subsp. n., *Ch. ussensis timanicus* subsp., n., *Ch. gravis* sp. n.

**Miloradovitsch B. V.** - Lower Permian Fauna from the Island Mejdusharský [*De fauna in strato Permiano inferiore insulae* Mejdusharsky]. (In Russ., Engl. Summ.). 4 tabl. o. t., Trans. Arct. Inst., XXXVII 37-82. Leningrad (1936). **b - 1415**

The fauna described here, about 20 species (*Brachiopoda, Scaphopoda* and *Gastropoda*), is rather scarce and uniform, which shows that the conditions of this part of the sea were not normal probably forming the bordering zone of the cold water anthracolitic sea of Northern Siberia. Three new species are determined: *Lingula arctica* sp. nov., *Spirelytha magna* sp. nov. and *Productus* (*Linoproductus* ?) *alferovii* sp. n.

**Morellet L. & J.** - Faune des sables à *Nummulites variolarius* de Lévignen (Oise) [*Sabularum fauna in regione* Lévignen, *speciem « Nummulites variolarius » continentium*]. Bull. Mus. Nat. Hist. Natur., VIII, Ser. 2, 3, 222-310. Paris (1936). **b - 1416**

Liste des espèces appartenant aux Vertébrés, Foraminifères, Coelentérés, Echinides, Bryozaires, Crustacés, Pélécypodes, Scaphopodes, Gastropodes, Céphalopodes, Algues calcaires (Dasycladacées). Analyse de la faune.

**Moy-Thomas J. A.** - The Structure and Affinities of *Chondrenchelys problematica* Tr. [*De structura et affinitatibus speciei « Chondrenchelys problematica »*]. 2 pls., 12 figs., Proc. Zool. Soc. London, 2, 391-403. London (1935). **b - 1417**

Description of the pectoral fins, and girdles, teeth and denticles based on reexamination of Traquair's material. This Scottish Carboniferous genus is probably the only known representative of a very primitive group of sharks, possibly descended from a common ancestor of both *Holocephala* and the *Pleuracanthii*.

**Musper K. A. F. R.** - Einige Bemerkungen zur fossilen Fischfauna von Padang (Sumatra) [*Observationes de fauna ichthyca fossili regionis* Padang (*Sumatra*)]. De Ing. in Ned. Ind. IV. Mijnb. en Geol., 3, 70-74. Batavia (1936). **b - 1418**

**Nalivkin D. V.** - Silurian and Devonian Fauna of the Northern Island of Novaya Zemlja [*De fauna Siluriana et Devoniana insulae septentr. Novae Zemliae*]. (In Russ. and Engl.). 2 pls., Trans. Arct. Inst., LVIII, 1-32. Leningrad (1936). **b - 1419**

Lists of species of both faunas, comparison with surrounding regions. The paleography of the Arctic Silur and Devon. New forms: *Conchidium novosemelicum* sp.n., *Athyris polaris* sp. n.

**Neviani A.** - Il corallo rosso fossile [*Corallium rubrum fossile*]. 1 fig., Boll. Soc. Geol. It., LIV, 1, 61-66. Roma (1935). **b - 1420**

L'A. passa in rassegna ventisette pubblicazioni nelle quali si trattò del corallo rosso fossile, comprese le specie affini, o considerate come tali. Conclude che il *Corallium pallidum* Micht., *C. sepultum*, Micht., *C. sulcatum* Micht., *C. inaequale* Micht. e fors'anche il *C. Becki* Lyell, sono da ritenersi come sinonimi, ed al più come varietà e mutazioni del *C. rubrum* Bauhin.

**Nikiforova A. I.** - Some lower Permian Bryozoa from Novaya Zemlya and Spitzbergen [*Bryozoa quaedam aetatis Permianicae inferioris Novae Zemliae*]. 3 pls. o. t., 2 figs., tabl., Trans. Arct. Inst., LVIII, 113-141. Leningrad (1936). **b - 1421**

Though there seems to be an abundance of *Bryozoa* in these deposits the present study is nearly the first one appeared on *Bryozoa* from this region of the Earth. Ten species of different genera are described.

**Nikiforova O.** - On the Finding of *Spirifer medius* Lebedeff in Novaja Zemlya [*De reinventa specie « Spirifer medius » in Nova Zemlia*]. 11 figs., Trans. Arct. Inst., LVIII, 109-112. Leningrad (1936). **b - 1422**

The presence of *Spirifer medius*, a typical form of the Lower Tournaisian, in Novaja Zemlya, is important for paleogeographic reconstructions.

**Nomura S. & Hatai K.** - On the Variation of Certain Internal Features of the Fossil *Terebratalia coreanica* from Hokkaidô [*De variationibus aliquarum peculiaritatum internarum speciei « Terebratalia coreanica » fossilis in* Hokkaidô]. 5 figs., Venus, V, 1, 10-13. Kyoto (1935). **b - 1423**

Report on *T. coreanica* (Adams and Reeve) which is a common brachiopod found in the seas around the northern part of Japan, as well in Miocene and even pre-Miocene formations, especially in the south-western part of Hokkaido, where the fossil forms often attain larger sizes than those of the recent form and show a wide range of variation in the external as well as internal features of the isolated valves.

**Nomura S. & Hatai K.** - On some Species of the Genus *Arca* from the Neogene of Northeast Honsyû, Japan [*De speciebus quibusdam generis « Arca » aetatis neogenicae in regione* Honsyû *nord-orientali, in Japonia*]. 2 pls. o. t., Jap. Journ. Geol. & Geogr., XIII, 1/2, 63-70. Tokyo (1936). **b - 1424**

Four forms are considered here which have not been recorded as living in the seas surrounding Japan. One is new, *Arca tatunokutiensis* sp. n.

**Nomura S. & Hatai K.** - A Note on Some Fossil *Mollusca* from Tugaru Peninsula, Northeast Japan [*Nota de quibusdam Molluscis fossilibus paeninsulae* Tugara *in Japonia nord–orientali*]. 1 pl., Jap. Journ. Geol. & Geogr., XIII, 3/4, 277-281. Tokyo (1936). **b - 1425**

Description of 8 species, of which 5 are new and 3 indetermined.

**Nomura S. & Hatai K.** - A Note of the Fossil Marine Fauna from Okinawa-Zima, Ryûkyu Group [*Nota de fauna marina fossili in Insulis*, Ryûkyu]. (In Engl., Jap. Rés.). Journ. Geol. Soc. Jap., XLIII, 336-339. Tokyo (1936).

( — ) Trans. Proc. Paleont. Soc. Jap., 3, 39-42. Tokyo (1936). **b - 1426**

Report on *Thyasira nipponica*, *Pecten praesignis*, *Coronula diadema* and other shells and Echinoids found near the city of Naha.

**Oimikado T. & Ikebe N.** - On the Fossil Specimen of *Macoma calcarea* (Gmelin) from Kazusa [*De exemplare quodam fossili « Macoma calcarea » a regione* Kazusa *provenienti*]. (In Jap.). 6 figs., Venus, V, 1, 14-17. Kyoto (1935). **b - 1427**

Comparison between the pallial sinus of fossil *M. calcarea* from the upper part of Tôgane silt bed of the uppermost Pliocene, and that of *M. masuta* and *M. tokyoensis*.

**Petrbok J.** - Meeres-Conchylien in den jüngsten holozänen Torfschichten aus Island [*Conchae marinae in stratis recentioribus aetatis holocenicae in Islandia*]. Arch. Moll. k., 67, 81-83. Frankfurt. a M. (1935). **b - 1428**

Auffallendes Vorkommen von *Astarte borealis*, *Modiola modiola* und *Buccinum undatum* in einer reinen Vegetationsschicht.

**Petrbok J.** - Die Bedeutung der holozänen Molluskenfauna bei Konstantin Monastyr am Meere für die stratigraphische Chronologie des bulgarischen Schwarzen Meer- Ufers [*Significatum faunae Molluscorum aetatis holocenicae apud* Konstantin Monastyr *ad mare, pro chronologia stratigraphica litorum Ponti Euxini*]. Arch. Moll. k., 67, 161-164. Frankfurt a. M. (1935). **b - 1429**

Die Befunde von 9 *Hyalina*– Arten im weissen Travertin- Lehm weisen auf ein warmes feuchtes Klima hin. Von den zwei übrigen Schichten ist eine arm an Mollusken, während die andere (die subboreale *Littorina*- Schicht) einer Steppenfauna ähnlich ist.

**Perruche L.** - Sur quelques Microfossiles du Jurassique [*De microfossilibus aetatis Giurassicae*]. 2 pl., Bull. Soc. Franç. Micr., V, 1, 23-25. Paris (1936). **b - 1430**

Echantillon montrant de nombreux rostres de Belemnites d'origine marine, des Foraminifères, des Algues et un nombre considérable de restes organiques indéterminables.

**Pfender J.** - Sur un Foraminifère nouveau du Bathonien des Montagnes d'Escreins (H.-Alpes): *Kilianina Blancheti* nov. gen., nov. sp. [*De Foraminifero novo provenienti a Bathoniano montium* d'Escreins: *« Kilianina Blancheti »*]. 2 pl. h. t., Trav. Lab. Géol. Fac. Sc. Univ. Grenoble 1934-35, XVIII, 121-130. Grenoble (1936). **b - 1431**

Historique. Description de l'espèce. Rapports et différences.

**Pieragnoli L.** - Fossili Eocenici d'Egitto raccolti da Figari Bey con alcuni altri dell'Arabia Petrea [*De fossilibus eocenicis Aegyptianis collectis a* Figari Bey. *Adiunguntur alia fossilia Arabiae Petreae*]. Boll. Soc. Geol. It., LIII, 2, 161-190. Roma (1935). **b - 1432**

Studiando una raccolta di fossili l'A. ha trovato 11 nuove specie e cioè cinque *Ostrea*, una *Chama*, una *Volutilithes*, tre *Helix*, un *Planorbis*.

**Piveteau J.** - Ressemblances des faunes ichthyologiques du Groenland et du Spitzberg avec celle de Madagascar au Trias inférieur [*Similitudines inter faunas ichthyologicas Groenlandiae regionisque* Spitzberg *et faunas insulae* Madagascar *aetatis Triassicae inferioris*]. C. R. somm. Soc. Géol. Fr., 113-114. Paris (1935). **b - 1433**

**Principi P.** - I terreni terziari della conca aquilana [*De locis aetatis tertiariae in valle urbis* Aquila]. 3 fig., Boll. Soc. Geol. It., LIV, 1, 11-40. Roma (1935). **b - 1434**

Gli strati dell'Eocene sono caratterizzati dalla presenza di Nummuliti e Ortofragmine, mentre nell'Oligocene questi generi si trovano associati a numerose specie di Lepidocicline, le quali proseguono, insieme a forme di Miogypsine, di Amphistegine e di Operculine nel Miocene inferiore e medio. [A.].

**Ramaccioni G.** - Il Lias medio di monte Cucco nell'Appennino centrale [*Aetas Liassica media in monte* Cucco *Appenninorum Centralium*]. Boll. Soc. Geol. It., LV, 1, 169-189. Roma (1936). **b - 1435**

Nella presente nota l'A. prende in esame alcune forme di Cefalopodi, Brachiopodi e Gasteropodi raccolti dal dott. Casella nel Monte Cucco (Appennino Centrale) determinando 28 specie e una nuova varietà, appartenenti al Lias medio.

**Rathbun M. J.** - A new Xanthid Crab from the Cretaceous of New Jersey [« *Xanthias* » *novum a strato Cretaceo* New Jersey *proveniens*]. 1 fig., Proc. Acad. Natur. Sc. Philadelphia, 1935, LXXXVII, 165-166. Philadelphia (1936).
**b - 1436**

Description and type locality of *Xanthias lenolensis* n. sp.

**Rein E. F.** - Paleozoic Ostracodes from the North-Eastern Shores of Novaya Zemlja [*Ostracoda Palaeozoica litorum nordorientalium Novae Zemliae*]. (In Russ. and Engl.). 41 figs., 2 pls., 1 tabl., Trans. Arct. Inst., LVIII, 45-90. Leningrad (1936).
**b - 1437**

The predominating form in this collection (about 30 species) is *Leperditia*, represented by 15 species, 8 of which are new. List of the vertical distribution of these Ostracoda and table indicating their age.

**Resser C. E.** - Nomenclature of some Cambrian Trilobites [*Trilobita quaedam aetatis Cambrianae. Quaestio de nomenclatura*]. Smithson. Misc. Coll., Publ. 3295, XCIII, 5, 1-46. Washington D. C. (1935).
**b - 1438**

Notes on 121 species arranged alphabetically by genera. 31 new species and 14 new genera are presented. For some more important forms diagnosis, comparisons genotype and range are given.

**Resser C. E.** - Second Contribution to Nomenclature of Cambrian Trilobites [*Trilobita aetatis Cambrianae. Secunda contributio in eorum nomenclaturam*]. Smithson. Misc. Coll., Publ. 3383, XCV, 4, 1-29. Washington (1936).
**b - 1439**

Nomenclatural changes necessary for certain Cambrian species with discussion on several Atlantic Province genera and species. About 70 species are listed of which there are 8 new genera and 18 new species.

**Richards L. G. Jr.** - Revision of some California Species of *Astrodapsis* [*Reinspectio aliquarum specierum Californiensium « Astrodapsis »*]. 7 pl., Trans. San Diego Soc. Nat. Hist., VIII, 9, 59-66. San Diego (1935).
**b - 1440**

The Miocene Echinid *Astrodapsis antiselli* Kew (not Conrad) is correctly identified and redescribed as *A. salinasensis* n. nom. The true *A. antiselli* Conrad was called *A. Arnoldi* by Clark, Twitchell and Kew.

**Richter E.** - Ein *Proetus* im Hunsrückschiefer (Tril., Devon). [« *Proetus* » *a stratis* τοῦ Hunsrück *proveniens*]. 1 Abb., Senckenbergiana, XVIII, 1/2, 79-82. Frankfurt a. M. (1936).
**b - 1441**

Dieser neue Fund ist aus Interesse, da Proetiden im Unter- Devon sehr selten sind und der neue Typus ausserdem 9 Rumpfringe besitzt. *Proetus* (*Cornuproetus*) *hunsrückianus* n. sp. Diagnose, Beschreibung, Beziehungen.

**Rutten L.** - Roches et fossiles de l'Ile Pisang et de la Nouvelle-Guinée [*Saxa et fossilia insulae* Pisang *et Novae Guineae*]. 4 pl. h. t., Bull. Mus. R. Hist. Natur. Belgique, XII, 10, 1-14. Bruxelles (1936).
**b - 1442**

Rapport sur une collection obtenue pendant le voyage de LL. AA. RR. le Prince et la Princesse Léopold de Belgique en 1929. Ile Pisang: Calcaires fins, organogènes, fragments de petits foraminifères ainsi que des foraminifères entiers des familles *Globigerinidae*, *Textularidae* et *Lagenidae*. - Nouvelle-Guinée (Environs de la Baie du Triton et la région montagneuse au S. de Manokwari): Lépidocyclines, moules de Gastropodes, Foraminifères et Coraux.

**Saito K.** - Older Cambrian Brachiopoda, Gastropoda etc. from North-western Korea [*Brachiopoda, Gastropoda, etc. antiquae aetatis Cambrianae a Koreana regione nord-occidentali provenientia*]. 3 pls., Journ. Fac. Sc. Imp. Univ. Tokyo, sect. 2, IV, 3, 345-367. Tokyo (1936).
**b - 1443**

Description of about 18 species, 3 of which are new.

**Salopek M.** - Ueber die Zephalopodenkalke des Greguričbrijeg in der Samoborska gora [*De formationibus calcareis Cephalopodorum in monte* Gregurič *in jugo montium* Samoborska]. 11 Abb., 4 Pl., Prirod. istraž., XX, 201-228. Zagreb (1936).
( — ) Bull. Int. Acad. Jougosl. Sc. & Beaux-Arts, Cl. Sc. Math. & Natur., XXIX–XXX, 173-182. Zagreb (1936).
**b - 1444**

Beschreibung von etwa 20Arten, unter denen mehrere Variationen und 2 neue Arten sind, *Kellnerites samoborensis* n. sp. und *Protrachyceras Vouki* n. sp.

**Samokhvatova S. V.** - Les brachiopodes de l'houille de l'île de Berkh (Novaja Zemlja) [*Brachiopoda carbonis fossilis insulae* Berkh (*in Nova Zemlia*]. (En russe). Troudy Vses. Naoutchno-Issl. Inst. Morsk. Rybn. Khoz. Okeanogr. (Trav. Inst. Rech. Scient. Pêches Marit. Océanogr.), I, 79-109. Leningrad-Moskva (1935).
**b - 1445**

**Scarsella F.** - Di una nuova specie di pteropodo del Miocene appenninico [*Pteropodus species nova aetatis Miocenicae appenninicae*]. Boll. Soc. Geol. It., LIII, 2, 177-181. Roma (1935).
**b - 1446**

È descritta, attribuendola al genere *Diacria*, una nuova specie di pteropodo, raccolta nelle marne della formazione marnoso-arenacea del camerinese, del Miocene medio.

**Scotti P.** - Briozoi fossili del miocene della Collina di Torino (collezione Rovasenda) [*Bryozoa fossilia aetatis miocenicae collinae Taurinensis* (*collectio* Rovasenda)]. 2 tav., Atti R. Acc. Sc. di Torino, LXXI, 3, 402-431. Torino (1936).
**b - 1447**

L'A. illustra una numerosa raccolta di Briozoi fossili estendendo, con opportuni confronti, le conoscenze geologiche intorno al classico giacimento piemontese. Rinvenimento e descrizione di una nuova forma, la *Idmonea cancellata* (Goldfuss), var. *distans*, n. var.

**Semichatov S. V.** - Upper and Lower Boundary of the Middle Carboniferous Moscovian Stage [*Limes inferior et limes superior quoad stratum centrale carboniferum apud Moscuam*]. Amer. Journ. Sc., XXXII, 189, 222-233. New Haven, Conn. (1936).
**b - 1448**

Recent examinations of fossil fauna have proved that there are a break at the top of this stage and a sharp change in the brachiopod fauna. This fauna point to an Upper Carboniferous age for the *Tegulifera* and *Omphalotrochus* horizons.

**Serra G.** - Descrizione di alcuni Echinidi dei giacimenti fosfatici della Tripolitania [*Describuntur Echinoidea ad phosphatica deposita Tripo-*

*litaniae pertinentia*]. 1 tav. f. t., Boll. Soc. Geol. It., LIV, 1, 121-126. Roma (1935). **b - 1449**

Degli Echinidi raccolti uno solo è nuovo, cioè *Botriopygus Vinassai* mentre gli altri sono stati già descritti per i giacimenti maestrichtiani della Tripolitania. Viene inoltre illustrato un caso teratologico presentato da un individuo di *Clypeopygus pseudominimus*.

**Serra G.** - Di alcuni echinidi del Pliocene di Matera (Lucania) [*Echinoidea aetatis Pliocenicae Materae (in Lucania)*]. Boll. Soc. Geol. It., LIV, 2, 220-222. Roma (1935). **b - 1450**

Viene studiato il materiale echinologico del Pliocene dei dintorni di Matera. Tra le specie determinate merita di essere segnalata, per la sua rarità nei depositi pliocenici italiani, lo *Schizechinus serialis*.

**Serra G.** - Di un nuovo pettine del Pliocene di Anzio [*Pecten quiddam novum ad aetatem Pliocenicam Antii pertinens*]. Boll. Soc. Geol. It., LIV, 2, 249-252. Roma (1935). **b - 1451**

Viene descritto un nuovo pettine (*Aequipecten romanus*) delle marne azzurre plioceniche affioranti a Tor Caldara presso Anzio e messo in rapporto specialmente con l'*Aequipecten histrix* dello stesso giacimento.

**Serra G.** - Di alcuni lamellibranchi del Maestrichtiano della Tripolitania [*Lamellibranchiata aetatis Maestrichtianae Tripolitaniae*]. 1 tav., Riv. It. Paleontol., XLI, 3/4, 75-83. Pavia (1935). **b - 1452**

Le specie descritte sono: *Crassatella Wanneri* Pervinquière, *Cardium Millosevichi* n. sp., *Lucina Checchiai* n. sp. e *Corbula harpa* d'Archiac et Haime.

**Shimizu S. & Obata T.** - New Genera of Gotlandian and Ordovician Nautiloids [*Nautiloidea Gotlandica et Ordoviciana. Genera nova*]. (In Engl.). Journ. Shanghai Sc. Inst., Sect. II, 11, 1-10. Shanghai (1935). **b - 1453**

A number of new genera and families are established, listed and partially described.

**Shimizu S. & Obata T.** - On a New Ordovician Nautiloid Genus *Sinoceras* [« *Sinoceras* » *genus novum Ordovicianum ex Nautiloideis*]. Proc. Imp. Acad., XI, 8, 324-325. Tokyo (1935). **b - 1454**

The A. reproduces the redescription of the genus *Orthoceras* made by Troedsson in 1931, on hand of which he shows that there are two important characteristics distinguishing *O. chinense* from the other species of the genus, and proposes to consider it as the genotype of a new genus *Sinoceras* n. g.

**Silvestri A.** - Sulla validità del genere *Fusulina* Fischer [*De validitate generis « Fusulina »*]. Boll. Soc. Geol. Ital., LIV, 2, 203-219. Roma (1935). **b - 1455**

In contrasto con gli scienziati americani Lee, Dunbar, Henbest e Skinner, che hanno negato la validità del genere *Fusulina* Fischer, l'A. la conferma pienamente, mediante le antiche osservazioni sui topotipi del Möller, del Carpenter e del Brady, e le moderne sue ricerche, documentate con microfotografie originali.

**Sladkevitch V. S.** - Faune de mollusques des formations du Pléïstocène du littoral du Golfe de Laurent (Péninsule de Tchoukhotsk) [*Fauna molluscorum in formationibus pleistocenicis litorum Sinus* Laurent (*in Paeninsula* Tchoukhotsk)]. (En russe). Troudy Leningr. Obstsch. Estestvop. (Trav. Soc. Natur. Léningr.), LXIV, 1, 112-121. Leningrad-Moskva (1935). **b - 1456**

**Sos V.** - Existencia del Cenomanense en las proximidades de Castellón [*De exsistentia Cenomanensis apud* Castellón]. 2 Lam., Bol. Soc. Españ. Hist. Natur., XXXV, 10, 507-512. Madrid (1936). **b - 1457**

Algunas indicaciones sobre los fósiles de las capas fosilíferas de Cretácico cenomanense: *Orbitolina aperta*, *Hemiaster verneuili*, *Micraster*, *Ostrea flabellata*.

**Spencer Henson F. R.** - Les grands foraminifères de l'Oligocène de Palestine [*Foraminifera maiora aetatis oligocenicae Palaestinae*]. 1 tabl., C. R. Acad. Sc., CCII, 10, 861-863. Paris (1936). **b - 1458**

L'A. donne une liste des grands Foraminifères des diverses formations de la Palestine, de la Syrie et de la Turquie, établit une comparaison entre les formes observées et tire des conclusions concernant les grands foraminifères de Ramleh-Koubeibeh (Palestine) qui ont été attribués à l'Oligocène, en les attribuant provisoirement à l'Aquitanien.

**Stefanoff A.** - Die Fauna aus der Trias von Golo-Bârdo in S. W. Bulgarien [*De fauna aetatis triassicae in* Golo-Bârdo *in Bulgaria sud-occidentali*]. (In Bulg., Dtsch. Rés.). 4 Taf. a. T., Mitteil. Kgl. Naturw. Inst., IX, 147-162. Sofia (1936). **b - 1459**

Beschreibung von 28 Arten mit Synonymen, Vergleich mit der Trias-Fauna der Nord- und Südalpen, Bakony in Ungarn, Bosnien, Dalmatien, Albanien, Serbien, Griechenland, Dobrudscha und Klein-Asien.

**Størmer L.** - *Dictyocaris* Salter a large Crustacean from the upper Silurian and Downtonian [«*Dictyocaris*» *crustaceus pergrandis in Stratis Silurianis superioribus et in stratis Downtonianis*]. 4 figs., 3 pls., Norsk Geol. Tidsskr., XV, 267-298. Oslo (1935). **b - 1460**

Redescription of some earlier collections and study on some recent funds, principally in Scotland and Norway, with a view to elucidate the zoological position of *Dictyocaris* and the stratigraphical range of the different species and their value as guide fossils. *Dictyocaris salteri* n. sp.

**Tappenbeck D.** - Ueber tertiäre Foraminiferengesteine von Sipoera (Mentawei-Inseln) [*De formationibus fossilibus Foraminiferorum (Aetate tertiaria) in* Sipoera]. Proc. Kon. Akad. Wet., 39, 661-670. Amsterdam (1936). **b - 1461**

**Teichert C. & Miller A. K.** - What is *Orthoceras* ? [*Quid genus Orthoceras ?*]. Amer. Journ. Sc., XXI, Ser. 5, 185, 352-362. New Haven, Conn. (1936). **b - 1462**

The Genus *Orthoceras* is to be ascribed to Bruguière, and *Hippurites bioculata* Lamarck, a pelecypod, should be regarded as the genotype. *Orthoceras* should be ascribed to Modeer, and its genotype is probably a foraminifer. *Orthoceratites* should be ascribed to Gmelin, and its genotype is a poorly known Devonian cephalopod. The name *Orthoceras* should be used to refer to pelecypods only, but the term *Orthoceras* can be used for straight cephalopods. *Orthoceratites regularis* Schlotheim (which has been regarded as the genotype of *Orthoceras*) can be used as the genotype of *Orthoceras* (A. A. abstr.).

**Thalman H. E.** - Mitteilungen über Foraminiferen. II. [*Communicationes de Foraminiferis. II*]. Eclog. Geol. Helvetiae, XXVIII, 2, 592-606. Basel (1935–1936). **b - 1463**

Stratigraphisches Verzeichnis der bedeutendsten eozänen, oligozänen und miozänen Foraminiferen vom Isthmus von Tehuantepec sowie der Foraminiferen von

verschiedenen miozänen Ablagerungen in Tuxpan, Vera Cruz, Mexico, von denen *Operculina tuxpanensis* und *Rotalia indopacifica* (*R. schroeteriana* Parker & Jones 1862) neu sind.

**Tomor-Thirring J.** - Paläontologische Neuigkeiten aus dem Bakony-Gebirge [*Res novae palaeontologicae ad montes* Bakony *pertinentes*]. 2 Taf., 15 Abb., Földtany Közlöni (Geol. Mitt.), LXVI, 1/3, 51-68. Budapest (1936). **b - 1464**

Eine der hier erwähnten Schichten umfasst die Gesteine des transgredierenden eozänen Meeres. Etwa zehn neue Arten, meistens marine, aus den verschiedenen Schichten sind beschrieben.

**Twenhofel W. H. & Shrock R. R.** - Invertebrate Paleontology [*Palaeontologia Invertebratorum*]. 175 figs., 511 pp., Mc Graw-Hill Publ. Co. Ltd. London (1935). **b - 1465**

*Protozoa. Porifera. Coelenterata. Vermes. Echinodermata. Bryozoa. Brachiopoda. Mollusca. Arthropoda.*

**Van Straelen V.** - Sur des Crustacés décapodes triasiques du Nevada [*De Crustaceis decapodis aetatis triassicae regionis* Nevada]. 2 fig., Bull. Mus. R. Hist. Natur. Belgique, XII, 29, 1-7. Bruxelles (1936). **b - 1466**

*Platypleon nevadensis* n. gen., n. sp., et *Triasiglyphea Mulleri* n. gen., n. sp., recueillis dans des couches marines d'âge triasique.

**Vassoevitsch N. B.** - Remarques sur la propagation des *Radiolaria* et de Spicules des silicisponges dans les terrains sénoniens et lutétiens au Caucase [*« Radiolaria » et Spiculae silicispongiae. Quaestio de eorum propagatione in terrena Senoniana et Lutetiana Caucasica*]. Boll. Acad. Sc. URSS, Cl. Sc. Mathém & Natur., 5, 696-704. Léningrad (1935). **b - 1467**

Nouveaux exemples de l'appartenance à des horizons stratigraphiques déterminés des Radiolaires et des spicules des éponges siliceuses lorsqu'elles se trouvent liées aux sédiments sénoniens et lutétiens de quelques régions du Caucase.

**Vaughan Wayland T. & Cole Storrs W.** - New Tertiary *Foraminifera* of the Genera *Operculina* and *Operculinoides* from North America and the West Indies [*Foraminifera aetatis tertiariae ad genus « Operculina » et « Operculinoides » pertinentia in America septentrionali et Indiis Occidentalibus reperta*]. 4 pls., Proc. U. S. Nat. Mus., Smith. Inst., LXXIII, 2996, 487-496. Washington (1936). **b - 1468**

Seven new species are described: *Operculina tuberculata, Operculinoides advenus, O. vicksburgensis, O. semmesi, O. antiguensis, O. forresti* and *O. tuxpanicus*.

**Vokes H. E.** - The genus *Velates* in the Eocene of California [*Genus « Velates » in Eocene californiensi*]. 2 pls. Univ. of Calif. Publ., Bull. Dpt. Geol. Sc., XXIII, 12, 381-390. Berkeley, Ca. (1935). **b - 1469**

The Genus is exclusively Tethyan in its distribution in the Old World. Description of *Velates perversus* Gmelin, and *V. Californicus* n. sp.

**Whitehouse F. W.** - The Cambrian Faunas of North-Eastern Australia. Part 1. Stratigraphical Outline. Part 2. *Trilobita* (*Miomera*) [*De fauna cambriana Australiae nordoccidentalis. Inspectio stratigraphica. Trilobita*]. 4 figs., 3 pls., Mem. Queensl. Mus., XI, 1, 59-112. Queensland (1936). **b - 1470**

Part I: Stratigraphical outline: Explanation; Previous records on Cambrian faunas; Stratigraphical details; On the use of the term Cambrian; Notes on the faunal stages, Part II: Palaeontology: Description of the subclass *Trilobita* Walch, containing the diagnosis of the following new forms: *Solenagnostus* g. n., *Euagnostus* g. n., *Diplorrhina normata* sp. n., *Enetagnostus* g. n., *Cotalagnostus* g. n., *Phoidagnostus* g. n., *Phalacroma* (?) *dubium* sp. n., *Lejopyge exilis* sp. n., *Pseudagnostidae* fam. n., *Glyptagnostidae* fam. n., *Hypagnostus vortex* sp. n., *Aspidagnostus* g. n.

**Wickwire G. T.** - Crinoid Stems on fossil Wood [*Crinoidea. Quaestio de eorum cirris in ligno fossili*]. 1 fig., Amer. Journ. Sc., Ser. 5, XXXII, 188, 145-146. New Haven, Conn. (1936). **b - 1471**

These specimens have been found near Lexington, Indiana, as float above weathered New Albany shale.

**Woodward Smith A.** - On *Tomognathus*, a Teleostean Fish from the English Chalk [*« Tomognathus » piscis teleosteus a formatione Cretacea Anglica proveniens*]. 1 pl., Ann. & Mag. Natur. Hist., XVII, 98, 304-306. London (1936). **b - 1472**

New observations of *Tomognathus mordax*; comparison with the genera of *Stomiatidae*.

**Yabe H. & Eguchi M.** - *Eohydnophora*, a New Genus of Cretaceous Corals [*« Eohydnophora » genus novum Coralliorum aetatis Cretaceae*]. 3 figs., Proc. Imp. Acad., XII, 5, 141-143. Tokyo (1936). **b - 1473**

Description of *Eohydnophora tosaensis* sp. nov. embedded in a characteristic limestone of the Lower Cretaceous from Okuminodani, Tosa province.

**Yabe H. & Sugiyama T.** - Notes on a Fossil Shark's Tooth Found in the Daitô Limestone of Kita-Daitô-Zima, Borodino Islands. [*Notae de dente ad squalum fossilem pertinenti in calcare reperto Insularum* Borodino]. 4 figs., Proc. Imp. Acad., XI, 4, 149-151. Tokyo (1935). **b - 1474**

Report on an unexpected discovery of a large shark's tooth from the Daitô limestone, which may perhaps be included in the well known, almost cosmopolitan species, *Carcharodon megalodon* Agassiz, but which author more safely ascribes to a local new subspecies, *C. megalodon yamanarii* n. subsp.

**Zuffardi-Comerci R.** - Corallari neogenici del Sahel eritreo [*Corallaria neogenica ad regionem Erythraeam* Sahel *pertinentia*]. 1 tav. f. t., Atti R. Acc. Sc. Torino, LXXI, 2, 205-219. Torino (1936). **b - 1475**

La determinazione delle specie di Corallari fossili del Sahel eritreo rivela la presenza di livelli non ancora conosciuti nella regione; rapporti intercorrenti fra i depositi marini contemporanei dell'Africa Orientale, la Corallofauna studiata, le coeve mediterranee e indoasiatiche, nonchè la ricca Corallofauna vivente nel Mar Rosso. La presenza del Pliocene nelle Colline del Sahel e descrizione di 2 nuove specie di Corallari.

# PHYLOGENIA

**Chabanaud P.** - Le neurocrane osseux des Téléostéens dyssymétriques après la métamorphose [*De neurocranio osseo in Teleosteis dissymetricis post metamorphosim*]. 112 figs., Ann. Inst. Océanogr., n. sér., XVI, 3, 227-297. Paris (1936). **b - 1476**

État actuel de la classification des Téléostéens dyssymétriques et des connaissances sur les stades larvaires et sur la métamorphose. Caractères du neurocrâne des *Percoidea* des *Psettodoidea*, des *Pleuronectoidea* et comparaison des neurocrânes des formes étudiées. Considérations systématiques et phylogénétiques. L'A. partage l'hypothèse de Kyle « dérivation successive, dans le temps, des principaux groupes dyssymétriques, à partir d'un phylum en voie d'évolution vers le type *Epinephelus* actuel ».

**Cuenot L.** - L'espèce [*De specie*]. 42 figs,, VI + 310. Encycl. Scient. Doin & C. Paris (1936). **b - 1477**

Histoire de la notion d'espèce. La constitution intime de l'espèce: La méiose, l'hérédité et la variation, les chromosomes, la sélection écologique des préadaptés. Les unités de la systématique: la lignée pure, la sous-espèce et le cercle de races, la terminologie des ichtyologistes russes, les mutations de Waagen. Monographie d'espèces: les Palaemonetes, les Cérithes, etc. La naissance des espèces: la variation polyploïdique, numérique des chromosomes, morphologique, chimique et physiologique. Nomenclature et glossaire.

**Fedotov D. M.** - Morphologische Gesetzmässigkeiten der Evolution in Anwendung auf die Wirbellosen [*Regularitates morphologicae in evolutione Invertebratorum*]. (In Russ., Dtsch. Rés.). Bull. Acad. Sc. URSS, Cl. sc. mathém. & natur., Sér. 5, 1015-1031. Moscou (1936). **b - 1478**

Vortrag gehalten am 22. April 1936 bei der Sitzung der biologischen Gruppe der Akademie d. Wissenschaften. Der Redner weist auf gewisse Uebereinstimmungen zwischen Wirbeltieren und Wirbellosen in Bezug auf grundlegende morphologische Gesetzmässigkeiten des Evolutionsprozesses hin. Die bei der Erforschung sich darbietenden Vorzüge der Wirbellosen, wodurch die Morphologie und Formenverwandtschaft leichter verständlicht werden. Beispiele: die Substitution der sekundären Leibeshöhle bei den Ophiuren, die Homologie der Cölome bei den Echinodermaten, usw.

**Kobayashi T.** - Classification of Primitive Cephalopods [*Cephalopoda Primigenia. Quaestio de distributione in classes*]. (In Jap.). 8 figs., 3 tabl., Chikyu, the Globe, XXV, 11-27; 85-105; 180-192; 271-281; 331-353. (?) (1936). **b - 1479**

Introduction to the classification of primitive Nautiloids for the beginner. 25 chapters are included concerning classification, evolution, mode of life, shell structure, formation of the septum and the connecting ring, the orthoceroid, rosetti and septal neck etc. Phylogeny.

**Kühn O.** - Die Gattung *Pironaea* Menegh. [*Genus « Pironaea »*]. 6 Abb., Ztrbl. Mineral. Geol. u. Paläontol., Abb. B, 9, 353-368. Stuttgart (1935). **b - 1480**

Erörterung der rudisten Pelecypoden; Diagnose der Gattung, ihre Entwicklung. Die Entwicklung von *Barrettia*, *Pironaea* stammt von *Vaccinites* her und *Barrettia* von *Pironaea*.

**Labbé A.** - La phylogénie possible des Silicodermes [*De possibili phylogenia Silicodermatum*]. Mém. Mus. R. Hist. Natur. Belgique, Sér., 2, 3. 15-21. Bruxelles (1936). **b - 1481**

Les silicodermes constituent un ordre particulier des Mollusques pour leurs caractères morphologiques et pour la fonction siligène; ils n'ont aucun rapport avec les Pulmonés auxquels des auteurs les avaient incorporés mais ils ont des points communs avec les Opisthobranches. Indications très intéressantes sur ce groupe fournies par l'étude de la distribution géographique et en particulier par la répartition du genre *Oncidiella* sur les côtes américaines et la côte Ouest de l'Europe et de l'Afrique.

**Lameere A.** - Histoire de la classification des Mollusques [*Historia distributionis in classes Molluscorum*]. Mém. Mus. R. Hist. Natur,. Belgique, Sér. 2, 3, 1-12. Bruxelles (1936). **b - 1482**

La « classification » est le résumé de la phylogénie des êtres vivants. Origine des Mollusques considerés par Haeckel dérivés des Plathelminthes, rapportés par Pelseneer aux Polychètes errantes, par Rauther aux Gordiacés: le débat est dominé par le problème du Coelome. Les Amphineures, les Gastéropodes, les Scaphopodes, les Bivalves et les Céphalopodes représentent les cinq classes reconnues par tous les zoologistes.

**Lang W. D. & Smith S.** - Ludwig's « Corallen aus Paläolithischen Formationen » and the Genotype of *Disphyllum* de Fromentel [« *Corallia ad formationes palaeolithicas pertinentia* » *liber a* Ludwig *confectus et genotypus* « *Disphyllum* » de Fromentel]. Ann. & Mag. Natur. Hist., XIII, 73, 78-81. London (1934). **b - 1483**

Emendations of nomenclature, suppression of 56 genera proposed by Ludwig in his work.

**Matveyev B. S.** - Concerning the Divergence of Signs in Ontogenesis [*De ontogenesi. Divortio in testis*]. Works Arnoldi Biol. Stat., II, 1, 149-155. Novorossiysk (1936). **b - 1484**

New signs arise on different stages of development of an organism. In cases when new systematical signs arise by way of anabolia the development of systematical signs is subjected to the law of K. Baer. On every stage of development evolutionary adaptive signs arise which are necessary to the organism only in a certain short period of life.

Examples cited on *Gobius*, *Pleuronectes flesus*, *Bothus maeoticus*, *Engraulis*, *Scorpaena*, *Ctenolabrus*, *Solea* and others. (From A:s rés.).

**Naef A.** - Kurze Mitteilungen zur Entwicklung von Acraniern und Selachiern [*Communicatio brevior de accretione Acraniorum et Selachiorum*]. Verhandl. Schweiz. Naturforsch. Ges., 117. Jahresversammi. im August 1936 in Solothurn, 329-330. Kommissionsverlag H. R. Sauerländer & Cie. Aarau (1936). **b - 1485**

Kurze Serie von Uebersichtsbildern bis zum Abschluss der Metamorphose: Bildung des Vornierengangs der Selachier und des Müllerschen Gangs; der Mund der Wirbeltiere, die Amphioxusmundhöhle, die Bildung des Mundes und der Kolbendrüse.

**Romer A. S.** - The Dipnoan Cranial Roof [*De fornice craniali in Dipnoideis*]. 4 figs., Amer., Journ. Sc., XXXII, 190, 241-256. New Haven, Conn. (1936). **b - 1486**

Attempt to a phylogenetic history under consideration of possible homologies of the dipnoan skull pattern with the skull bones of Amphibians and Crossopterygians.

**Schindewolf O. H.** - Zur Stammesgeschichte der Cephalopoden [*De phylogenia in Cephalodis*]. 4 Taf., 7 Abb., Jahrb. Preuss. Geol. Landesanst., LV, 1, 258-283. Berlin (1934). **b - 1487**

Erörterung der Entwicklungsgeschichte; Aenderung früherer Annahmen: *Valbortella* ist ein primitives Cephalopod nicht verwandt mit *Salterella*; *Bactrites* ist ein Ammonoid und kein Nautiloid; *Lobobactrites*, *Gyroceratites* und die ältesten Goniatiter sind aus rechtlinigen in wenig zusammengerollte und dann in stark zusammengerollte Formen entwickelt worden, wie man aus dieser Kette sehen kann: *Bactrites*, *Lobobactrites*, *Gyroceratites*, *Mimagoniatites*, *Agoniatites*, *Anarcestes*, *Werneroceras* und der neuen Gattung *Anetoceras* n. gen. Der Ursprung dieser Linie ist in den orthochoanitischen Nautiloiden zu suchen. Entwicklung und Lage des Siphos bei den Goniatiten und gewissen Permischen und Mesozoischen Ammoniten. Nur die Ammoniten, welche ursprünglich den Sipho nicht auf den Rücken hatten, stammen von den Goniatiten her.

**Selys (de) Longchamps M.** - A propos de la torsion de la queue chez les urochordes [*De caudae torsione in Urochordibus*]. Mém. Mus. R. Hist. Natur. Belgique, Sér. 2, 3, 401-405. Bruxelles (1936). **b - 1488**

Si la torsion de la queue, chez les Appendiculaires et chez les têtards d'Ascidies, ne s'explique que par des raisons ataviques, les larves d'Ascidies, qui ont la queue tordue, seraient les plus primitives et l'absence de torsion serait un caractère secondaire.

**Straelen (van) V.** - L'Ancienneté et la régression du genre *Homarus* [*De antiquitate et regressione generis* « *Homarus* »]. Mém. Mus. R. Hist. Natur. Belgique, Sér. 2, 3, 469-479. Bruxelles (1936). **b - 1489**

L'A. démontre l'identité du genre *Hoploparia* avec le genre *Homarus*. Ancienneté du *Homarus* qui a eu son apogée au cours de l'ère mésozoïque; les espèces cénozoiques sont en un très petit nombre et cette régression a continué: aujourd'hui la tribu des *Nephropsidea* compte seulement trois familles: *Nephropsidae*, *Astacidae*, *Parastacidae*.

**Stubblefield C. J.** - Cephalic Sutures and their Bearing on Current Classifications of Trilobites [*Suturae cephalicae earumque momentum pro hodiernis classationibus circa Trilobita*]. 9 figs., Biol. Rev., XI, 4, 407-440. London (1936). **b - 1490**

Definition of the cephalic sutures, their distribution, interrelationships and function. Classification: erection of three orders. Discussion on *Mesonacidae*, *Proparia* and *Opisthoparia*. Addendum: Remarks on two newly appeared works of Kobayashi. Bibl.

**Vasnetsov V. V.** - Pyti filogeneticheskich issledovanii kastistych ryb [*De instituendis investigationibus phylogeneticis in Teleostea*]. (In Russ., Dtsch. Rés.). 4 fig., Bull. Acad. Sc. URSS, Cl. sc. mathém. & natur., sér. biol., 5, 999-1014. Moscou (1936). **b - 1491**

Breve rivista storica delle principali ricerche filogenetiche con riguardo speciale ai pesci teleostei. Dopo un breve sguardo sulle ricerche filogenetiche sull'unità sistematica dei pesci teleostei l'A. espone i lavori eseguiti dall'Istituto Russo sulla morfologia evoluzionaria e paleozoologica allo scopo di chiarire il problema della filogenesi dei Teleostei. L'articolo dimostra l'importanza delle ricerche filogenetiche per una migliore comprensione della ecologia delle specie di valore industriale.

**White E. G.** - A Classification and Phylogeny of the Elasmobranch Fishes [*Distributio in classes et phylogenia in Piscibus Elasmobranchiis*]. Amer. Mus. Nov., 837, 1-16. New York (1936). **b - 1492**

Author bases the distinction between genera and species principally on external characters and the distinction between larger groups on internal structures.

Key to the order *Galea*. Classification. Orders of the *Antacea*. The Phylogeny of the Elasmobranchs.

## GENERALIA

### *Institutiones. Stationes. Laboratoria. Relationes annuae et activitas.*

**Allen E. W.** - The Pacific Halibut Commission. Its legal Powers and Function. – Canad. Fisherm., XVIII, 11, 79-80. Gardenvale, Que. (1936). **b - 1493**

The real name of this commission is « The International Fisheries Commission ». Foundation.

**Carter N. M.** - Report of the Pacific Fisheries Experimental Station Prince Rupert, B. C. for 1935. – Ann. Rep. Biol. Bd Canada 1935, Appendix IV, 37-46. Ottawa (1936). **b - 1494**

Technological aspects of fisheries research. Uses of fish oils in manufacturing, for feeding and medicinal researches. Bacteriology: handling of fish (refrigeration, storage, canning etc.). Sea water temperature. Miscellaneous. Co-operation with industries. Education and public relations.

**Finn D. B.** - Report of the Atlantic Fisheries Experimental Station Halifax, N. S. for 1935. – Ann. Rep. Biol. Bd Canada 1935, Appendix II, 17-24. Ottawa (1936). **b - 1495**

Investigations on fresh fish: cod and haddock, scallops. Smoked fish. Canning. Salt fish. By-products. Miscellaneous. Educational activities, services and publications.

**Järvi T. H.** - Fiskeriföreningens i Finland verksamhet år 1935. (In Sved.). – Fiskeritidskr. f. Finl., XLIII, 4, 1–11. Helsinki (1936). **b - 1496**

Resoconto generale. Sedute e Soci, direzione, funzionari. Istruzione: preparazione, conferenze ed esposizioni. Propaganda. Pesca. Pubblicazioni, ecc.

**Leim A. H.** - Report of the Atlantic Biological Station St. Andrews, N. B. for 1935. – Ann. Rep. Biol. Bd Canada 1935; Appendix I, 7-16. Ottawa (1936). **b - 1497**

Biological problems concerning the conservation and development of the fisheries of the Canadian maritime provinces. Hatching and rearing of trout and salmon. Investigations on cod, haddock, herring, oyster, scallop, lobster; hydrographic and miscellaneous investigations. · General activities and publications.

**Lücke J. B.** - Das Institut für Seefischerei in Wesermünde. – Dtsch. Fischwirt., III, 43, 707-709. Berlin (1936). **b - 1498**

Geschichte: Gründung, Aufgaben, Arbeitsmethoden; Verarbeitung der Hering, der wichtigsten Rohware; Versuche mit Konservierungsmitteln, sterile Fischzubereitungen; Expeditionen und fischereibiologische Untersuchungen; wissenschaftliche und technische Einrichtungen des Instituts. Zusammenarbeit mit anderen Forschungsinstituten.

**Osadtchikh M. P.** - Institut Polaire de l'Economie de la Pêche Maritime et d'Océanographie « N. N. Knipovitch » à Mourmansk. (En russe). – 3 fig., Naouka i Zhiznj, 7, 46-47. Moskva (1935). **b - 1499**

**Sundara Raj B.** - Administration Report for the Year 1934-35. – 76 pp., Madras Fish. Dpt. Madras (1936). **b - 1500**

Part I. Marine Fisheries: Scientific and technological research. Administration. II. Minor marine and estuarine fisheries: Prawns, edible oysters. III. Inland Fisheries. IV. Crown monopolies (pearl and chank fisheries). V. Biological specimens supply. VI. Anti-malarial work. VII. Socio-economic work: schools, marine aquarium etc. VIII. Propaganda. IX. Fishery legislation. X. Publications. Part II. Finance. Part III. Staff and equipment.

**Thompson H.** - General Report. – Rep. Newfoundl. Fish. Res. Lab., Div. Fish. Res., Dpt. Natur. Resources, Newfoundland, II, 5, 1-31. Cardiff (1936). **b - 1501**

This report concludes the first phase of the fifth year of work. The fishery resources of Newfoundland. The deep sea fishery: schooners and trawlers, experiments by British trawlers, training ships, importance of regular supplies and of utilising haddock. Other deep sea species of fish. Suspension of deep-sea investigations. The inshore fishery: increase of controls requisite in the codfishery. Other inshore species. Salmon. Herring. Lobsters. Caplin. Smelts. Squid. Shell–Fish. Seaweeds. Hydrographic factors. The utilisation of the fishery resources. Education.

**Canadian Fisheries Association** - Memorandum Presented to Minister of Fisheries. – Canad. Fisherm., XXIII, 1, 9-12. Gardenvale, Que. (1936). **b - 1502**

Full text of the memorandum presented by the Canadian Fisheries Association suggesting improvements in the markets for Canadian, fish and the condition of fishermen with special regard to markets wanted, educational campaign, exports, markets and trade.

**Confederazione Fascista dei Lavoratori dell'agricoltura** - Corporazione della Zootecnia e della Pesca. – Conf. Fasc. Lav. Agric., 11-82. Roma (1936). **b - 1503**

Accennato ad alcune direttive di azione nella disciplina della produzione e della utilizzazione dei prodotti zootecnici e dei loro derivati, vengono esaminati i problemi della previdenza e assistenza a favore dei pescatori, della disciplina dei mercati all'ingrosso del pesce. Seguono le mozioni della Corporazione deliberate in seguito all'esame dei singoli problemi.

**Department of Fisheries (Japan)** - Annual Report for 1934-35. Saghalien Central Experiment Station. (In Jap.). – 60 pp., Konuma, Saghalien, Jap. (1936). **b - 1504**

**Fishery Advisory Committee** - Reports. – Fish. Gaz., LIII, 4, 14 & 23. New York (1936). **b - 1505**

Report on the exceptional record production of certain important canned fish in 1935, the canned salmon curtailment, the necessity of conservation measures, legislation concerning the stabilization, the material assistance and the conservation of the fishery of the United States.

**Fishery Board for Scotland** - Fifty-Fourth Annual Report for the Year 1935. – Tables, graphs., Fish. Scotl., 6-83. Edinburgh (1936). **b - 1506**

Means of capture and persons engaged; the herring fishery, and other fisheries. Miscellaneous. Marine Superintendence. Harbours. Scientific investigations. Salmon fisheries. Appendices: Harbour improvement schemes. Return of assistance granted to various harbours. Annual grant for harbour works. Salmon fishery close times. Staff.

**Fishery Research Laboratory Newfoundland** - Annual Report 1935. – 19 figs., 19 charts. Rep. Newfoundland Fish. Res. Lab. 1935, Div. Fish. Res., Dpt. Natur. Resources, Newfoundland, II, 5, 1-95. Cardiff (1936). **b - 1507**

I. General report. II. Hydrographic and biological investigations: Hydrographic conditions in 1935; Plankton, Haddock and Salmon investigations; the relative productivity of fishing - grounds; relationship between catch of cod and water temperature; sizes of cod and distribution of age- classes in 1935; racial groups of cod; cod- tagging experiments. III. Notes on technical investigations. Appendices. Log of «Cape Agulhas» operations; hydrographic data; Newfoundland Lobster investigations; a further species of Grant squid.

**Imperial Fisheries Experimental Station** - Semi-annual Report (January-June 1936). (In Jap.). – Tables, 205 pp. Imp. Fish. Exper. Stat., Rep. No. 58. Tokyo (1936). **b - 1508**

Synopsis of the hydrographical investigations, sectional observations, coastal observations; regular off-shore observation; current measurements; résumé of fisheries; records of highsea and shore fisheries; marked fish; plankton.

**Inspector of Eastern Sea-Fisheries** - Inspector's Report for the Year: Shrimps, Crabs, Lobsters, Whelks, Winkles, Cockles, Mussels. – Fish. Trad. Gaz., LIV, 2761, 23. London (1936). **b - 1509**

**Marine Department, Wellington N. Z.** - Report on Fisheries for the Year ended 31 st March, 1936. – Mar. Dpt. Wellington, N. Z. (1936). **b - 1510**

**Ministry of Agriculture and Fisheries** - Fisheries-England and Wales. Salmon and Freshwater Fisheries Report for the Year 1935. – Pls., tabl., figs., H. M. Stat. Off., 4-41. London (1936). **b - 1511**

General. The season of 1935. Administration. Miscellaneous: Salmon received at Billingsgate. Prices of Salmon, Imports and exports, sealing. 7 Appendices.

**Roinn Talmhaiochta Brainse Iascaigh** (Department of Agriculture, Fisheries Branch). - Report on the Sea and Inland Fisheries for the Year 1934. – 3 figs., 17 tabl., Stat. Off., 34 pp. Dublin (1935). **b - 1512**

Sea fisheries and Inland fisheries. Statistical tables and graphs showing the quantity und value of fish landed, the fish prices, import and export of fish with special regard to the mackerel and herring fisheries, the fishing boats, the trawling, the licences issued, the output of salmon and trout fry, etc.

**Roinn Talmhaiochta, Brainse Iascaigh** (Department of Agriculture, Fisheries Branch). - Report of the Minister for Agriculture on the Sea and Inland Fisheries for the Year 1935. – Rep. Sea a. Inl. Fish. 1935, 1-32. Dublin (1936). **b - 1513**

Sea fisheries (1-9): Demersal fishery. Pelagic fishery: Herrings, mackerel. Shellfish. Landings by outside boats. Imports and exports. Fishery loans. Sea Fisheries Association of Saorstat Eireann, limited. Fishery patrol service. Minor marine works and dredging. Scientific and technical investigations. Appendices.

**Saghalien Central Experiment Station** - Annual Report for 1934-1935. (In Jap.). - Department of Fish., 60 pp. Konuma, Jap. (1936). **b - 1514**

**Secretary of Commerce** - Annual Report for 1935. Bureau of Fisheries. – Dpt. Comm., Bur. Fish., 87-111. Washington D. C. (1935). **b - 1515**

Outlook on the fishing industry of the United States Fishery Advisory Committee. Effectuating a better relation ship between commercial and sport fishermen. Cooperation with states, educational institutions and other federal agencies. Conservation of whales. Biological fishery investigations. Alaska Fisheries Service and Fur-Seal Service. Propagation and distribution of food and game fishes. Aquarium. Marketing. Statistical and technological investigations. Black bass, and anglers division. Vessels. Appropriations.

**J.** - Das Fischereimuseum in Wesermünde eine eindrucksvolle Lehrschau über die Seefischwirtschaft. – Dtsch. Fischwirt., III, 43, 720. Berlin (1936). **b - 1516**

Das Museum enthält eine grosse Modellsammlung über Fischfang, Fischhandel, Fischindustrie und Hafenbau; Kartographische Darstellungen der Fangplätze mit ihren Erträgen, Statistiken über die wirtschaftliche Bedeutung der Seefischerei und eine biologische Sammlung. (Vf.)

**J.** - Das Nordsee-Aquarium in Bremerhaven zeigt die Seefische lebend in naturwahrer Umwelt. – Dtsch. Fischwirt., III, 43, 720-721. Berlin (1936). **b - 1517**

Beschreibung des seit 1913 bestehenden Aquariums, das neben dem von Helgoland das grösste seiner Art ist.

**An.** - The Chekiang Provincial Fisheries Experiment Station, Tinghai, Chekiang, China. (In Engl. & Chin.). – Chek. Prov. Fish. Exp. Stat., Spec. Publ. 1, 1-11. Tinghai, Chekiang, China (1936). **b - 1518**

Location of the Station. Its history. Organization and staff. Building and equipment. Finance. Activities. Publications.

**An.** - Aus dem Jahresbericht des Propagandaausschusses des staatlichen Fischereihafens Wesermünde-Bremerhaven Seefischmarkt A.-G. – 1 Tab.,

Dtsch. Fisch.-Rundschau, 14, 316-319. Bremerhaven (1936). **b - 1519**

Kurzer Bericht über die Tätigkeit der Propagandastelle des Fischereihafens Wesermünde-Bremerhaven während eines Zwischengeschäftsjahres vom 1. April bis 31. Dezember 1935.

**An.** - President's Annual Report Oyster Growers' and Dealers' Association at Annual Convention. – Fish & Oyst. Rep., XVII, 6, 3 & 11. Tampa, Fla. (1936). **b - 1520**

Brief account of the activity and progress of the Association during the year 1935.

**An.** - Port Erin Biological Station. – Fish Trad. Gaz., LIV, 2778, 23 & 25. London (1936). **b - 1521**

Lobster cultivation. The Plaice hatchery. The herring fisheries. Oyster research.

## *Congressus – Conventus – Expositiones – Bibliographia piscatoria – Necrologiae.*

**Dakin W. J.** - Research in Australian Sea Fishes. – Pap. & Proc. R. Soc. Tasmania for 1934. Hobarth (1935). **b - 1522**

In his R. M. Johnston Memorial Lecture A. gives a brief survey of various fisheries and methods of investigations in all parts of the world as well as the needs and development of the Australian fisheries. Of special interest is the life-history of the prawns, *Penaeus plebejus* migrating to the sea from the lake.

**De Angelis R.** (A cura di). - Atti del Convegno di pesca (Bari, 10 settembre 1935), organizzato dalla Lega Navale Italiana con il concorso del Ministero dell'Agricoltura e Foreste. – 43 pp., Tip. A. Manuzio. Roma (1936). **b - 1523**

Rapporto del Convegno svoltosi sotto la presidenza del prof. G. Tassinari e delle comunicazioni sul valore nutritivo dei pesci (S. Visco e G. Quagliariello), sull'uso del ghiaccio secco nella conservazione del pesce (G. Ginori Conti) e sulle applicazioni radio alle navi da pesca (L. De Medici). (Vedi anche Boll. Pesca, Piscicolt. e Idrobiol., XII, 2, 77–117. Roma 1936).

**Essipov V. K.** - Liste des ouvrages sur l'économie de la pêche du Nord européen de l'URSS, 1917-1933. (En russe). – 160 pp., Glavsevmorpoutj (Administration Centrale de la Voie Maritime du Nord). Leningrad (1935). **b - 1524**

**Frison T. H.** - First North Central States Fish and Game Conference. – Science, LXXXIII, 2150, 265-266. New York (1936). **b - 1525**

Account of the meeting held in Urbana, Ill. on December 5 and 6, 1935.

**Höver O.** - 50 Jahre Deutsche Hochseefischerei, 40 Jahre Wesermünder Fischereihafen – 75 Abb., 330 S., Verlag Stalling. Oldenburg i. O. (1936). **b - 1526**

Besonders berücksichtigt wird hier die Gründung und Entwicklung der Dampfhochseefischerei. Die Fischereihäfen, die Fischdampfer und die Fanggeräte. (Siehe auch Dtsch. Fisch.-Rundschau, 9, 196-197; 22, 501-516; 1936. Dtsch. Fischwirt., 17, 261-263. Fischmarkt, IV, 5, 133-134, 1936).

**Lebbin G.** - Fischhandelskunde und Fischwarenindustrie. Ein Hand-, Lehr- und Nachschlagebuch für Fischhändler, Fischwarenfabrikanten, Feinkosthändler, Tierärzte, Nahrungsmittelchemiker, Ärzte und Beamte. – Chem.-techn. Bibl., CCCCIII, 344 S., A. Hartlebens Verl. Wien & Leipzig (1936). **b - 1527**

I. Kurze Begriffsbestimmungen über sowohl Seeals Süsswasserfische, Systematisches, Altersbestimmung, Wanderungen, Fischkrankheiten und Parasiten, Begriffe « lebende », « lebendfrische » und « gefrorene » Fische, Zersetzungserscheinungen, Handelsbezeichnungen und giftige Fische. II. Kurze Uebersicht der « unverarbeiteten Wassertiere »; III. Industrielle Erzeugnisse. IV. Hilfsstoffe der Fischindustrie. V. Gesetzliche Bestimmungen. VI. Bibl., Index. - (Siehe Kritik von Schnakenbeck in Fischmarkt II, S. 30, 1936).

**Lücke F.** - Fischindustrielles Taschenbuch. 2. Aufl. Praxis und Wissenschaft der Seefischverarbeitung. – Verl. Dr. Serger und Hempel. Braunschweig (1936). **b - 1528**

In dieser Neuauflage ist grosses Gewicht auf die praktische Erfahrung gelegt besonders in Bezug auf die Konserven.

**Österholm J., Gottberg G. & Forssell F.** - Handbok för skärgårdsfiskare. (In Sved.). – 250 pp., Utg. Nylands fiskarförbund. Söderström & Co. Förl. Helsinki (1936). **b - 1529**

Questo manuale, dedicato specialmente ai pescatori dell'Arcipelago del Golfo Finnico, dà informazioni sulle diverse specie di pesci catturati, la loro pesca e preparazione sui battelli di pesca, la navigazione, la legislazione di pesca, ecc.

**Ugarte J.** - Miscelánea piscìcola. – Bol. Pesca y Caza, VIII, 2, 1-10. Madrid (1936). **b - 1530**

Conferencia dada en la Sociedad « El Sport de Pesca y Caza » el dia 27 de diciembre de 1935. Las facultades mentales de los peces. Valor nutritivo de los peces. Politica piscicola.

**Wundsch H. H.** - Professor Dr. Paulus Schiemenz. – 1 Portr., Ztschr. f. Fisch., XXXIV, 5, 751-754. Neudamm & Berlin. (1936). **b - 1531**

Lebensverlauf und Werk von Professor Paulus Schiemenz, « Vater der preussischen Fischereiforschung » am 15. Dezember 1936 gestorben.

**Conseil Permanent International pour l'Exploration de la Mer** - Meeting of Herring Experts. – Cons. Expl. Mer, Rapp. & Pr.-Verb., C, 2ème partie, 7-10. Copenhague (1936). **b - 1532**

Terms of reference. Agenda. Proceedings. Conclusions. Recommendations. List of members taking part in the discussion. Papers.

**Conseil Permanent International pour l'Exploration de la Mer** - Copenhagen Meeting of Experts from Baltic Countries. – Cons. Expl. Mer., Rapp. & Pr.-Verb., C, 2ème partie, 35-36. Copenhague (1936). **b - 1533**

Experts present. Agenda. Proceedings. Flounder. Salmon. Recommendations.

**Illustriertes Fischerei-Lexikon** - 251 Abb., 362 S. Verlag Neumann. Neudamm (1936). **b - 1534**

Dies Werk ist unter Mitwirkung namhafter Fischereifachleute auf Grund einer sechsjährigen Gemeinschaftsarbeit geschaffen worden und bietet nur nicht dem praktischen Fischer und Teichwirt sondern auch dem wissenschaftlich arbeitenden Naturforscher eine Hilfe dar.

**Office scientifique et technique des Pêches maritimes** - Manuel des Pêches maritimes françaises. – Mém. Off. Pêches marit., IX, 1, 13-140; X, 2, 13-198; XI, 3, 11-173; XII, 4, 13-191. Paris (1935-1936). **b - 1535**

1. Introduction à l'histoire des pêches maritimes en France. Etat actuel de l'industrie de la pêche maritime. Organisation des pêches en France. 2. Les différentes pêches maritimes et leurs engins. 3. Les principaux ports et les fonds de pêches. 4. Les industries annexes de la pêche. L'Ostréiculture, la mytiliculture et la conchyliculture. Le contrôle sanitaire coquillier. Aperçu sur la réglementation.

Ed. traduit en allemagne dans « Handb. Seefisch. N. Europa », Schweizerbartsche Buchandl. Stuttgart.

**Lb.** - Prof. Dr. Ehrenbaum: Naturgeschichte und wirtschaftliche Bedeutung der Seefische Nordeuropas. – Dtsch. Fischwirt., III, 8, 172-173. Bremerhaven (1936). **b - 1536**

Kommentar und kurze, zusammenfassende Wiedergabe des Inhaltes des neuen Werkes von Prof. Dr. Ehrenbaum, das als Band II des « Handbuches der Seefischereien Nordeuropas » kürzlich in Stuttgart erschienen ist.

**An.** - Almanaque del Pescador 1936. Año II. – 194 pp. Imprenta Mortosa. Madrid (1936). **b - 1537**

El volumen contiene diversos temas como biologia de las Aguas, metodos de pescar, hojas estadisticas para capturas, noticiario, información bibliográfica, etc.

**An.** - Terada Torahiko. (In Jap. and Engl.). – 1 fig., 2 pp., Bull. Jap. Soc. Scient. Fish., IV, 6. Tokio (1936). **b - 1538**

Necrology of tis pioneer of the fishery and oceanography, one of the promotors of the Japanese Society of Scientific Fisheries; his life, studies, works and publications.

**An.** - Jahres-Mitgliederversammlung der Fachgruppe Fischindustrie in der Wirtschaftsgruppe Lebensmittelindustrie am 15. Juni 1936 in Altona. – Dtsch. Fisch.-Rundschau, 13, 292-293. Bremerhaven (1936). **b - 1539**

Bericht über den Verlauf der Versammlung und zusammenfassende Wiedergabe der Hauptreden.

**Lepin A. T.** - Biological Work on Novaja Zemlja in 1934-1935. (In Russ. & Engl.). – Bull. Arct. Inst., V, 12, 446-447, 468; VI, 2, 77-79; 100-101. Leningrad (1935 & 1936). **b - 1623**

Results of the study of the fauna of the Novaja Zemlja during the wintering. The study has been made in order to organize fisheries and hunting in the region for trading purposes.

**Lundbeck J.** - Woher kommen die Ertragsschwankungen in der Hochseefischerei ? – Dtsch. Fischwirt., III, 39, 617-618. Berlin (1936). **b - 1624**

Erörterung der zwei wichtigsten Ursachen, der Veränderungen im Nutzfischbestande und des Wechsels der Verbreitung des Fischbestandes. Ein Beispiel des Nutzens von Statistik und Marktuntersuchung.

**Schou G.** - Eksisterer det lovmessighet mellem fiske og nedbørmengde ? (In Norv.). – 3 figs., 4 tav., Naturen, LX, 7/8, 230-239. Bergen (1936).

(—) Meteorol. Ztschr., Bioklim. Beibl., 3, 66-68. Braunschweig (1936). **b - 1625**

È stato dimostrato che esiste un rapporto fra la quantità di pesci catturati e la quantità di pioggia caduta nel mese nel quale avviene la pesca o in quello precedente, nel Mare del Nord lungo la costa norvegese. Questo rapporto può quindi servire come prognostico del rendimento della pesca.

**Uda M. & Okamoto G.** - Effect of Oceanographic Conditions on « Iwasi » (Sardine) (*Amblygaster melanosticta*) Fishing in the Japan Sea. (In Jap., Engl. Rés.). – Journ. Imp. Fish. Exp. Stat., VII, 19-49. Tokyo (1936). **b - 1626**

Report based on records collected from 1918 to 1934 concerning periods, localities and depths of fishing, temperature and salt content of water; different size generations of fish; fluctuations of yield; migrations and forecast of fishing.

**Willer A.** - Um die Trockenlegung des Frischen Haffes. – 2 Abb., Dtsch. Fischwirt., III, 8, 115-119; 9, 134-136. Berlin (1936). **b - 1627**

Zusammenfassende Wiedergabe verschiedener Standpunkte betreffend das Problem der Trockenlegung des Frischen Haffes und die Auswirkungen einer solchen Massnahme auf die Fischerei, mit besonderer Berücksichtigung der Haffischerei, der Ostseefischerei und der Binnenfischerei.

**An.** - Grundsätzliches über die Seefischerei-Forschung. – Dtsch. Fisch.- Rundschau, 18, 408-409. Bremerhaven (1936). **b - 1628**

Die mit dieser Forschung verbundenen Schwierigkeiten. Notwendigkeit eigene Methoden zu entwickeln. Ratschläge für die Forschung.

**An.** - Die Bedeutung der Strömungsveränderungen durch die Strasse von Dover für die Fischerei. – Fischmarkt, IV, 6, 163-164. Cuxhaven (1936). **b - 1629**

An Hand der in « Fisheries Investigations », Ser. II, B. XIV, n° 4 von Carruthers veröffentlichten Ergebnisse seiner Strömungsuntersuchungen am Varne-Feuerschiff, wird ein Zusammenhang zwischen den Strömungsverhältnissen in der Strasse von Dover und der Herings- und Schellfischfischerei, festgestellt.

**An.** - New Method of Studying Herring devised by Alaska Investigators. – Pacif. Fisherm., XXXIII, 9, 81. Seattle, Wash. (1935). **b - 1630**

The most notable of the new methods is the marking of the herring on the spawning grounds described here. District races found.

## *Influentia temperaturae in piscaturam.*

**Enros B.** - Vad förorsakar växlingarna i strömmings-fiskets avkastning under olika år? (In Sved.). – Fisk.-tidskr. f. Finl., XLIII, 2, 23-26 Helsinki (1936). **b - 1631**

Apart from some general factors as tide phenomena, oscillations in food conditions and of year-classes A. claims that for the fishery of *Clupea sprattus* in the waters surrounding the Åland Islands the temperature of the water is the most important factor to take into consideration. It has been ascertained that *Clupea sprattus* does not dwell in a temperature above 14° C.

**Kida T.** - On the Surface Temperature of Water in the Tunny Fishing Grounds off Kusiro and Urakawa in Summer. (In Jap., Engl. Rés.). – 1 graph. fig., 2 tabl., Bull. Jap. Soc. Scient. Fish., V, 2, 87-90. Tokyo (1936). **b - 1632**

Data obtained from investigations during the summer of 1935 concerning the most favourable temperature, the fishing ground, the size of fish and the connexion between tunny fishery and shoals of other species of fishes.

**Takayama I., Uda M. & Tukusi Z.** - A Study of « Saba » (*Scomber japonicus* Houttuyn). Fishing in 1930 and 1931. (In Jap., Engl. Rés.). – 7 figs., tabl., Journ. Imp. Fish. Exp. Stat., VII, 1-18. Tokyo (1936) **b - 1633**

The investigations concern principally the influence of temperature on the catch.

**Thompson H.** - Relationship between Catch of Cod and Water Temperature. – Rep. Newfoundland Fish. Res. Lab. 1935, Div. Fish. Res., Dpt. Natur. Resources, Newfoundland, II, 5, 34-35. Cardiff (1936). **b - 1634**

1. On the Fishing Banks. Average number of quintals per haul during four voyages in the spring of 1935. Comparison with conditions in 1934 and 1935. 2. Inshore: Labrador fishery, on the east and south- west coast.

**Uda M.** - Locality of Fishing Centre and Shoals of « Katuwo » *Euthynnus vagans* (Lesson), Correlated with the Contact Zone of Cold and Warm Currents. (In Jap., Engl. Rés.). – 4 figs., Bull. Jap. Soc. Scient. Fish., IV, 6, 385-390. Tokyo (1936). **b - 1635**

The shoals of *Euthynnus vagans* are at first introduced by the invasion of warm current in the region and accumulated mechanically by the cyclonic convergent vortex produced between warm and cold current in consequence of the said invasion. Results of the last marking experiments which show that migration keeps pace with the movement of fishing centre.

## *Piscicultura.*

**Faouzi H.** - Successful Stocking of Lake Qaroun with Mullets (*Mugil cephalus* L. and *M. capito* Cuv.) from the Mediterranean. – 1 fig., tabl., Int. Rev. ges. Hydrobiol. u. Hydrogr., XXXIII, 5/6, 434-439. Leipzig (1936). **b - 1636**

Referring to a previous notice on the breeding of *M. capito* in Lake Qaroun in Nature, June 22, 1935, A. here gives a more detailed account of the stocking operations undertaken from 1931 in this lake. Thus, possibility has been offered to fish spawning at sea to lay its eggs in the lake of Qaroun without the agency of a marine milieu.

**Ikematsu W.** - Observations of Temperature, pH, and Dissolved Oxygen in Culture Ponds for Eel. – Journ. Fish. Culture, V, 1/2, 1-12. Tokyo (1935). **b - 1637**

**Kimura K.** - Further Note on the Death of Sardines in Confinement. (In Jap., Engl., Rés.). – Tabl., diagr., Journ. Imp. Fish. Exp. Stat., VI, 239-280. Tokyo (1935). **b - 1638**

Report on experiments undertaken by the Station during the summer of 1932. It results that *Sardinia melanosticta* is more resistant to injuries and irritation than *Engraulis japonica* but less resistant to asphyxiation. The latter seems to be more readily acclimatized to low oxygen concentration.

**Krauss D.** - Ueber die Wirkung verschiedener gelöster Düngemittel von K- Na- und Ca- Salzen auf Haut und Kiemen von Fischen. – 17 Abb., Ztschr. f. Fisch., XXXIV, 5, 787-817. Neudamm & Berlin (1936). **b - 1639**

Die tödliche Wirkung von Düngemitteln (Kali- und Ammonsalzen und Harnstoff) auf Fische beruht in einer Zerstörung des Kiemenepithels und Unterbindung des Gasaustausches. Die Wirkung auf die Haut ist im Prinzip die gleiche wie auf die Kiemenepithelien, jedoch sind dazu bedeutend höhere Konzentrationen erforderlich. Die histologischen Veränderungen treten in den Lösungen der Elektrolyte und Elektrolytgemische auf. Die Gewebsschädigungen beginnen jeweils an den Kiemenblättchenspitzen und bei der Haut an der obersten Deckschicht. (Aus Vf. Zus.)

**Needham P. R.** - The Hot Creek Rearing Ponds. – 4 figs., 2 tabl., Calif. Fish & Game, XXII, 2, 118-125. Sacramento (1936). **b - 1640**

Three separate springs in the Owens Valley, eastern California, with a temperature from 52° F. to 68° F. have been used by the California Trout Investigations from 1932. Report on the work.

## *Aquarum pollutio et sanatio hydrica – Substantiae et organisma Piscibus obnoxia.*

**Fisk H.** - Die Schlechtwasserverhältnisse und die Auswirkungen auf den Fang in der Niederelbe. – Fischmarkt, 9, 231-232. Cuxhaven. (1934). **b - 1673**

Bedeutung des niedrigen Wasserstandes und des darauf folgenden Schlechtwassers für die niederelbische Fischerei. Massnahmen, die zur Bekämpfung dessen Auswirkungen dienen.

**Galtsoff P. S., Prytherch F., Smith R. O. & Koehring V.** - Effects of Crude Oil Pollution on Oysters in Louisiana Waters. – U. S. Dpt. Comm., Bull. Bur. Fish., XLVIII, 18, 143-210. Washington (1935). **b - 1674**

Report on the investigations undertaken to study the causes of the great mortality of oysters observed during 1932-33 in Louisiana Waters. It results that crude oil discharged in the sea whether floating on the surface or deposited on the bottom yields water- soluble substances which narcotize the ciliated epithelium of the gills thus causing a gradual starvation and weakening of the oyster. The chemical nature of these substances is however not yet determined.

**Poteriayev E. A.** - A Review of the Sanitary-Biological Investigations in the Black Sea. (In Russ., Engl., Rés.). – Works Arnoldi Biol. Stat., II, 1, 131-148. Novorossyisk (1936). **b - 1675**

Rate of intermixing of the sewage with the sea water in horizontal and vertical directions and factors concerned. Rate of oxidation of organic matter dissolved in the sewage. Experiments. Marine organisms as indicators. Factors concerned with the biological analysis of the sea-water.

**An.** - Fishery Scientists prove that Oil Pollution is Detrimental to Oyster on Gulf Coast. – Fish. & Oyst. Rep., XVI, 7, 5. Tampa, Fla. (1935) **b - 1676**

Short note on investigations sponsored by the U. S. Bureau of Fisheries, proving that the dumping of crude oils and brine from the wells into the bays of Louisiana will be increasingly disastrous to the oyster fishery of that region.

## PORTUS AD PISCANDUM

**Belloc G.** - Les ports de pêche du littoral français de l'Atlantique: La côte de Vendée et de Gascogne. – 22 fig., Mém. Off. Pêches Marit., Man. Pêches Marit. franç., 11, 3, 122-138. Paris (1936). **b - 1677**

Sur cette côte les ports sont nombreux: Pornic, Herbaudière, Port Joinville, et Les Sables-d'Olonne, qui est un port des plus importants de la côte Ouest ainsi que le port de La Rochelle, qui est devenu aussi le plus grand marché au poisson frais du littoral atlantique. La flotte de pêche, le port et l'écoulement des produits de la pêche.

Le port d'escale de La Pallice, Fouras et les établissements ostréicoles de La Tremblade et de Marennes. Sur la côte de Gascogne: Bordeaux, centre principal d'exploitation de l'industrie morutière française; Arcachon, qui a acquis importance grâce à l'ostréiculture et à la pêche à la Sardine; Biarritz et les ports de Saint Jean-de-Luz et de Socoa qui arment à la pêche de la Sardine et de l'Anchois.

**Croker R. S.** - What is the World's greatest Fishing Port ? – 2 graphs, 1 tabl., Calif. Fish & Game, XXII, 1, 40-42. Sacramento (1936). **b - 1678**

Statistical information on 12 of the word's leading fishing ports, of which Hull and Grimsby come in the first line.

**Desbrosses P.** - Les ports de pêche du littoral français de l'Atlantique: La côte sud de Bretagne. – 25 fig., Mém. Off. Pêches Marit., Man. Pêches Marit. franç., 11, 3, 100-121. Paris (1936). **b - 1679**

Sur la côte sud de la Bretagne, de Camaret au Croisic c'est un chapelet serré de ports de pêche: environ 35.000 pêcheurs sont concentrés sur cette côte. La pêche principale est la pêche de la Sardine et puis celle à congres, à raies, à langouste et aussi aux maqueraux. Douarnenez, Audierne, Concarneau. Le port de Lorient-Kéroman, entré en service en 1927 et exploité par une société concessionaire: outillage et fonctionnement du port; les bateaux de pêche; les équipages; la pêche et les apports; l'écoulement des produits de la pêche. Les petits ports qui gravitent autour de Lorient sont: Kerroch, Port Luis, Gâvrais, Groix avec ses 225 thonniers et Etel, Quiberon, Turballe et Saint-Nazaire.

**Göhring H.** - Die Beteiligung der deutschen Seehäfen am Walfang vergangener Tage. – Dtsch. Fisch- Rundschau, 16, 364-365; 17, 386-387. Bremerhaven (1936). **b - 1680**

Investigations on age, growth, size and age composition in the waters round Faroes, Iceland and West Greenland.

**Jespersen P.** - Fluctuations in Year-Classes of Halibut. – Cons. Expl. Mer, Rapp. & Pr.–Verb., CI, 3ème partie, 6, 1 p. Copenhague (1936). **b - 1812**

Short information on the questionnaire sent in the subject of which most replies were negative. Sufficient material only in Icelandic waters. Reference to other works.

**Roberts W. A.** - The History and Progress of the Halibut Fisheries. – 1 fig., Fish. Gaz., LIII, 4, 12 & 25. New York (1936). **b - 1813**

Description of the species *Hippoglossus hippoglossus* found extensively in the North Atlantic and North Pacific Oceans giving rise to one of the most important fisheries. Appearance and life-habits, properties of its flesh, white and gray halibut; its spawning periods; the depletion of the stock; type of bait used. Pacific halibut fisheries.

**Schmidt U.** - Untersuchungen über die Schollenlandungen der deutschen Hochseekutter aus der Nordsee im Jahre 1935. – 1 Abb., 7 Tab., Fischmarkt, IV, 4, 88-89. Cuxhaven (1936). **b - 1814**

Zusammensetzung der Gesamtanlandungen. Die örtliche Verteilung der Fischerei. Die Fangaussichten für 1936.

## *Gadidae.*

**Hickling C. F.** - Fluctuations in Year-Classes of Hake (*Merluccius merluccius*, Linn.). – Cons. Expl. Mer, Rapp. & Pr.–Verb., CI, 3ème partie, 8, 1 p. Copenhague (1936). **b - 1815**

Short note on the « small hake » in the regions south and west of Ireland during 1921-1925.

**Sund O.** - The Fluctuations in the European Stocks of Cod. With a Note on the Fluctuations in the North-Western Area by Dr. Å. V. Tåning, Copenhagen. – 7 figs., tabl., Cons. Expl. Mer, Rapp. & Pr.–Verb., CI, 3ème partie, 1, 1-21. Copenhague (1936). **b - 1816**

The results of the calculations are expressed graphically in several figures concentrated in a simplified view of the fluctuations of the brood in the areas of Greenland and Iceland, Barents Sea, Finnmark Coast, Lofoten, Faroe, Skagerak, Danish waters, North Sea and Midd. Baltic for 1897-1935. Appendix by Å. V. Taning concerning Greenland, Iceland and Danish Waters. Bibl.

**Thompson H.** - Haddock Investigations. – Rep. Newfoundl. Fish. Res. Lab. 1935, Div. Fish. Res., Dpt. Natur. Resources, Newfoundland, II, 5, 29-32. Cardiff (1936). **b - 1817**

1. Quantities of Haddock available. 2. Sizes and age-composition of the shoals.

**Thompson H.** - Sizes of Cod and Distribution of the Age-Classes in 1935. Racial Groups of Cod. – 1 Map, Rep. Newfoundl. Fish. Res. Lab. 1935, Div. Fish. Res., Dpt. Natur. Resources, Newfoundland, II, 5, 36-40. Cardiff (1936). **b - 1818**

Two principal factors for good supply to the fishery: suitable water conditions and the satisfactory existence of year-classes of cod. Comparative proportions of various age-classes for Bay Bulls, Grand Bank and Fortune during 1922-1932. Some difference in growth noticed in the direction from south-west to north-east. Other similarities of the average recorded. Vertebral counts on Cod.

## *Clupeidae.*

**Altnöder K.** - Die deutsche Heringsfischerei in der Ostsee. – Dtsch. Fischwirt., III, 25, 395-397. Berlin (1936). **b - 1819**

Der Hering als Nutzfisch. Fangmenge und Wert. Gesamtproduktion Deutschlands. Hauptlandegebiete und Fangzeit. Verschiedene Heringssorten. Fanggeräte.

Report on the stock for the Swedish fishery. Characterization of autumn spawners and spring spawners.

**Chambré Ch.** - Shad Fishing in New Brunswick. – 2 figs., Canad. Fisherm., XXIII, 4, 14-15. Gardenvale, Que (1936). **b - 1821**

The morphological and ecological characteristics of *Alosa sapidissima*; its life history; migrations, gears used in New Brunswick, price fluctuations.

**Dierks** - Steigende deutsche Salzheringproduktion. – 2 Tab., Dtsch. Fischwirt., II, 2, 20. Berlin (1935). **b - 1822**

Statistische Angaben über die Entwicklung der Heringsfangflotte, Steigung der Erzeugung deutscher Salzhering und Rückgang der Einfuhr ausländischer Heringe.

**Erdmann W.** - Die deutsche grosse Herings-Fischerei in den Jahren 1931-1934. – 14 Karten, 2 Anh., Ber. Dtsch. Wiss. Komm. Meeresf., N. F., VIII, 1, 1-23. Stuttgart (1936). **b - 1823**

Die Entwicklung der deutschen Heringsflotte für die grosse Fischerei und ihre Fangergebnisse. Monatskarten der Fangerträge für 1931-1934.

**Erdmann W.** - Die Deutsche Grosse Heringsfischerei im Jahre 1935. – 1 Abb., 5 Tab. a. T., 9 Kart., Ber. Dtsch. Wiss. Komm. Meeresf., N. F., VIII, 2, 25-36. Stuttgart (1936). **b - 1824**

Die Flotte und die Fangergebnisse. Die Monatskarten 1935. Die Jahreskarten 1934-1935.

**Furnestin J.** - Observations diverses sur les concentrations de Harengs du « Fladen » (Mer du Nord). – 5 fig., Rev. Trav. Off. Pêches Marit., IX, 1, 33, 47-55. Paris (1936). **b - 1825**

Répartition quant à l'âge des Harengs pendant les mois de juillet, août, septembre 1929-1935. Polygones des variations du nombre des vertèbres et la moyenne vertébrale. Age: composition du stock qui est constitué par au moins deux populations distinctes: une population de hareng de printemps, se rapportant au type Atlantoscandinave et une population de hareng d'automne rapprochée du type Mer du Nord.

**Le Gall J.** - Hareng. Sur l'abondance relative des « Classes annuelles » dans les différentes concentrations de Harengs de l'Atlantique Nord-Est. – 1 graph., 1 table, Cons. Expl. Mer, Rapp. & Pr.–Verb., CI, 3ème partie, 3, 1-11. Copenhague (1936). **b - 1826**

Remarques générales sur les méthodes et leur valeur. Résultats: Norvège, Sud de la Mer du Nord et Manche Orientale, Manche Occidentale, Nord de l'Irlande, Mer d'Irlande. Côtes d'Ecosse; harengs dont la ponte a lieu en automne et en printemps. Interprétation des résultats. Conclusion.

**Le Gall J.** - Statistiques biologiques et considérations sur les populations de Harengs de la Manche Orientale et du Sud de la Mer du Nord. – 2 fig., Rev. Trav. Off. Pêches Marit., IX, 1, 33, 37-46. Paris (1936). **b - 1827**

Les déplacements de la pêcherie harenguière pendant la saison d'hiver 1935-1936. Taille, âge et moyenne vertébrale des échantillons de hareng prélevés sur les différentes pêcheries. Les harengs de 6 ans, de 4 ans et de 3 ans ont constitué plus de 80 p. 100 de la population présente; l'étude de la moyenne vertébrale montre une forte pénétration des harengs du type de la Mer du Nord.

**Marquard O.** - Die Ostpommersche Sprottfischerei. – Dtsch. Fischwirt., III, 33, 523-526. Berlin (1936). **b - 1828**

Im Anbetracht der ausserordentlichen Entwicklung dieser Fischerei während der letzten 6-7 Jahre wird hier eine eingehende Darstellung derselben gegeben. Verschiedene Zubereitungsmethoden. Geräte. Einfluss der erhöhten Sprottfischerei auf den Fang von Schollen und Flundern in der mittleren Ostsee. Kontingentierung der Fänge.

**Russo A.** - Zone di concentramento, migrazioni e pesca dell'Acciuga *Engraulis encrasicholus* L. con sorgenti luminose nel golfo di Catania. – 6 fig., Atti Acc. Goenia Sc. Natur., Ser. 6, I, 1-16, Catania (1936). **b - 1829**

Zone di concentramento. Varietà costiere di Acciughe. Migrazioni. Prodotto della pesca delle Acciughe con sorgenti luminose in relazione ai fondali. Reti adoperate per la pesca luminosa a Catania, loro adattamento per la cattura dei Clupeidi. Dati statistici. Tabelle.

**Russo A.** - Prodotto della pesca dei Clupeidi (acciuga, sardina) nel golfo di Catania nel 1934-1935. Dati riassuntivi e dati giornalieri. – num. tab., Boll. Pesca, Piscicolt. & Idrobiol., XII, 1, 5-28. Roma (1936). **b - 1830**

In numerose tabelle vengono riportati i dati relativi alla pesca dei clupeidi fatta nel Golfo di Catania con qualunque attrezzo di pesca, di giorno e di notte. Il prodotto è in aumento rispetto all'anno precedente per il contributo apportato dalla pesca luminosa fatta con la pulica e la menaida negli alti fondali del golfo.

**Schmidt U.** - Ueber den Heringsfang bei Helgoland. – 2 Phot., 3 Tab., Fischmarkt, IV, 2, 36-41. Cuxhaven (1936). **b - 1831**

Nach einer kurzen Einleitung über die Schwankungen der Heringsfischerei an den deutschen Küsten bespricht Vf. eingehender die ziemlich reiche Heringsfischerei bei Helgoland in 1935-1936. Uebersicht über die seit 1928 angelandeten Küstenheringe und die erzielten Durchschnittspreise, Vergleich zwischen den Längen der bei Helgoland und in der Süderpiep gefangenen Heringe. Über die Herkunft der Heringe.

**Schnakenbeck W.** - Die europäische Heringsfischerei. – 1 Karte, Tab., Fischmarkt, N. F., IV, 9, 229-237. Cuxhaven (1936). **b - 1832**

Geschichtliche Uebersicht der Heringsfischerei seit dem 10. und 11. Jahrhundert: Schwankungen und lokale Verschiebungen. Jetziges Hauptgebiet. Möglichkeit einer künftigen Steigerung der Heringsfischerei und damit zusammenhängende noch unerforschte Faktoren.

**Takayama J. & Sakai M.** - An Investigation of the Present Position of Important Fisheries: III. On the Sardine Fishery. (In Jap., Engl. Rés.). – Journ. Imp. Fish. Exp. Stat., VII, 287-334. Tokyo (1936). **b - 1833**

Results of investigations undertaken by the Imperial Fisheries Experimental Station in collaboration with other similar stations during 1931 showing the increase of this most important branch of fishing industry in Japan; total area and total catch of 1931.

**Wendt R.** - Die deutsche Heringsfischerei mit Treibnetzen im Jahre 1935. – 5 Tab., Fischmarkt, IV, 2, 32-35. Cuxhaven (1936). **b - 1834**

Statistische Angaben über die Flotte der deutschen Loggerfischereien. Qualität der Fänge, ihr Verkauf, das finanzielle Ergebnis der Loggerfischerei und ihre Entwicklung in 1934 und 1935. Statistik der deutschen Logger-Heringsfischerei im Nordseegebiet für 1935. Vergleich zwischen den Fangergebnissen von 1907 bis 1935.

**F.** - Reiche Heringsfänge der Motorkutter. – Fischmarkt, IV, 2, 50. Cuxhaven (1936). **b - 1835**

Kurzer Bericht über die Sprott- und Heringsfischerei zwischen Helgoland und der Düne sowie bei der Süderpiep.

**Hi.** - Auftakt zur Heringssaison 1936. Die deutsche Loggerflotte auf der Ausreise. – Dtsch. Fischwirt., III, 21, 333-334. Berlin (1936). **b - 1836**

Zusammensetzung der Flotte. Kurze historische Uebersicht über die Heringsfischerei seit den vom 10. bis zum 16. Jahrhundert stattgefundenen Schonenmärkten. Geburtsstätte der deutschen Heringsfischerei an der Nordsee. Statistische Uebersicht über die Entwicklung der deutschen Treibnetzheringsfischerei seit dem Jahre 1930.

**S-E.** - Abschliessende Zahlen über die Heringssaison. – Dtsch. Fischwirt., III, 2, 20-21. Berlin (1936). **b - 1837**

Aus den statistischen Angaben über den Verlauf der Heringssaison 1934 kommt hervor, dass sowohl die deutsche Schleppnetzheringsfischerei wie auch die deutsche Treibnetzheringsfischerei in dieser Saison ihre Produktion vorwärts getrieben haben.

**An.** - Kritik an der letzten norwegischen Heringssaison. – 2 Tab., Dtsch. Fisch.– Rundschau, 12, 265-267. Bremerhaven (1936). **b - 1838**

Über die reiche Heringssaison von 1935. Aussichten über den Absatz der Heringe, die Herabsinkung der Preise und die Bedingungen von Angebot und Nachfrage.

**An.** - Hochsaison in Ostsee-Heringen. Der Fangbetrieb ist in vollem Gange. – Dtsch. Fischwirt., III, 14, 210-211. Berlin (1936). **b - 1839**

**Abderhalden E.** - Eiweiss von Seefischen als Nahrungsmittel. – 2 Tab., Dtsch. Fisch.-Rundschau, 9, 193-194. Bremerhaven (1936). **b - 1938**

Ein Beitrag zur Lösung der Frage der Deckung des Eiweissbedarfs im Inland. Vortrag gehalten in der Sitzung der Deutschen Akademie der Naturforscher vom 13. 12. 1935, (zuerst erschienen in « Nova Acta Leopoldina », N. F., III, 17). Es kommt klar aus der Betrachtungen des Vf. vor, dass das Fischmuskeleiweiss ein biologisch hochwertiges Produkt darstellt.

**Bailey B. E.** - The Nutritive Value of Marine Products. VII. The Vitamin A and D Potency of the Oils from British Columbia Canned Salmon. – Journ. Biol. Bd. Canada, II, 5, 431-437. Toronto (1936). **b - 1939**

In each species of canned *Oncorhynchus nerka* and *O. gorbuscha* the vitamin D potency of one of the samples was 50 international units per gm., and of two of the samples, 67 international units per gm. Two samples of sockeye salmon oil contained approximately 2.5 and 2.0 A. D. M. A. units of vitamin A per gm.

**Carere Comes O.** - Valore nutritivo della carne di pesce in confronto di quella di bue. – Quadr. Nutr., III, 5, 342-350. Napoli (1936). **b - 1940**

Nutrendo ratti albini soltanto con carne magra di bue oppure con sardelle (*Clupea pilchardus*) l'A. ha messo in evidenza che i primi hanno subito un netto arresto dell'accrescimento, mentre i secondi hanno continuato a crescere quasi quanto i controlli a dieta mista. Poichè la quantità di azoto ingerita, riferita all'unità di peso, è praticamente la stessa, risulta che la carne di pesce è assai superiore.

**Carter N. M.** - The Nutritive Value of Marine Products. VIII. Proximate Analysis of canned British Columbia Sockeye and Pink Salmon. – Tabl., Journ. Biol. Bd. Canada, II, 5, 439-455. Toronto (1936). **b - 1941**

The proximate compositions and calculated calorific values of individual and composite samples of *Oncorhynchus nerka* and *O. gorbuscha* caught in several localities on the British Columbia coast are compared. The resulting data are presented in such a way as to allow comparison of the composition and energy content of the various constituents in the can, some of which are frequently discarded in the utilization of canned salmon. (From A:s abstr.).

**Fielder R. H.** - Consider the Fishes. – Fish & Oyst. Rep., XVII, 12, 6-7. Tampa, Fla. (1936). **b - 1942**

General considerations on the alimentary value of fish with special regard to its content of minerals.

Statistische Angaben über den Verbrauch in England und Deutschland. Nahrungswert des Fisches. Zubereitung, Resteverwertung. Sättungsgrad der Fischspeise. Verschiedene Arten von Bereitung.

**Lundbeck J.** - Die natürliche Veränderlichkeit in der Körperverfassung der Fische. – Dtsch. Fischwirt., III, 43, 713-715. Berlin (1936). **b - 1945**

Verhältnisse, die auf den Stoffwechsel und den Wachstum einwirken. Charakteristik der Fett- und Magerfische: Veränderungen in der Konsistenz des Fleisches durch Wanderungen, Laichperioden, Temperatur- und Nahrungsverhältnisse. Beispiele. Vergleich zwischen Fett- und Magerfischen.

**Quagliariello G.** - Il valore nutritivo dei prodotti della pesca. – Boll. Pesca, Piscicolt. & Idrobiol., XII, 2, 82-104. Roma (1936). **b - 1946**

Nelle presenti ricerche sui prodotti della pesca viene riferito sul contenuto percentuale in protidi, glucidi, lipidi e sostanze minerali. Digeribilità, assorbimento e valore alimentare delle carni di pesce; il loro contenuto in vitamine.

**Riddell W. A.** - The nutritive Value of Marine Products. XI. Proximate Analysis of Canned British Columbia Coho (Blueback) Salmon. XII. Mineral Constituents of some Food Fishes of British Columbia. XIII. Mineral Constituents of the Flesh, Skin, Bone and free Liquor in Canned British Columbia Coho (Blueback) Salmon. – Tabl., Journ. Biol. Bd Canada, II, 5, 763-468; 469-472; 473-475. Toronto (1936). **b - 1947**

XI. The nutritive value of canned *Oncorhynchus kisutch* appears to be greatest when the fish are caught in July. XII. The magnesium content is very uniform from species to species, but the other constituents, Ca, Na, Ka, P, Cl, S, Cu and Mn show considerable variations. XIII. Presence of calcium and magnesium metaphosphates in the ash of the flesh, calcium metaphosphate in that from the skin and tribasic calcium orthophosphate in that from the bone.

**Rizzo L.** - I prodotti del mare nell'alimentazione. – 8 tab., 52 pp., Manuali « Diana ». Firenze (1936). **b - 1948**

Le richieste alimentari dell'organismo umano e le sostanze atte a soddisfarlo; le proteine e il loro valore biologico. Le carni di pesce ed il loro valore alimentare; importanza dell'alimentazione ittica in determinate condizioni patologiche quali l'uricemia, l'arteriosclerosi, la calcolosi biliare e le gastropatie.

**Schmidt E.** - The Food Value of Herrings. – 1 table, Fish Trad. Gaz., LIV, 2792, 43 & 45. London (1936). **b - 1949**

Herring supplies the three principal foodstuffs in a very high percentage and at a very low cost; it contains important mineral salts and vitamins of exceptional value. (From A:s rés.).

**Tully J. P.** - The nutritive Value of Marine Products. XIV. Proximate Analyses of Fresh British Colombia Oysters. – Tabl., Journ. Biol. Bd. Canada, II, 5, 477-484. Toronto (1936). **b - 1950**

The food value of the oysters in terms of available energy shows very little seasonal variation. The glycogen and protein values definitely associated with the sexual conditions show however marked seasonal variations. Conclusions as to the time for best marketable conditions for *Ostrea lurida*, *O. virginica* and *O. gigas*.

**White F. D.** - The Nutritive Value of Marine Products. IX. Proximate Analysis of British Columbia canned Pilchard. – Tabl., Journ. Biol. Bd. Canada, II, 5, 457-460. Toronto (1936). **b - 1952**

The percentage of fat (18.5) in the late- caught fish was almost twice as great as that in the early-caught fish. Separate proximate analyses of the flesh, skin, and bone disclosed significant changes in the percentages of fat, protein, and minerals in these components between the beginning and end of the season. (A.).

**White F. D.** - The nutritive Value of Marine Products. X. Proximate Analysis of Ling Cod. – Tabl., Journ. Biol. Bd. Canada, II, 5, 461-462. Toronto (1936). **b - 1953**

Great nutritive value of the flesh and skin of *Ophiodon elongatus* due to protein content. Average composition of flesh and cod reported in tables. The skin has a protein content roughly 50% greater than that of the flesh.

**An.** - Wie der polnischen Fischerei geholfen werden soll. – Dtsch. Fisch.-Rundschau, 3, 47-48. Bremerhaven (1936). **b - 2113**

Ausführliche Darstellung, die in der « Gazeta Handlowa » unter dem Titel « Ein Produktionsgebiet, das noch in den Kinderschuhen steckt » erschienen ist, und wirtschaftspolitische Probleme in Bezug auf die Förderung und Entwicklung der polnischen Seefischerei erörtert.

**An.** - Argentina as a Market for British Fish. A Survey of the Country's Fishing Industry and its Imports, I, II. – Fish Trad. Gaz., LIV, 2778, 36-37; 2780, 39 & 41. London (1936). **b - 2114**

Fishing is carried on along the whole Atlantic coast but is not organised. Gulf Stream conditions. Imports. The trade in oysters. Canned and smoked fish.

## SUBPRODUCTI FRUCTUUM PISCATIONIS

### *Residua et reiectanea – Farina ichthyca. Collae.*

**Berry M. H. & Manning J. R.** - Comparison of the Feeding Value of Steam dried and Flame dried Menhaden Fish Meal. – 3 tabl., Fish & Oyst. Rep., XVIII, 1, 8 & 12. Tampa, Fla (1936). (—) Journ. Dairy Sc., XIX, 10, 663-669. Baltimore (1936). **b - 2115**

No considerable difference found with respect to gains, weight and palatability.

**Bickel E.** - Eine noch zu wenig erschlossene Möglichkeit zur Verwertung von Fischabfällen. – Dtsch. Fischwirt., III, 5, 66-68. Berlin (1936). **b - 2116**

Einige Betrachtungen über die Möglichkeit Fischabfälle ohne vorherige technische oder chemische Behandlung nützbar zu machen, nämlich durch Verfütterung in der Pelztierzucht. Ein Beispiel bietet die Peltztierzucht Norwegens dar.

**Boselli A.** - L'utilizzazione dei residui della pesca e sua importanza nell'economia nazionale. – 3 fig., Ind. It. Freddo, 10, 146-150. Milano (1936). **b - 2117**

L'A. prospetta il problema della costruzione di impianti moderni per l'utilizzazione dei residui di pesce, con i quali sia possibile estrarre tutti i grassi ed olii, nonchè farine secche e sgrassate. Tali impianti, da costruirsi sia in Italia, sia nelle Colonie, sia a bordo di navi da grande pesca, consentiranno di ottenere prodotti di alto valore fino ad ora importati dall'estero.

**Boury M.** - Les sous-produits. – 2 figs., Mém. Off. Pêches Marit., 12, Man. Pêches Marit. franç., 4, 54-64. Paris (1936). **b - 2118**

Les chalutiers équipés pour la fabrication de la farine du poisson. Les usines de Fécamp, Concarneau, La Rochelle fabriquant régulièrement une certaine quantité de farine alimentaire. Le traitement des poissons gras et des poissons maigres. Les engrais de poisson. La préparation à bord et à terre des huiles. Les colles.

**Brenner M. L.** - Low Temperature Drying of Sardine Meal is highly successful. – 2 figs., Pacif. Fisherm., XXXIII, 5, 63-64. Seattle, Wash. (1935). **b - 2119**

Description of a new fish meal dryer installed in the Monterey plant. Dryer gases burned. Instrument control employed. Excellent results obtained.

**Carter N. M.** - Ambergris-and How to Identify it. – Canad. Fisherm., XXIII, 3, 18. Gardenvale, Que. (1936). **b - 2120**

The origin of ambergris, its relative rarety and some methods of its identification.

**Centola G.** - Struttura e proprietà del « bisso » o seta di ostriche. – 3 fig., Gazz. Chim. It., LXVI, 2, 71-80. Roma (1936). **b - 2121**

Lo studio della struttura del bisso porta a concludere che esso è costituito da un miscuglio di ammino-acidi complessi (tipo cheratina) e di amminoacidi semplici (tipo fibroina della seta) e ciò è in accordo col risultato dell'indagine chimica. Il bisso è l'unica fibra naturale nella quale le molecole non hanno nessun orientamento. Considerazioni circa un parallelismo esistente tra il grado di orientamento delle molecole e le proprietà fisiche delle fibre tessili.

**Hiltner P.** - Ein wichtiges deutsches Forschungsergebnis: Trocken-Eiweiss aus Seefischen. – Dtsch. Fisch. -Rundschau, 1, 1-3. Bremerhaven (1936). **b - 2122**

Kurzer Bericht über die Entdeckung eines Verfahrens zur Fabrikation von Trocken-Eiweiss aus Seefischen, welches ein Beitrag zur Deckung des Eiweissbedarfs im Inlande darstellt, mit besonderer Berücksichtigung der von Prof. Abderhalden auf diesem Gebiete durchgeführten Arbeit. Bedeutung der Erfindung für die deutsche Seefischerei.

**Johnston A.** - Note on Analyses of Meal made from Labrador dried Codfish. – Rep. Newfoundl. Fish. Res. Lab. 1935, Div. Fish. Res. Dpt., Natur. Resources, Newfoundland, II, 5. 46. Cardiff (1936). **b - 2123**

Examination of material treated in three different ways. Percentage of ash, salt and albuminoids. Prescriptions in order to avoid spoilage.

**Kawakami T.** - On the Hygroscopicity of Fishmeal. I. (In Jap.; Engl. Summ.). – 4 figs., 3 tables, Bull. Jap. Soc. Scient. Fish., V, 1, 51-55. Tokyo (1936). **b - 2124**

Measurements of the increment of the weight of sardine, white and salmon meal previously completely dried in an oven and than exposed to constant humidities at constant temperature (20° C) and wetted to saturation.

**Manning J. R.** - Relation of the Fishery Industries as a Source of Raw Material in the Manufacture of Dog Foods. – Fish & Oyst. Rep., XV, 9, 8-9. Tampa, Fla. (1934). **b - 2125**

Special report prepared by the Chief Technologist of the U. S. Bureau of Fisheries for the National Recovery Administration.

**Ôya T. & Takei T.** - On the Manufacturing Process of the Sardine Fish Meal. (In Jap., Engl. Rés.). – 3 figs., 2 tabl., Bull. Jap. Soc. Scient. Fish., V, 3, 199-201. Tokyo (1936). **b - 2126**

Description of the process.

**Pottinger S. R., Harrison R. W. & Anderson A. W.** - Effect of Method of Manufacture on the Composition of Haddock Fish-Meal Proteins. – 1 fig., 7 tabls., U. S. Dpt. Comm., Bur. Fish. II, Invest. Rep. 31, 1-14. Washington D. C. (1935). **b - 2127**

The investigation has shown that there are three general conditions encountered in the manufacture on nonoily fish-meal which have effect on the composition of their proteins: the difference in the proportion of head and backbone water, the removal of water-soluble protein material by the wet process, and the method of drying.

**Schulze M.** - Fischerei und Landwirtschaft verbindet die Fischmehlwirtschaft. – 5 Tabl., Dtsch. Fischwirt., III, 4, 49-51. Berlin (1936). **b - 2128**

**Fischer E.** - Die Anwendung neuerer Forschungen auf die Qualitätserhaltung der Seefische. – Dtsch. Fischwirt., III, 16, 241-245. Berlin (1936). **b - 2167**

Vortrag gehalten auf der Mitgliederversammlung des Deutschen Seefischerei-Vereins. Neue Auffassung von der Fischzersetzung. Charakteristik der eiweisslösenden Fischbakterien. Wege diese Bakterien zu bekämpfen: in erster Linie mit Kälte. Verschiedene Kühlverfahren.

**Fisher L. M. & Acker J. E.** - Bacteriological Examinations of Oysters and Water from Narragansett Bay during the Winter and Spring of 1927-28. – 6 figs., U. S. Publ. Health Repts., L, 42, 1449-1475. Georgetown (1935).

( — ) Sewage Works Journ., VII, 4, 727-741. Easton Pa., (1935). **b - 2168**

The quality of the water in Narragansett Bay is better in winter and early spring than in the late fall; and consequently there follows a marked improvement in the quality of oysters. (From A:s rés.).

**Gibbons N. E.** - Studies on Salt Fish. 1. Bacteria associated with the Reddening of Salt Fish. – 1 table, Journ. Biol. Bd. Canada, III, 1, 70-76. Toronto (1936). **b - 2169**

A study has been made of thirty strains of red halophilic organisms from reddened fish, salt and the timbers of salt fish plants. Eleven were cocci and belong to the species *Sarcina litoralis* and *Sarcina* sp. of Lochhead. The rod forms are of five types. Three resemble *Bact. trapanicum* Petter, *Serratia salinaria* and *S. cutirubra* Lochhead. The others do not resemble any of the described species. Of thirty samples of salt, reddening organisms were found in twenty, seven of which were mined or evaporated salts (A.)

**Kimata M.** - Effect of Halogen Ions upon the Growth Rate of Bacteria and on the Decomposition of Fish Muscle. – 3 tabl., Bull. Jap. Soc. Scient. Fish., II, 5, 291-296. Tokyo (1936). **b - 2170**

Studies upon the effect of Na F, Na J, Na Br and Na Cl. The inhibitory action od halogen ions is F > J > Br > Cl.

**Kimata M.** - The Rates of the Decomposition of Fish Muscle by various Kinds of Bacteria. – 5 figs., Bull. Jap. Soc. Scient. Fish., V, 2, 77-79. Tokyo (1936). **b - 2171**

This study deals especially with such water *Bacteria* as are particularly concerned with the fish-muscle decomposition. Results: The rate of the decomposition of the fish muscle; the rate of the growth of *Bacteria*; relation of the velocity of the decomposition of fish muscle and the velocity of the growth rate of *Bacteria*; relation of the velocity of the decomposition of fish muscle and the final amount of *Bacteria*.

**Kimata M.** - Effects of Carbohydrates upon the Rates of the Decomposition of Fish Muscle by *Bacteria*. – 4 figs., Bull. Jap. Soc. Scient. Fish., V, 4, 219-223. Tokyo (1936). **b - 2172**

This effect varies with the kinds of Bacteria and those of Carbohydrates and the rate of bacterial decomposition is seldom increased but mostly decreased with a following bacterial fermentation of carbohydrates of the media. The inhibiting action of the carbohydrates is probably due to the change of pH and of total acidity as well as to production of acids and other fermenting materials.

**Krempf A.** - La conservation et l'utilisation des produits de la pêche sous les tropiques. – Inst. Océanogr. Indochine (Commun. 5e Congrès Pacifique Vancouver 1933) 29, 31-37. Saïgon (1936). **b - 2173**

La conservation par la glace ou la frigorification et celle par la salaison présente des difficultés insurmontables; résultats encourageants obtenus par le poisson soumis à l'action de la chaleur et de l'agitation mécanique; richesse alimentaire de ce produit.

**Lambert L.** - Le contrôle sanitaire coquillier. – 7 fig., Mém. Off. Pêches Marit., 12, Man. Pêches Marit. franç., 4, 148-170. Paris (1936). **b - 2174**

Les décrets du Décembre 1915, du Mars 1919 et Juillet 1923 sur le contrôle sanitaire obligatoire. Enquêtes et analyses par les Laboratoires du Contrôle Sanitaire; le contrôle des Moules et des coquillages; l'organisation actuelle du Service du Côntrole Sanitaire.

**Laurinat K.** - Erfahrungen mit der Prüfung und Stempelung der Salzheringe. – Dtsch. Fischwirt., III, 13, 196-199. Berlin (1936). **b - 2175**

Prüfung bezüglich gewisse Gütebedingungen, Verpackungs- und Kennzeichnungsvorschriften sowie Mindestgüte um eine Qualitätssicherung und Hebung des deutschen Erzeugnisses zu befördern. Folgen dieser Prüfung. Statistische Angaben geprüfter Heringe.

**Lücke F. & Geidel W.** - Bestimmung des flüchtigen basischen Stickstoffs in Fischen als Massstab für ihren Frischezustand. – 9 Abb., zahlr. Tab., Ztschr. Unters. Lebensmittel, LXX, 6, 441-458. Berlin (1935). **b - 2176**

Vorteil dieser Methode im Vergleich mit anderen hier beschriebenen Methoden. Anfangsgehalt und Verteilung des flüchtigen basischen Stickstoffes für jeden einzelnen Fisch. Festlegung eines Grenzwertes für die Haltbarkeit.

The U. S. Bureau of Fisheries having received numerous requests from various public and private agencies and individuals for information on home-canning methods, has initiated an investigation on home canning with the aim to develop new processes and methods, and to endeavor to correct improper and dangerous processes and practices. The results of this investigation are reported in the present paper.

**Kawaguchi T., Simizu Z., Tani S. & Yui T.** - Difference of Chemical Composition in Various Parts of Canned Crab (*Paralithodes camtschatica*) (In Jap.; Engl. Rés.). – 2 tabl., Bull. Jap. Soc. Scient. Fish., IV, 6, 415-417. Tokyo (1936). b - 2236

Influence of the pH-value, amount of volatile basic nitrogen, copper, iron, and total sulfur on the degree of various examined parts of three canned crab-meat.

**Weedon H. W. & Notevarp O.** - Konservering av torskefileter med vinsyre. (In Norw., Engl., Rés.). – Stat. Fiskerifors. stasj. virks. 1934, Årsber. v. Norg. Fisk. 1934, 3, 12-14. Bergen (1936). b - 2237

Experiments of conservation of codfillets with tartaric acid compared with treatment with chlorine. The tests show the necessity of trying out new methods.

**Imperial Fisheries Experimental Station (Japan)** - Experimental Preparation of Fish for Canning of small Mackerels in Oil. (In Jap.). – Fish. Invest., Suppl. Rep. 3, Paper No 34, 45. Tokyo (1936). b - 2238

**Sender** - Dogfish – and how to skin them. – Fish Trad. Gaz., LIII, 2749, 37. London (1936). b - 2239

Prescriptions for the preparation of Dogfish into « Flake ».

**An.** - The Handling of Shucked Scallops. – Canad. Fisherm., XXII, 9, 18. Gardenvale, Que. (1935). b - 2240

Some considerations as to the failure of the industry of the shucked scallops to obtain the possible maximum returns.

**An.** - Canada produces many Kinds of canned Fish. (Engl. & French). – 2 figs., Canad. Fisherm., XXIII, 9, 48-50. Gardenvale, Que. (1936). b - 2241

Alphabetical list of about 18 species.

**An.** - Yellowfin canned Tuna a distinctly American Delicacy. – 1 fig., Pacif. Fisherm., Yearbook 1935, 127. Seattle, Wash. (1935). b - 2242

Increasing popularity. Species used for canning. Preparation.

**An.** - Canned Mackerel the Newcomer in the Million-Case Class. – 1 fig., Pacif. Fisherm., Yearbook 1935, 145. Seattle, Wash. (1935). b - 2243

Begin of the commercial production. General notes on mackerel. Catching methods. Outstanding characteristics of canned mackerel.

## *Officinae fructibus piscatoriis conficiendis et conservandis – Thecae – Industria.*

**Brinkmann E.** - Die Mechanisierung in der deutschen Fischindustrie. – 3 Abb., Dtsch. Fisch. - Rundschau, 11, 240-243. Bremerhaven (1936). b - 2244

Stellungsnahme zu verschiedenen Patenten in bezug auf die Mechanisierung in der deutschen Fischindustrie, mit besonderer Berücksichtigung der Konserven-Fabrikation.

**Elden A.** - Black's Harbour Sardine Plant is Self- Contained Industry. – 3 figs., Canad. Fisherm., XXIII, 10, 12-15. Gardenvale, Que. (1936). b - 2245

History and description of the plant, production, shipping.

**Ellender H. C.** - Shrimp Canneries in full Swing in Louisiana giving Employment to Hundreds of Persons. – 1 fig., Fish & Oyst. Rep., XVII, 10, 4-5, 12-13. Tampa, Fla. (1936). b - 2246

Description of Terrebonne's four shrimp canneries.

**Gire G.** - Essais de porosité des fers-blancs. – 7 fig., Rev. Trav., Off. Pêches Marit., VIII, 4, 423-429. Paris (1935). b - 2247

L'A. cherche à préciser une méthode simple et rapide, susceptible de fixer la physionomie de la porosité totale du fer blanc. Essais de porosité pratiqués actuellement: Essai au ferricyanure de potassium. Essai à l'eau chaude. Essai de porosité par sulphuration électrolyse: Dégraissage et préparation des échantillons. Sulfuration.

**Gire G.** - De l'établissement pour les fers-blancs, d'un coefficient de résistence à la corrosion. – 11 fig., 2 tabl., Rev. Trav. Off. Pêches Marit., IX, 4, 36, 421-436. Paris (1936). b - 2248

Constitutions des fers-blancs. Résistance chimique et mécanique des constituants du fer-blanc. Etablissement et interprétation des courbes d'attaque par l'acide acétique. Epreuve de porosité par sulfuration électrolytique.

**Hess E.** - Lobster Canneries Must be Kept Clean. – Canad. Fisherm., XXII, 7, 8. Gardenvale, Que. (1935). b - 2249

Sanitary prescriptions, best way of disinfecting the interior of the cannery.

**Hesse K.** - Bombagen bei Vollkonserven. – Dtsch. Fisch. - Rundschau, 2, 30-32. Bremerhaven (1936). b - 2250

Vf. weist auf die Ursachen vorkommender Bombagen bei Vollkonserven hin und bespricht die Massnahmen, welche es ermöglichen dieselben bei der Fabrikation fast glatt auszuschalten.

**Miyosi F. & Hirose I.** - Relations among the Inspected Items for Cans. (In Jap., Engl. Rés.). – 6 diagr., Bull. Jap. Soc. Scient. Fish., V, 4, 247-248. Tokyo (1936). b - 2251

Statistic records for pink-salmon cans concerning colour, texture and odour.

**Okada M., Yamaguti F. & Sinoda M.** - Tones Emitted by Cans at the Inspection by Tapping. Preliminary Report I. Relation of Pitch of the Tones to the Weight of Salmon Cans. (In Jap.; Engl. Summ.). – 2 figs., 5 tabl., Bull. Jap. Soc. Scient. Fish., V, 1, 47-50. Tokyo (1936). b - 2252

By means of resonators of Helmholtz's type tones emitted by ½ Lb salmon cans when struck on the upper end were analysed with respect to their pitch. It is shown that the heavier the can is packed, the lower is the pitch of each partial tone. A correlation coefficient between the pitch and the weight of the cans has been provisionally determined.

**Okada M., Yamaguti K. & Sinoda M.** - Tones Emitted by Cans at the Inspection by Tapping. Prel. Rep. II. Weight of Contents and the Tones of Salmon Cans. (In Jap., Engl. Rés.). – 3 figs., 1 table, Bull. Jap. Soc. Scient. Fish., V, 4, 242-244. Tokyo (1936). **b - 2253**

That the pitch of partial tones emitted from ½ Lb. salmon cans has a negative correlation to the weight of net content of cans is ascertained. The correlation is, however, not very high owing to the variation of the weight of emptied cans which is itself negatively correlated with the pitch of tones. The partial correlation coefficients are significant. (A. A.).

**Tjötta L. L.** - Winke für die Einrichtung eines Vollkonservenbetriebes. – Dtsch. Fischwirt., II, 21, 446-447. Berlin (1935). **b - 2254**

Ratschläge für eine zweckmässige Einrichtung eines Vollkonservenbetriebes, welcher eine vollständig einwandfreie Ware auf den Markt liefern kann.

**Tomimasu K.** - Measuring of the Vacuity of Full Cans by the Elastic Deflexion of their Upper and Lower End Plates. II. Finding Out of the Most Adequate and Accurate Scale of the Vacuity for the « Dial Vacuum Tester ». (In Jap., Engl. Summ.). – 4 pls., 10 figs., Bull. Jap. Soc. Scient. Fish., V, 1, 56-71. Tokyo (1936). **b - 2255**

Results of measurements of the relation between the vacuity and the depth of the top or bottom end plates of full cans. Description and interpretation of the v-β diagrams elaborated.

**Tomimasu K.** - Measuring of the Vacuity of Full Cans by the Elastic Deflexion of their Upper and Lower End Plates. III. Pneumatic Vacuum Tester. (In Jap., Engl. Rés.). – 6 figs., 2 tabl., Bull. Jap. Soc. Scient. Fish., V, 4, 255-261. Tokyo (1936). **b - 2256**

Description of a new vacuum testing apparatus utilizing the pneumatic micrometer. Results obtained by measuring the vacuity of pink-salmon 1 Lb. cans circulated in market.

**Williams R. H.** - Early New Brunswick Lobster Canners, Bay of Fundy District. – Canad. Fisherm., XXIII,7, 11. Gardenvale, Que. (1936). **b - 2257**

Story of the first established canneries in New Brunswick, of which the very first has been founded in 1839.

**An.** - Aluminium ein neues Dosenmaterial der Fischkonservenindustrie. Eine norwegische Herstellerfirma gibt Erfahrungen bekannt. – Dtsch. Fischwirt., III, 51, 854-855. Berlin (1936). **b - 2258**

An Hand des wertvollen Untersuchungsmaterials und der Prüfungsergebnisse der « Aktieselskapet Norsk Aluminium Company » wird hier über die vorteilhafte Verwendung von Aluminium berichtet.

**An.** - World Pack of Canned Salmon Largest in the History. – Fish. Gaz., Ann. Rev. Numb., 89. New York (1935). **b - 2259**

Statistical data of the world pack of canned salmon in 1934, which seems to be the largest in the history of the industry.

**An.** - New Unloading and Storage Plant for General Seafoods. – 1 fig., Fish. Gaz., LIII, 8, 13 & 30. New York (1936). **b - 2260**

Information on a wharf holding building under construction in connection with the General Seafoods Building at Boston's Fish Pier.

# OCEANOGRAPHIA BIOLOGICA ET PISCATUS

**Abyssales** pisces. b - 1066, 1072, 1073, 1074, 1168, 1181
**Acanthocephala** regionis *Burma*. b - 688
**Acanthurus** chirurgus. Pinnae caudales. b - 126
**Accretio** abdominis in Brachyuris. b - 972
— comparata formarum eiusdem speciei. b - 513
— in Tunicatis. b - 1053, 1057
— larvalis. a b - 354 ad b - 401, 410, 422
— Piscium. b - 500, 1190, 1200, 1211, 1222, 1064
— quoad lucem. b - 475, 514
— quoad temperaturam. b - 500, 507, 514, 516
— scopulorum coralliferorum. b - 810, 812
**Accretionis** velocitas Echinorum quoad latitudinem. b - 375
**Acentrogobius** neilli. Accretio. b - 1064
**Acerina** cernua. Parasiti. b - 672
**Achiridae.** De organo nasali nadirali. b - 138
**Acipenseridae.** b - 1102, 1150
—. Migrationes. b - 613
—. Piscatio. b - 1936
**Acoela** in Groenlandia. b - 826
*Açores* Insulae. Inquisitiones de fauna. b - 13.
**Acrania.** b - 1293, 1485
**Acropoma** japonicum. b - 298
**Acrothamnion** pulchellum. b - 1348
**Actinarctus** doryphorus. b - 953
**Actiniae.** Irritabilitas salis marini causa. b - 405
**Actiniaria.** b - 794
**Actio** substantiarum chemicarum in organismis marinis. a b - 402 ad b - 434
**Adamsia** palliata. Toxicitas. b - 407
**Aega** stroemi. Apparatus digestionis. b - 211
**Aegyptus.** Fauna fossilis. b - 1432
—. Relatio de piscatione. b - 2104
**Aequilibrium** in Piscibus. b - 150
— in Vertebratis. b - 154
**Aeronautica** pro vectura fructuum piscationis. b - 2030
**Aestimatio** alimentaris farinae ichthycae. b - 2115
— — fructus piscationis. b - 457, 1530. a b - 1938 ad b - 1957, 2010, 2115
**Aestuaria.** Investigationes. b - 467, 481, 501
**Aetas** in *stock* Clupeidarum. b - 1825, 1827
— — — Gadidarum. b - 1817, 1818
— — — Salmonidarum. b - 1852, 1856
**Aetatis** animalium marinorum determinatio. a b - 273 ad b - 288
— Piscium determinatio. b - 2, 1171, 1176, 1200
**Africa.** Crepidulae. b - 896
—. Pisces marini. b - 1107, 1108, 1111
—. Polyclada litorea. b - 853
**Aglantha** Krampi. b - 799
*Agulhas Bank.* Piscatio. b - 1663
**Akysis.** b - 1139
*Alaska.* De piscatione. b - 2038
**Alcyonaria.** b - 783, 790
**Alderia** modesta in Sinu *Puck*. b - 910
**Alectis** ciliaris. b - 376
**Alexandria.** Fauna. b - 770, 777, 951, 959, 1035, 1050, 1293
**Algae** marinae. b - 74, 82, 404, 470, 535, 570, a b - 1299 ad b - 1348
— —. Adaptatio temperaturae ambientali. b - 499, 503
— —. Compositio chemica. b - 432, 451, 452, 464, 465
— —. De metabolismo. b - 418
— —. De parasitis. b - 642
— —. Distributio in litora. b - 527
— —. Fermentatio. b - 462
— —. Fossiles relicti. b - 1368, 1373, 1416, 1430
— —. Industria. b - 1927, 1928
**Alimentaris** apparatus. a b - 189 ad b - 218, 494
— valor fructus piscationis. b - 457, 1530, a b - 1938 ad b - 1957, 2010, 2115
**Alimentatio** animalium marinorum. a b - 189 ad b - 218
— Piscium. b - 1, 8, 9, 54, 424, 426, 463, 466
**Allocreadida** in Piscibus marinis. b - 686
**Alopidae** in insula *Formosa*. b - 1175
**Alosa.** Parasiti. b - 695
— sapidissima. Captura. b - 1821
— —. Depopulatio. b - 1840
**Alpheidae.** b - 262, 1005
**Alteratio** piscium. a b - 2161 ad b - 1193
*Altona.* Mercatus fructuum piscationis. b - 1990, 1992
**Aluminium** pro thecis in industria conservationis fructuum piscationis. b - 2258
**Amblygaster** melanosticta. b - 1626
**Ameira** arenicola. Distributio. b - 553
**Ameiurus.** De melanophoris. b - 243
—. Innervatio. b - 135
**Americae** Provinciae Foederatae. V. U. S. A.
**Amiidae.** Taxonomia. b - 1166
**Ammodytes.** b - 1103, 1137
— cicerellus. Piscatio. b - 1929
**Ammonoidea.** b - 1413
**Amoebocyta** Spongiarum. b - 76
*Amoy* Baja. Fauna. b - 760, 765, 860
**Amphibia.** Respiratio. b - 186
**Amphilocus** neapolitanus in Lytechinus. b - 630
**Amphinomidae.** Larvae. b - 377
**Amphioxus.** b - 559, 637
**Amphipoda.** b - 967, 969, 985, 986, 1027, 1029
— in Mari Karensi. b - 539
**Amstelodamensis** Portus. Fauna. b - 590

— Teleosteorum. b - 127, 128, 129
**Musculorum** apparatus. a b - 92 ad b - 133
**Musea.** b - 14, 26, 39, 52
—. *Indian Museum.* Pisces. b - 1142
—. *U. S. National Museum, Washington.* b - 39
—. Zoologicum Museum Universitatis *Stanford.* Pisces. b - 1132, 1133
**Mustelus** canis. b - 253, 254, 1232
— —. Pinnae quoad natationem. b - 106
— laevis. De placenta. b - 222
— —. Proteinae. b - 439, 440
**Muta.** a b - 263 ad b - 272
**Mutsu** Baja. Fauna. b - 902, 1062
**Mya** arenaria. b - 284, 456, 661
**Mya-Nereis.** Biocoenosis. b - 565
**Myoxocephalus** octodecimspinosus. Excretio. b - 225, 226
**Myriactis.** b - 1331
**Mysidacea.** De glandula antennaria. b - 242
—. De organo laterali. b - 167
—. Distributio. b - 966, 995, 996
**Mysis** oculata. b - 588
**Mytilicultura.** b - 1909, 1910
**Mytilodonta** gen. nov. b - 908
**Mytilus.** b - 77, 563, 588, 800, 1348, 1910
—. Oecologia. b - 485, 532, 545
— californianus. Apparatus digestionis. b - 189, 190, 194, 196, 913
— edulis. Biochemia. b - 417, 436
— —. De commensalismo. b - 628
— —. Musculi. b - 112
**Myxine** glutinosa. b - 438, 1127
**Myxosporida** in Piscibus. b - 677, 691
**Myxus.** Descriptio. b - 1132

**Nassa** reticulata. b - 900
**Nautiloidea.** Systematica. b - 1397, 1453, 1454
**Nautilus.** De concha margaritifera. b - 897
**Naves.** V. Expeditio navis
— idoneae ad plancton colligendum. b - 698
— praesidiariae. a b - 1614 ad b - 1617, b - 2061
**Navicula** fusiformis. b - 1329, 1330
— ostrearia. Pigmentatio. b - 402, 1301
**Neapolitanus** Sinus. Fauna. b - 586, 665, 774, 853, 1059
**Necrologiae.** b - 1531, 1538
**Nemacystus** divaricatus. Biologia. b - 1313
**Nematocysta.** b - 819
**Nematodes.** b - 555, 579, 824, 830, 857, 858
**Nemertini.** b - 823, 834, 862
**Nemichthys** avocetta. b - 297
**Neogenica** Aetas in Japonia. b - 1424
**Neomerinthe** Hemingwayi. Descriptio. b - 1109
**Neothunnus.** b - 192, 1075
**Nephrococcidioides.** b - 658
**Nephthys** hombergi. Accretio. b - 864
— —. Histologia. b - 75
— trituberculatus. Accretio. b - 1036
**Nereidae.** b - 159, 836, 843, 850, 860
—. Species novae. b - 839
**Nereocystis.** De substantiis gasosis. b - 188
**Nerita** japonica. Habitat. b - 946
**Neritina.** Conchae. b - 264
**Nervorum** apparatus. a b - 134 ad b - 174
**Nessorhamphidae.** b - 1072
**Neurocranius** osseus in Teleosteis. b - 1476
*Newfoundland.* Piscatio. b - 1501, 1506, 1580, 1769
**Nichelii** localisatio in Molluscis. b - 456
*Ningpo.* Piscatio. b - 2095
*Nith* flumen. Salmones. b - 1160
**Nitocra.** Distributio. b - 553
**Nitzschia.** Pigmentatio. b - 402
**Nomenclatura** zoologica. b - 1292, 1296
**Nomeus** gronovii. De epithelio intestinali. b - 80
*Nordmark* Regio. Pisces. b - 1102
*North Uist.* Fauna aquae salmacidae. b - 566
— *Western* Area. Gadidae. b - 1816
**Norvegia.** Fauna. b - 876, 877, 971, 1101
—. Industria fructuum piscationis. b - 1838, 2089, 2090, 2091
—. Ostreicultura. b - 1912
—. Planctonicae investigationes. b - 17
—. Studia pro biologia marina. b - 2, 19, 40
**Nosema** ovoideum. b - 677
**Notodelphyoida.** b - 1022
**Notostraca.** Corporis orientatio. b - 1012
**Nova** Guinea. Fossilia. b - 1442
— Scotia. Pisces rari. b - 1228, 1229
— Zelandia. Algae. b - 1311
— —. Fauna. b - 890, 937, 1194
— Zemlia. Fauna. b - 1623
— —. Fossilia. b - 1376, 1419, 1421, 1422, 1437, 1445
— —. Piscatio. b - 1080, 2101
*Novorossiysk* Baja. Fauna. b - 381, 717, 719, 1003
— —. Statio pro biologia marina. b - 32
*Nozima* Promunturium. Pisces. b - 1226, 1227
**Nudibranchiata.** b - 573, 902
—. Dendronotacea. b - 931
**Nummulites.** b - 1390, 1407, 1416

*Oahu* Regio. Copepoda. b - 974
*Obj* Baja. Acipenser güldenstädti. b - 1150
— —. Captura speciei Delphinapterus leucas. b - 1875, 1872
— —. Piscatio. b - 2100
**Observatorium** pro biologia marina Messanae. Studia. b - 1168

**Squamae** Piscium. b - 94, a b - 273 ad b - 288, b - 1099, 1100
— —. Determinatio aetatis. b - 1171, 1176, 1177
— —. Methodus ad registrandas pulsationes. b - 69
— —. Methodus reproductionis. b - 64
**Squatina** squatina. De systemate vasculari. b - 178
**Squilla** mantis. Compositio chemica. b - 436
— —. De corde. b - 134
— —. Respiratio. b - 185
*St. Andrews.* Biocoenoses litoraneae. b - 565
**St. Francisci** Baja. Fauna. b - 661, 767
*Stannius* corpuscula. b - 224
**Statio.** *Arnoldi in Novorossiysk.* Relatio. b - 32
—. *Biological Station at Cape Cod.* b - 18
—. — — *of Trondheim.* Expeditiones peractae. b - 11
—. *Economic-biological Section of the Arctic Institute.* b - 43
—. *Meeresstation und Aquarium in Varna.* Relatio. b - 29
—. *Pacific Biological Station Nanaimo.* Relatio. b - 9
**Statio.** Statio biologica in *Helgoland.* b - 2070
—. Statio pro biologia marina Messanae. Fauna. b - 1288
—. Statio pro biologicis inquisitionibus Rhodiis. Constitutio. b - 56
—. Stationes ad biologiam marinam investigandam. b - 14, 42
—. — — — —. Relationes annuae. b - 7, 9, 25, 29, 32, 36
—. — ad piscationem investigandam. Relationes annuae. a b - 1493 ad b - 1521
—. Stationes maritimae b - 14, 42, 49
**Statisticae** ad fundos piscosos pertinentes. a b - 1775 ad b - 1795
— piscatoriae quoad piscationem Germanicam. b - 2077, 2080, 2081, 2082
**Staurocoryne** filiformis. b - 801
*Stearine* in Olea Gadidarum. b - 2144
**Stegosoma.** Distributio. b - 1056, 1063
**Stelgistrum.** Species novae. b - 1067
**Stephanoscyphus** in aquis Japonicis. b - 548
*Stettiner* Sinum. Leuciscus rutilus. b - 1179
**Stichaeus** regionum nordicarum. b - 1219
**Stlengis.** Reinspectio generis. b - 1078
**Stomatolepas** elegans. b - 625
**Stomatopoda.** Distributio. b - 1014 1035
**Stomias** barbatus. b - 564
**Strombus** bubonius. b - 1354
**Strongylocentrotus** purpuratus. Ovorum accretio. b - 351
**Styela** atlantica. Distributio. b - 1058
— partita. Parasiti. b - 658
**Suberites** domuncula. Alimentatio. b - 506
**Subproducti** fructuum piscationis. b - 1802, a b - 2115 ad b - 2160
**Substantiae** circulatio in mari. Decompositio per bacteriis marinis. b - 736, 738
— Piscibus obnoria. a b - 1673 ad b - 1676
— primae necessitatis in Germania. b - 1972
**Substantiarum** chemicarum effectus in organismis marinis. a b - 402 ad b - 434, 1639
**Suetia.** b - 1, 2, 37
—. Fauna. b - 540, 768, 990
—. Piscatio. b - 1820
—. Planctonicae investigationes. b - 17
*Susaki.* Algae marinae. b - 1333
**Sycon** raphanus. b - 76
— —. Parasiti. b - 656
*Sydney.* Crustacea. b - 1033
**Symbiosis.** a b - 623 ad b - 639
**Synaphobranchus** innatus. Distributio. b - 524
**Syngnathidae.** b - 1113; 1138
—. De epithelio tubuli renalis. b - 223
**Systema** circulationis, nervorum, ecc. V. Apparatus circulationis, nervorum, ecc.

*Table Reef.* b - 808
**Tabulae** ad fundos piscosos pertinentes. a b - 1775 ad b - 1795
*Taiwan.* Corallia. b - 816
**Talitrus** saltator. Biologia. b - 969
**Tanaidacea.** b - 967
**Tanytarsus** boodleae. b - 954
**Tapes** decussatus. Cultura. b - 1901
— —. Musculi. b - 112
— —. Parasiti. b - 674, 822
**Tardigrada** maris Nordici. b - 953
*Tarva* Regio. Fauna. b - 640, 824
**Technica** refrigerationis fructuum piscationis. a b - 2209 ad b - 2230
**Tegumentalis** apparatus Isopodorum. b - 118
**Teleostea.** V. Pisces
**Tellina** tenuis. Accretio. b - 517
**Tellinae** in Sinu Arupinensi. b - 637
**Tellinidae.** Species novae. b - 945
**Temnodon** saltator. Parasiti. b - 695
— — = Pomatomus saltatrix. b - 1157
**Temperatura** Cetaceorum. b - 294, 295
**Temperaturae** effectus in accretionem ovorum marinorum. b - 351
— — — biologiam organismorum marinorum. b - 430, a b - 467 ad b - 517
— — — piscationem. b - 1631
— — pro alimentatione Anguillarum. b - 205
— — — — Ostrearum. b - 199
**Teratalogia.** b - 643, 644, 647, 660, 667, 673, 681, 684
**Terebratalia** coreanica in *Hokkaidô.* b - 1423
**Teredinidae** Maris Mediterranei. b - 930
**Teredo navalis.** Maturitas sexualis. b - 305, 308
— —. Permutatio sexualis. b - 320
**Terrae** motus. Effectus in Pisces. b - 297
**Terranova.** Piscatio. b - 1759, 2062
**Testaceae** cellulae. b - 72, 81
**Tethys** punctata. De glandula purpurae. b - 240
**Tetrarhynchoidea** ex *Puget Sound.* b - 838
**Tetrodon** lagocephalus. b - 529, 805
**Thalassinidea** litoris Suetiae. b - 999
**Thalassoma** umbrostigma. De cibo. b - 201
**Thaumantias** maeotica. b - 793
**Thecacineta** donsi, parasitus. b - 640
**Thecae** pro piscationis fructibus servandis. a b - 2244 ad b - 2260-
**Theragra** chalcogramma. Aetatis determinatio. b - 287
**Thoracophelia.** De pigmentis. b - 248
**Thoracostomopis** barbatum. b - 824
**Thymallus** thymallus. Accretio. b - 1211
**Thynnidae.** b - 2109
—. Conservatio. b - 2180, 2226, 2231
—. Olea. b - 2140, 2148
—. Piscatio. b - 1841, 1842, 1843, 1846, 1847, 2063
**Thynnus** thynnus. Biologia. b - 1094, 1167
— —. Compositio oleorum. b - 437
— —. Leges pro piscatione. b - 1587
— —. Temperaturae aquarum effectus pro piscatione. b - 1632
**Tigriopus** fulvus. Oecologia. b - 979
**Tintinnoinea.** b - 731, 745, 760, 761
*Tomboli.* Microbiologia. b - 734
**Tomognathus** mordax. b - 1472
**Tomopteris** Nisseni. b - 653
**Topsentella** fallax. b - 656
**Torpedo.** b - 435, 436
- ocellata. Embryones. b - 383
*Tortugas* Insulae. Ciliata parasitica in Echinoideis. b - 676
— —. Corallia. b - 818
**Trachinus** draco. Larvae. b - 359
**Trachurus** trachurus. Parasiti. b - 668
**Trachypterus** taenia. De otolithis. b - 148
**Trematodes.** b - 666, 669, 672, 681, 686, 692
**Tretomphalus** bulloides. Reproductio. b - 756
**Triacanthidae.** Species novae. b - 1181
**Triassica** Aetas. b - 1459, 1466
— —. Pelecypoda. b - 1394
— —. Pisces. b - 1358, 1433
**Trichechus.** Industria. b - 1869, 2038
— rosmarus. Cerebrum. b - 142
— —. Distributio. b - 1242
**Trichiuridae.** b - 1158
—. Sinensia. b - 1159
**Tridacnidae** cum Zooxanthellis. b - 639

**Trigla.** Organa sensuum. b - 160
— corax. Larvae. b - 359
— hirundo. Parasiti. b - 695
**Trilobita.** Cambriana. b - 1396, 1405, 1408, 1438, 1439, 1470
—. Cephalicae suturae. b - 1490
**Triphora.** Species novae. b - 904
**Tripolitania.** Fossilia. b - 1361, 1406, 1449, 1452
**Tripterygion** varium. Accretio. b - 1190
**Triticella.** b - 1283
**Trochus.** De concha margaritifera. b - 897
— niloticus. Accretio. b - 940, 941
**Trutta** genivittata. b - 1098.
— marina. b - 1134, 1171, 1176, 1177, 1178
**Trygon** violacea. Reproductio. b - 339
**Tryptophanum** pro alimentatione Piscium. b - 466
*Tscheskaia* Baja. Osmerus. b - 1154
*Tsien Tang Kiang*. Piscatio. b - 2096
*Tuamotu*. De Ostrea margaritifera. b - 916
**Tubifex.** Parasiti. b - 655
**Tubulanus** borealis. Anatomia. b - 835
**Tunetana** algologia. b - 1308
**Tunicata.** b - 270, 535, a b - 1052 ad b - 1063
**Turbellaria.** b - 555
—. Distributio. b - 828, 844
—. Zooxanthellae. b - 433
**Turbo.** De concha margaritifera. b - 897
**Turmae** Piscium. b - 274, 280, 281, a b - 1759 ad b - 1774, b - 1815, 1816, 1817, 1818
**Turritella** communis. De glandulis genitalibus. b - 229
**Tursiops** truncatus. De hypophysi. b - 170
**Tutela** juvenum piscium. a b - 1651 ad b - 1672
— pro piscatoribus. a b - 1572 ad b - 1586
*Tyôsen*. Sardinia melanosticta. b - 443
**Tyrosina** pro alimentatione piscium. b - 466

**Uca** pugilator. Intersexualitas. b - 311
**Ulca** marmorata. b - 1173
*Union* Insulae. Pisces. b - 1074
**Upogebia** in litoribus suetiis. b - 990
**Uranoscopus.** b - 1074
**Ureae** excretio. b - 225
**Urechis** caupo. b - 351
**Urinae** compositio in Phocis. b - 460
**Urochordata.** De caudae torsione. b - 1488
**Urogenitalis** apparatus. a b - 219 ad b - 233
**Ursorum** Insula. Piscatio a Germanis peracta. b - 2072
*U. R. S. S.* b - 1499
—. Foraminifera. b - 764
—. Industria fructuum piscationis. a b - 2097 ad b - 2102
—. Piscationis oeconomia. b - 1524
—. Pisces. b - 1563
*U. S. A.* Industria fructuum piscationis. a b - 2038 ad b - 2045
—. Mollusca marina. b - 576

**Valonia.** De hydrogeno sulphurato. b - 419
**Valor** Alimentaris. V. Aestimatio alimentaris
*Vancouver* Insulae. Hydroidea. b - 784
*Varna*. Statio pro biologia marina. b - 29
**Vasa** sanguinea in Ostreis. b - 176, 177
— — in Piscibus. b - 175, 178
**Vasconicus** Sinus. Fauna. b - 907, 1117
**Vectigalium** regimen fructuum piscationis. a b - 2015 ad b - 2037
**Vectura** fructuum piscationis. a b - 2015 ad b - 2037
**Velates** perversus in Eocenica aetate. b - 1469
**Venditio** fructuum piscationis. a b - 1958 ad b - 2014
**Venericardia** in Tripolitania. b - 1361
**Venus.** Mutationes sexuales. b - 308
— mercenaria. Phases sexuales. b - 326
**Vermes.** b - 470, a b - 823 ad b - 865
—. Biochemia. b - 406
—. Compositio chemica. b - 453
—. De sanguine. b - 416
—. Regeneratio. b - 270
**Verrucomorpha.** b - 1023
**Vertebrae.** b - 495
—. Enumeratio in Clupeidis. b - 1796, 1825, 1827
—. — in Gadidis. b - 1818
**Vertebrae.** Enumeratio in Mullidis. b - 1099, 1100
**Vesica** natatoria piscium. b - 100
**Vestigia** animalia in argilla. b - 292, 299
*Vestmanna* Insula. Gadus morrhua. b - 209
*Victoria* Insula. Echinodermata. b - 878
*Villefranche-sur-Mer*. Fauna. b - 556, 1063
—. Phaeosporeae. b - 1331
**Vimba** vimba. Migrationes. b - 612
**Visus** in Piscibus. b - 156
**Vitaminae** in oleis animalium marinorum. b - 1939, a b - 2139 ad b - 2160
— Piscium. b - 458, 1946, 1949

**Waagenophyllum,** genus Permianicum. b - 1387
*Wattenmeer*. Contributiones oecologicae. b - 585
*Wesermünde*. De piscatione. b - 1498, 1516, 1519, 1526, 2005
*Winnipeg*. Industria. b - 2054
*Woods Hole*. Boleti marini. b - 1334
— —. Protozoa. b - 550

**Xanthias** lenolensis. b - 1436
**Xanthodius** exaratus. b - 645
**Xiphias** gladius. Piscatio. b - 1848

**Yoldia.** b - 583

**Zanclea** implexa. b - 804
*Zarotschenzeff* methodus refrigerationis. b - 2216
**Zeus** faber. Larvae. b - 359
**Zirphaea** crispata. Distributio. b - 520
**Zoantharia.** b - 779
—. Symbiosis cum Spongiis. b - 623
**Zoarcidae.** Species novae. b - 1214
**Zooplancton.** V. Plancton
**Zooxanthellae** cum Tridacnidis. b - 639
— — Turbellariis. b - 433
**Zostera.** b - 501
—. Industria. b - 1928
— marina. b - 1327
— —. Morbi. b - 679, 680, 687
— nana. b - 1328
*Zuiderzee*. Fauna. b - 492, 579
